New Rose American Pillar

NO Climbing Rose is attracting the attention that "American Pillar" does, and most deservedly so. It is by far the best single-flowered climbing rose for outside purposes; and on account of the great durability of its flowers, it is the best single-flowered forcing rose.

Gentlemen: July 12, 1909.

Let me tell you, too, that the American Pillar is a better Rose than you know, perhaps. The plant I had from you, which was planted this Spring under unfavorable conditions, is now giving us a succession of most exquisite bloom.

Yours truly,
J. HORACE McFARLAND,
Pres. of American Civic Association, Harrisburg, Penna.

COMMENT FROM THE LONDON GARDEN

"A most notable feature in this glorious display (Temple Flower Show in London) was the New 'American Pillar' Rose. The large and attractive rich rose pink blooms are produced in immense clusters, the white centers of the blooms adding to their attractiveness. —Florists' Exchange.

2 1/2-inch pot plants, \$1.50 per dozen, \$8.00 per 100, \$75.00 per 1000.

4-inch pot plants, \$3.50 per dozen, \$25.00 per 100.

AMERICAN ASSOCIATION OF NURSERYMEN

F. H. Stannard, Ottawa, Kan., President; N. P. Stark, Lubleiana, Mo., Vice-president; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., treasurer.

American Association of Nurserymen

The 35th annual convention of this body is scheduled to be held at Denver, Col., June 8, 9 and 10. Headquarters, The Brown Palace Hotel.

The secretary of the Association is John Hall, 201 Granite Bldg., Rochester, N. Y. That gentleman has been unable to obtain special rates from the railroads, but is informed that delegates will be enabled to avail themselves of the Summer Tourist Rates which go into effect June 1, with return limit to Oct. 31. Delegates can obtain these rates from their nearest large city on application. The Rochester nurserymen are chartering a special car from Rochester; we presume Easterners can join that party.

The hotel rates are as follows: European plan, rooms without bath: One person, \$2; two persons in one room, \$3.

Rooms with bath: One person, \$2.50 or \$3; two persons, \$4 or \$5. Application for rooms should be made now.

Exhibitors should address at once, E. P. Bernardia, Parsons, Kans., chairman of committee on exhibits.

We are advised by J. W. Hill, chairman of committee on program, that the following gentlemen will appear on the program of the Denver Convention: E. S. Osborne, Rochester, N. Y.; Jas. M. Irvine, St. Joseph, Mo.; Professor C. P. Gillette, Fort Collins, Colo.; Professor W. L. Howard, Columbia, Mo.; Vice-Pres. E. A. Smith, Lake City, Minn.; W. N. Scarff, New Carlisle, O.; A. Willis, Ottawa, Kan.; Professor John Craig, Ithaca, N. Y.; A. B. Morey, Dansville, N. Y.; C. S. Harrison, York, Neb.; E. W. Kirkpatrick, McKinney, Texas; W. H. Stark, Louisiana, Mo.; H. W. Marshall, Arlington, Neb.; George H. Whiting, Yankton, So. Dak.; J. R. Mayhew, Waxahachie, Texas; Professor E. P. Taylor, Columbia, Mo.; Peter Youngers, Geneva, Neb.; E. M. Sherman, Charles City, Iowa.

WELLSBORO, PA.—The Asaph State Nursery is, it is understood, to be increased to 20 acres.

KENNEWICK, WASH.—The Vanholderbeck Nursery Co. has purchased 80 acres in Kennewick Highlands and will plant them with nursery stock this year.

KINCAID, KANS.—C. P. Tompkins of Kansas City has purchased the Kincaid Nursery, and is preparing to locate here within a few weeks.

Beauty of Viburnum tomentosum The Snowball type of Viburnums make such a great display when in flower that the other species with small, perfect blossoms appear insignificant alongside of them. They make up for this, however, in their display of ripe berries in Autumn. But in the Japanese type there is one, not a Snowball kind, which merits the prominent position it occupies as a flowering shrub—this is *Viburnum tomentosum*. In company with all Viburnums its flowers are white. They are large, so are the whole hunches, so that when in flower, in May or June, it is decidedly attractive.

The habit of growth of this shrub is peculiar. It has not the upright character of many Viburnums, instead the branches are but little above the horizontal, so that the shrub has an almost flat appearance at the top. It has leaves opposite on the stems, and the flower heads come in pairs, one in the axil of each leaf, being the same order of arrangement as in the well-known Japanese Snowball. It is not only a beautiful flowering shrub but unlike any other one in both flowers and habit of growth, so that, as it is not yet common in collections, it always excites curiosity when one first observes it.

The Star Magnolia The Easter plants of *Magnolia stellata* which find their way to purchasers' hands are usually planted to become permanent lawn specimens. As their flowering is over for this season the next blooms will not be expected until another year has passed, but careful planting and good soil if given them will do much towards producing growth to bear next year's crop. Hardly too much can be said for this beautiful Magnolia. It is not only the first to display its flowers in Spring, but these flowers are treasures. Pink in the bud they are white when fully open, are sweet scented and semi-double. Then again, it is always floriferous, even from its youngest years. A little one year layer, well rooted, will flower, and ever after

as it grows it will never fail to bear a crop of flowers. Unlike many, or most other kinds, its growth is bushy from the start. A little one, 2 or 3 ft. high, will always be as wide as high, and usually bears 25 to 50 flowers. It is the earliest of all Magnolias to open its flowers. This season, March being very warm, many plants were in bloom the latter part of that month. Sometimes late frosts catch it because of its earliness, but being of dwarf, bushy nature it is not difficult to place a mat or burlap over it should occasion call for it. Every garden should contain this leading Magnolia.

Embellishing Old Trees

Besides the great use of vines in other ways, their presence clothing the trunks and tops of old trees is nearly always pleasing. Not quite could it be said *always* pleasing, for sometimes one sees a beautiful tree becoming destroyed by the foliage of a vine overshadowing it. This is something that must not be permitted, because foliage that is hidden from sun and air by that of other trees, or of vines, is sure to die, if too densely hidden. But a tree clothed with vine, covering such portions of it as represent the trunk and limbs or dead parts, is rejuvenated, as it were, becoming again a thing of beauty and, sometimes, even prettier than it was before.

The mistake is made, occasionally, of planting vines close to large trees. There is little good food there, and often the soil is dry and hard. A better way is to get vines with long shoots, say 2 or 3 ft. long, then plant

place on the lawn in Summer and in the conservatory in Winter. When so grown its flowers come soon after housing it in October, its golden yellow fruit ripening in early Spring.

What this evergreen wants, when wintered outside, is to be where shelter of some kind is available. This shelter can come from large trees, slopes of hills, buildings, etc. There is no use in setting a plant not over hardy in a position by itself. A native evergreen will often die when so planted. It needs groups of trees together, one to help the other, or in some other way a shield from the ills which Winter brings to all but the hardiest of trees.

Sour Orange Stocks

Sour Orange stocks which nurserymen sometime have calls for are the product of seedling Oranges, wild Oranges as many call them. After the great freeze in Florida some years ago, which killed the Oranges to their bases, the most of them sprouted again from the ground below the budded part, and the owners, despondent over the results, never budded them afresh, and these now give what are called sour Oranges. The seeds of these are used for raising stocks on which to bud valuable kinds, most all kinds doing well on it, excepting the favorite sort, Satsuma, which has a decided preference for the *Citrus trifoliata* stock. The latter stock, trifoliata, answers well for nearly all kinds of Oranges, dwarfing them a little; and being harder than any other is

Clerodendron trichotomum

them nearly the length of the shoots from the trunk, carrying them underground to the tree. The roots have a better chance when 3 ft. or so away, and in time the parts of the shoots buried will make roots, all a help toward sustaining the vines.

It does not always need to be a self-climbing vine, such as the Virginia Creeper, for trees; almost any vine will find its way if given a little help at the start. For instance, a Wistaria, a Clematis, a Grape, a Passion Vine, or a Gelsemium, will mount little by little and will find its way to the topmost branches in time, some by twisting of their stems, others, like the Clematis, by kinking their leaf stalks. Those who overlook planting such vines in early Spring can use pot plants in Summer, and with full success.

Eriobotrya Japonica

The success which a few persons have had in wintering outdoors such evergreens as *Cerasus Caroliniana*, *Photinia serrulata*, *Ligustrum lucidum* and some other evergreens usually not considered hardy in the vicinity of Philadelphia, has led to the trial with the *Eriobotrya Japonica*, called the Loquat Tree and the Japan Plum, and it has been successful in the hands of one party, at least. This evergreen is a native of China and Japan, and is much planted in the southern States as well as in California. It is valued in many ways. In the first place the tree itself is ornamental with its large, glossy green, crumpled leaves. Add to this its clusters of yellowish white flowers, followed by its "plums" as its fruit is called. So far, aside from the trials of its hardness mentioned, it is seen here as a decorative tub plant, occupying a

thought to pass this tendency to the less hardy sort budded on it.

The introduction of the hardy sort, *C. trifoliata*, has encouraged hopes that hybridization will give us a seedling from it at some time as hardy as it, and with a fruit that can be eaten, as it is hardy to New York City, and perhaps farther, what a boon a hardy edible Orange of this character would be!

Double-Flowered Horse-chestnut

The double-flowered Horse-chestnut in collections is a variety of the European one, *Aesculus hippocastanum*, and is known as the double white. In some lists one is found called double red, but there is no double red in cultivation that any one can place. Unless a sport in color as well as in being double flowered, a double red should belong to the *Aesculus rubicunda*, which would indeed be a valuable variety. As it is now, with its single flowers, it is a great beauty, and when in the cooler and moister climate of England it is more beautiful than it is here.

These double-flowered trees are in some respects better than the single ones, the flowers are more enduring.

The red-flowered Horse-chestnut does not make as large a tree as the common one, *Hippocastanum*, and its leaves are of a dark, lustrous green. Its origin is somewhat obscure; some think it is of hybrid origin, and that its lustrous foliage shows some connection with the *Pavia rubra*.

All varieties of Horse-chestnuts may be increased by budding them on the common stock, doing it in Summer, before the sap has ceased running strongly.

Bloomsburg, Pa.

Lexington, Ky.

Easter this year was the best ever and most of the florists were cleaned out of everything. Lilies were, of course, the best sellers and some stores could have sold more, both cut and pot plants. Azaleas, Hydrangeas, Spiræas, Rhododendrons, Genistas and Roses in pots, such as Baby Ramblers, Dorothy Perkins and Crimson Ramblers were good sellers. Pots and pans of bulbous stock such as Tulips, Daffodils, Hyacinths and Paperwhite Narcissus were also good sellers and great quantities were sold at good prices. Some good Lilacs were also seen in the downtown stores on Main st.

There was an excellent demand for cut flowers and the Roses here were never so good before. Carnations, Violets, Sweet Peas, Tulips, Daffodils, Paperwhite Narcissus, Snapdragons and cut Lilies were disposed of in great quantities at good prices. The prices realized were as follows: Roses, from \$2 per doz. up; Carnations, \$1 and \$1.50 per doz.; Violets \$2 and \$2.50 per 100; Bulb stock sold well at from 50c. to \$1 per doz.; cut Lilies sold for \$3 per doz.

The weather was ideal, warm and Summer-like. The delivery boys had everything delivered in ample time.

J. A. Keller reports cleaning up everything and says he could have sold more Lilies. He had an exceptionally fine lot of plants and cut flowers. His

heaviest cut was Carnations. Several thousand Violets were also cut at the greenhouses and sold for \$2 and \$2.50 per 100.

Honaker, the Florist, on Main st., had an excellent lot of plants and cut flowers and it is reported that he did an excellent business in both.

The Michler Bros. Co., on East Maxwell st., did a good plant business. They had quite a nice lot of stock this year.

Anderson & White, the lady florists on Georgetown st., had their share of the business and they say they are well pleased.

S. S. Kelley, in Clifton Heights, did a good business and is now very busy with Spring stock, of which he makes a specialty. Mr. Kelley also grows Carnations and has been cutting some first-class flowers all the season. There have been a great many deaths here this Winter and funeral work has been plentiful with all the florists.

Oliver Hancock, formerly of Columbus, O., is now with Honaker at the greenhouses on North Jackson st.

Louis D. Singer, formerly plantsman with J. A. Keller, this city, but now in business for himself at Thora Hill, near Frankfort, Ky., was a recent visitor here and says he is doing much better than he expected at the start. Mr. Singer is a hustler and will no doubt succeed in his new field. He reports several funeral orders of late.

Otto Heberling of the Georgetown Floral Co., Georgetown, Ky., was also a recent visitor here. Mr. Heberling says he has been cutting this Winter the best Roses and Carnations he has ever grown. Most of his cut goes to Cincinnati and this market.

All the florists are now very busy with Spring stock, and look for a good business.

The weather here is very warm and Summer-like. The past March was the warmest on record here.

LEXINGTONIAN.

Augusta, Ga.

Ideal Spring weather is experienced in Augusta; flowers are plentiful indoors and outdoors, the woods full of Dogwood and Jessamines, and the town full of tourists, all delighted.

The florists all report better trade than ever. Balk's Nursery was kept very busy all Easter week; they were in full crop with Bride, Killarney and Beauty and Richmond Roses. Their Easter flowers were on time and of a superior quality. Spiræas, Azaleas, Hyacinths and Easter Lilies all sold well; 800 Easter Lilies were sold on the Saturday, which is a record-breaker. Prices on Lilies were from 50c. to \$2 per plant.

HENRY W. T. BALK.

Firms Who are Building

FLORENCE, S. C.—DeWitt House is planning to build a new greenhouse to cost about \$4000.

LA FAYETTE, IND.—H. Roth is shortly to increase his greenhouse establishment, practically doubling it.

BALLSTON SPA, N. Y.—Richard Schafer, who has been employed for nearly 15 years at the High st. greenhouses has decided to erect greenhouses for himself on Church ave.

Mme. Gabriel Luizet. Satiny pink.
Mrs. John Laing. Satiny pink.
Paul Neyron. Dark pink.
Perle des Blancches. White.
Persian Yellow. Yellow.
Prince Camille de Rohan. Dark crimson.
Ulrich Brunner. Cherry-red.

For prices see above

Baby Rambler Roses

BABY DOROTHY. The same in habit as Baby Rambler, but the color of the flowers is similar to Dorothy Perkins. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c. for 5, \$16.00 per 100.

CATHERINE SEIMETH. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. 85c. for 5, \$15.00 per 100.

MRS. WM. H. CUTEUSE. Color intense crimson and exceptionally free-flowering. 85c. for 5, \$15.00 per 100.

MME. NOBERT LEVAVASSEUR (Baby Rambler). Strong, field-grown plants. 85c. for 5, \$15.00 per 100.

THE TREE BABY RAMBLER. (Grown as a Standard.) The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40c. each, \$3.75 for 10, \$35.00 per 100.

BABY DOROTHY. (Grown as a Standard.) For description, see above. 75c. each, \$6.25 for 10, \$60.00 per 100.

Something New in Roses for Florists Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60c. each, \$6.00 per doz., \$45.00 per 100.

BABY RAMBLER (Half standard). Crimson. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY CATHERINE SEIMETH (Half standard). White. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY "STARS AND STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50c. each, \$5.00 per doz., \$40.00 per 100.

Ramblers and Other Climbing Roses

PAUL'S CARMINE PILLAR. Flowers large and free; color rosy carmine. Two-year-old, field grown. 85c. for 5, \$15.00 per 100.

CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 4 feet, \$1.25 for 10, \$12.00 per 100; 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 5 to 6 feet, extra heavy, \$2.25 for 10, \$20.00 per 100.

DOROTHY PERKINS. Lovely shell-pink color. \$1.25 for 10, \$12.00 per 100.

TAUSENDSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

Flower of Fairfield The Everblooming Crimson Rambler

This variety is a sport from the beautiful Crimson Rambler, is similar in color, more brilliant and lasting than the old favorite. It also possesses the further advantage over the Crimson Rambler in the fact that it flowers profusely on the young wood the first year. Flower of Fairfield is a vigorous grower and free bloomer. It starts to bloom early in the Spring and continues until late in the Autumn. It is rightly termed "perpetual blooming." 40c. each, \$3.50 for 10, \$30.00 per 100.

Veilchenblau (Violet-Blue)

It has long been the desire of rosarians to secure a blue Rose. In Veilchenblau we have practically approached this color. The steel-blue flowers of this new Rose appear in large clusters, are semi-double, of medium size and keep in bloom a long time. The showy yellow stamens contrasting with the blue flower, give the whole a striking appearance. 60c. each, \$5.75 for 10, \$55.00 per 100.

Indianapolis

The owners' section in the automobile flower parade in this city last week embraced some thirty finely decorated cars. The outcome was a pronounced success as the streets were thronged and the local press enthusiastic over the event. A large touring car of artificial Chrysanthemums carried off the honors in the dealer's section, while a gunboat decorated with natural Am. Beauty Roses received first premium in the unique section. Some eight or ten cars of natural flowers were contestants in the owners' division. A beautiful auto of Harrisii Lilies, decorated by the Bertermann Bros. Co., received first premium and a second equally beautiful one of Carnations and American Beauty Roses, decorated by A. Wiegand & Sons, received second premium.

It is the wish of the committee in charge to have another such event next year in which separate classes for the natural and artificial flowers are to be provided. Both classes labored under handicaps in the present event as the artificial floats and cars could be arranged at leisure and the natural only at the last moment, and again the artificial flowers stood but a small show in contrast with the real article with artistic effects upon the same basis.

W. W. Coles of Kokomo was prominent in the Scottish Rite events in this city last week; he was also an enthusiastic witness of the auto parade.

J. J. Karios of Philadelphia visited the trade and reported a good business.

John Heidebreich has a nice new auto. Mr. Wm. Humfeld of the Muncie Floral Co., visited Indianapolis on a shopping expedition; he is opening a new store in his city and is on the lookout for all that is necessary in connection therewith.

Mr. Hughes of Zanesville, O., called on the shopmen while en route to the West. Adam Heim of Coopersville was showing his Carnation supports to the growers last week.

John Evans walked off with several orders for ventilating machines in his pocket and says business in his line is excellent.

Mr. Chase of the Chase Nursery Co., Huntsville, Ala., is developing new territory in Indiana for his firm.

I. B.

St. Louis

Since Easter the trade among the florists has not been any too brisk, though there should be a number of busy days for them this month as several big weddings have been announced in society.

Miss Edith Ostertag was married last week to John W. Doedic. Miss Ostertag is the daughter of Henry C. Ostertag of the firm of Ostertag Bros., and is well known in the trade, having been with her father in the store for some time.

The florists of the East Side, Miss M. Schuell and Aug. Nuriog, say they did a fine business for Easter and that plants sold especially well in all varieties.

Geo. Walbart, Mrs. M. M. Ayers and other florists along Grand ave., have restocked their show houses since Easter and things are beginning to look natural again.

A. Brix reports that he is glad he had his greenhouses back in time for Easter as they brought him in quite a lot of fine blooming plants and cut flowers to his St. Louis ave. store.

C. Young & Sons Co. at 1406 Olive st. are showing a fine lot of blooming bulbous plants in their big show windows. Their seed, plant and cut flower departments have been busy since the Easter rush. Their shipping trade has been very large of late.

There will be quite a number of important meetings interesting to florists next week. The St. Louis Florists' Club will hold its regular monthly meeting Thursday afternoon, April 14, at 2 o'clock. A general review of the Easter business will be an interesting function. The Executive Board of the St. Louis Hort. Society will meet and talk over the possibility of holding a Fall Flower Show again in the big Coliseum building.

The Lady Florists' Home Circle will meet on Monday afternoon, April 11, at the same place the last one was held. The secretary announces that Miss B. Meinhardt will have something interesting for the members.

The Retail Florists' Association will also hold its meeting next week at the Washington Hotel; the usual notices will be sent out by Secretary F. C. Weber, Jr. There is some important business to be worked over at the meeting.

ST. PATRICK.

Louisville, Ky.

The Easter trade of Louisville florists was much better than usual, according to all reports, and though there has, of course, been something of a lull following the holiday, business is nevertheless opening up for the regular Spring season pretty well. During the Easter rush the demand for handsome blooming plants was in evidence, especially choice ones, including Rhododendrons, Lilacs,

Azaleas, Genistas, and pots and pans of Tulips and Lily of the Valley. There was a noticeable scarcity of Lilies in pots, but plenty of good cut blooms. Callas also were fine. Flowers are taking the place of other gifts at Easter, and Louisville florists are consequently having plenty to do at that season. The churches were all handsomely decorated, and the fine weather which prevailed through March made the big demand easy to handle. One of the disadvantages of the weather, however, was that Violets did not ship well, several of the florists reporting that large shipments from Virginia had spoiled en route.

The demand for nursery stock is growing steadily, and one or two Eastern nurseries are coming into this market, the number of handsome, new residences in the suburbs having a large part in stimulating the demand. Cherokee Park, the finest in this section, is now surrounded by scores of handsome homes, all notable by reason of their gardens, lawns and conservatories.

Flowers have been used in considerable quantities of late in connection with openings of the retail stores. Hush Bros. consumed recently a large number of Roses, one being given to each visitor. Mrs. Charles W. Reimers supplied the Carnations for the Walkover Shoe Store, which had its opening recently, quantities being used.

Miss Eliza Kinkead, daughter of the late Judge Blackburn Kinkead, has been appointed a member of the board of park commissioners of Lexington, Ky. She is the first woman who has ever been given such an appointment in Kentucky. The regular meeting of the local Florists' Association was held April 5. The meetings are growing in interest as the members of the trade recognize the possibilities of the organization. Fred Schulz is secretary.

Cecil Fraser of Louisville, well known all over the country as a landscape gardener, died at Frankfort, March 30, following a stroke of paralysis which he sustained in the office of the Governor. The burial was in Louisville. Mr. Fraser had had charge of the work of beautifying the grounds of the new State Capitol, and was in Frankfort in connection with that business when the stroke came. He was for years connected with the Louisville Park system, and did much to make it one of the best in the country, though the general design for the work was done by Olmstead Bros. Mr. Fraser was well known to the Louisville trade.

Gov. Willson has proclaimed April 8 Arbor Day. He made a special address to the school children of the State, urging everybody to plant trees on that day. He said: "Let us all get together and all plant trees, and all ask everybody else to plant trees, and let us have a special meeting on the eighth day of April, 1910, in every schoolhouse and other good places for meetings, to talk over how to make every place more beautiful, how to plant the waste places with trees. Much interest in the observance of the day has been aroused. Sugar Maple are planted principally."

The Woman's Outdoor Art League of Louisville, is planning for another vigorous campaign this Spring and Summer. The League is headed by leading women of the city, and is taking a large part in urging the planting of flowers and shrubs on vacant lots and the care of back yards as well as front ones. Local florists unite in commending the work of the League.

Cave Hill Cemetery, noted all over the country as one of the most beautiful cemeteries ever constructed, is now in its glory. Thousands of Tulips, which are planted generously through the cemetery, are now in bloom, and throngs of people have visited it in order to see the display of flowers.

The Crescent Hill Improvement Association has accomplished a big work in connection with the beautification of a strip of land lying along the Louisville & Nashville Railroad. Hardy shrubbery, part of which was donated by a florist living in Crescent Hill, was planted, and the results of this work are expected to be seen in a short time. The Association intends to push its work during the coming season. Work of this sort is tending to stimulate the demand for shrubbery to a considerable extent.

Miss Amelia Yunker, a teacher in the Normal School, gave a talk on gardens and gardening at the Parkland branch library recently. Miss Yunker explained the best methods of planting, and interested many in the subject.

The State Legislature, which recently adjourned, appropriated \$50,000 for the purpose of completing the work on the

April 9, 1910

grounds of the State Capitol. This includes grading and planting, and a large sum will be spent in beautifying the site of the new building.

Nanz & Neuner report that the demand for shrubbery and trees is at least 50 per cent. better than usual, and their nursery at St. Matthews is being kept busy supplying the call.

The Kentucky Nursery Co. is securing a large number of orders for trees and plants to be used in connection with handsome homes in and near Louisville. The company is drawing the plans for the lawn of the new home of Samuel J. Shackelford, one of the most prominent politicians in the State, who lives at Frankfort. Shrubs and flowers of various kinds will be used.

E. H. Reimers, who has gone into the automobile business extensively, has made a success of it, and in addition is maintaining the fine florist trade which he has developed. He is now building a garage to accommodate his cars. He has several important agencies. Owing to his location on Baxter ave., opposite Cave Hill Cemetery, his florist business is large. G. D. C.

Detroit

A continuous heavy call for funeral work has stamped this last week one of the best of the season. Things came especially favorable to the retailers because of an enormous supply in all lines. Bulbous stock is getting a little scarce and Daffodils will be a thing of the past in a few days.

The local Gardening Club, a branch of the Twentieth Century Ladies' Club, is doing very good work by distributing \$1500 worth of seeds among the children of the public schools at cost price.

This year these ladies expect to go a little further in their endeavor to get the children interested in garden work. Geo. Rackham has offered his services free and will deliver short lectures in the various schools. Frank Danzer, on the other hand, will gratuitously superintend the establishing of model gardens, where children may receive practical demonstrations in the growing of vegetables and flowers. FRANK DANZER.

Worcester, Mass.

Business has assumed its regular status after the Easter rush. The stores have been rearranged, but the various green-houses have the appearance of being swept by a cyclone. Never in the history of Worcester florists has there been such a cleaning out. Already plans are being laid for Memorial Day.

James Blauvelt, for a time with Warendorff of New York, and later with H. F. A. Lange, is now with H. F. Littlefield. We have been told Mr. Blauvelt has a talent for window decoration.

Sunday, April 3, will go down to posterity as one of Worcester's greatest days. The convention of railroad men from all over the United States, Mexico and Canada, was honored by the visit of President Wm. H. Taft. The city was in gala dress everywhere. There was very little opportunity for the florists to increase their sales, but everyone of their stores near the line of March, was decorated with the national colors.

The peculiar weather of March has produced much sickness and this, in turn, has brought about a large amount of funeral work.

After Easter weddings also added their quota to business. CAROLUS.

BENEFACT. "James," protested the father, "what do you mean by boring holes into that big tree?"

"Father, I'm a benefactor," said the boy, giving his anger a few more vicious turns. "I'm making knotholes in baseball fences for poor boys."—Exchange.

Readers will confer a favor upon us if more than passing value if, when ordering stock of our advertisers, they will mention seeing the advt. in the Exchange.

FOUNDED IN 1888

A Weekly Medium of Interchange for Florists, Nurserymen, Seedmen and the Trade in General.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter.

Published every Saturday by the A. T. De La Mare Ptg. and Pub. Co., Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. De La Mare, president and managing editor; Jas. H. Griffith, secretary; David Touzeau, treasurer. The address of the officers is the address of this paper. Show address: P. O. Box 1697, New York. Telephone 3765-6 Beakman

PRINCIPAL OFFICES

Chicago: Margaret T. Flint, room 614, No. 60 Wabash Avenue; tel. Randolph 2000. Office hours: 9:30 to 12.

Boston: Robert Cameron, Cambridge, Mass.

Philadelphia: Appointments can be made on letters addressed to Jos. H. Sperry, our representative, care of Keystone Hotel, Market st., near 16th, for Mondays and Tuesdays.

Yearly Subscriptions.—United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.50. Payable in advance. Remit by Draft on New York, Post Office or Express Money Orders; if paid in cash please register letter.

The address label indicates the date when subscription expires and is our only receipt therefor.

Registered Cable Address: Florax, New York.

Telegrams.—Telegrams received in this office up to 3 p.m. Wednesday, containing changes in advertising, will receive attention for the issue of the Saturday following; likewise, telegrams having informative matter intended for our news columns will be received up to Thursday 9 a.m. News telegrams should be forwarded after 5 p.m. Wednesday and marked "Night Press Message, Collect." These will be forwarded by the Telegraph companies at their newspaper rate, providing the material so forwarded contains news for the paper.

Worcester Co. Horticultural Society

This Association, with headquarters at Worcester, Mass., a thriving city of 150,000 population, with many smaller towns and villages within a radius of 50 miles, is quite active, and for the year 1910 will hold exhibitions almost every week, of seasonable flowers, fruits and vegetables, for which prizes are offered, the final exhibition of the year being that held Nov. 10 at which Chrysanthemums are the feature. Schedules are obtainable on request to Adin A. Hixon, secretary, 18 Front st.

Presentation to Alexander Montgomery, Jr.

Alex. Montgomery, Jr. left the Waban Rose Conservatories on March 31 to take charge of the Montgomery Rose Co. establishment at South Hadley, Mass. The employees of the Waban Rose Conservatories took this as an opportune time to show the respect and esteem in which they held their assistant superintendent, and presented him with a roll-top desk and chair, also with a set of office chairs. The employees assembled at the office, Mr. Montgomery was sent for and Mr. Donahoe, the salesman of the establishment, made the presentation. He said he voiced the sentiments of all the employees that they were all very sorry, indeed, to part with their efficient and beloved assistant superintendent. Every person in the establishment felt that they were losing their best friend, but what was their loss no doubt would be Mr. Montgomery's gain. They were also pleased that such a fine opportunity had presented itself to so promising a young man, and believed, in time, the establishment of which he was to take charge would become one of the best in New England.

Alex. Montgomery, Jr., is a son of Mr. Montgomery, manager of the Waban Rose Conservatories, Natick, Mass., who is one of the greatest rosarians in this country. He was the pioneer in growing high-grade Roses and to him, above all others, should be given credit for the great work he has done for commercial Rose growing.

Alex. Montgomery, Jr., has had unique training for his profession. He graduated from the High School in Natick and, after a short apprenticeship with his father, entered Amherst Agricultural College, where he studied the theory and practice of horticulture in all its branches and graduated with honors at the head of his class. On leaving college he was given the position he occupied at the Waban Rose Conservatories, under his father, where he has been for the past fifteen years, and has been honored and respected by all the employees and others who came in contact with him. Besides his regular work he has done much in hybridization and selection of Roses and we shall hear of some of his production later. He is the author of a capital book on Rose Culture, and contributed some excellent articles on the growing of Roses to the horticultural and trade journals.

He has the respect and best wishes of everyone in the trade and we all wish him the greatest success at South Hadley.

R. C.

Chrysanthemum Society of America

Special Prizes

The following special prizes have been offered for competition at the annual show of the Society to be held at Morristown, N. J., in conjunction with the annual show of the Morris County (N. J.) Gardeners and Florists' Society, Nov. 2-4, 1910:

Chrysanthemum Soc. of America: Silver cup for the best 10 blooms of any Chrysanthemum, one variety.

W. Wells & Co.: Gold, silver and silver gilt medals (3 prizes) for the best 6 blooms of Chrysanthemum Howard Gould.

W. Wells & Co.: Gold, silver and silver gilt medals (3 prizes) for the best 3 vases of Single Chrysanthemums in 3 varieties, 6 sprays of each variety.

Lord & Burnham Co.: Gold medal for the best 30 blooms Chrysanthemums in 6 varieties, introductions 1909 and 1910; open to private gardeners only.

Hitchings & Co.: Silver cup, value \$25, for the best 6 vases, 6 varieties, 5 blooms in each vase; open to all.

Vaughan's Seed Store: Silver cup for the best specimen Chrysanthemum plant, any variety; open to private gardeners only. Prize offered by Vaughan's Seed Store Chicago and New York.

Peter Henderson & Co.: First \$10, second \$5 for the best 6 vases of Ostrich Plume Chrysanthemums, 6 varieties, 3 blooms to a vase.

Chas. H. Totty: Silver cup, value \$50, for the best 12 blooms Chrysanthemum R. F. Felton.

Elmer D. Smith & Co.: \$25 for the best 6 blooms of Chrysanthemum Rande.

Wm. Duckham: First \$10, second \$5, for the best 6 blooms Chrysanthemum Onunda.

Anton C. Zvolanek: \$10 for the best 3 varieties, 3 blooms to a stem, any Chrysanthemum.

The secretary will be pleased to add to this list any other specials from firms or individuals willing to contribute a prize.

President Elmer D. Smith has appointed E. G. Hill, Richmond, Ind., chairman of the executive committee of the Chrysanthemum Society of America.

C. W. JOHNSON, Sec'y.

to the roots, while others look upon it merely as a harmless saprophyte. However this may be, it seems to me that the La France disease is a disease of the root. But we are not yet in the position to assert this definitely.

"It is highly desirable that some experienced rosarian should publish his observations on the occurrence, nature, and course of the disease; and specialists in plant pathology should also take up the subject. But, unfortunately, it is just the Rose grower and florist by profession who will not apply to a scientifically trained man, when they are confronted with a plant disease, for they, of course, carry only prime stock, which is always in the best of health!"

White Fringed Cyclamen

Editor The Florists' Exchange:

On page 472 of the EXCHANGE you reproduce a white fringed Cyclamen with note thereon on page 452. These remarks may cause the impression that this new Cyclamen is something very extraordinary. I am forwarding you a plant which you will recognize as the representative of your reproduction, except that the flowers of the plant sent are perhaps larger. I have had plants with much larger flowers, the one sent you being merely a cull as nothing else is left.

Now, I wish to say that while the flower, when looking into it, is undoubtedly very beautiful, if not one of the finest white flowers in existence so far as my knowledge goes, it is certainly a great disadvantage to have same hanging like a snowdrop from its stem. This, in my estimation, will prevent it from becoming popular. Two years ago I purchased 4000 seeds from the originator of this Cyclamen, "Snow Queen," at \$15 per 1000, and the plants raised from same were all sold for a higher price than others, to various parties, and I do not believe that one of the purchasers was pleased with them when they bloomed, on account of their drooping habit. I retained 100 plants for stock and just three plants of this lot showed a type like the photograph I send you; these I will use for stock. The rest of the plants, while they were sold all right, had to be worked off so as not to offend customers, a few in each lot. A plant of this selected type is simply beautiful; the flower is of the purest white, while the habit of the plant is very stocky, foliage elegantly marked, crimped and reflexed, and I hope for a good true strain the next season. The photo I am sending you (and which please return) is almost life size.

Toledo, Ohio, March 14, 1910.

J. L. SCHILLER.

[The plant sent by Mr. Schiller was submitted to a grower who expressed as his opinion that it was identical with the one we figured on page 472. The photograph of a single bloom Mr. Schiller sent us, and which is here reproduced, shows a marked improvement in the more upright bearing of the bloom, and we quite agree with the writer that on account of its wonderful color, — an unsurpassed pure white — its fringed form and the markings of its foliage, this variety will be found of great value if it can be made to produce its flowers looking at you instead of, as now, drooping to such an extent as to hide their beauty. — Ed.]

Alexander Montgomery, Jr.

The La France (Rose) Disease

In a somewhat lengthy article on the most important diseases of the Rose, printed in "Gartenflora," the writer has the following paragraphs on the La France disease: "So far as I know, the so-called La France disease, to which the La France (and others reported) Rose is subject, has not yet been adequately studied by any properly qualified investigator; the manuals dealing with plant pathology do not mention it at all, neither its causes nor manifestations. And the writer also is at present not in a position to give any detailed information in regard to it.

"Gardeners have noted it as early as the last decade of the last century, for instance in the vicinity of Berlin. Afflicted with this disease the plant grows limp, fades and loses its leaves within a few days; and each day new plants are affected. Some florists have considered it as an instance of "senility" of the variety, or as the consequence of too much cutting or of other errors of culture. A few years ago, I found at the roots of some Roses that had died of the disease a peculiar fungus, *Roesleria pallida* (Pers.) Sacc. (= *Roesleria hypogæa*, *Coniocybe nivea*, belonging to the *Ascomycetæ*) with small ball-shaped fruit capsules with stems, and I surmised that this fungus had something to do with the disease. This interesting fungus is found on the dead roots of various woody plants (e. g., the Pear and vine); some fungus specialists consider it to be a fungus injurious

BY EBER HOLMES

Care During Hot Spring Weather

The Rose grower with large airy houses has the advantage over the one with small, old structures during the hot Spring months, as much as at any other period of the year. To keep up the quality of the blooms ventilation must be attended to, water and plant food freely given, and just enough fire heat kept in the houses every night to keep up the required temperature, which may safely be lowered two degrees from the Winter temperature now the nights are shorter and the plants growing so rapidly with the long hours of sunshine. The slight drop in the night temperature helps to keep the size and substance of the flowers up to the mark. The quantity will be there from now on. It will generally be necessary to carry a little air all night now, the quantity to be increased early in the morning. In the last two nights we had frost, but before eight o'clock in the morning the houses required as much ventilation as would ordinarily be carried at noontime at this time of the year.

This reminds me that to get the best results the grower must get a good early start at this time of the year. I am not going to advocate having men work longer hours than are right and proper, but I do believe in having some arrangement whereby the work is divided, so that if some men commence earlier than others they may have corresponding advantages in the shape of time off, or extra pay.

The Importance of Early Morning Work

I do know, from experience, that a man can do more and better work if he starts in while the houses are cool, especially when cutting the flowers, than he can after the sun is well up; and there is no doubt that the quality of the cut flowers is better. It also follows that the plants get better attention in the after work, such as further ventilation, watering and syringing.

A strong point in favor of early ventilation is that if one starts in early and gets on the maximum amount as quickly as possible without overdoing it the houses will be comparatively cool all day; but if he waits until the houses are hot he will have to keep them so all day long, or crowd a lot of air on all at once, which is a bad thing to do. It often happens, too, that the first two or three hours after sunrise are calm and good for ventilation, but after that there is often a high wind which makes it impossible to increase the air, although it may sometimes be reduced to advantage.

Crops for Memorial Day

April 9, when these notes are in readers' hands, will not be too late to pinch back any plants which are to produce a crop for Memorial Day. No time should be lost, however, as there is none to spare. Almost any variety may be so treated. Kaiserin and the Killarneys do extra well this way. With some people, this is the only way they can produce Killarney with long stems; but it must be remembered that extra long stems are not required for the trade on Memorial Day—the call is mostly for medium and shorter grades.

We have just cut our first crop of Kaiserin, and expect a second one the last of May.

Flowers of Kaiserin are not appreciated now as they will be in Midsummer, when white Roses are scarce, but they helped out the sale at Easter time. This Rose seems to do better when it is planted in a house where it can remain undisturbed for years rather than where it is used as a "fill in" between other crops. It will do well for 15 years in the same place, and probably longer.

We shall pinch back the few Bridesmaid we have and flower them for Memorial Day. It is next to impossible to sell these flowers now, but we found last year a good demand for them at that time. We have only about 1500 plants left of this variety, and these go out early in June to make room for newer varieties.

Preparation of Soil for Benching

Planting will soon be in full swing, and the weather is perfect for preparing the soil. A great deal of labor can be saved by using one or two horses and a disc harrow to cut up the sod and mix it with the manure. This method is quicker, too, where a lot of material is required, and allows the sun and air to sweeten the loam.

On a great number of places this plan may not be feasible, and the old method of stacking up the sod with about one-fourth cow manure, and then slicing it down and chopping it up as it is turned over, has to be resorted to. A common garden hoe makes a good tool to use in chopping up the sod in this case. It should be well broken up and thoroughly mixed. Turn it over two or three times, if possible, and do this on fine sunny days, do not handle it when wet. Avoid sod from land where sorrel is growing. If impossible to get other than this use a little lime mixed well through the pile when preparing it—a peck is enough for loam sufficient to cover 500 sq. ft. of bench surface 6 in. deep.

Care of Young Stock for Planting

The young stock should not be neglected during these busy days. On the welfare of this the future success depends. Stake the plants up, if grafted, and avoid having the growths broken off when handling, or by the hard syringings. Cut away the raffia if it is likely to injure the bark. Move the plants around on the benches, as occasion requires, never allowing them to suffer for want of room; and never let them suffer for want of water. It used to be a common practice on places where a variety of plants were grown to take the men out of the Rose houses to help several hours daily with other work. I do not know if this was ever done without detriment to the Roses, but I do know of cases where much loss was caused by this procedure.

Flowering Roses Outdoors

For flowering outdoors this Summer some of the plants from benches will be very good and give excellent results. Killarney is very fine outdoors, and produces flowers of fine color and substance. Wellesley is, perhaps, the best of any Rose in its class for Summer flowering outdoors. The claim has been made for it that it is the best of any class for this purpose. The ground outdoors should be well prepared and the plants should receive a covering of manure when the hot weather comes. This may be covered with a sprinkling of loam, if unsightly, and the plants should be liberally watered through the Summer months, if quantities of good flowers are required.

Schismatoglottis Roebelenii

Schismatoglossis Roebelenii

In the search for desirable house plants Schismatoglossis Roebelenii seems to have been entirely overlooked. It is one of the finest variegated foliage plants in the Arum family, and both in beauty and ease of culture is scarcely inferior to the popular Dieffenbachias, which it resembles very closely. It has generally been considered suitable only for the decoration of warm conservatories, but the subject of our illustration successfully passed through last Winter, which was very trying, in a New York apartment where the heat ran to 75° at times in the daytime, and as low as 42° on many nights. When first

installed in its quarters, which are, practically, sunless, it dropped a few leaves, but soon fell in with conditions and began to push out new leaves. Ficus plants and Ferns in the same situation and conditions dropped all their foliage. Florists certainly would do well to look into the merits of this worthy plant.

Proposed G. A. R. Boycott of Florists

According to a despatch from Pittsburgh to a New York daily, early preparations are being made by G. A. R. posts in Pennsylvania for the annual Memorial Day exercises, and in connection with the same Adj. Sidney Brauff of Post 88 has been requested to have the floral committee consider a plan for placing artificial flowers on the graves this year instead of natural plants and cut flowers. The despatch further states: "It has been a custom for several years for school children to donate plants. Exorbitant prices have been charged by the florists, however, and the suggestion of using artificial flowers is meeting with great approval. Local G. A. R. people say they have figures showing that prices on flowers have been raised unduly about Memorial Day for six years."

Readers are requested to write us on any subject bearing on trade conditions. If the subject interests them it will, in all probability, interest many others.

Mrs. Sarah Escott Smith

Mrs. Sarah Escott Smith, aged 76 years, mother of Henry Smith, florist, Grand Rapids, Mich., died Saturday morning, April 2, at the Smith Fruit Farm on West Bridge st. Her health had been failing for several years.

Mrs. Smith was born in New Rochelle, New York, in 1833, and went to Grand Rapids with her parents in 1839. In 1856 she married Geo. Smith and they lived on the farm at Englishville till 1870. Two years previous to her husband's death they removed to the West Bridge st. location, where she died. The deceased was active in agricultural work and was a leading fruit grower in her section. She is survived by one son, Henry Smith, and a brother, George Escott of Charlotte, N. C. She was much esteemed and the florists of Grand Rapids attended the funeral on Tuesday morning, April 5, in a body.

GEO. F. CRABB.

Alfred A. Williams

One of the pioneer florists and greenhouse vegetable gardeners of the Pocasset section died at his home, on Hartford Pike, Providence, R. I., Friday, April 1. He was formerly a member of the Johnston Town Council, and of the R. I. House of Representatives. For over a twelvemonth Mr. Williams, who was in his 76th year, had been in failing health. Death was due to hardening of the arteries.

He was a son of Larned Williams, a lineal descendant of Roger Williams, and was born in Seekonk, Mass. He was educated in the public schools, completing his education at the Lapham Institute at Scituate, R. I. During his early manhood, Mr. Williams was associated with his father-in-law. Their mill was in Simonsville, and was known as the Bag Mill; it was on the site of the present Victoria Mill.

About 50 years ago, Mr. Williams, took up his residence in the farmhouse where he died. He became prominent in town affairs, and served 14 consecutive terms in the Town Council, before the annexation of a part of the town by Providence. He also served in the lower branch of the General Assembly before the partition of the town.

In his younger days, Mr. Williams was a prominent member of Manufacturers' Lodge of Odd Fellows. He is survived by a widow and five children. The latter are Alfred H. Williams of Scituate, Mrs. Leonard N. Austin of Providence, Mrs. W. G. Thornton of Scituate, Olney H. Williams and Larned Williams of Johnston.

Mr. Williams took a great interest in anything pertaining to horticulture and always held the controlling interests in the greenhouses on his place, run by his son, Alfred H., then by Larned, who was succeeded by Olney H. and his sons, managers for the past eight years. These greenhouses consist of about 200,000 sq. ft. of glass, and Carnations, Violets, Roses, Mums and great quantities of bulbous stock, as well as of Azaleas, Palms, Rubbers, Ferns and an immense lot of bedding and vegetable plants are grown. Olney H. Williams & Sons have a wholesale and retail store on Mathewson st., where they handle this stock.

Mr. Williams' funeral was held Wednesday last, and was largely attended by a number of veteran florists, gardeners and members of the House of Representatives and other public men from Providence and the Olneyville section.

G. A. J.

Gladiolus Bulb Rots. Co-Operative Experiments

During the past season many letters of inquiry have come to this Department asking for information concerning diseases of Gladioli. Many growers are anxious to know how to control, or prevent the "rot" affecting the corms, which is so common and which, in some cases, causes serious loss. During the season of 1908 and 1909, the writer undertook an investigation of these diseases and succeeded, after some difficulty, in locating the organisms responsible for several types of diseases. From quite similar types of rot, three different fungi have been isolated, grown in pure culture, and the diseases reproduced artificially by inoculation. With two of these the inoculation experiments of last season have been repeated within the past month, and the results seem conclusive. The inoculated corms have, in every case, developed the rot in less than two weeks, while the check corms remained perfectly sound. I have now, therefore, no doubt that the fungi which we have located are the cause of the disease. A full description of these diseases and the associated fungi will appear later in a bulletin of the Cornell Experiment Station. A very brief description, with some notes, is given in the Rural New Yorker, March 19, 1910.

Unfortunately, we are as yet unable to give any definite information as to methods of control, and have not the time at our disposal necessary to personally conduct experiments along this line. Knowing this, one or two growers have very generously volunteered to carry out some co-operative experiments. With this suggestion, I have prepared a plan for such field and harvesting experiments as we think most promising, judging by what we have learned of the nature and cause of these diseases. This plan is submitted below for the benefit of growers who might be interested. We shall be glad to have as many as possible test out any or all of the points here mentioned and report results to us. The larger the number of those who can duplicate these experiments, the more reliable will be the conclusions to be drawn therefrom.

Judging from what we now know concerning the fungi causing these diseases, it does not seem probable that any method of spraying can be devised to control them. They are evidently, more or less, soil organisms, and are probably carried over in the soil or in or on diseased seed corms, or possibly even adhering to the surface of healthy corms that have been in contact with diseased ones. As to which of these methods prevails, or when and how infection takes place, we have yet to learn. We, therefore, consider it probable that certain sanitary methods of handling the crop would naturally reduce the rot in many cases. With this in view the following experiments are suggested:

Field Experiments

- Plat I. Perfectly sound seed corms on soil where Gladioli have never been grown.
 Plat II. Perfectly sound seed corms, sterilized by immersing in 5% formalin for 30 minutes, on soil where Gladioli have never been grown.
 Plat III. Diseased seed corms on soil where Gladioli have never been grown.

Fig. 2—Gladiolus Bulb Rot.—Checks Not Inoculated

Plat IV. Healthy seed corms on soil where diseased corms had grown last year.

Plat V. Diseased corms on soil where diseased Gladioli had grown last year.

Plat VI. Healthy seed corms, sterilized, on diseased soil.

Plat VII. Healthy and diseased seed corms on diseased soil, heavily limed, 2 tons per acre.

Plat VIII. Healthy and diseased seed corms on diseased soil fertilized heavily with acid phosphate, 1000 lbs. per acre. In selecting sound seed corms the husks must be removed and each examined very carefully.

In cultivating, the infection may be carried to the new soil plats by tools. If available, use another set for these. If not, cultivate clean plats first each time.

Observe conditions at harvest time and store corms from each plat separately.

Sort in Winter to determine percentage of rot in each.

Harvesting Experiments

I would suggest some experiments in regard to harvesting. It seems that the disease continues to develop quite seriously after harvesting, in storage. Now whether the infection has all taken place in the field or continues to take place in storage we are not able to state positively. If it continues to take place in storage

there is a possibility of the germs of the fungus being spread from the affected bulbs to the healthy ones during the process of harvesting. To illustrate: If the corms are harvested and thrown together in the bins with the old mother corms still adhering, and allowed to stand for a couple of weeks or so before cleaning up and removing the old corms, there would seem to be ample chance for the germs to be spread to all the corms of the bin from the few diseased ones, by means of the particles of soil that are adhering to them. During this time, unless they have been thoroughly dried at harvesting, they are likely to take more or less of a sweat, which results, perhaps, in production of sufficient moisture to favor infection, wherever the fungus is present. Now, of course, you will understand that this is merely a suggestion as to what might happen, and I would not dare to label it as even probable, as yet. But experiments as outlined below should give us some line on this point.

First, select some variety that is susceptible to decay in storage. In harvesting in the Fall allow each corm to lie where it has been pulled until dry. When thoroughly cured, remove the mother corm, husk and treat with 5% formalin for about 10 minutes and then store. Do not pile in heaps or bins before treatment. Another lot from a row close by treat in a similar way, omitting the formalin treatment. In part of these omit the husking, simply allowing individual corms to dry thoroughly before being heaped together, and remove the mother corm, and as much of the adhering soil as possible, before being heaped together in the bins. Another row, close by, gather and dry and store in bins with the mother corms attached, and re-sort two or three weeks later in the usual way.

ERETT WALLACE.
 N. Y. State College of Agriculture, Cornell University, Ithaca, N. Y.

Impatiens Petersiana

This remarkable plant was recently exhibited before the French National Society of Horticulture by Messrs. Vilmorin-Andrieux & Co., who describe it as follows: "Impatiens Petersiana was introduced from tropical Africa but a few years ago. Its characteristics relate it closely to *I. Holstii*, from which it differs chiefly in its leaves, which are more elongated in shape and dark purple in color, with which the bright scarlet flowers are in admirable contrast. It flowers freely and uninterruptedly in outdoor beds in the Summer, while it is a more abundant bloomer in the Winter in the hothouse than *I. Holstii*."

"Of the plants exhibited, some propagated by cuttings constitute the typical form; others, obtained from last Fall's seedlings, do not show any appreciable difference in the shade of the leaves or the color of the flowers. The seedlings, however, indicate that *I. Petersiana* is a species which seems to stand in the same relation to *I. Holstii* as the latter does to *I. Sultani*, that is to say, it is a distinct plant from a specific and especially from a horticultural point of view. The value of these two latter *Impatiens* for Summer decorations is too well known to need comment. This novelty possesses in addition to the attractions common to the class, that fine purple of its leaves which landscape gardeners will not be slow to use for effects of contrast; as a Winter-flowering plant it will be a welcome addition."

The French Society awarded a certificate of merit to this *Impatiens*.—*Revue Horticole*.

Greenhouse Construction and Heating

By JOHN A. PAYNE

Copyright, 1910 by A. T. De La Mare Ptg. & Pub. Co., Ltd.

[Readers desirous of further information on any subject mentioned in this series will have their questions freely answered. Address your envelope Construction Dept., care of this paper.]

Article II

General Arrangement of a Greenhouse Plant

In considering this matter we must still keep before us the advice given in the first article of this series—to plan for the future. If it was only the question of the erection of one house the matter could be easily decided, but as the proposed house will probably be the first unit of a large range it will influence, considerably, the

arrangement of the whole. In considering this question the first thing to be decided after giving due consideration to the matters mentioned in the preceding article should be the location of the workroom or head house, in connection with the whole range.

Fig. 1 shows a workroom constructed at one end of a range of greenhouses. If the range runs north and south this workroom would be at the north end and the houses themselves would be even span. If the houses run east and west the workroom or head house would naturally be at the west end.

Fig. 2 shows the workroom building cutting a range directly in two; where the property admits of a long run of houses this certainly is a very desirable arrangement and cuts down the operating expense quite a little. Of course, this is only advisable where the total length of a range can be 400 ft. or over. If the houses should run north and south, the glass to the north of the workroom building would be considerably shaded and, in such a case, growers would use the shaded end for any plants which they might grow requiring shade, or for propagating purposes. Very frequently these houses are connected to the workroom by a short glass passageway, just wide enough for a three or four foot walk and two benches, as shown in Fig. 3, and this passageway would be used for propagating purposes. The extent

of the shadow caused by the workroom on these northern houses would depend upon the height of the workroom building.

The plan as shown in Fig. 4 has been frequently used, and in some instances is desirable, owing to the location of the property. In this arrangement the workroom space is concentrated, and it makes possible the extension of the range on both sides of the workroom building, still giving the advantage of the cross house or passage allowing access to each end of the long greenhouses.

It will be seen that the houses on one side of the workroom have a wide passage house cutting the houses directly in two. This cross passage house would be provided with benches, which could be used for propagating or other purposes where shadow is not a disadvantage.

The houses on the other side of the workroom building are run continuous, but

FIG. 5

are connected through a small passage connection. This is a good plan where there is no use for the cross house; and in many cases it is much better, especially where the houses run north and south, as the passage house would cast more or less shadow on the north side. In either case the heating mains would be carried in a trench beneath the passageway, and in the case of the continuous houses there would be a passageway allowed, about 5 ft. between the benches.

In all the foregoing we have before us separate houses, either even or three-quarter span, and under the assumption that the range is constructed on a level.

Steep Grade

Should it be necessary to construct the houses on a steep grade the general arrangement would be altered somewhat. It is needless to say that under such conditions the ground should always slope to the south; and as the boiler of the heating plant must be at the lowest point an arrangement similar to Fig. 5 would be found advantageous.

In this case the workroom building would be placed at the bottom of the grade, and beneath the same would be located the heating boilers and pumps, or other apparatus in connection therewith. From this workroom building would be carried,

FIG. 6

up the grade, a glass passageway which, if properly shaded, could be used for propagating purposes, and which would open into the various houses. The plan shows the houses built somewhat on the order of the ridge and furrow type, probably the most desirable in the case of a steep grade of say about 25°.

This construction would be planned under the supposition that the houses would not be over 300 ft. long, but if the range could be constructed so that the total length of the houses would be 400 ft. or over the arrangement could be modified similar to Fig. 6—which is practically the same as Fig. 5 with the exception that the houses are shown placed with a space between them—which would be suitable for a grade not quite so steep as in the case of Fig. 5, the glass passage house cutting the range in two for convenience both in operating and heating. In either case the mains for the heating apparatus would be carried in the trench through the glass passage house. Having decided on the location of the workroom building the next matter to be considered is the form and size of house.

Among the Growers

F. R. Pierson Co., Tarrytown and Scarborough, N. Y.

A visit to the greenhouse establishments of F. R. Pierson Co., at Tarrytown, and Scarborough, N. Y., just now is particularly interesting, particularly when the visitor is lucky enough to go over them under the guidance of Mr. Pierson himself, who is at all times a busy man, saddled as he is with the cares of various offices he holds outside of his own business—president of the village of Tarrytown, president of the Tarrytown Board of Education, a member of the Tarrytown Committee on Good Roads, president of the S. A. F., and chairman of the committee on the National Flower Show, Boston, 1911.

At Tarrytown the company conducts a very large retail business, and there also is located the wholesale seed and bulb department. The greenhouses there are mostly devoted to the growing of Ferns, in which Mr. Pierson is a well-known specialist. Starting with the old favorite *Nephrolepis exaltata Bostoniensis* he has brought out therefrom and introduced to the public *Nephrolepis Piersoni*, *Nephrolepis elegantissima*, *Nephrolepis superbissima* and *Nephrolepis elegantissima compacta*. A very attractive new form derived from *superbissima* is now to be seen, having very heavily crested fronds; and an interesting form of *Bostoniensis* which is being tried out.

The Scarborough establishment covers 57 acres, with an additional twenty-five acres of cove land. The range of greenhouses embraces 250,000-ft. of glass, six houses, built during the past six years, with all modern improvements; each house covers a half acre of ground.

Especially interesting is the house built last Summer, 400 ft. long and 56 ft. wide, with side walls of reinforced concrete and iron frame, furnished with solid beds having concrete sides. Roses are being grown successfully in these solid beds. As the visitor enters this house he finds himself in a half acre Rose garden under glass, and notes at once the healthy, clean condition of the plants, and the wealth of bloom. In the other houses also a similar condition is noted, both as regards Roses and Carnations.

Carnations and Roses are the specialties at this establishment. In Roses mostly American Beauty and Killarney are grown with a few Maryland. New varieties, however, are continually being tried out. The Carnations grown are White Perfection, Winsor, Victory, Beacon, and a light and a dark pink yet unnamed, sports of Winsor. A large well-built, strong-stemmed, silvery pink seedling Carnation, No. 40, is also on trial, which

is very attractive and promising. A succession of plantings of *Gladiolus America* have been made between the Carnation plants. The range is heated with hot water and, as a fuel, No. 3 Buckwheat coal is used, with a blower to increase the draught.

Walking through the packing cellars, where thousands of Roses and Carnations were being boxed for shipment, the visitor passes out from the greenhouses, impressed with the quiet and orderly manner in which the whole work is conducted.

From an adjacent nursery stock is going out by the carload. The retail trade in ornamental nursery stock is very large. In the nursery are evergreens of many varieties; the Koster variety of Colorado Blue Spruce, Japan Yews, *Retinisporas*, Mugho Pines, *Rhododendrons* of the hardy types, and many other ornamentals.

The growing of *Hydrangea Otaksa* in large tubs for outdoor Summer blooming is one of the specialties of this company.

Any of our readers visiting this establishment will certainly come away with the experience of both entertainment and instruction.

Peter Reinberg, Chicago

A visit to Peter Reinberg's establishment just now shows all hands unusually busy. Many of the houses of Roses that have just gone off crop are being cleared out and replanted with stock from 3½-in. pots for next September's crop. Mostly American Beauty stock is being planted at present. About 40 houses are to be devoted to American Beauty, necessitating from 32,000 to 35,000 plants. The varieties Bride and Bridesmaid it is found here give much better results when plantings are made from grafted stock, consequently this season stock used of these varieties will be grafted. It is not intended, however, to devote nearly as much space to these two particular varieties as previously, pink and white Killarney will be grown instead. While it is the opinion here that the flowers of Bride and Bridesmaid are superior to the Killarneys, being so much firmer and more double, the stems invariably come weak, and for this reason only the Killarneys are planted in preference.

About 14 houses of Richmond are to be planted, this Rose doing remarkably well at this establishment. Ivory is planted largely, as it is found to be a good paying variety, with good stems, a profuse bloomer, and an easy grower.

My Maryland is just coming on crop. This has proved to be a much better Summer Rose than any other variety, but for Winter it is too slow to be much of a success.

The stock of Sunrise is to be doubled this season. This variety is at present in excellent shape and just coming

on crop. Uncle John they will not go back on; the stock of it is now in fine condition and producing an abundance of blooms. A few houses of *Perle des Jardins*, Mrs. Marshall Field, Mme. Abel Chatenay, and Kaiserin will be included in the Rose section as they have been for some seasons past.

Many of the Rose houses are being supplied with new benches. The advanced weather, Mr. Collins, the superintendent, says, necessitates getting cuttings planted from the propagating benches in shorter time than usual. The houses that are used for small Rose stock are used later for Chrysanthemum plants.

About 19 houses will again be devoted to Carnations, the popular varieties being White Perfection, pink and white Lawson, Enchantress, Victory and Cardinal. Aside from five houses that are used for Asparagus, mostly plumosus, the rest of the vast area of glass, covering 27 acres, will be devoted to Roses exclusively.

Retarding the Fermentation of Manure

Experiments with stable manure, with a view to preserving its efficiency after a period of storage, have been made by the French engineer of agriculture, Gimel, as noted in the *Revue Horticole*. A grower of Mushrooms had an opportunity to obtain a large quantity of manure for his beds, on very favorable terms, and desiring to use it as the need arose, he asked Mr. Gimel how best to keep it. The latter accordingly experimented with the fresh manure, applying first gaseous antiseptics (formic and sulphuretted acid) and then treating it with sulphuric acid in the proportion of 10 grammes (one-third of an ounce) per liter (1.76 pints) of water. Fermentation was arrested in all the plots so treated. At the end of two months the plots were either sown with pure culture of bacilli subtilis, mesentericus, etc., or mixed with fresh manure in fermentation. The plot treated with sulphuric acid was previously watered with a solution of carbonate of potassium, in quantity sufficient to saturate the acid so added. The plots made antiseptic with formic acid and sulphuretted acid did not ferment; that treated with sulphuric acid had a normal fermentation.

"My first conclusion," says Mr. Gimel, "is that the use of antiseptics serves no particular purpose. But manure can be kept intact for several months by sprinkling it, when fresh, with acidulated water. Then, two weeks before the beds are made, all that is necessary is to sprinkle the manure again with water in which has been dissolved carbonate of potassium at least equal in quantity or a little in excess of that necessary to saturate the acid employed; then some wheelbarrows of hot manure or a few test tubes of bacillus cultures should be mixed with the manure, and fermentation will soon begin."

Florists in good standing throughout the country can avail themselves of the advertisers' offers in this Department and accept, without hesitation, orders from their local customers, transmit same to an advertiser in these columns, and thus avail themselves of the opportunities for extension of trade which are open to all. Let your customers know you fill orders by telegraph to any part of the country.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail firms advertising under this heading are all considered by the publishers of The Florists' Exchange as being responsible, and will accept and fill orders for Flowers, Plants and Floral Designs for Steamer Orders, departing Trains, or any given point within their reach, forwarded them by mail, telegraph or telephone, in the respective districts to which their trade extends, the usual commission being allowed. While no guarantee is expressed or implied by this paper as to the satisfactory fulfillment of orders sent to parties whose names appear in this Directory, we will state that only concerns of known good standing will be admitted in this Department. The use of Arnold's Telegraph Code No. 16, a copy of which is placed in the hands of every advertiser, will greatly facilitate this interchange of business.

Eyres **ALBANY, N. Y.**
11 North Pearl Street
Cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Hatcher **AMSTERDAM, N. Y.**
Leading Florist
ESTAB. 1877
SCHENECTADY, N. Y.

Atlanta Floral Co. **ATLANTA, GEORGIA**
41 Peachtree Street
We cover all of Georgia and are within easy reach of New Orleans, Jacksonville, Birmingham, Chattanooga and Charleston. Retail orders placed with us will receive careful attention.

Thos. F. Galvin **BOSTON, MASS.**
124 Tremont Street
We cover all New England points. Retail orders placed with us receive careful attention. The delivery of flowers and plants to Boston sailing steamers a specialty.

J. Newman & Sons **BOSTON, MASS.**
Corporation
24 Tremont Street
Orders by wire receive prompt and careful execution. We can refer to leading florists in all principal cities. Established 1870.

Zinn & The Florist **BOSTON, MASS.**
No. 1, Park St. No. 2 Beacon St.
Equipped with best facilities for quick delivery to any part of NEW ENGLAND. Also special delivery without extra charge.

Robt. L. Wilson **BROOKLYN, N. Y.**
Fullton St. and Greene Ave
Deliveries anywhere in Brooklyn, New York, New Jersey and Long Island. Trade orders cared for from all parts of the country and delivered at Theatre, Hotel, Steamer or Residence. Tel.: Prospect 2840 and 4065.

Palmer's Flowers of Quality
BUFFALO, N. Y.
W. J. PALMER & SON, 304 Main St.

Hauswirth **CHICAGO, ILL.**
The Auditorium Florist, 232 Michigan Ave.
The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

JULIUS BAER,
CINCINNATI, O.
Fourth St.

Frank F. Crum **COLORADO SPRINGS, COLO.**
Retail Florist
Telegraphic orders will be carefully and promptly filled; personal attention given. Usual discounts allowed.

J. N. Champion & Co. **CONNECTICUT**
New Haven
1026 Chapel St., Opposite Yale College
Every facility for prompt deliveries in all parts of Connecticut. Cui Flower and Funeral work solicited.

W. S. Matthews **DAYTON, OHIO**
Florist, 16 West Third Street
Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

A Section of Bellamy Bros.' (Syracuse, N. Y.) Easter Display

The Growing of Lilies for Easter

A paper read before the Florists' Club of Philadelphia, April 5, 1910, by Henry I. Faust, Merion, Pa.

I do not suppose there is anything grown for Easter more uncertain as to crop and requiring a greater amount of skill and attention than the Lily, especially the growing of good Lilies. To make this paper interesting it has been suggested that I take up the entire subject of forcing Lilies, from years ago to years to come, and illustrate by samples of well-grown and diseased plants; in fact, to enter upon a long and learned discourse and kick up such a lot of dust and hemuddle my subject to such an extent that you would have to catch on to my coat tail in order to follow me. But in this I saw no use. The diseased plant you all have seen enough of, you have had a heart's scald of them—the good ones are all sold.

Liliums giganteum and Formosum Best

As far as my experience goes, there are only two varieties of Lilies worth attempting for Easter—the giganteum and the Formosa Lilies. To grow in quantity and to produce good, even results, there is at present only one Lily, the giganteum. This is a variety almost perfect; it comes true to its name, and for health it is all that could be desired. This year, out of 13,000 bulbs I did not have to throw out 10 plants through disease; but as far as health goes, I can give the Formosa an equally good character.

Now, to get down to business, in the growing of Lilies for Easter let us suppose there is only one variety, the giganteum. The first essential is to get good bulbs. I do not think it makes any difference from whom you procure them, any house of repute can supply you. My bulbs this year came in three separate lots. I saw no difference, they were all in perfect condition. Just as soon as you receive your bulbs get them potted.

A Quick and Cheap Method of Potting

I have a way of potting that may interest you, as I never knew anyone else to pot in the same way. It is a very quick and cheap way of doing what would often, in the ordinary way of potting, be a slow and worrisome job, especially when you grow in quantity. A few days before we receive our bulbs we have a large space cleared on the ground near the soil pile. We then cover this space with 2000 to 2500 empty 6-in. pots, say 20 to 25 pots wide to 100 long. We then have a man fill the pots about two-thirds full of soil, and we are ready for the bulbs. When the bulbs arrive, another 2000 to 2500 pots are placed on the floor, the bulb cases are opened and stock sorted, selecting all the best bulbs in the case, the cullings being kept separate. The good bulbs are for growing on in 6-in. pots, the cullings we place two bulbs in a pot. Then we take a 16-ft. board to place upon top of the pots to stand, or rather kneel upon, and we start to plant, two men planting and two following up filling the pots with soil, and so on until the end.

In filling the pots we throw plenty of soil on top, levelling it with the back of a rake. In this way we have often been able to use up 10,000 pots in three days; and last Fall we did 10,400 pots in three days. I think you will acknowledge this to be a much more expeditious way of getting your Lilies potted than the usual way of potting at a bench. The Lilies now being potted, all the work, especially selecting the bulbs and planting, having been done at a minimum cost by two laboring men—not interfering at all with our regular work—the bulbs are ready to wheel inside, to be placed under a bench, or, just as well, left outside, covering them up carefully and bringing them in later, or at your convenience. We mostly leave ours out until we are rid of the Chrysanthemums, although it does not hurt to bring them in at once if it suits your convenience or space. We always like to have our Lilies inside, on the bench, by December 15, and that reminds me of the great difference in forcing a Lily for Easter.

Years ago when we first commenced growing Lilies, we grew Harrisii and got our bulbs in August or early September. We would pot at once and have them two or three inches high when brought inside, but we always had trouble getting them to bloom for Easter. Of later years, since the Japanese bulbs have been grown, although we do not get them until November, and often late November, we have no trouble, although, as in this year, needlessly anxious.

Care in the Greenhouse

Now we come to the growing. We always start the Lilies off at a cool temperature and hold them in this temperature according to the date of Easter. The longer they stay at a cool temperature in the early stage the better. After we see they are well rooted and starting to grow, the temperature can be increased up to any reasonable extent until they show evidence of making buds, then you had better go slow. From the time that they first start to make bud to the time the bud is well developed is what might be called the critical period; stunted plants or blasted buds may very easily be your lot. All that can be said of this period is "Beware!"

In growing a Lily for Easter the credit is due to two people, the fireman and the man at the hose. There is

no plant that loves syringing more than a Lily, yet no plant resents more quickly an over supply of water at the roots. I often, on a bright day, syringe two or three times, and have frequently at night gone into the houses and given them a good syringing, wetting down the paths, and also the steam pipes. I think syringing is very beneficial in growing Lilies, especially if you have an apparatus for heating your water. We have an arrangement for tempering the water that enables us to have a constant flow at a temperature of 70° and upwards. This water heater is a very simple apparatus; anyone who uses steam heat could at the expense of a few dollars so equip themselves.

After a Lily is in condition to stand it, I believe the quicker it is grown the better, only, of course, remembering to gauge the growth and development according to the date for Easter. I must say this year was one calculated to try men's souls. We did not get our bulbs until Nov. 18, and, on account of the late Chrysanthemums, could not get them on the benches until Dec. 24. Out of 10,000 pots I do not believe 25 showed growth above the soil. Then came a month of anxiety and worry. How slowly they seemed to grow! How quickly the weeks flew by! A constant fluctuation between hope and fear, and cloudy weather seemed our portion. Still, the few short weeks we had to Easter were being rapidly counted off. "Eight more weeks," we anxiously said to ourselves; then seven, six and five.

Time Required for Flower Development

It is usually calculated that it takes six weeks for a Lily flower to develop, from the time the bud first shows. It can be done in less. I would prefer to have six weeks to do it in, sooner than attempt to do it in four—yet it can be done in four. Just to satisfy myself how long it would take, or rather how quickly a Lily could be brought into bloom, I this year marked a few plants.

On Feb. 22 I selected a few plants, marking them "No buds in sight." On the 25th buds could be seen on several, and by the 27th all showed bud. We were then running a night temperature of 70°, or a little over, letting the day temperature, with sunshine, run higher. They were all in bloom in time for Easter, just taking, you see, from four weeks to a month from the time of first showing of bud to the blooming period.

Marketing the Product

One of the most important points in growing a Lily is the selling of it. I think I am speaking advisedly when I say it does not pay to grow Lilies to sell at 10 cents. Now don't misunderstand me on this point. I do not mean that a Lily cannot be grown and sold at 10 cents per bud and yield sufficient margin for the grower to pay his debts, but that is all it will yield; it will give the grower no real profit; that is, no such profit as will in any way reward him for his risk, trouble and anxiety.

Right at this point I cannot refrain from wondering if we are conducting our business in as wise a manner as we should. Are we not just stumbling along in the dark?

Every year, as long as I can remember, I have heard the report that Lilies were going to be scarce, but without any real foundation for it. No one knows how many Lilies it takes to fill the requirements of the city of Philadelphia. Don't you think we should know? If we only knew, or had a way of finding out, we would commence to be on a business basis; we would then be in a position to regulate prices.

I have thought that a "Florists' Board of Trade" might be a benefit, with committees to look after the

different branches of the trade. The committee on Lilies could get reports from all the seed houses and know just how many bulbs were in the growers' hands, or get the report direct from the growers, with monthly reports as to progress, condition and number expected to be put on the market—in much the same way as the Government gets its agricultural reports.

I believe if we all were to cut down the Lilies grown 25 per cent., try to grow better Lilies and get a better price, it would be a move in the right direction. There is one thing sure, none of us make enough money. We have the most anxious, worrisome business in the world; everything we buy costs more, and still more, but every time we get our returns we find them markedly less.

The only people I see making any money on flowers are the street fakirs and the commission men; yet I think the commission man deserves all he gets. Without these hustling and enterprising business men, who are ever advertising to find an outlet for our goods, I fear often our business would be in a bad way.

Two-thirds of the time the flower market is glutted, prices demoralized, and the growers are building more houses to throw more stock upon the market, to compete with themselves. Would it not be advisable to call a halt? Let every grower who has more than 10,000 feet of glass pledge himself not to build any more for five years, until the market catches up with the supply. Almost every week during the seasons we read in the trade papers of Carnations, Roses, Violets, or Lilies being a glut on the market. Let us work for prosperity and better prices, not for the street fakirs.

Lilies, to afford the grower a proper profit, should bring 15 cents per flower. We have been too much in the habit of rubbing shoulders with poverty. Let us put ourselves upon an equality with other professions and get more of the sweets of life and not so much of the bitters.

A Device for Dethorning Roses

Under the name of Poppe's Apparat, a device for dethorning Roses has been patented in Germany by Miss

Lilli Poppe, a florist of Bremen. It consists of two stout strips of iron, which are hinge-jointed and one of which has a spring action. On each of the two inner edges three semi-circular pieces have been cut out so as to form three round holes of varying size when the apparatus is closed, and it is through these the stems to be dethorned are drawn. Furthermore, there is a knife on one side for cutting off the flower stems. This tool may be screwed to any table; its usefulness seems self-evident.—Illustration and text from *Bindekunst*.

Dwarf Rose Orleans

Messrs. John Charlton & Sons of Rochester, N. Y., have favored us with a photograph of the new French Rose, "Orleans," which they describe as a remarkable grower, surpassing all other dwarf or baby Roses, so far as their knowledge extends, and which they think will be much sought after. This Rose originated with the firm of Levassieur et Fils, Orleans, France. It is a cross of Mme. Norbert Levassieur with an unnamed variety, and is described as a profuse bloomer, carrying its buds on an extremely straight stem. The flowers are clustered in immense panicles rising well above the foliage. The color is a Geranium red, tinted, like Paul Neyron, with a whitish center. It is very vigorous, ranging in height from 18 to 27 inches. Foliage is of a handsome shining green color. Exceedingly decorative in appearance, the Orleans Rose should prove effective in mass planting and is well suited for forcing in pots. It has been awarded a gold medal by the French Society of Horticulture of Orleans and of Loiret.

New Dwarf Rose Orleans

Double Your Carnation Profits—Last Chance to Buy

The trade has certainly bought liberally of Carnation Dorothy Gordon this Winter and Spring—orders for rooted cuttings have taxed our producing capacity nearly to the limit, but we're proud of the stock we've sent out, and judging by their kind letters, our customers are pleased, too. And next Winter, when all these splendid plants come to bloom and these florists begin to make money as they have never before made it from Carnations, they'll be still better satisfied!

Have you delayed getting in your order for this magnificent new Carnation?

If so, this advertisement is addressed to you; we have just a few thousand more cuttings in the sand for April 15th delivery, and when these are taken, no more will be available till next Winter.

We urge you, if you want to double your Carnation profits, not to delay; the merit of this splendid new variety has been thoroughly proved and the only possible loss you can experience in the matter is to let this opportunity slip by and stick to the old sorts you've been growing in the past.

Carnation Dorothy Gordon

has a splendid pedigree, a long list of good qualities, and an enviable record of prizes and awards. It is a seedling of Lawson on Enchantress, possessing the principals merits of these varieties without their faults. It is vigorous in growth and is perfectly free from disease. Its flowers are a trifle darker than Pink Enchantress; they are borne in double the quantity, and are of exceptional size—averaging over 3 inches in diameter. They are very fragrant and keep exceptionally well. The market price paid for Carnation Dorothy Gordon is regularly 50 per cent. more than that paid for Enchantress.

From the very first, Dorothy Gordon has established a splendid record as

an exhibition variety. High awards were given it at the meeting of the American Carnation Society in 1908 and at the National Gardeners' Association meeting in New York in 1909. This season it has attracted much attention and has won further renown at the Pittsburgh and Toronto meetings.

In order to give the trade a fair opportunity to test it thoroughly, we have from the first sold rooted cuttings at a price which would get it established everywhere. This low figure still prevails, and the remaining stock will be sold at these prices: \$10.00 per 100, \$75.00 per 1000. No further offers this season.

Springfield (O.) Florists' Club

Roger Murphy, C. L. Reese, C. P. Bethard, John M. Good, and George D. Leddie, were placed in charge of the Fall flower show at a meeting of the Club held March 24. Plans for the event were suggested by many of the members. Assurances were received from the Y. W. C. A. that it would co-operate with the Club in this matter. It was suggested that the top floor of the Fairbanks building was an ideal place to hold the show. It is expected that it will be largely attended by people from the city and county. Every member of the Club, including the leading florists of Springfield, pledged their hearty support to the show. A list of premiums is being prepared. Competition will be open to local amateurs and out-of-town florists.

Florists' Club of Philadelphia

A regular monthly meeting of the Florists' Club of Philadelphia was held at the Club rooms in Horticultural Hall on Tuesday evening, April 5. In the absence of the president, Joseph Heacock, Alfred Burton, vice-president, occupied the chair. The following new members were elected: A. V. Cartledge, Jr., Nelson T. Geiger, H. W. Collins. Candidates for membership were as follows: Lewis A. Cathery, Thomas Dale, Hilborn Darlington.

The chairman introduced Henry I. Faust of Merion, Pa., who read an instructive and interesting paper on the growing of Lilies, which will be found elsewhere in this issue. A vote of thanks was passed to Mr. Faust at the conclusion of the reading.

Some discussion of the paper then followed. Geo. Anderson said that he considered multiflorum a much better Lily than giganteum; that it gave a much better flower, was a much better seller and was no more subject to disease. D. T. Connor inquired more particularly about the falling of buds.

Frederick Hahman attributed the falling of buds to excessive moisture rather than heat. He also inquired why good multiflorum could not be obtained as well as good giganteum, instead of multiflorum mixed with giganteum. He agreed with Mr. Faust that we should grow less and better Lilies. Mr. Faust in reply to an inquiry from Mr. Connor said that the quicker Lilies grew the taller they would become, and that two feet was tall enough for a pot plant.

Frederick Hahman again took up the discussion complaining that his giganteum averaged less than three flowers, and that his October planted bulbs gave the poorer results.

Eugene Bernheimer took exception to the statements of Mr. Faust and Mr. Farenwald that there was already too much glass going up.

David Rust stated that the general public were guided on prices of Lilies by the prices of Lilies in department stores, who used them as an advertisement and sold at cost, and that he, last year, by arranging with the leading growers of Lilies obtained 12c. each from department stores. Mr. Faust remarked that department stores paid as much as florists and were not so critical as to quality.

A vase of Callas was exhibited by Samuel Batchelor of Jenkintown, Pa., for which the committee on exhibits, John C. Grace and Leo Niessen gave cultural commendation.

About sixty members were present. The meeting adjourned at 9:45 o'clock, after a pleasant and profitable evening.

Florists' Club of Washington, D. C.

The Club met on Tuesday night at Gude's store, 1214 F st., with the new president, John Robertson, in the chair. After reading minutes of previous meeting ex-Pres. Krammer paid high tribute to Mr. Edw. S. Schmid who supplied the excellent talent for last meeting night, making it a banner occasion of its kind, and a further tribute to Wm. F. Gude for use of his store for the purpose.

This being the night for the annual banquet, and no feast laid, excuses were in order. "The Easter rush," was such that the committee in charge had not had the time to devote to the matter, so the present meeting will be held open until after the banquet which will take place one night next week, due notice being given. It was moved that a committee of five be appointed to look into the matter of having a show during the Fall of 1910 as usual. The names of the committee will be made known at the banquet.

At 9:45 the Club adjourned to partake of a dainty repast prepared by Wm. F. Gude. Hugo Mullert, formerly a celebrated producer of gold fish in this country, and one of the organizers of the S. A. F. at Cincinnati, was present, and spoke entertainingly to the Club. Mr. Mullert now resides in Germany but visits this country every two years.

JAS. L. CARBERRY.

Elberon (N. J.) Hort. Society

This Society held a meeting on April 4, President Peter Murray in the chair. R. R. Hughes read a paper on "Landscape Gardening," which was very interesting and opened up a large field for discussion in which every one present took part. Mr. Hughes talked for some time on the best trees and shrubbery to plant along the coast and also the best Grass seed mixture to use for the lawns. The awards for competition were as follows: Wm. Seymour, Callas, 92; D. Kelley, Cauliflower, 90; P. Murray, Gardenias, 89; P. Ewen, Dracenas, 85; C. Duncan, Roses, 75; A. Bauer, Tulips, 70.

ALEX. FLEMING, Rec. Sec.

PITTSFIELD, MASS.—Easter business was better this year than last. Lilies, Azaleas, and bulbous stock in pans and pots were most in demand, and all kinds of cut flowers, especially Violets, sold well. Roses, excepting American Beauty, retailed at \$2 per doz.; Carnations \$1 per doz. Lilies brought 25c. per bloom, and Violets \$1 to \$2 per 100. Business was better with everything but yellow stock.

L. W. ACHESON.

New Orleans

If Lilies were scarce at Easter, Hyacinths and other bulbous stock were plentiful and good. Some of the Lilies shipped to this city were away below the average. The condition in which Carnations, some of them, reached the consignee, proved without a doubt that it was salted stock. The writer saw some that simply could not be offered for sale and this practice of shipping such worthless stock cannot be too strongly condemned.

Robert Reineicke will take a trip to Europe this Summer, visiting his aged mother in Germany. CRESCENT CITY.

Newport, R. I.

The lecture at the Horticultural Society's next meeting, April 12, will be by E. O. Orpet, South Lancaster, Mass., whose subject will be "Orchids."

The condition of Henry M. Wilson has considerably improved and he is now considered out of danger.

James McLeish, who has been housed with the gripe is now able to be about.

E. Kempeener of the firm of Bulk & Kempeener, Boskoop, Holland, has leased some land on Champlin st., this city, and is to engage in the propagation and cultivation of nursery stock. Roses are to be one of his specialties.

B. A. Bohuslar, for 7 years foreman and propagator at the Rhode Island Nurseries, has leased three acres of land and will give his whole time to the propagation of nursery stock for the wholesale trade. He expects to be able to compete with the foreign growers, giving special attention to the propagation of some plants which have heretofore been neglected by our home growers.

Andrew J. Pow, for the past nine years head gardener at The Breakers, Mrs. Cornelius Vanderbilt's, has tendered his resignation, to take effect April 15. Mr. Pow is a good plantsman and will be missed at the Horticultural Society's exhibitions.

ALEX. MACLELLAN.

THE PRICES ADVERTISED IN THESE COLUMNS ARE FOR THE TRADE ONLY

The Easter Trade

With a view to ascertaining, exactly, trade conditions at Easter in different sections of the country, the following questions were submitted by the publishers of The Florists' Exchange:

A—Compared with last Easter, was business better or worse?

B—What plants were most in demand?

C—What cut flowers were most in demand?

D—What was the retail price on Roses, per dozen? American Beauty, other Reds, Pink, White, Yellow.

E—What was the retail price on Carnations, per dozen? White, Red, Pink, Variegated.

F—Also, what were the prevailing prices for: Gardenias, each; Cat-tileyas, each; Lilies, each; Violets, Wallflowers, Sweet Peas?

G—What is your opinion of the Easter trade in general this year compared with that of last year? Was it better or poorer?

The answers received are embodied in the following reports:

ADAMS, MASS.—A—20 per cent. better. B—Lilies, Azaleas and Genistas. C—Carnations and Violets. D—White \$1.50 to \$2; pink \$1.50 to \$2. E—75c. to \$1; White and Pink Enchantress and Winsor. F—Lilies, each, 20c. to 25c.; Violets, \$1.50 per 100. G—Very much better. T. D. B.

ATLANTA, GA.—A—Volume larger; prices less. B—Lilies, Azaleas, Hydrangeas, Spireas. C—Lilies, Carnations and Roses. D—\$1.50. E—\$1.50; Enchantress and variegated. F—Lilies, each, 25c. Better, but warm weather made Easter stock more perishable and more expensive to handle. The percentage of profit was less than former years. WEST VIEW FLORAL CO.

CHILLICOTHE, O.—A—Better in general. B—No particular variety. C—Roses and Carnations. D—White, Bride, \$1 to \$1.50; pink Killarney and Richmond, \$1 to \$1.50. E—75c. for firsts, 50c. for seconds; Enchantress pink and white, Victory. F—Lilies each, 25c.; Violets, \$1.50 single; Tulips, Daffodils and Narcissus, 60c. to 75c. per doz.; Hyacinths, cut, 10c. each. G—With us it was by far better, as we ship the most of our Roses and Carnations out of town. The home trade I think was poorer. I think if the people here had

been taught how to use or make use of flowers our Easter would be better. We find it hard to bring people to a large city style, as hamper and plant baskets were never shown here until we came, so you can see it will take some time. Last year we sold but one hamper, this year 15. Decorated plants were never seen, except with green scrim on the pots and wrapped up in a newspaper. Do you wonder that some of the country florists complain? If they would go to some large city and see out brother florists' style I think less complaint would be heard. CHAS. JOHNSON.

COLUMBUS, O.—A—Much better. B—Azaleas, seemed to be in the lead. Rhododendrons, Lilies, and pot Roses, mostly Crimson and Baby Ramblers, sold well. C—Carnations took the lead. The demand for Sweet Peas was heavier than ever experienced here before. The demand for Violets was good, but stock arrived in bad order. D—\$1.50 to \$4 per dozen, red varieties sold out first, American Beauty \$8 to \$10. E—75c. to \$1.50 per doz. F—Lilies, 25c.; Violets, 50c. to 75c. per bunch; Sweet Peas, \$1.50 to \$2 per 100. G—Local florists generally declared that not only the Easter trade but that for several days before and after was the best they had ever known. C. D. B.

DENVER, COLO.—A—Very slight increase. B—Roses of the Rambler type. C—Violets and Carnations. D—American Beauty, \$5 to \$12; white, \$1 to \$3; pink, \$1 to \$4. E—\$1. F—Lilies, each 25c.; Violets, \$2 per 100; Sweet Peas,

\$1.50 per 100. The cut flower end of the game is getting less and less each Easter and the plant sales increasing. March weather was very warm and sunny—temperatures as high as 80° in the shade and not a drop of rain during the month, so that some plant stock was rather overdone.

PARK FLORAL CO.

EAST LIVERPOOL, O.—A—Same. B—Lilies and Hyacinths. C—Carnations and Lilies. D—White, \$3 to \$5; pink, \$3 to \$5. E—75c. to \$1. White Perfection, Enchantress, Lawsons. F—Lilies, each 25c.; Violets, \$1.50; Sweet Peas, 25c. G—Did not notice much difference.

CHAS. PETERSON.

GRAND RAPIDS, MICH.—A—Considerably better, aided materially by favorable weather. B—Lilies, and Azaleas, while a quantity of Lilac, Rhododendrons and bulbous stock in pans sold out clean. C—Carnations took the lead followed by Roses, cut Lilies, Violets and bulbous stock. D—American Beauty, \$2 to \$6; white, \$1.50 to \$2; pink, \$1.50 to \$2. E—75c. per doz.; with department stores selling at 35c. per doz. The leading varieties were Enchantress and Lawson families, Beacon and White Perfection. F—Lilies, each 25c.; Violets, 50c. per bunch of 25; Sweet Peas, 25c. to 35c. per doz. G—Easter trade was much better than last year; everything salable, including bulbous stock cleaned up closer than for many years. One noticeable feature was the heavy sales of one of the department stores, where abnormally low prices prevailed. Good Carnations could be had for 35c. per doz. and pot Lilies 15c. per bud against the florists 20c., and every other flower and plant in like proportion. Another department store, in its efforts to draw trade to itself, paid \$30 per 1000 for its Carnations and sold them for 35c. per doz., a loss of 1c. per doz. only, allowing that every flower sold. They

must set a high value on its advertising advantage. G. F. C.

JOHNET, ILL.—A—Better. B—Lilies, Daffodils, Tulips, Hyacinths. C—Lilies and Roses. D—American Beauty, \$5 to \$10; white, \$1.50 to \$2; pink, \$1.50 to \$2; other Roses, \$1.50. E—75c. to \$1; White Perfection and Enchantress. Lilies, each, 25c.; Violets, \$1.75 per 100; Sweet Peas, \$1.75 per 100; Cattleyas, each, \$1. G—Decidedly better.

JOS. LABO.

NEW BEDFORD, MASS.—A—Better if anything. B—Lilies, Tulips in pots, Daffodils, Azaleas, Cyclamens, Primroses and Ferns sold fairly well. C—Roses, and Carnations, Tulips and all bulbous stock sold well. Violets were in big demand, not half enough to go round. D—\$2.00. E—75c. to \$1; Enchantress, Fair Maid, Beacon, Winsor, White Perfection, Boston Market. F—Lilies, each 25c.; Violets, \$1.50 per 100; Sweet Peas, \$1 per 100 blooms. G—Easter trade for 1910 was as good and in the writer's opinion even better, from all accounts. Everyone is well satisfied with Easter. American Beauty Roses, Orchids, and Gardenias are not much called for here, our class of trade not being in a position to pay for them. All are tired but satisfied, and wearing the smile that won't come off. HORTICO.

NEW ORLEANS, LA.—A—Quite an advance on previous Easters. B—Azaleas, Hydrangeas, Spiraeas, Hyacinths, a scarcity of Lilies in pots. C—Roses, Carnations, Lilies being scarce, were soon sold out. D—American Beauty, \$8 to \$15; white, \$3 to \$4; pink, \$3 to \$4; other Roses, \$5 to \$8. E—\$2 to \$3; Enchantress, pink and white, and the usual standard varieties. F—Lilies, \$4 to \$5 per doz.; Violets not called for much; Cattleyas, each \$1 to \$1.25. G—Much better. There was a great demand for flowering plants this Easter. Azaleas were particularly well flowered and sold well. There were some nice Hydrangeas to be seen in pots. Spiraea was a good old standby for Easter. Ebbe had a good demand for his especially well grown Phoenix Roehelini. Metairie Ridge Nursery Co. had Rose Tausenschön, both trained and bush specimens, finely flowered. Seldom at Easter has there been such a cry for Lilies; it could not be satisfied. CRESCENT CITY.

OMAHA, NEB.—A—About the same. B—Lilies and Hyacinths. C—Carnations and bulbous stock. D—White \$1.50; pink \$1.50; other Roses \$1 to \$1.50. E—\$3 to \$1.25. Enchantress pink and rose pink. F—Lilies, each 25c.; Sweet Peas, \$1.50 per 100. G—Business would have totaled somewhat more than last year had not the hot spell of a few days prior to March 26, softened the stock so that the shrinkage was more than in any year in my memory. Lily plants, after the spoiled flowers were taken off, were sold for what they cost and in many cases less. J. H. BATH.

PATERSON, N. J.—A—Good. B—Hyacinths, Lilies, Cinerarias. C—Carnations, Callas. E—75c. F—Lilies, each 15c. MARTIN WERNE.

POMONA, CAL.—A—The same. B—Azaleas and Cyclamens. C—Carnations. D—No call for Roses as there are so many growing outdoors. E—Greenhouse \$1, outdoor 25c., for all sorts. O. ROESSNER.

SYRACUSE, N. Y.—Trade with us was nearly doubled in some lines, notably in Lilies and Azaleas, which were sold out early. Violet plants in small baskets and pans were eagerly bought, as also Pansy plants in baskets. Baby Rambler Roses were not in sufficient supply, though numerous. Sales on fancy baskets doubled. Sales on fancy Roses were lighter than last year. There was a heavy demand for Carnations, and a good demand for Valley and Sweet Peas. Violets doubled. Heavy call for potted plants in all lines. In Daffodils, Emperor, and Bicolor Empress were best sellers, both cut and in pans. Higher prices realized than last year, especially in Azaleas. J. B. B.

WILMINGTON, DEL.—A—Better. B—Lilies, Hyacinths and Tulips. C—Carnations. E—From 50c. to \$1.25. F—Lilies, each 15c. G—Very much better, everything cleaned up well, weather being ideal. W. H. VANCE.

Baltimore

We are enjoying Summer weather instead of Spring. The country resembles Summer time, with the shrubbery in full bloom, trees beautifully leaved, all kinds of hardy plants in full bloom, and fruit trees in blossom. We are one month ahead of the usual season. Flowers and vegetables are making great headway. However, we are not out of the danger yet and if it does the beautiful showing will be ruined.

Trade has kept up fairly well. Many pot plants for garden purposes are being disposed of. Cut flowers are still plentiful, the open weather setting things humming. Roses are still heavy in supply. Carnations are plentiful and bringing good prices. Callas are coming in heavily. Violets are on the decrease. Bulbous stock is still in heavy supply. Narcissus very abundant. Sweet Peas are holding their own. Pot plants of various kinds are quite plentiful, and greens of all kinds a little more regular in supply.

A surprise and birthday party was given to John Williams, Ruxton, Md. on April 1, at his home. About forty guests were present, including many gardeners and their wives, to extend their congratulations. The home was tastefully decorated with various kinds of cut flowers and potted plants. An enjoyable evening was spent, many games being indulged in and a hearty feast enjoyed. Mr. Williams is one of the best known gardeners in his section and has charge of the beautiful country place of R. C. Hoffman.

Shortly after Easter Frederick Fauth of Woodlawn, Md. disappeared from his home and left his business entirely in the hands of his father. No reason for his act is ascribed, unless it is to get out of the florist business. His father is conducting the business until further arrangements can be made. Mr. Fauth is well known to the trade in Baltimore and Washington, and was successful.

Pattison & Gahan, auctioneers, sold last Wednesday a large quantity of Rose bushes and various other ornamental plants. All came from P. Van Tol, Jr., Boskoop, Holland.

Walter Conroy, W. Franklin st., the new florist, reports a rushing business this week, especially in funeral work.

The street market flower merchants have been forbidden to offer for sale their cut flowers on the outside of the market line on stalls. Tuesday morning one of the boys offered his flowers for sale. At the time the writer was present, and three policemen were enforcing the ruling. One of our large department stores has also protested against their standing on the street. A short time ago a delegation of these street men called on the mayor and they were advised to take out a license to sell perishable goods. After doing so they were not allowed to sell on the streets unless they kept moving and selling from a basket, which, of course, it was impossible to do. The grovers expect to make a test case when one is arrested. One of our growers said the new order of things would be a drawback to the trade. The Florists' Exchange will be one house to feel the effect, as the street boys handle great quantities of the surplus stock that accumulates there.

J. Bolgiano & Sons are doing a rushing business. They recently shipped 4000 bags of seed Potatoes and disposed of four carloads of incubators. Their seed business has been steadily increasing. J. F. T.

Richard Vincent, Jr. and wife have left White Marsh for England, where they are due about April 17. After spending a few days in that country, they will leave for Holland and Belgium, as previously related in these columns, returning again to England May 3, and sailing for home May 14 on S. S. Columbia. Mr. Vincent says that Gude Bros. of Washington, D. C., are going to send, by fast steamer, a vase of American Beauty Roses to be set up in the Haarlem Show. Mr. Vincent has a beautiful American flag, and should the Roses be in good condition he will display the flag in connection with the exhibit.

TAMPA, FLA.—Gardens are to be laid out and a florist's establishment opened at the junction of Grad Central ave. and Bay blvd. Mr. Newman of Boston is at the head of the enterprise.

Cucumbers Under Glass

Would like to have some information as to the culture of Cucumbers in the house. About what temperature should they be kept at? Should they be syringed and how wet should I keep them? My varieties are the Duke of Edinburgh, Telegraph and White Spine. How should these be trimmed or pinched for a good crop?—F. B., Pa.

There should be no difficulty in producing Cucumbers in almost any style of a house, at the same time. If inquirer had stated the style or structure of his house the question could be answered more intelligently.

All the varieties mentioned may be grown successfully together from Spring until Fall, but for Winter treatment the White Spine type can be grown in five degrees less heat, which is quite a consideration in coal consumption. A good temperature for Cucumbers at this season is 70° night, 80 to 85° day. For Winter culture they may be grown successfully in five degrees less, both night and day.

Cucumbers delight in a moist, humid atmosphere at all times, with syringing both morning and afternoons, excepting on dark and cloudy days, when spraying would be of no benefit, but rather a disadvantage. From now on a light shade is a decided improvement over the clear glass; just enough to break the strong rays of the sun. The vines should never be allowed to get very dry. Neither should they be kept saturated to the extent of souring the soil. The best plan to follow is to give a thorough watering, then no more until necessary.

Cucumbers are grown in both solid beds and raised benches; they will flourish under either system, particularly from early Spring until Fall. For Winter work, however, I would certainly recommend raised benches with pipes running under the bench to keep the roots warm.

Dealing with the Telegraph types it is best to plant them in a position where they may be trained up the front, far enough from the glass to prevent the foliage from crowding against it; 15 or 16 in. would be about right; plant in hills, 3 to 3½ ft. apart. Allow the vines to grow to the length of 6 ft. or so before pinching the main growth; strong lateral growths will then start away from it. These should be secured to the trellis; these laterals, when about 18 in. may also be pinched; by so doing the first crop will be hastened. As the laterals grow pinch again; then, later, maybe the foliage will be getting a bit crowded; if this occurs cut some of the weakest parts of the vine away; the aim should be to have the trellis covered with foliage, but avoid crowding.

A satisfactory compost for best results is a sandy loam; if procured from pasture land so much the better, having in mind that the ideal compost is one the roots can penetrate through rapidly. A quick substantial growth is desirable for best results. If any manure is added to the soil it should be thoroughly decayed.

When the Cucumbers are in bearing a watering once a week with manure water will assist the growth and increase the quantity of fruit. Following along these lines there should be no difficulty in producing a handsome crop of Cucumbers, either in Summer or in Winter.
W. T.

Trenton, N. J.

The Ribsam building at South Broad and East Front sts. was gutted by fire on the night of March 30. Carlman Ribsam, owner of the building, sustained a loss of about \$25,000, fully covered by insurance. The loss to Martin C. Ribsam, who conducts the Ribsam Flower and Seed Store in the building amounts to \$20,000 also fully covered by insurance.

Martin C. Ribsam has been able to get temporary quarters at North Broad and Academy sts., where the business will be continued without hindrance on account of the fire.

McMINNVILLE, ORE.—Trade has been very good the past Winter. Your Enter number is grand.
S. H. MARIS.

Cleveland, O.

The J. M. Gasser Co. moved into its new quarters in the Ball Building April 1. As a "goodby" to the old location the company advertised that on March 31 it would present to all callers a half-dozen fresh Roses. The company states, in regard to this distribution: "We had no idea there would be such a generous response, nor of what a lot of work we were making for ourselves. The result was that we were simply swamped with applicants; and although we had extra help to serve the people and advertised we would give away 12,000 Roses, yet we were compelled to close our doors at noon to keep out the crush, and we gave away about 17,000 Roses, besides Carnations, etc. Our object in doing this was, first, to clean up an overloaded market; secondly, to keep the flowers out of the hands of street fakirs, and, thirdly, as an advertising medium. This week we work off our "surplus" by turning over 10,000 or 12,000 Roses to one of the leading newspapers for distribution to all the hospitals and homes for the aged in the city. In this case we work together, and the paper gets up quite an article in regard to the free distribution of Roses with illustrations, etc."

REVIEW OF THE MARKET

NEW YORK, April 6.—Last Saturday cut flowers for the first time since Easter began to clean up somewhat, though mostly at sacrifice prices, and with the aid of the street men. Lilies, however, could not be moved at any price, and still made 28th st. and the Coogan building on 26th st. look like Easter week. There was a fair demand for good Tulips, and Smilax was in short supply.

Conditions this week have not at all improved. The continued warm weather causes the growers to hurry in their flowers, and the demand is not at all sufficient to consume the large shipments daily arriving. The result is only what might be expected; everything is moving off very slowly and at sacrifice prices. There are, practically, no prices today. When anyone wants to purchase flowers in anything like quantity a sale is effected only after sharp bargaining.

American Beauty Roses, specials, in some few cases of small sales realized 25c. each, but most sales are on the basis of 20c. each. The best Killarney Roses are sold at 6c. in a very few transactions, but most of sales are around 5c. for best grades. Richmond is down this week along with the other varieties, and the best quality find a slow sale at 10c. Bride and Bridesmaid find little demand at 5c. for specials.

For the best grade Lilies 4c. is the top notch price, with few sales effected at any price, and the same conditions prevail with Callas. Lily of the Valley moves rather better than some other flowers, but cannot be moved above \$3. The market is greatly overburdened with Carnations and few sales are effected at \$2.50 per 100, while it is difficult to realize 2c. for fancy grade. Good quality flowers are sold at \$1.50 per 100.

In Orchids, Cattleyas, best grade, sold at 60c. each and Cypripediums at \$1.50 per doz.

Gardenias of best grades find few buyers at \$1.50 doz.

Sweet Peas are moving at \$1 per dozen bunches, for best quality.

There are in the market some fine Snapdragons, which sell at \$1.50 per doz. for best grades. Bulbous stock moves very slowly and very little reaches the \$1 per 100 mark, though some high grade Tulips have sold for 3c. each. On Violets 20c. per 100 is about the top notch price, for doubles.

On the whole the market is still in a demoralized condition, with no improvement over the beginning of the week, and sales are made in most all cases at incredibly low figures.

PHILADELPHIA, April 5.—The cut flower market last Saturday cleaned up rather poorly. On Monday sales were only moderately brisk, but prices were firmer and somewhat in advance of those of last week. The commodities which seemed to have suffered least from the ups and downs of the Easter season were Smilax, which is still in short supply, Lily of the Valley, Orchids, Lilac, and Asparagus plumosus. The queenly Rose in all varieties, has been, as regards price, buffeted first on one cheek and then on the other till she knows not whether she is any longer a Rose or not. Today, the highest price realized for American Beauty specials was 35c. each. Top grade Killarneys were bringing 10c. each, Bride and Bridesmaid 10c. Richmond, which, by the way, has been in steadier demand, and has of late suffered less from the slump in Rose prices than any other Rose, is selling at 15c. for specials.

The best quality Lilies hardly reach the 12c. mark, and all grades of them are moving slowly, and the same is true of Callas, which bring 12c. for excellent stock. Some Lily of the Valley has realized 4c., but most sales are at a lower figure.

Good Gardenias are in full supply, but most sales effected are at low prices, considering the quality, \$3 per dozen being the high water mark. The Sweet Pea continues to be one of the most popular flowers, but abundant arrivals prohibit high prices, select stock changing hands at \$1 per 100, and from that down.

Carnations in the best grades bring as high as 4c. each. Cattleyas, and select stock, command 60c. each. Lilies, top grade, sell for \$1 per bunch of one dozen sprays. Stocks, double, with long stems realize 50c. per dozen; and the choicest long stemmed Snapdragons bring \$1.25 per bunch of one dozen.

Pansies are favorites, but no more than 5c. per bunch can be obtained. Bulbous stock moves slowly at \$3 per 100 for the very best local supplies. Asparagus plumosus brings 50c. for large bunches of select stock; and Smilax, which is in short supply, easily brings 25c. per string.

Greater confidence seems to prevail and there is a slight inclination towards better prices, but whether the warm weather has already hurried on so much stock to maturity that a shortage in some lines will arise, or whether a continuance of the same weather conditions will produce a still further supply in excess of demand remains to be seen.

BOSTON, April 5.—Business has been poor all this week with the exception of Saturday, which was for some reason or other a good business day and flowers disappeared in great quantities. The market is overburdened with stock and there is a slump in prices all around. Never before were flowers more plentiful than they are at the present, and yet of excellent quality.

Roses are very abundant and are considerably lower in price than a week ago. Of some kinds there is quite a surplus. American Beauty is more plentiful and slightly lower in price. Killarney, Richmond, and My Maryland arrive heavily. There is very little call for Bride and Bridesmaid. Bon Silene and Safrano are quite plentiful but the demand is satisfactory. Mrs. Aaron Ward is in better supply and sells well.

Carnations are arriving in great quantity and prices have dropped considerably. Prices run from \$1 to \$2 per 100, very choice grades bringing \$3 per 100.

Violets are about finished for this season, but the few that are coming are in good demand.

The hot weather is playing havoc with bulbous stock and the market is completely overstocked, with prices away off. Easter Lilies are selling now at from 4c. to 8c. Lilium candidum is arriving more freely. Callas are in great abundance and sell at from 4c. to 8c. Snapdragons are plentiful and there is a good demand for pink varieties. Mignonette, although of good quality, is not in much demand. Sweet Peas are quite plentiful and stock of good quality brings good prices.

Asparagus Sprengeri and plumosus are not over plentiful and the price holds firm. Hardy Ferns are beginning to get scarce. Cape Cod Mayflowers are coming more freely and sell well.

R. C.

CHICAGO, April 5.—The market this week is in a very unsettled and unsatisfactory condition, owing to enormous quantities of everything coming in, and while there is a heavy demand in the shipping line and for funeral work, not nearly all the stock is consumed. If the cool weather of the past few days continues it will help a lot in the reduction of stock in all lines. Roses are the hardest commodity to move, to get any money out of them, and outside of American Beauty and good Killarney, the rest are disposed of at a sacrifice, and even then much stock in the short grades is unsold.

Carnations, also, are in greater quantities than can be utilized, and it is hard to get a price for anything but the cream of the stock, which sells for \$2.50 to \$3, with shipping grades, \$1.50 to \$2. Many are glad to get even 75c. per 100 for flowers and good ones at that.

Lilies and Callas sell fairly well for the after Easter season. The price, however, has taken a tumble as in all other lines; the best are bringing \$10 per 100.

Sweet Peas in Spencers are exceptionally fine and sweet scented, better shape than at any period this season; The prices are 50c. to 75c. per 100. Violets are going off rapidly and very few are obtainable. Lilies are being shipped in from the South and, as usual, there are good, bad, and indifferent grades; 35c. to 50c. a bunch is the price, according to stock. Bulbous stock is diminishing rapidly and the market will

soon be relieved of the accumulation of it. With the exception of Narcissus and Daffodils from outdoors, there will not be any to contend with in a week or two.

Spring flowers, have already made their appearance. Trailing Arbutus, and Hepaticas are both to be had, fully two weeks earlier than customarily; they bring from \$1.25 to \$1.50 per dozen bunches. Quantities of miscellaneous flowers, Iris, Pansies, Mignonette, Daisies, Stocks, Candytuft and Snapdragons, are still observed everywhere.

Orchids are none too plentiful, more could be disposed of if to be obtained. Gardenias are, as usual, about equal in supply to the demand.

Green stock of all sorts is plentiful. Ferns are being picked over by all houses, their condition being even worse than at this season last year.

ST. LOUIS, April 4.—We are still having that fine Summer weather with us that we had all through the month of March and the planting-out season has fairly begun.

Trade among the retailers was not any too rushing last week, but they are looking to much better business towards the end of the month. Cut flowers have been in plenty at all the wholesale houses and all the stock seems to be of extra good quality.

At Kuehn's fine Roses could be had, ranging from 3c. to 8c.; Carnations from 2c. to 3c.; extra fancy 4c.; American Beauty Roses, best long fancy, \$3 per doz.; shorts, from 3c. to 6c.; Lily of the Valley, \$3 per 100; Lilies, \$10 per 100; Sweet Peas, from 25c. to 50c. per 100; Smilax, \$12.50 per 100. At the other houses of Smith, Berning and Angermueller we also find a lot of good stock running along the same prices as mentioned above.

Greenhouse men are busy with orders for planting out and are looking for a big business in this line this Spring.

ST. PATRICK.

INDIANAPOLIS, April 4.—Automobile shows, parades and store decorations have been one of the chief sources of income for the flower shops during the past week. The automobile parade was generally participated in and both natural and artificial flowers were used profusely. There are some twenty re-

tail stores with autos in the city and nearly all were nicely trimmed with foliage plants.

Funeral work keeps up splendidly and offers an outlet for the heavy cut of bulbous stock along with the poorer grades of Roses and Carnations. The writer does not mean to imply that all funeral work in this vicinity is made up of poor stock but, as is well known, design work permits of using the weaker grades of fresh stock in part. Counter trade selects the choicest articles each day and pays fair prices for fancy flowers. Boxes of Spring flowers are still in constant demand and are much used for hospital flowers.

It is difficult to handle trade intent on getting good Violets as it is almost impossible to obtain the stock, and the trade is not content with a substitute. Eastern Violets are retailing at \$1.50 to \$2 per 100; local singles at about half that amount.

Carnations do not show the effects of warmer temperatures and wholesale readily at \$2 to \$4; the general retail figure is 75c. to \$1 per doz. Smaller grades are offered in department store windows at 35c. to 50c. per doz.

The supply of Roses is more than sufficient and some of the Indianapolis product is shipped away. Bridesmaid and Bride are wholesaling at \$3 to \$8; white and pink Killarney are in fine condition at \$3 to \$10; Am. Beauty are exceptionally fine in color at \$5 to \$35. From \$1 to \$3 per doz. is the usual retail figure for all but the Am. Beauty which bring from \$1.50 to \$3 per doz.

Beautiful branches of fruit tree blossoms form an attractive setting in the flower shops and are also a source of profit for those in the city who are longing for an emblem of Spring.

Ixias, Spanish Iris, Candytuft, Pansies, Forget-me-not and Heliotrope are among the choicer cut flowers to be had.

Callas and Harrisil Lilies re still offered in quantity at \$10 to \$12.50 per 100. The new variety of Calla is making a good impression as the color is clearer and the production per plant at last fifty per cent. greater.

The plant market is not so well supplied right now but the best specimens are readily taken by the store men at profitable prices.

CUT FLOWERS AT WHOLESALE

New York

Kessler Bros., 50 W. 28th st., report that after an excellent Easter business in potted plants the window box, and bedding plant season immediately began, with sales better than usual at this time of year. Some very fine Alphonse Ricard and Beante Poitevine Geraniums are noticeable, at their store.

There will be several changes among the wholesalers and commission men on West 28th st. about May 1. W. F. Sheridan will move to No. 133, Traendly & Schenck to No. 131, and the Growers' Cut Flower Co. to No. 41 W. 28th st.

The regular monthly meeting of the directors of the N. Y. Cut Flower Exchange was held on Saturday, April 2, in the Anable Building, 24 and 26 Jackson ave., Long Island City. Only the usual routine business was transacted.

The wife of George M. Stump, the Fifth ave. florist, after a brief illness beginning last Friday night died on Tuesday of this week, of a throat disease resembling diphtheria. The funeral services were held at the family residence, 65 East 91st st., on Thursday afternoon.

The trade in window boxes is beginning. A very notable display of them is to be seen at the Café Martin, where a box at every first floor window is filled with white Daisies, and scarlet Geraniums.

The sale of the Fruit Auction Company of Tuesday last attracted a very large attendance and was most satisfactory in every way. Rhododendrons, Roses, evergreens, and ornamental shrubbery made up the bulk of the sales. The quality of everything offered was first-class, and most pleasing to the buyers. The company will have many important sales during the season and will maintain the highest standard in all stock offered.

William Elliott & Sons' regular Tuesday auction sale included bulbs and roots of all kinds, as well as full line of ornamental shrubbery and evergreens, and a large assortment of the better varieties of Rhododendrons, hardy Roses, Clematis and herbaceous Peonies; California Privet was also offered in quantity. The attendance was large and the prices obtained good. Messrs. Elliott will continue these sales throughout the season every Tuesday and Friday, beginning each day at noon, sharp, as usual. If the warm weather holds bedding plants will soon form part of the stock offered.

An Aphine demonstration under the auspices of the Nassau County Horticultural Society will be held on the date of the Society's next meeting, Wednesday, April 13, at Pembroke Hall, Glen Cove, L. I. between 3 and 6 o'clock p.m. The manufacturers are anxious to have gardeners and growers submit a goodly collection of insect-infested plants, so that it can be proved decisively that Aphine will do all that is claimed for it. The Aphine Mfg. Co. last month did the largest business in its history. The merits of Aphine have been discovered both on the Pacific Coast and in the South, from which points large orders are being received.

John Walter Reimels, son of John Reimels of Woodhaven, L. I., was married on April 1 at North Chelmsford, Mass., to Miss Harriet Lincoln Shaw. Harry Reimels, brother of the groom, was best man.

Joseph Proval, connected with the establishment of Louis Schmutz, Flatbush, did not sail for Europe last week on the Lusitania as he had planned. When he went to bed on Tuesday night at his home, 131 Clarkson st., he had nearly \$1000 in his pockets, but when he arose early next day every cent of it was gone. A burglar, whom the police think must have been aware of the situation, had broken into the house and got the money without disturbing Proval's sleep.

The April meeting of the New York Florists' Club will be held next Monday evening, April 11, at the Club's rooms, Grand Opera House Building, 23d st. and Eighth ave., at 7.30 p.m. The business for the evening will be quite interesting, and include a report from the joint committees having in charge the securing of a permanent plant market, a report which may call for action. Anton Zvolanek of Bound Brook is to deliver an address covering his recent visit to California. Frank R. Piersou will talk of the arrangements made for the S. A. F. convention at Rochester. Roses and Sweet Peas are called for as exhibits for the evening; and Chairman Nugent of the entertainment committee will see to it that there is a good display of personal comforts in the cauteen at recess.

Philadelphia

The season here is so forward that Magnolias are in bloom, and some trees and shrubs are in leaf. The lawns are as green as they usually are in May.

At 10 o'clock a.m., April 4, the president and other officers of the Select Council, and of the Common Council of Philadelphia, were sworn in at the Council Chambers, City Hall. J. J. Habermehl's Sons, the Bellevue-Stratford florists, had the decorating. In the corridors were placed large specimens of Bay trees and Palms; in the council chambers were used bankings of Azaleas and Rhododendrons, with Palms in the corners. The tables were adorned with vases of American Beauty Roses in one chamber, and Killarney Roses in the other. Though the decorations were not elaborate they were in good taste and effective.

The Robert Craig Co. is very busy with the aftermath of a successful Easter "house cleaning." It is found that on account of the unprecedented warm weather, retail customers are even now asking for bedding plants.

Alfred Campbell is cutting some nice Kaiserin Roses and Gardenias.

John McIntyre continues to make a specialty of Lilacs, selling not only to the local trade but also shipping to out-of-town buyers.

At S. S. Pennock-Meehan Co.'s, where almost an entire line of cut flowers is handled, the usual busy scene is noticeable.

At W. E. McKissick & Bros.' some unusually fine Pansies, bunched by colors, especially the pure yellows and whites, have been worthy of note, as well as some Campbell Violets of good quality.

Robert Scott & Son of Sharon Hill are adding to their range of glass.

Samuel T. Freeman & Co., auctioneers, will hold their annual sale of imported nursery stock at 1519 Chestnut st., April 11.

At the Leo Niessen Co. a full line of roses and of Spring flowers of excellent quality was noticeable.

The extremely warm weather makes it almost impossible to receive southern Paeonies in good condition.

Boston

Trade has been quiet here since Easter and will not straighten out to normal conditions for a few days yet. Saturday was an exception; there was a fair demand in all departments and goods were cleaned up fairly well. The weather has been exceptionally mild and has brought flowers along so plentifully that markets are overstocked.

Outdoor work of all kinds is being pushed ahead at a great rate for this early date and nurserymen fear that this will be an exceptionally short season if the mild weather continues much longer; they are busy, indeed, and large consignments are being shipped daily of trees, shrubs and herbaceous plants. They report that they were never loaded down so heavily with orders as they are this year, and if they only get a little cooler weather their business will be unprecedented.

Ernest Stickel, the genial and obliging salesman at 1 Park St. Market, for the Montrose Greenhouses, has been confined to his home for the past week with a severe cold. We miss him and wish him a speedy recovery.

Eber Holmes, the proprietor of the Montrose Greenhouses, took his place at the market during his absence.

Mr. Twin of the King Construction Co. has been in town this week and is kept very busy. His firm does a large business in this section of the country and the greenhouses which they are building are highly spoken of.

W. E. Lenk, superintendent of the Halifax Garden Co., Halifax, Mass., was a visitor this week. This company has a very large range of houses which has been devoted entirely to vegetable growing; the firm is now going to change to Carnations and Violets in several of its houses. Mr. Lenk has been very successful in vegetable growing and we expect he will produce just as good quality in his cut flower business.

Kidder Bros., Lincoln, Mass., are the only growers who are picking good Violets. Their Violets during the Winter and Spring have been as good as any that have been brought to the market; they were especially careful in their bunching and for their extra care and trouble they made readier sales and better prices. They have about 30,000 sq. ft. of glass, which is devoted principally to Carnations, Violets and Stevia. They picked 50,000 Violets for Easter; for Christmas they make a specialty of

Stevia, of which they grow a very fine form, obtained by careful selection; in its season they sell as high as 500 bunches per day at remunerative prices.

A. S. Parker of Stoneham has been unwell for the past week; his friends and associates hope he will soon be quite well again.

A. N. Pierson, Cromwell, Conn., is shipping to 1 Park St. Market excellent Maryland, Killarney, both pink and white, and also very fine Richmond Roses.

H. W. Field of Northampton is shipping to 1 Park St. Market some extra well-grown Richmond Roses, which are handled by Thos. Peglar.

Willow Hill Greenhouses, of which A. Scott is proprietor, are growing large quantities of Callas, which have been sold at 1 Park St. Market during the Winter and Spring; they also make a specialty of yellow Marguerites which are very well grown.

It is the same story in all lines of business; the newer and sometimes the better things push the older varieties aside and are in turn replaced by new favorites. We remember that only a few years ago Bride and Bridesmaid were thought to be the very highest type of perfection in Roses for indoor growing. Now they have been replaced by others and, this week, could hardly be sold at all; we think there will be very few growers of these varieties for next year. We must not discard them altogether. Bon Silene and Safrano were discarded twenty years ago, but they are back again and are general favorites with people of refinement and good taste. So perhaps the day will come when Bride and Bridesmaid Roses will be favorites again as they were in the past. We are loth to part with the old friends who have given to many a man his daily bread and butter.

Mann Bros. are handling the best Lilium candidum we have seen this year. It's too bad there was not more of this lovely Lily, the true Easter Lily, grown for the Easter trade. It is a much prettier Lily in every way, when well grown, than the longiflorum types. Their Spanish Irises, of which they have a large crop, are very fine. This is a most lovely flower and ought to be in great demand.

Aaron Ward Rose is a general favorite and is much more abundant now than it was a few weeks ago; it is handled by most of the retail stores. Wm. H. Elliott seems to be the principal grower of this new arrival.

Waban Rose Conservatories are shipping very fine quality Roses to their wholesale rooms at 3 Somerset st. Their American Beauty are a very fine grade; they have splendid foliage and very long stout stems. Their Killarney and Richmond are of remarkably fine quality. The firm reports an exceptional good Easter business and last Saturday, April 2, was the best day for sales they have had in years, outside of holidays.

Joseph Fagan White of Doyle's is drawn for the jury and his term begins April 4.

Welch Bros. had one good large order this week. It was for 30,000 Carnations and was filled with high-grade stock.

Samuel Hudson, who has been at W. A. Manda's, South Orange, N. J., for some time, is now at the Harvard Botanic Garden, in charge of the greenhouse.

James Wheeler has located at Natick and is busy making improvements on his 30-acre farm and preparing foundations for a range of new houses.

A few days ago we visited Daniel White, a private gardener at North Easton, and saw Snapdragon with stems 8 ft. long and immense long heads of flowers. We never saw anything like this before and we have been wondering if any commercial establishment has grown any as large as these.

Rhododendron precox is a fine flower here now; this is the shortest early shrub that blossoms in this vicinity. It is rather scarce and we would recommend nurserymen to get stock. Our plant is about 5 ft. in height and twenty-five years old. Prunus Davidiana is also in bloom and is very fine indeed at this early date. Forsythias and Cornus Mas are waves of yellow, and for outdoor hardy herbaceous plants there is a very long list in bloom, in fact more than we ever saw before at this early date. These notes about shrubbery and hardy plants will give those in the trade a chance to compare notes in other sections of the country.

The florists of Cambridge have been very busy for the past week making funeral pieces of which there were many and most elaborate ones sent to the residence of the late Prof. Agassiz, who was

Chicago

Fortunately for all in the trade, the weather has in the past two or three days been more seasonable, and can now be described as real April weather. Monday arrived much cooler, with frequent showers that were most acceptable, rain being needed badly. Never has there been known such a warm, sunny or dry March as just passed. There was not one day in the entire month that the sun did not shine some portion of the day. The logical effect of such weather can easily be surmised regarding stock. Lilacs, Tulips and Jonquils are already swarming into the market from a very short distance south of this city, which of course has the effect of depressing the prices for indoor stock in these lines, even in Chicago. Daffodils have been in bloom outdoors for a week past. Cherry and Peach trees are also in full bloom, and this cannot be remembered to have been the case at so early a period before.

The Rose crop for the past two weeks has been enormous, and has caused much anxiety to the wholesalers, as with the excessive heat stock has become soft, which makes it very undesirable for shipping. However, as the large growers are

already beginning to throw out old stock and are replanting this will soon tend to have an effect on the market that will be very noticeable. It is stated by many of the growers that never before have they started replanting at the opening of April, but with the progression of young stock ready for the benches, and the rapid advancement of the crop of Roses, there is no other alternative.

With an immense quantity of stock, in all lines available there is a large volume of business being done, but the accumulation of dollars and cents does not amount to so much, as prices are controlled by the glutted condition of the market, and stock must be exceptionally fine to bring quoted prices.

The early Spring weather has given a start to the work of the Chicago City Garden's Association, and last Sunday the tracts of land, for the cultivation of Gardens, that have been loaned to the Association by the McCormick estate, near the Bridewell, and by the Western Electric Co., near Hawthorn, also divided into lots for garden purposes for the poor of the city, were disposed of, the distribution of same being through drawing of lots by the people at Hull House. Two hundred lots have already been taken possession of with the same number still in the balance.

The work of City Forester Prost in interesting the school children in gardening is giving impetus to the farming craze throughout the city. Mr. Prost says the enthusiasm of the children is almost unbounded.

The lawsuit brought by the Government against the glass trust should be discussed by all the florists' clubs and societies throughout the country, as it is an important feature in their line and presents a very serious question to all who use glass. Every means should be taken to assist the Government to win this suit.

The double funeral of Robert W. Patterson, editor-in-chief of the Chicago Tribune, and his mother, Mrs. Julia A. Patterson, on Monday last kept many of the florists busy all the morning, as many flowers and designs of all descriptions were ordered by the many friends of both. Ernst Wienhoeber Co. had the bulk of the work for the family, the principal piece being a casket cover of

Lily of the Valley, bordered with Violets and Ferns for the casket of R. W. Patterson, besides numerous other designs and flat pieces. A. Lange came in for a share, having all the work from the Tribune office. Many other florists were also kept busy with outside orders.

Mr. Vaughan, of Vaughan & Sperry, says that this season is very much like the season of 1905, when the Peonies of this locality were on the market almost as early as those from the South, and it looks like a repetition this Spring. The same applies to Daffodils this season, as our own local outdoor stock is very little in arrears with that shipped from southern points.

It is surprising what activity is displayed by some of our old-time florists, since the fine weather arrived. Wm. Winterson, the father of E. F. and L. H. Winterson is busy among the shrubs and plants at the Winterson Seed Store, despite his 78 years.

The friends of Ned Washburn will be pleased to hear that news received from California is to the effect that he is improving slowly but steadily.

Mrs. Schroeder of Columbus, Nehr, formerly Miss Manchester, florist, of Chicago, is here on an extended visit to relatives and friends.

Mrs. Burkhardt of E. H. Hunt Co., who was absent all last week, through illness, is at her post again.

Anthony Varley, who had charge of the grounds of the Edison Commonwealth Electric Co., and who was gardener for Mrs. Rosenwald, 49th st. and Ellis ave. for a number of years, died four weeks ago of pneumonia.

Milo Crozier of Cedar Rapids, Ia., spent Monday in town. Mr. Crozier is starting on a trip to the East.

Charles L. Washburn and several of the boys took an auto trip to Belmont, Ill., to visit the Kidwell greenhouses. He says that at present there, as everywhere, they are busy with the usual Spring work.

J. E. Craig says that since Easter a very busy time with funeral work has been experienced, and he is open to any arrangements in the line of June weddings that may come his way.

The Bohannon Floral Co. had a most strenuous week following Easter. On Monday last it had all the floral ar-

rangements for the Prendergast-Kettell wedding, including the church and home decorations and bridal bouquets, work which was most elaborate. On Thursday, besides four banquets, Mr. Bohannon had a dinner decoration on the North Side, and being pressed for time and fearing to be late he called a taxicab, putting the flowers and basket for the center of the table inside. He says he lost no time in putting the thing in shape while in the cab and arrived at his destination just in time. Mr. Bohannon says he can't help but laugh every time he thinks of his trying to make up flowers with the jostling and shaking of the cab, and trusts he will not be called on to repeat the experience.

Harry Rowe says that he certainly had a good Easter business; in fact, he does not see how he could possibly have handled more than he did.

The Blackstone Hotel will be dedicated at a banquet Saturday evening, April 9, and will be formally opened to the public April 15. Mangel has the decorations throughout.

Bowling

The Chicago Florists' League bowled on Thursday, March 31, the following score being the result: Carnations, totals, 748, 771, 806; Roses, totals, 717, 714, 726; Orchids, totals, 731, 737, 734; Violets, totals, 723, 737, 697.

The teams now stand with Carnations and Roses a tie. On Thursday of this week the teams will bowl six games each, thus making up one of their postponed games.

The onrush of the counter trade before the mail order trade has scarcely begun makes it almost impossible for Vaughan's Seed Store to keep up with the orders, and necessitates utilizing the help in both capacities at one time. Usually the mail order business has quieted down before the counter trade begins. There is no doubt, however, but what the staff will rise to the emergency.

Charles Drissler, who has been in the employ of Wietor Brothers for the past nine years, was married last Tuesday morning to Miss Mary Solt. A reception was held at Mr. Drissler's home, 4734 North Artesian ave., in the evening.

Engle Brothers of South Evanston have started the erection of two additional greenhouses.

Visitors: C. H. Woolsey, Rockford, Ill.; Hans Tobler, Traverse City, Mich.

Cincinnati

The warm weather has had the effect of sending large quantities of all kinds of flowers to the market, consequently the prices have dropped materially. American Beauty Roses are holding up better than anything else and sell out clean; the best grade is now selling at \$3 per dozen. Callas have been splendid stock all through the season, in fact I have never known them to sell so well, but at the present time the stock is beginning to accumulate; they have sold at \$1 to \$1.50 per dozen. Easter Lilies are now making their way into the market, in quantities, a little late for Easter. Bulbous stock is very plentiful, but on the wane. The retail stores are only busy with funeral work, once in a while a small decoration. With the advent of cooler weather, and stock shortening up somewhat, things will assume normal conditions.

J. T. Fisher of Huntsville, Ala. was a caller last Friday. J. T. Herdegen of Aurora, Ind., was also in the city.

C. J. Ohmer made his first shipment of Asparagus plumosus last week. It arrived in fine condition, was of splendid quality, and sold at sight. He states that he now has one acre planted to Asparagus, which will by Fall give him a pretty good lot to cut from. At the present time he says it is pretty warm down at West Palm Beach.

E. G. GILLET.

COVINGTON, IND.—W. C. Welch, florist, was on March 15 stricken with illness while in Danville, the trouble later proving to be an abscess at the base of the brain.

Providence, R. I.

Wm. Hay is building a house 300x65 ft. for Roses; he expects to have it planted July 1.

The Public Parks Association has asked the city fathers for an appropriation for the building of greenhouses at Roger Williams Park.

Jeremiah Donovan, the oldest living veteran florist and gardener in this section, called on his friend J. B. Canning on Monday last. Mr. Donovan does not look within 20 years of his age, which is 81, and is a very hale and active man.

Louis Patry, foreman for John F. Wood, has fully recovered from his recent fall, and was at his post at Easter.

Mr. and Mrs. J. B. Canning are away visiting friends in the trade in New York and Philadelphia. They will stay a week at Atlantic City before returning.

Eugene McCarron has been exceptionally busy with funeral work, and Monday last his office was filled with made-up pieces which attracted much attention.

George Kelly made an extra fine display of blooming plants at Easter, and is still showing Spring flowers in great variety. He does considerable landscape work and is very busy thereat just now.

Matthew MacNair reports the best Easter and Spring trade in his time in the business. He makes an elaborate window display and maintains two of the most artistic delivery wagons in the city.

John A. Macrae reports the banner Easter trade of his career; he looks forward to a good Spring business.

Edward Murray, who was with Johnston Bros. for a number of years, is now captain and star first rush on the Amsterdam (N. Y.) Polo Team. He was at his home here for the Easter holidays.

William B. Hazard reports a good trade at his new store on Mathewson st. He was fortunate to get a store in this location, as it is considered one of the best here.

William Appleton on Broadway is busy with landscape work. He makes a specialty of this and nursery work in connection with his greenhouse business.

J. L. Reynolds of T. J. Johnston & Co., is convalescing very fast. His many friends will be pleased to see him at his post in a few days.

Johnston Brothers, 38 Dorrance st., have a special sale of Azaleas April 2, which went off well.

The first step in the development of the new city nursery at Roger Williams Park, was taken April 1, when 500 young Tulip trees were taken to the park for planting. In addition another shipment is expected consisting of 500 red Oaks and 1000 Poplars, which, when planted, will make a total of over 1500 saplings in the ground at the new nursery. City Forester Johnson is getting ready to do some planting around the precipitation tanks at Fields' Point, and the work will probably be started in a week or two. The trees which will be used are the product of the park nursery, mostly Maples.

Condition of Trade

Prices have receded considerably this Easter. Business has been fairly good the entire past week, causing heavy buying, but yet the supply is still in excess of the demand. Wholesalers and retailers make cheerful reports of their Easter trade. Some of the growers have Sweet Peas in quantity, and will be glad to see the end of the Violet season.

The demand for cut Lilies is heavy and they are not over abundant, selling at \$10 to \$12 per 100. First-class Roses of all varieties are plentiful and sell: American Beauty, \$10 to \$15 per 100; Killarney, My Maryland and Mrs. Taft, \$8 to \$10; Richmond, \$12 to \$15; Bride and Bridesmaid, \$6 to \$8. In lots of 1000 all the above can be bought much lower.

Orchids average 50c. each. Good varieties of first-class Carnations bring from \$2 to \$3.

Bulbous stock is very plentiful and fetches \$1.50 to \$3.

Trailing Arbutus has made its appearance and \$1.50 per dozen bunches is the price. Daisies, Stocks, Pansies and Mignonette are plentiful. Asparagus, Adiantum, Smilax and hardy and fancy Ferns have shortened up considerably since the Easter trade, but maintain their regular market value. Gardenias are coming in more plentifully at \$25 to \$35 per 100; Soapdragon, \$2 to \$4; Sweet Peas, 75c. to \$1; miniature Dutch Hyacinths, \$4 per 100; Callas, 75c. to \$1 per doz.

G. A. J.

Prices Advertised in these Columns are for THE TRADE ONLY

Hartford, Conn.

Easter business was far ahead of last year in every respect. Stock was more plentiful and could not have been in better condition. The week of exceptionally fine weather had much to do with increasing the sales and bringing the stock to the state of perfection that it was in. Blooming plants were more in demand than cut flowers, and the Easter Lilies were most called for and sold generally at 20c. per blossom, the plants with from five to eight blooms being the best sellers. Azaleas were next in demand and some very fine plants were in the market. They sold at from \$2 to \$5 each; the medium priced ones sold the best. Single and double Daffodils in pans sold well at from 50c. to \$1 per pan, as did Tulips in pans at 35c. and 50c. Hyacinths in pots and pans sold exceptionally well; a single pot sold for 25c. while the pans brought from \$1 to \$2 each, according to the number of bulbs in the pan. There was not an over supply of Genistas and those that were to be had were not especially good. They brought from \$1 to \$2 each. Rambler Roses and Lilacs sold well at \$3 and \$4 each.

As usual, Violets were most called for in the cut flower line. The supply lasted up to early Saturday evening, at which time orders had to be refused. They were good in quality and sold everywhere at \$1 per 100. There was a good supply of Carnations, and they brought 75c. and \$1 per dozen; the quality was exceptionally good. The demand for Roses was about equal to the supply. American Beauty brought \$8 to \$10 per doz., other varieties \$1.50 to \$2.50 per doz.; they were all very fine in quality. Sweet Peas sold well at \$1.50 per 100, as did Cat-tleaves at 75c. and \$1 per blossom. Quantities of Daffodils and Tulips were disposed of at 50c. per dozen. Lily of the Valley brought 75c. per doz., and Mignonette 50c. and \$1 per doz. All the dealers report being well pleased with the results of the Easter trade. Most of them were completely sold out by Sunday noon. J. F. COOMBS.

Cattle Manure in Bags
Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

Pulverized
Sheep Manure

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

The Pulverized Manure Company
34 Union Stock Yards Chicago

Stop The Caterpillars With Strokum
Bind It Around Your Trees

DO it now, don't wait until they have crawled up and spun their webs in the trees and hatched out by the thousands. It is easier to prevent their going up than it is to burn them out after they are up.

Don't wait until they are dropping down by their silken threads to spin their cocoons for another crop—stop the progress of the first crop by banding your trees with Strokum.

Anyone can put Strokum on, and once on, it remains effective through the entire season. Caterpillars or tussock moths can't crawl under it, and won't crawl over it. Better than burlap, cotton or fly paper. Does not disfigure the tree. Does not dry up and stick to bark as does the smeared-on tar preparations. Strokum is entirely harmless. Endorsed by the leading horticulturists and tree experts.

Send \$3.00 at once for a sample package of fifteen pounds, which is enough to band fifteen trees three feet around. Delivered free anywhere East of the Mississippi; 50c. extra West of it. Send for our illustrated booklet.

The Mastin Automatic White-Wash and Spraying Machine
is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs. Ask your dealer about our Extension Hose, Extension Rods, and the Mastin White-wash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

Are you going to build a Sash Bar, Semi-Iron Frame or Iron Frame Greenhouse? We have interested others in our methods of construction and in our prices—why not you?

ISAAC CASSIDY,
Summer Ave. and Erie R. R.
NEWARK, N. J.

Early propagated plants struggle along in a 2-inch pot; give them a shift into a size larger, the extra work doing it is well spent, even if you can't see it now. If a cold frame can be had, the young stock might as well be put there for the next two or three weeks. Have sash ready to cover the plants in case of bad weather; we may not have any serious change, yet it doesn't pay to run any chances in that respect. Don't put the sash on in the day time, on fair days; be ready only. It should be almost needless to say don't allow the young stock to run up into flowering shoots—that only weakens the little plants; pinch them at the first sign of the stem and thereby encourage them to branch out from the base.

The Retail Grower

A Few Suggestions for April

There has never been a Spring like this, March and 31 days of sunshine. One simply can't get around to transplant and shift the stock quick enough. This must be quite a problem with many small growers. We ourselves are fully four weeks ahead of last year, as far as the size of the bedding stock is concerned. We have Geraniums, Cannas and Salvias ready to go out for bedding, and our neighbors are in the same shape. With these plants, when in large enough pots and given plenty of room, no harm is done, but the small stock in 2" or 2 1/2" pots, as well as in flats, is liable to suffer, if not shifted in time. Nothing is worse than a spindly plant for bedding, no matter what variety it may be. Don't neglect the young stock now, it is too important. Many of us who conduct retail places have out to do for customers, which no doubt pays well, and yet it is certainly wrong to neglect the indoor work on account of it. After all, it hurts but little if a certain shrub is pruned or a bed spaded over this week or the next, but not so with the transplanting of the bedding stock when 75° and 80° in the shade is an every day occurrence for March. When a plant needs transplanting, or more room, if it doesn't get it it suffers and is bound to show the effects of it sooner or later. In our desire to make a few dollars we quite frequently attempt to do too many things at the same time, and the retail grower has a splendid chance to get caught that way, no one suffering but himself. Spend a little time each day now to plan out the work so as to do the greatest good—it pays.

Lowell, Mass.

Lowell is about 26 miles from Boston and has some 100,000 population. Business here during the Easter season was unusually brisk and between the Easter trade and the usual run of funeral work all stores were working day and night. There are six retail stores here, one being opened about the middle of March, in time to get a nice share of Easter trade.

Wm. J. Collins, 23 Gorham st., reports a very good season, which is the best he has had during the seven years the store has been open. A recent order was for a design showing part of an engine, with balance wheel and piston rod, etc., for

the funeral of a local engineer; the piece was 6 ft. long.

Whittet & Co. of Summer st. report a good Easter and a great deal of funeral trade. This firm is making some alterations to their store, including a longer entrance.

R. A. Griffiths has been in his present location some 18 years and has had a very fine Easter trade. The funeral work made here is very much out of the ordinary and all pieces are made up from original ideas of Mr. Griffiths.

Morse & Beals, 8 Merrimack sq., have a splendid location on a main business street, and reported "sold out" for an Easter trade report. The store is tastefully arranged and the window is one which is unusually well fitted for display. The make-up counter is of marble and for the wrapping table there is a sheet of heavy brass which is kept well polished, this is somewhat of a novelty and makes a durable top to an otherwise easily cut up table top.

W. H. Shedd of Woburn st., South Lowell, has some 22,500 sq. ft. of glass, mainly devoted to Carnations, although considerable space is allotted to Violets, Sweet Peas, etc. Mr. Shedd was formerly a vegetable grower, but for the past three years has been raising flowers instead, with a few vegetable plants.

James Harding & Son have at present some 7000 sq. ft. of glass in which they grow Carnations and Sweet Peas for wholesale market and for local retail trade. Mr. Harding, Sr., is working out a number of seedlings of merit—one Carnation seen measured over 4 1/2", and one has been cut which was over 5" in diameter, on a stem 42" long. The firm is having splendid success in their Carnation work and will be heard from on this stock before long. The house was built about three years ago, but Mr. Harding has only occupied it for about one year.

James J. McManmon of 6 Prescott st. has some 75 acres in nursery stock and about one acre under glass, to supply his retail flower shop near Merrimack sq., in Lowell. He makes a specialty of hardy and evergreen stock although considerable trade is had in fruit trees and large stock. At this time he has a quantity of large Elms, Maples, Pines and Spruces, ranging up to 25 ft. in height and up to 6" in diameter. Considerable ground is devoted to Phlox, Iris and Dahlias, of which he has great variety. Mr. McManmon has been here some 14 years, and at this time employs 25 men at the nursery and greenhouses, and a number of salesmen all about the country. A nice business is done in the store in seeds and supplies for farm and garden, and the past Easter season was the best he ever had.

A (W)HOLESOME OCCUPATION.—Mrs. Subbiss (who has hired a man to plant shade trees)—Digging out the holes, I see, Mr. Lannigan.

Lannigan—No, mum. Oi'm diggin' out the dirt an' lavin' the holes.—*Boston Transcript.*

Easter at Los Angeles

Easter Sunday was a wet one. Rain began to fall at 5 a.m. and kept falling until 3 p.m. The temperature was low (41°) and artificial heat in dwellings was necessary for comfort. The cut flower trade was good; prices were about the same as a year ago, with the possible exception of Cattleya and Lælia blooms which sold at \$2 each this season, an advance of 50c. over last year.

L. Harrisli were in great abundance retailing at one to two dollars a plant with three to nine blooms each. Of these Tom Wright's greenhouses turned out the best stock this year. He has had them in his Flower Shop regularly since Christmas. He bought only the best grade bulbs last fall for which he paid \$200 per 1000 and, so far as I am aware, it is the first time such high-class bulbs have been planted by any grower here. The result in flowers of unusually large size proved the wisdom of the investment, then, too, his greenhouse superintendent is a man above the average in skill in cut flower growing.

Tulips sold for \$1.50 per dozen. To an eastern grower of these flowers the price may seem fabulous. The fact is the early varieties are a failure here, and we have not yet learned all there is to know about forcing the late sorts. The low relative humidity of our climate, and the generally high temperature of the atmosphere, present problems to the grower which must be solved before cheap Tulip blooms on long stems may be had in our markets.

Callas have no commercial value. They grow in all the yards (and all residences have yards in Los Angeles) and the flowers may be had for the asking. Hyacinths grown in the open are of finer quality this season than I have seen here; they retail at 50c. per dozen.

Carnations, field grown, because of sunny days and scarcely any rain for a month, are fine and plentiful at 25c. to 30c. per dozen, but when fine flowers are wanted, even in this climate, the greenhouse-grown stock is in demand at 75c. to \$1.50 per doz. The Wolfskill houses sent in the finest Astilbe Japonica and cyclamen this season. The first named sold at \$1 and \$2 each; the second at 25c. to 75c. each. Roses retailed at \$1 to \$3 per doz., except American Beauty, which sold well at \$8 to \$15.

The Narcissus family are increasing in popularity and in the quantities grown. They are so well suited to our climate that, beginning with Paperwhites about the last of November, a succession of flowers may be had until May the first from the open ground. They found a ready sale at 25c. per doz. The time will come when they, like Callas, will have no commercial value here because

everybody will have them in their yards. And when our park commissioners shall have learned that they may be successfully grown over the hills without any attention other than some fertilizer applied once a year, the parks of Los Angeles will contain Narcissus beds, acres in extent, and become famous for their beauty during the Winter months when we always have at least 50,000 visitors with us from the frozen, blizzard-stricken country east of the Rocky Mountains.

A peculiar feature of these late rains is that they cover our mountain peaks with snow. An electric railway runs to the top of one of these, and the latter part of March and the first half of April, men and women of means, filled with the spirit of mirth, take empty sugar barrels to its summit and bring them back to town filled with snow, and a game of snowball is indulged in on our streets while it lasts, which is but a short time. This is the only means our native sons and daughters have of knowing how snow looks and feels to the touch. The reported depth of snow at this writing (March 28) at the summit of the mountain is fifteen inches.

One of our large hotels has planned, for the entertainments of its guests, a snowballing party on the lawn, where Geraniums, Marguerites, Roses, Heliotrope, Narcissus and Oxalis are all in full bloom. If we do not have a frost within ten days that will damage some of these flowers we shall be agreeably surprised; the temperature is 42° this morning.

P. D. BARNHART.

Albany, N. Y.

Easter business this year was way ahead of expectations, all plants and cut flowers having a ready sale and at top prices. In the plant line Azaleas had the lead. Every store was well stocked for the demand and all comers could find what they wished to purchase.

F. A. Danker has purchased a fine large top delivery wagon and a fine Canadian span of roan horses to match, which made a strong hit at Easter time.

Jack Butts, with W. C. King, is laid up with pneumonia, having been taken with the sickness at Easter time. Sam Goldring is also laid up with a broken wrist, which made W. C. King short handed at the busy time.

W. W. Hannell of Watervliet, N. Y., had a beautiful supply of Rambler Roses, the new Newport Fairy and also Lady Gay, which were exceedingly fine and large plants.

The wholesalers around Albany were all cleaned up on stock of all kinds. They were well satisfied with results.

The next regular meeting of the Albany Florists' Club will be held the first Thursday in April, which will be followed by a stag and smoker for all members. There will be a few new applications presented for membership.

Visitors: Stephen Green of H. Bayersdorfer & Co., Philadelphia; H. Adler, with H. Adler & Sons. W. C. K.

SAN FRANCISCO, CAL.—Alex. Mann Jr., florist, has filed a voluntary petition in bankruptcy, with liabilities \$3062 and assets nil.

Greenhouse Materials

If it's ventilating apparatus you want, here's our self-closing that is a crackerjack. Easy to put up, powerful, light running, needs oiling but once a year.

Order your materials for your entire house of us, and we will see to it that one of our competent construction men starts your men off right in erecting it. We make no charge for such assistance.

We have Pecky Cypress for your benches if you want it. Send for catalog.

CENTRALIZE
YOUR HEATING PLANT

The economy in heating large ranges of glass from a central plant is so great that the first cost is repaid in a few years.

Following are a few plants which we designed and installed:

THOMAS YOUNG, JR.
BOUND BROOK, N. J.

150,000 sq. ft. glass heated by steam from a central plant; the exhaust from pumps is passed through a condenser which heats 2-150 foot propagating houses with hot water.

F. R. PIERSON CO.
SCARBOROUGH-ON-HUDSON, N. Y.
150,000 sq. ft. glass heated by steam from a central plant; the steam is passed through condensers and the hot water is forced through the houses with circulators.

JOHN N. MAY
SUMMIT, N. J.

75,000 sq. ft. glass heated by steam from a central plant.

New Bedford, Mass.

Trade here the past week has been good. The very warm weather we are having has brought out the blooms quickly. Carnations are now retailing at 50c. per doz. Roses of good quality bring \$1.50 per doz. Violets are still with us, but won't last much longer if the present hot weather continues; they are selling at 75c. and \$1 per 100 blooms. Sweet Peas sell at 75c. and \$1 per 100. Bulbous stock is in good shape; Tulips, Daffodils and Paperwhites sell at 50c. per doz., some single Narcissus at 35c. per doz., double Tulips at 60c. per doz. Callas bring \$2 per doz., Easter Lilies \$2.50 per doz. Snapdragon commands 75c. and \$1 per doz. Candytuft, Alyssum and other fine flowers come in handily for funeral work.

Funeral work has been very good the past week or so, using up enormous quantities of stock.

H. V. Sowle reports a good clean up for Easter.

S. S. Peckham will have pretty nearly 10,000 Geraniums for Spring, besides other bedding plants.

Wm. E. Mosher has been tearing down some of the old houses on Walter P. Winsor's place. This is the gentleman after whom the Winsor Carnation was named.

Wm. S. Brown, Peter Murray, E. Y. Peirce, R. H. Woodhouse and others are busy now with garden work.

E. H. Chamberlain reports business as good with him.

A. H. Astley will have an immense lot of Ten Week Stocks.

Lawns are beginning to look green, and soon it will be time for cutting them again.

Everyone has now gotten over the Easter rush and all are well satisfied. The plant trade was the best ever.

Chamberlain is showing some nice Cyclamen at his store.

Wm. P. Peirce had some nice Whitman's Ferns for Easter.

One of our department stores is now selling Rose bushes at the low price of 10c. each.

Memorial Day will be the next rush for us all.

F. A. Treadup, Jr., will have an immense quantity of Aster plants this Spring for sale, and also for his own planting.

The weather is warm, all right for planting young Carnations if it would hold out.

HORTICO.

Washington, D.C.

March went out like a lamb in the same placid manner peculiar to itself as a record-breaker throughout. The premature warm weather, with the mercury as high as 84°, rushed the young buds and many fruit trees are in full blossom, while the forests are taking on their Spring attire and the Judas and Dogwoods are opening nicely with a profusion of flowers. Small plants on the outside are again held in check by the drought which remained unbroken from the fore part of March to April 3, when a light rain fell. All planting has been greatly delayed as the soil is too dry to till.

The usual quietude which follows the Easter rush is on in Washington, while the stores are well filled with good stock and plenty of it in both cut flowers and plants.

**Unquestionably The Lightest, Safest House Built**

A complete iron frame, completely supported with the required number of columns to take from the ridge and eaves the tremendous strain of roof weight, and wind and snow pressure.

The greenhouse engineers who designed it, first made sure it was strong enough, then they made it light enough.

It is the Sectional Iron Frame Construction, which is not the cheapest house you can build, but it costs what is necessary to make it **safe and sure**.

We have several other photos of this house we would like to have you see. If interested, write and let us know.

European Notes

Dry, cool and very sunny conditions still continue and the easterly winds are causing the wet heavy lands to cake over as hard as the high road so that a few warm showers would be very acceptable.

The lighter lands are now in splendid working order and Beets and Mangels are being transplanted under conditions that would have been considered ideal in the middle of February. The chief difficulty appears to exist in the Loire Valley from which reports are just to hand stating that many beds of plants are still almost inaccessible and much of the land too wet to be cultivated. As we are now in April it will soon be too late to do anything this year.

On lands that are workable nothing now stands in the way of Spring sowings but the intense stupidity of the growers, and this unfortunately causes worry and loss to us all.

Lucerne (Alfalfa) is such an important article for the seedsmen all the world over that the following table of the results of experiments conducted by Dr. Steiblerio, Switzerland will be read with interest. The varieties tested were Provence, Turkestan and Spanish; two separate plots, each of 33 metres square, were sown, with results as follows:

	Provence	Turkestan	Spanish
	*kilog.	kilog.	kilog.
1904: 2 cuts	67.0	63.8	58.2
1905: 3 cuts	191.8	160.6	138.6
1906: 3 cuts	207.5	152.9	157.1
1907: 3 cuts	193.6	141.7	135.2
1908: 3 cuts	172.7	108.4	156.4
1909: 2 cuts	127.3	86.8	105.0

Average per annum 161.5 118.9 128.4

* 5 Kilos equal 11 pounds.

It will be readily seen that both for productiveness and durability the Provence seed is far ahead of either of its rivals. It is, however, right to state

"Horseshoe Brand" Products

The pulse of an elephant beats 30 times per minute; that of a horse 40; of a man 70, and that of a mouse about 700—or in proportion to size. An experienced horse trainer once said that he had known an unkind word to increase the pulse beats of a thoroughbred 10 per minute. Now, if an unkind word to a thoroughbred horse will increase his pulse beats 10 per minute, how fast will a thoroughbred florist's pulse beat when he realizes he is stung on Lily bulbs? If you are a thoroughbred and want the best in bulbs, buy the Horseshoe Brand Products

SUBSCRIBERS PLEASE NOTE.—The
Florists' Exchange is a trade paper, and
its advts. quote wholesale prices. For
that reason it should be treated with
care. Copies should not be left lying
where they will be seen by outsiders,
nor should they on any account be used
as wrapping or packing material. Furth-
er, the fact that a purchaser not in the
trade may seek to obtain goods at trade
prices by no means compels you to sell
him at wholesale.

that the Turkestan variety gives splen-
did results in very bleak and exposed
positions.

As the mail is closing we learn by
cable that Marseilles, Nenes and Mont-
pelier were visited yesterday with fairly
heavy falls of snow: Paris and London
also report light snow showers, and in
both cities 9° Fahr. of frost was regis-
tered during the night.

The prevailing dryness of the air will
minimize the mischief done by these un-
seasonable visitations.

EUROPEAN SEEDS.

American Notes

Trade Strong and Steady

The past week has been one of
the best with the seedsmen so far this
season; the somewhat cooler weather
steadied counter trade quite a little
and thus gave a chance to reduce in
some measure the mass of accumulated
orders. Between the terrible rushes of
retail counter business that each warm
spell always brings at this season, every
effort to fill mail and express orders is
made; but this season night and even
Sunday work has not been nearly suffi-
cient with many of the larger houses to
keep at all even with the splendid vol-
ume of orders that are each day being
received. Regarding seed stocks, as has
been expected would be the case, many
important items are already almost im-
possible to obtain. In Peas, perhaps the
shortages in the list of wrinkled vari-
eties, as a whole, are the most acute in
years. The demand for Gradus, Sut-
ton's Excelsior, Telephone, Thomas Lax-
ton and kindred sorts is impossible to
satisfy; offers of \$10 and even more per
bushel have been made for Gradus with-
out producing any. Many important
varieties of Beets and Radishes are very
difficult to obtain also; but it can be

truly said that taking the entire list of
seeds right through, very much less
trouble from short seed supplies has
been experienced than has all along
been expected. Regarding the sales of
Sweet Peas, so far this season, they
have been simply enormous. Early in
the year many of the larger dealers felt
that they were very much overstocked
and destined to sustain severe losses on
this important seed; it is, therefore, very
satisfactory to be able to note that the
splendid demand for Sweet Peas has
reduced stocks to just about a normal
level. Seed Potatoes are in good de-
mand, but in some sections the very
low rates for table stock has affected
prices adversely. At the moment \$2 to
\$2.75 is the market for standard vari-
eties; table stock has in some sections
sold during the past week in large lots
as low as \$1.25 per barrel, and that
for the best quality. It is worthy of
special mention the particularly large
demand there is for Grass seeds and
Clovers; this applies especially to lawn
Grass seed.

Red Varieties of Onions

Red Onions would seem to be
gaining in general favor even faster in
many sections than either the yellow
or white varieties. Two varieties of red
Onions will be found ample to supply
most calls in this direction, the Large
Red Wethersfield and the Southport Red
Globe. The Large Red Wethersfield is
always standard, an immense yielder
and brings top prices in the market.
The bulb itself is large, of flattened,
oval shape, and good quality, especially
adapted to dry soils, perhaps a greater
favorite in the East than in other sec-
tions. The Southport Red Globe is the
universally known globe-shaped sort and
will satisfy every customer who does
not wish a flat Onion. This Onion is
also very large and uniformly spheri-
cal in shape. It is a somewhat later ma-
turing sort than the Wethersfield, and
considered by many the best Winter
keeper of all Onions. Should customers
desire other red varieties than the two
standard sorts just described, the dealer
can easily obtain them from his seeds-
man, but in most cases these two red
varieties of Onion seed will be ample
stock to carry.

Vegetable Plants

The season has arrived when a
good assortment of vegetable plants will
be found rapid sellers. It is not wise
to force the tender varieties, such as
Tomato, Eggplants, etc., upon customers
too early; wait until the weather is
warm and settled for these. But early
Cabbage, Lettuce, and all hardy sorts
can be sold now, and for the next two
months an active trade can be done.
Pot-grown plants of the various herbs
will be found excellent sellers. Such
varieties as Sage, Sweet Marjoram,
Thyme, Dill and many others retail
well. Of course, in this line is in-
cluded Asparagus and Rhubarb roots;
in fact, if the proper attention and care
be given to vegetable plant sales a most
satisfactory volume of business can be
easily worked up in this direction. One
vital point must be borne in mind, how-
ever—only vegetable plants of the best
quality are profitable to handle, custo-
mers being very critical in selecting
them, they will not touch poor quality.

A Great Southern Seed House

The Atlanta (Ga.) Constitution in its
issue of April 10 gives a three-column
notice to the seed house of Hastings &
Co. of that city, and in its final summing
up proclaims it one of the great indus-
tries of Atlanta and wishes "we had
more enterprising firms like this cov-
ering other lines of business; we have got
through thinking that the seed business
is an insignificant one." The Constitu-
tion states that the Atlanta post office
has paid more money orders to Hastings
& Co. than to all the rest of Atlanta
put together during the months of Janu-
ary and February. It is said the firm
issues more than 600,000 catalogs yearly,
and that the house of H. G. Hastings &
Co. which moved from Florida ten
years ago has grown to be the largest
seed firm in the South. The members
thereof are H. G. Hastings and H. W.
Brown.

Apart from their immense business in
the ordinary garden seeds, a great spec-
ialty with this firm is Corn and Cotton
seed. We have previously mentioned the
fact that they recently established a
"Seed or Plant Breeding Department"
which is working along well defined
lines in the endeavor to improve exist-
ing varieties and to originate new ones.

Florists Handling Seeds

It has been the endeavor of The Flo-
rists' Exchange to interest florists in
the handling of seeds, bulbs, etc., as an
auxiliary to their business. Thus it
gives us great pleasure to publish a
warm endorsement of our efforts from a
representative of one of the largest En-
glish seed houses; this gentleman says:

"I am in the fullest sympathy with
your efforts to interest the florists in
your country in the sale of seeds."

"The matter is too important to be
left in the hands of department stores,
however ably conducted, so I trust you
will keep hammering away."

"No one knows better than an intelli-
gent florist what will sell and what is
worth selling, and I think the effect of
your suggestion, if properly carried out,
will be to elevate the tone of the coun-
try trade, bring a knowledge of the use-
ful and the beautiful into the outlying
districts, and help, instead of destroy,
the trade of the high-class mail order
houses."

"You may rely upon receiving all the
help I am able to render."

bill, against which there was scarcely any opposition, passed the House, and according to the journals passed the Senate. The Biddison Bill, which was drafted by the Governor's Commission on Agriculture, died in the Senate Finance Committee. When the measure before the Governor was examined, it was found that it was the Biddison bill with Mr. Collier's name on it. How this came about no one knows. It is believed that it is the mistake of the printer.

Under these conditions it is not believed the Governor will sign the Pure Seed Bill.

The Collier Bill had the strong support of the Griffith & Turner Co., J. Bolgiano & Son, W. G. Scarlet & Co. and S. L. Lambert & Co., and these gentlemen will make every effort to see that it, and not the Biddison Bill, will be the one finally signed by the Governor. The above named firms, seed merchants of Baltimore, have worked manfully for the Collier Bill, at much personal sacrifice in the midst of their busy season, and at considerable expenditure of money for legal advice, and deserve high credit for the stand they have made in support of a bill under the provisions of which it will be possible for seedsmen to continue in the business.

Chas. J. Bolgiano authorized the statement that the provisions outlined in the Biddison Bill would completely destroy the seed business as it aims to compel seed merchants to guarantee the growth of seeds under "any and all conditions," a result which experts recognize as absolutely impossible.

New York Seed Trade

Another week, acknowledged by all our seedsmen to have been as busy as anything ever experienced in this city is just closing. It is useless to specify particular lines, as the limit would seem to be almost reached as far as capacity for putting out seeds is concerned. Had it not been for the cooler weather it would have been even worse than it was. It is certainly a wonderful season.

The Stumpp & Walter Co. is meeting with large sales for its Early New Market White Oats. As in past years, this house is devoting special attention to farm seeds.

Burnett Bros. received by the S. S. Noordham, of the Holland-American Line, 42 cases of evergreens and conifers, which were immediately shipped out on orders. Messrs. Burnett have added to their capacity another floor of the same building, which will be devoted to Grass seeds. The firm have largely increased their trade in this line this season.

Peter Henderson & Co. have arranged the show windows of their newly remodeled store in most attractive shape. Lawn Grass is the principal feature this week, the windows being arranged so that a growing lawn is shown, which is most attractive.

The death of J. R. Strang who, for more than ten years, has had charge of the books of Wm. Elliott & Sons, is regretted by the entire trade, as the deceased was much esteemed by all.

A. Hansen of Copenhagen, Denmark, arrived by the S. S. St. Louis, for a six weeks' trip among his customers. Mr. Hansen confirms previous reports of the closely sold-out condition of both Cauliflower and Cabbage seeds in this country this season.

At Boddington's, a very busy week was the last one. Both Mr. Boddington and Mr. Bunyard feel that the end of the season will show a volume of trade very much in excess of a year ago. This house has reduced its enormous stock of Cannas so materially that those contemplating purchasing their stocks there should do so without delay. In this line, orders are being hooked for 1911.

C. McTaggart was a visitor at the monthly exhibition of the New Jersey Floricultural Society at Orange, N. J., last Friday and reports a most excellent display. Mr. McTaggart is adding to his offering a very complete line of vegetable plants, finding a particularly large demand for them.

Geo. W. Glassey, who for many years has been in the vegetable seed department of J. M. Thorburn & Co., has connected himself with the Stumpp & Walter Co.

"Buds" is the title of a new corporation recently formed and just opening quarters for the sale of seeds, bulbs and plants. Carl R. Gloeckner is president and Wm. H. Siebrecht, Jr., secretary. The new store is at 76 Barclay st., a most desirable location for the business

TEN POINTS OF EXCELLENCE OF THE NEW SEEDLING BEGONIA "Glory of Cincinnati"

- 1.—It lasts longer in the dwelling than any other Begonia.
- 2.—It is a most beautiful shade of soft satiny-pink.
- 3.—The individual flowers are much larger than those of Gloire de Lorraine.
- 4.—Easily propagated.
- 5.—Easy of cultivation.
- 6.—Strong, robust grower.
- 7.—It can be grown in a 4-inch pot to look like a plant.
- 8.—It flowers from October to April.
- 9.—Not surpassed by any other Begonia.
- 10.—The best plant for the Christmas Trade.

\$1.00 each, \$9.00 per dozen, \$50.00 per 100. July delivery.
You cannot invest your money to better advantage.

Please mention the Exchange when writing.

contemplated. Mr. Gloeckner has been with J. M. Thorburn & Co. for some seventeen years and is a thoroughly experienced seedsman. Mr. Siebrecht is a son of Wm. H. Siebrecht, Sr., the well-known specialist in Lily of the Valley and other bulbous stock, of Astoria, L. I. Mr. Gloeckner is manager of the new corporation and extends to all old friends a cordial invitation to visit the new store.

These are busy days at Vaughan's Seed Store; the past week they have been giving particular attention to special sales of nursery stock and plants.

J. M. Thorburn & Co. have been very busy, particularly so in the flower seed department. Their new Eschscholtzia Thorburnii is selling well, both at wholesale and retail.

Philadelphia Seed Trade

A slight fall in temperature brings somewhat more seasonable April weather. This has checked, slightly, the demand for seeds, bulbs and plants, and brought the seed trade into more nearly a normal condition. Nevertheless, all seed stores are as yet more or less behind-hand in filling orders, and crowded stores are the order of the day; great activity on the part of all employees is very noticeable.

A striking instance of how far separated parts of the world are, in these days, brought into commercial touch with each other, is that American seedsmen in Philadelphia are buying Asparagus plumosus seeds from a French establishment, with an English manager, in the far away little Comore Islands, between Madagascar and Africa.

So many Onion sets, especially the red and yellow varieties, have been thrown upon the market by Western growers that, notwithstanding the fact that the quality is inferior to Eastern-grown sets, prices are greatly depressed, much to the detriment of local growers of the famous Philadelphia quality sets.

Henry F. Mitchell Co. is still making a feature in the plant line of large Pansy plants, with blooms of immense size, good substance, and great range of color. This enterprising company is offering the first potted Tomato plants noted anywhere this season.

At Henry A. Dreer's, the energetic manager, Mr. Thilow, is seen attending to a group of buyers and at the same time firing back answers to the questions coming to him from employees constantly, correcting this and directing that at the same time. Indeed, there is need of it, for not only the seed and bulb season is here, but the sale of hardy herbaceous plants in which this company is a specialist has begun.

The Moore Seed Co. is selling a small lawn mower, of improved form, suitable for mowing close to trees and shrubs without injuring them, and also for mowing narrow grass edgings.

The Stokes' Seed Store is very busy with both mail and counter trade, and is making a very full display of every seasonable kind of root and bulb.

The Johnson Seed Co. is making heavy sales of Peony roots and Cypas stems, and is showing this week some sturdy own root hardy Roses in 6-in. pots.

Some seedsmen are anxious lest too early plantings, caused by unprecedentedly warm weather, will, if a cold spell follows, entail a small per cent germination of seeds, and unjustly redound to their discredit.

A Few Good Things

—You Want—

DRACAENA Indivisa, 3-in., \$5.00 per 100; 4-in., \$10.00 per 100.
BEGONIA Rex, 2-in., \$5.00 per 100.
ASPARAGUS plumosus, 2-in., \$3.00 per 100; 3-in., \$5.00 per 100. Cut sprays, 25c. per bunch.
ASPARAGUS Sprengeri, 3-in., \$5.00 per 100.
GERANIUMS, Nutt, Doyle, Perkins, Grant, La Favorite, R. C., \$1.25 per 100; Pot plants, 2-in., \$2.00; 3-in., \$4.00 per 100.
Castellane, Vioad, Jaulin, Ricard, Buchner, Poitevine, R. C., \$1.50 per 100; pot plants, 2-in., \$2.50; 3-in., \$6.00 per 100.
Mme. Sallerod, 2-in., \$3.00 per 100.
FERNS, Whitman, 4-in., 25c. each. Boston, 4-in., 15c. each; 5-in., 25c. each.

Cash with order; no C. O. D. All shipments at the risk of purchaser after being delivered to Express Co.'s properly packed in good order.

GEO. M. EMMANS, NEWTON, N. J.

Please mention the Exchange when writing.

New Bedford, Mass.

Business the past week both in cut flowers and funeral work has been good. Carnations are a little off crop around here, though on the whole flowers appear to be quite plentiful, and retail at 50c. per doz. Roses retail at \$1.50 and \$2. per doz. Violets are on their last legs; the weather is quite warm and as a result they are getting poorer; 75c. and \$1 per 100 blooms are the general prices. Sweet Pans of good quality sell at \$1 per 100; Callas at \$2 per doz.; Easter Lilies at \$2 to \$2.50 per doz. Snapdragon of the lighter shades sell fairly well, retailing at \$1 per doz. Paperwhites are beginning to come poor, and sell for 50c. per doz. Tulips are very good as yet, 50c. per doz. for single varieties and 75c. for doubles are the prices. Daffodils, double, sell at 50c. per doz.; and singles at 35c. Taken altogether this has been a very good season for bulbs.

R. H. Woodhouse reports that he did not have half enough Lilies to go around at Easter. He could have sold more of them. His Geraniums and bedding stock are looking slick.

E. H. Chamberlain has been on the jump the past week. Funeral work has been good with him: Last Sunday he had some big orders for Roses.

Wm. S. Brown, Peter Murray, S. J. Donaghy and others are busy with Spring garden work.

It looks as if most of the growers will get their Ten Weeks Stocks in on time, also Candytuft.

S. S. Peckham will have about 10,000 Geraniums for this Spring's trade. He is growing about 7000 Carnation plants, from which he is cutting some nice flowers.

The uptown stores are making a big showing with Pansy and Daisy roots; 35c. per doz. is the general price, some few selling at 25c.

One of our department stores is selling Rose bushes at 10c. each; also Azalea mollis, Rhododendrons and other shrubs at awfully low prices, in some cases cheaper than the florists can buy them.

R. Sylvia, at the Dartmouth St. Nurseries, has about all he can do just now, planting shrubs and bushes. He reports a good call for nursery stock.

A. B. Hathaway is still cutting some grand Daffodils. He likes the variety Emperor about the best of all. Pricepess is very good with him.

E. Y. Peirce reports business as fine. His Carnations are a little off crop just now. The weather is very warm and there will be a fairly good crop of flowers for Memorial Day, from the present outlook.

HORTICO.

Kalamazoo, Mich.

As usual, immediately after Easter we experienced dull times for a few days, but now with social events and funeral work business has become brisk again. The weather is indeed most remarkable for the season and the landscape gardeners are kept busy remodeling and improving the gardens of our citizens. Daffodils were in bloom outside at Easter. Hyacinths following closely after, and now the fruit orchards are in full bloom, all of which goes to show an abnormally early Spring. Outdoor flowers are likely to be quite scarce at Decoration Day, as those usually in bloom will be long past, but, doubtless, Peonies will be in their prime. I notice the 5-cent stores are displaying seed packages and bulbs in large quantities this year, and seem to be having good sales.

G. Van Bochove & Bro. are already busy at work on their new addition; 3 houses, each 30x300 ft. will go up this time, making a block of 10 houses, practically under one roof. Two more boilers, 150 h.p. each, are being placed in position; and an electric motor is being installed to run machines for sawing lumber and doing steamfitting work, etc. About everything found useful in running or repairing a greenhouse plant is to be found in their workshop, even to a blacksmith's forge, which indicates that the firm are making a most efficient and economical administration.

James Fraser did a nice trade at Easter and has on hand a splendid assortment of bedding plants for the Spring trade. His reputation in these lines is excelled by none hereabouts, and he does a large amount of the best priced work in the city.

Fred Marker is another suburban grower whose business in Spring flowers and bedding stock steadily increases. A satisfied customer is a good advertiser says Fred.

S. B.

DECORATION DAY ROSES

Pot To-day and Don't Delay

Karl Druschki

Hardy Hybrid Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name:

Price, 75c. for 5 (of one variety),

Perle des Blanches. White.
Persian Yellow. Yellow.
Princesse Camille de Rohan. Dark crimson.
Ulrich Brunner. Cherry-red.
For prices see above

Baby Rambler Roses

BABY DOROTHY. The same in habit as Baby Rambler, but the color of the flowers is similar to Dorothy Perkins. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c. for 5, \$16.00 per 100.

CATHERINE SEIMETH. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. 85c. for 5, \$15.00 per 100.

MRS. WM. H. CUTBUSH. Color intense crimson and exceptionally free-flowering. 85c. for 5, \$15.00 per 100.

MME. NORBERT LEVAVASSEUR (Baby Rambler). Strong, field-grown plants. 85c. for 5, \$15.00 per 100.

THE TREE BABY RAMBLER. (Grown as a Standard.) The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40c. each, \$3.75 for 10, \$35.00 per 100.

BABY DOROTHY. (Grown as a Standard.) For description, see above. 75c. each, \$6.25 for 10, \$60.00 per 100.

Something New in Roses for Florists

Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60c. each, \$6.00 per doz., \$45.00 per 100.

BABY RAMBLER (Half standard). Crimson. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY CATHERINE SEIMETH (Half standard). White. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY "STARS and STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50c. each, \$5.00 per doz., \$40.00 per 100.

Ramblers and Other Climbing Roses

PAUL'S CARMINE PILLAR. Flowers large and free; color rosy carmine. Two-year-old, field grown. 85c. for 5, \$15.00 per 100.

CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 4 feet, \$1.25 for 10, \$12.00 per 100; 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 5 to 6 feet, extra heavy, \$2.25 for 10, \$20.00 per 100.

DOROTHY PERKINS. Lovely shell-pink color. \$1.25 for 10, \$12.00 per 100.

TAUSENDSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

Flower of Fairfield The Everblooming Crimson Rambler

This variety is a sport from the beautiful Crimson Rambler, is similar in color, more brilliant and lasting than the old favorite. It also possesses the further advantage over the Crimson Rambler in the fact that it flowers profusely on the young wood the first year. Flower of Fairfield is a vigorous grower and free bloomer. It starts to bloom early in the Spring and continues until late in the Autumn. It is rightly termed "perpetual blooming." 40c. each, \$3.50 for 10, \$30.00 per 100.

Veilchenblau (Violet-Blue)

It has long been the desire of rosarians to secure a blue Rose. In Veilchenblau we have practically approached this color. The steel-blue flowers of this new Rose appear in large clusters, are semi-double, of medium size and keep in bloom a long time. The showy yellow stamens contrasting with the blue flower, give the whole a striking appearance. 50c. each, \$5.75 for 10, \$55.00 per 100.

New Rose American Pillar

NO Climbing Rose is attracting the attention that
"American Pillar" does, and most deservedly so.
It is by far the best single-flowered climbing rose for
outside purposes; and on account of the great durability
of its flowers, it is the best single-flowered forcing rose.

July 12, 1909.

Gentlemen:

Let me tell you, too, that the
American Pillar is a better
Rose than you know, perhaps.
The plant I had from you,
which was planted this Spring
under unfavorable conditions,
is now giving us a succession
of most exquisite bloom.

Yours truly,
J. HORACE MCFARLAND,
Pres. of American Civic As-
sociation, Harrisburg, Penna.

COMMENT FROM THE LONDON GARDEN

"A most notable feature in
this glorious display (Temple
Flower Show in London) was
the New 'American Pillar'
Rose. The large and attractive
rich rose pink blooms are pro-
duced in immense clusters, the
white centers of the blooms
adding to their attractiveness."
—Florists' Exchange.

AMERICAN ASSOCIATION OF NURSERYMEN

F. H. Stannard, Ottawa, Kan., President; N. P. Stark, Louisiana, Mo., Vice-president; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., treasurer.

DAYTON, WASH.—F. M. Hoskins, owner of a 2500 acre valley ranch near this town, is establishing a large nursery.

MILWAUKEE, WIS.—A. F. Page and Walter Koch of this city have left for the Bitter Root Valley, Mont., where they will establish an orchard and nursery business.

NEW YORK.—Vice-president Melleny of the N. Y. & N. H. Railroad has stated that his road has authorized an expenditure of \$5000 for the purchase of shrubbery, plants, trees, etc., to be distributed at various points.

CLEVELAND, O.—According to the Municipal Journal, City Forester Frink has submitted a report to Director of Public Service A. B. Lea, stating that the tree nursery set out at Warrensville under the last administration is a failure. But few of the trees, he says, are fit to be removed and set out in the streets of Cleveland, and most of them will be taken out and burned if his advice is heeded. Frink says the reason for the failure was that the soil was not put in a high state of cultivation. He says further that the ground is wet and untilled, and for this reason the trees will not flourish. Of the 1008 soft Maples on the ground only 200 can be used, he says. His report further states that of 354 Scotch Elms but 50 can be used, and out of 431 Ash-leaved Maples but 75. There are 950 European Sycamores set out at the Warrensville Nursery, and of these but 90 can be used. The rest of the trees are failures and can only be removed and burned. Of the 230 Horse-chestnuts set out but 30 can be transplanted for city use. Frink favors a city nursery, but believes that a new location should be selected at the Warrensville farm if the present site is not drained and the proper soil put in. He says the city would save \$500,000 by raising its own trees and park shrubbery. Within the past three years the city has set out 20,344 trees, costing \$14,930.10. This number did not meet the city's needs. The city could use 75,000 to 125,000 trees, he asserted.

An article of unusual interest to the trade will be found in the April number of the National Nurseryman. It was written by Prof. John Craig, we believe, and is headed: "How Nursery Stock is Received in Port of New York: A summing up of the conditions and factors entering into the problem of inspecting nursery stock at the port of entry." The subject is fully illustrated with pictures which serve to show how utterly impracticable is the idea of dock inspection. In summing up the author concludes:

"It would seem a fair proposition to say that dock inspection is out of the question for the following reasons: 1. Lack of space; 2. unfavorable storing conditions; 3 method of packing the goods; 4 amount of time required to make the examination under existing conditions; 5 injury and destruction of nursery stock under the most favorable method conceivable of conducting such an examination."

Fortunately, the amended bill of Congressman Jas. S. Simmons, a résumé of which we publish this week, gives promise that inspection at "port of entry" is a bugaboo no longer to be feared.

Federal Bill Covering Nursery Stock Inspection

Under the title of H. R. 23252, introduced in the House of Representatives March 21, 1910, Congressman James S. Simmons of New York has considerably amended the text of the provisions contained in the prior bill introduced by him under the title of H. R. 15056 covering the same subject. Under the provisions of the new bill the strongest objections to its predecessor have been removed; whereas, in the old bill it was provided that the inspection of imported foreign nursery stock should be made at ports of entry by official experts of the Department of Agriculture, H. R. 23252 provides for inspection at final destination, on the premises of the owner or consignee, with the exception that unless said imports are accompanied by a certificate of inspection given by an official expert of the country from which the importation has been made, then such imports are to be held in quarantine, either at final destination on the premises of the owner or consignee or at port of entry or other designated place, at the option of the Secretary of Agriculture, and shall not

be released by the official expert. It is also provided that examinations shall be begun and, if possible, completed within ten days of arrival of goods. Other provisions in the original bill have also been modified.

H. R. 23252, the new bill, is in the hands of the Committee on Agriculture and, if passed at this session, will probably go into early effect.

The present bill corresponds very closely to that endorsed by the American Association of Nurserymen as a substitute to various bills now before Congress.

Erythrina Where hardy, so that it can grow to a good size, the Erythrina is called Coral Tree, but in the North, where it has to be treated as a greenhouse plant, it is known as the Coral Plant, and it is there dug up every Fall and housed in the greenhouse, to be planted out again in Spring. When so treated it flowers well, the blossoms being of a rich crimson, and pea-shaped in outline, belonging to the leguminous order of plants, as it does, and its flowering continues throughout the Summer. All it needs when housed for the Winter is to be heeled in a rather dry place under a greenhouse stage, to be set out again when the soil warms up in Spring. If the writer is not mistaken, Prof. Massey once wrote that he had wintered this Coral Tree safely by mounding up around it with ashes, enough to keep frost from it, the ashes covering a few inches of its woody growth as well, keeping the roots and a few inches of wood safe from freezing, as is done with tender Roses and plants by many persons. Figs can be wintered outdoors in the same way.

Both of these Beeches—all Beechea in fact—require heavy pruning when transplanted, to make them take kindly to the removal.

Catalpa speciosa The claim made for the great value of the Catalpa speciosa as a timber tree is so well verified, and the claims added to as the years pass, that nurserymen find a great call for the seedlings from foresters, farmers and others interested in the growing of timber trees. There is still the evil going on of parties growing the inferior kind, *C. bignonioides*, for the speciosa. Though the wood of this may be as lasting as that of the other, its spreading habit of growth is against its value as a forest tree as, even when planted close together, it is impossible to get a tall, straight trunk to it, added to which it is not as hardy as speciosa in the colder States. On the other hand, the speciosa grows tall and straight, without any forcing up, by planting it close to other trees; and as there is no trouble in getting the true seed, why get the inferior kind? It is worth while to be sure that the stock is genuine, to save trouble. Seeds are to be sown in Spring, and in favorable seasons a growth of 12 to 18 inches is sometimes made the first year. So much spurious stock is in the market that a guarantee should be given that the seeds or plants are true speciosa. Some parties may be growing the wrong kind, while firmly believing it to be speciosa.

The Golden Bells

The Golden Bell shrubs, Forsythias, when in full display of flowers are one of the charms of Spring. There is no

other shrub approaching them in beauty or in habit of growth. The writer well remembers the first good specimen in flower he saw, now over 40 years ago, and how its beauty appealed to him. He enquired its name from his companion at the time, and got it too, both the botanical and common, Forsythia viridissima, Golden Bell. And a bush of it is as attractive to him now as it was then, though he has seen them annually for nearly half a century. Of the two usually seen, the *F. viridissima* and *F. suspensa*, the former is of upright growth, the latter of a drooping habit. Though many prefer the upright grower—and it sells well—the drooping one is beautiful when in bloom, and, besides, its flowers are of a deeper yellow. Its drooping habit can be taken advantage of to form a "weeping" shrub, as this form is called. A strong shoot is tied to a stake in Spring, cut off at a height of say 5 ft. It becomes self-sustaining in a short time, forming a drooping head as well, the whole a pretty object. As a bush, it ascends little by little, the shoots making some upward growth before drooping, so that in time it becomes a perfect

Forsythia viridissima. The Golden Bell Shrub.

Plant the English Beech

It is not so many years ago that a break—and in many ways a good one—was made in the planting of so many European trees and shrubs in preference to those of our own country, and this change has left its mark in finding the old world trees on our lawns confined principally to large specimens. Among them is one of much beauty in its old age, the European Beech, *Fagus sylvatica*. Indeed, it is a pleasing object to look on, in its young stages of growth as well as in its older ones, and there is good reason for making an exception in the case of this tree and still planting it, as our landscape gardeners are. It is nearly always of a bushy growth from the ground up, though a true tree in height, so that when fifty or more feet high it is still in shrub shape. The deep green of its foliage is pleasing as well as its general bushy habit. When Autumn comes it does not cast its leaves, though they die, but holds them fast until Spring. There is a rusty brown color to them then which is a real attraction; and because of the retention of the leaves it is a good tree to set where a screen or some shelter is required, for these requirements it can fill. Standing alone on a lawn, perhaps mingled with evergreens, it is well placed and always pleasing.

The whitish bark of the American Beech makes the tree useful in many places, but it has not the several beautiful characters of the European, neither does it keep its leaves through the Winter. When growing wild in woods the native Beech is often met with as a thick, sprouting from its roots, but in cultivation this character does not seem so pronounced.

lower. Specimens of this kind 15 ft. high are not uncommon. All the Forsythias come under the head of shrubs requiring pruning after flowering in Spring, all blossoms coming from young shoots of the previous season.

Plant Scotch Broom

When planted on a hill side or in any place where, drainage being good, it will ripen well its wood, the Scotch Broom, *Genista scoparia*, thrives much farther north than it is given credit for. Usually Maryland or Delaware is looked on as about its northern limit, but it has been growing and thriving well in the southern part of Philadelphia for a long time, and years ago it proved itself able to withstand the winters of Germantown, the northern part of Philadelphia, as it is still doing. Some plants set out last Spring on a hill sloping to the east have wintered well, and being of good size and well supplied with young shoots a good crop of flowers is looked for soon after Spring opens. The foliage of the Scotch Broom being sparse makes the yellow flowers more conspicuous than would otherwise be the case, and as these flowers are of good size and usually abundant along the shoots the display is very attractive.

Do not plant the Scotch Broom in low ground, unless it be in places where no severe frosts occur, for with unripe shoots hard freezings are sure to injure it. When it seeds freely, as it always does following its flowering, if the soil about it be undisturbed a colony of young plants will soon be established.

Rhododendron Catawbiense

In Car-Load Lots

And the largest collection of Hardy American Plants in existence

Sixty Years of Retrospect

With Notes by the Way

By Stephen Taplin, Nurseryman and Florist

My first experience with Violets for Fall and Winter blooming was with two varieties: one double, very like the Marie Louise in size and color, a very free bloomer, good grower, non-spitting; the other single Russian, large dark color and good stem, free bloomer after January until May. We did not have any disease either at root or on foliage.

About the middle of May the clumps were divided into six or more pieces and planted about six inches apart in a good open loamy soil, with plenty of well-decayed leaves and a good sprinkling of soot, well mixed. If the weather was dry they were given a sprinkle of water a few times, until they had taken root, then a light hoeing about once a week to keep the weeds down. About the first week in October we would clean out the old Melon frames, spade up the soil, put in four inches of good clean decayed leaves and a good sprinkling of soot, mix all well together. We would then take up the plants, trim off suckers, runners and some of the foliage, and plant them in the frames, about six inches apart, water them and put on snsh for a few days, and afterward snsh was left off night and day unless there was a frost. About November 1 the snsh was put on close at night, and ventilation given in the day, unless it was freezing. We covered at night and barked up the frames with leaves, according to temperature. The only drawback was picking flowers in severe weather. Violet growing there was so simple and successful that a green hand was likely to think there was no trouble to grow Violets. I have found it was not so simple at several places.

My first experience with Strawberry plants for forcing is well remembered. As soon as the crop was through in the open ground we cleaned between the rows. If they were very dry we gave them a good watering. As soon as the first runners were strong enough we would pinch off the runners above the first joints. We would collect a quantity of stones about half the size of hen's eggs. We made a shallow hole in the ground about two inches across, filled it with soil mixed with fine manure, laid the eye of a runner on this soil and put the stone on the back of the eye. In about two weeks we put on a layer of well prepared soil, about three inches deep. As soon as the plants were well rooted they were put into 6-in. pots and watered carefully; they would then make fine crowns before growth stopped, and the pots were well filled with roots. There were many other ways of preparing plants for forcing which I tried on a limited scale, but I never found any as satisfactory as my first experience. The labor in forcing Strawberries on a large scale is almost endless; the best plants that can be made in the time are none too good, to give a paying crop. In England the Strawberry is of as much importance as any fruit under glass.

In the Fall of 1852 the foreman resigned to take a similar position at a more extensive place. His successor only stayed a month, because there was no woman kept to cook for him. The next one only stayed two weeks, because there was no place to go to spend his evenings. He did not like the idea of working till 9 p.m. I was then made foreman; I suppose I did as well as some others that had been longer in the business; at any rate I made no failures, at the same time it gave me a chance of picking up experience which I should not have had, in hardly planting.

We had a block of dwarf Pears, Plums and Cherries which had been planted four years and were intended for espaliers and pyramids, but the ground being too rich and deep they grew so rank they could not be controlled sufficiently for the purpose. It was a soft Winter, without much snow, and being favorable for such work they were all taken up, root pruned and planted back again. They were given enough dry mulching the following Summer, and two years later they were making suitable growth with no losses. The following Spring a quantity of hardy trees had to be taken up from the home nursery, including evergreen and deciduous sorts, ranging from four to eight feet high, to be planted on different parts of the estate. Some places were very high and exposed to the wind, with not much soil to plant in, on a soft red sandstone bottom. Many of the hardy trees did well in it after getting started, but it required careful planting.

One of the men in the gang of planters, I think, knew more soils, exposures and suitable trees for the same, and used more common sense and judgment, than any man I have met since. I often think of that man when I read about what should be done to reforest the barren and waste lands that once produced some of the finest timber in the world. His theory was first to shade the ground, then plant what the ground was most suitable for, and that something to be useful in the future.

About August of that year I applied for and was admitted at once to what at that time was the mecca of most of the young men who were anxious for extensive experience in general gardening—Trentham, the seat of the Duke of Sutherland, Staffordshire. George Fleming was the gardener. If any old Trentham men should happen to read this they will remember what the name of George Fleming meant in those days. The Duke of Sutherland, at the time I was at Trentham, was the grandfather of the present Duke.

The system at Trentham was different from that of any other large place I know of in England. There was no general foreman and not many department foremen. All were "birds of passage," and nearly all young men who went there went as improvers, to enable them with the prestige of Trentham to secure positions as head gardeners or foremen elsewhere.

As a general improver he, a newcomer, paid £5 sterling, for two years' experience, and received twelve shillings per week wages, taking his chance either under glass or outside work. Those who considered themselves higher grade men and came there to finish up in Pine, Grape or general fruit growing would pay £10 sterling. At the end of their periods, if nothing they wanted was in sight, they would, through interest of former employ-

ers, be taken into a London nursery at twelve shillings per week, till the nurseryman found suitable situations; then, if their records were good through Trentham prestige they would be likely to secure a prize. Nearly all the situations for gardeners or foremen were filled through a leading nurseryman, who took no responsibility further than furnish names of all former employers to an applicant. If the references were not satisfactory the young fellow would then have to begin again or turn his attention to something else. Some would go as laborers in a nursery and if they were good useful hands they would get ahead in the nursery line.

My first start at Trentham was in the plant department, under the plant foreman, and I had to pay for my room and board in the village. Three months later I was put in charge of a large ridge and furrow conservatory, with a night temperature in Winter of 40°. I then went to room on the place; about 15 improvers like myself lived on the place, as we all had fires to attend to. The house I took charge of was partly planted with Camellias, Acacias, Daphnes and many other large greenhouse plants, with assorted vines running up columns and suspended from the roof. Part of the house was occupied in Winter with large specimens of the same class of plants in pots and tubs which were set outside in Summer. In all the conservatories and plant houses, which had to be kept gay and attractive with flowering or other plants, all work, watering, cleaning, etc., had to be finished before 10 o'clock. No one must be seen in such houses after that time. All kinds of potting, tying and sponging must be done out of sight. We had to watch for a time when the family was away to do all inside top dressing, sponging, tying, etc. There were six plant houses of different sizes, with night temperatures from 40° to 65°, according to the class of plants to be grown in them.

The acme of skill in growing specimen plants at that time was to grow a Pelargonium or a Chrysanthemum, or any fast growing plant of similar habit, say in a 12-in. pot, with a flat head about 3 ft. across, and, with pot, not to stand more than 2 to 3 ft. high, with sticks enough in it to build a rook's nest, sticks not to show when plant was in bloom. Later on in the season there was trouble with specimen Azaleas, the leaves dropping off. The next trouble was with a house of specimen Camellias, the buds all dropping off. I then had to take charge of all the hard-wooded plants.

The next and worst trouble of all was with a lot of very fine Orange trees in the conservatory opening into some of the principal rooms in the mansion. The leaves were all dropping off. The man who had charge had to take all the blame and he left the place in disgrace. I was then put in charge of the Orange trees. To go into all details of causes and remedies would take too much time and space. Each time anything was added to my charge I was to have more help and a regular foreman's pay. I got the help all right, such as it was; many of the hands could not be trusted to watch a batch of scrubby Calceolarias. It got to be a standing joke among the men when they saw a specially duds looking young fellow come, who wanted further experience under glass. They would say "There is another addition to Taplin's gang."

All the young men who came to me, if willing to work and pay attention to instructions, had just as good a show as I could give them; if they showed any tendency to shirk it was no Paradise for them. One man, who would almost make two of me, was sent out with one of the pleasure ground gang. He sent in a complaint, to the effect that he did not want wheelbarrow practice, he wanted a job in the houses. I had a lot of top dressing to do just then, which meant carrying out the old soil in boxes and bringing back new soil. It was tough work on a hot day. He was told that young men could not select their work, but they would make an exception in his case as the plant foreman wanted a man in the houses. So he got a chance under glass. He came to me with best clothes and polished shoes. As each man had to take his turn with the boxes of soil there was not much chance to shirk. I soon saw the work did not agree with him; he was growling all the time and the others laughing at him. I then set him to carry water for me, in four-gallon cans—we had no rubber hose in those days. He would keep me waiting for water when I was in a hurry to get something finished up. He kept up a constant growling about paying to learn plant growing and then he kept carrying dirt and water. I told him I had nothing to do with that. If he did not like the work he could go to the office and complain, but as long as he was with me he would be kept at the same kind of work as the other men till it was finished. He then made a very insulting remark to me and said he had a mind to throw me in the river. I think I must have lost my temper for a minute, as I turned round and struck him with my fist on the side of the head. I did not think I used much force but he dropped like a log. Just as he fell the head gardener came past, and then there was trouble. It took a lot of cold water to get him on his feet again. There was a thorough investigation, as fighting and drinking meant sure dismissal in disgrace. The head gardener questioned the other men very closely and they told him what the man had said to me before I struck him, also that I treated him the same as I did them in work and they had no complaint to make.

(To be continued)

Our illustration is from a photograph taken at the Young Men's Republican Tariff Club Banquet, Pittsburgh, Pa., for which the well-known firm of Gustav & J. W. Ludwig of 626 E. Diamond st., that city, furnished the decorations. The picture was taken by the Chautauqua Photographic Co.

SMITH & GANNETT, Geneva, N. Y.

Please mention the Exchange when writing.

SUBSCRIBERS PLEASE NOTE.—The Florists' Exchange is a trade paper, and its ads. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

Syracuse, N. Y.

Trade has been very good since Easter, as society people have been very active and there have been some quite large private and public functions, calling for many flowers and much southern Smilax. Funeral orders, too, have been quite large and frequent, which has kept stock well worked up.

The excessive heat prevailing several days the past week has materially affected the quality of Roses and Carnations. The oldest inhabitant cannot recall such a hot spell at so early a date. The glass several days registered over 80°, and one day 88° in the shade, but in less than 48 hours the glass fell to 32° and the ground was covered with snow. How much the fruit crop is injured cannot be told as yet. It is recorded that just fifty years ago, on April 13, zero weather prevailed for a day, which ruined everything in the way of fruit crops and vegetables.

Our park commissioners are seeking power to acquire more land for enlarging our park system, and it is earnestly hoped they may succeed. Park Supt. Campbell is greatly in favor of the

scheme and is displaying great activity.

H. H. Franklin is to enlarge his greenhouses and Crouse Klock will build a large conservatory and fine range of houses. He has secured the services of W. J. Quinlan, brother of P. E. Quinlan, as head gardener.

Pittsburgh, Pa.

The cut flower trade has been moving along nicely since Easter and stock of all sorts is abundant, so that prices are within the reach of all. Roses and Carnations are coming in of good quality. Bulbous stock is rather cheap. Outdoor stock is coming in, which will have a tendency of lowering prices a little more on greenhouse stock. The plantsmen are very busy. The extraordinary mild weather is a great help to them in their outdoor work.

We never had such an early Spring, everything is about a month ahead of time. Tulips, Hyacinths, Narcissus in bloom, many varieties of Magnolias, even Lilacs are blooming, and the fruit trees are covered with blossoms. The weather throughout March was mild and, so far, April is warming things up a little too lively, the thermometer reaching the 80° mark. The sound of the lawn mower is heard and amateur gardeners are making their gardens and planting seeds, but I much fear that a good deal of replanting will be done as it is not likely that these conditions will last, for frost can be expected for another month at least.

W. C. Becker, the North Side seedsman has had the busiest month he ever had in his career; his store room is crowded with people all day long.

The gardeners who occupy the space around the North Side market for the sale of plants, and who usually start about May 1, are already in their places, but there is not much rush for tender plants yet.

Recent visitors were J. Murchie of Sharon, Pa., and W. P. Snyder, of the Edwards Folding Box Co., Philadelphia.

H. Blind & Bros. expect to have their new auto-truck the coming week. It will be a ton and a half capacity, about the largest in the trade. The automobile is coming into more use among the florists and it will not be long until all have machines for business and pleasure.

P. Demas expects to leave for Greece about the first week in May, and John Bader has some thoughts of crossing over again. Your correspondent sails April 23 on the Lapland, for Antwerp, and expects to take in some of the flower shows in Haarlem and Brussels.

E. C. REINEMAN.

Providence, R. I.

John F. Wood of 167 Westminster st. made an assignment on Thursday, April 7, to Charles H. McKanna, attorney-at-law, for the equal benefit of his creditors. This came somewhat as a shock to the trade at this season, as, to all appearances, Mr. Wood was doing his share of the business.

William Appleton has recovered from a severe attack of stomach trouble; his oldest son, Eugene, looked after the business during his father's illness.

Stephen Toher of Concord st., has built a house 75x25 ft. He is to grow Carnations and a general line of bedding stock.

Business the past week was good and prices kept up well, all things considered. There was but a limited amount of funeral work.

Violets still come in plentifully and can be bought for \$2.50 per 1000. Prices on other first-class stock are about the same as last week. Carnations are making \$1.50 to \$2.50 per 100. In Roses, My Maryland, Richmond, Mrs. Taft and Killarneys bring \$6 to \$10; Am. Beauty, \$15 to \$50. Trailing Arbutus is a glut, selling for the best price that can be obtained. The same applies to all bulbous stock, except Lilies.

G. A. J.

ALLEN TOWN, PA.—Daniel B. Kroninger is offering his greenhouses for sale.

CHROMWELL, CONN.—A. N. Pierson sailed for Europe on April 4 on a two months' trip.

CLUBS AND SOCIETIES

G. & F. Club of Pittsburgh

The April meeting of the Pittsburgh Florists and Gardeners' Club was very well attended, considering that this is a busy time of the year for the many florists and gardeners. In the absence of Pres. Burki, Vice-Pres. P. S. Randolph occupied the chair. The Club's membership is still growing, four new members were elected and one proposed. The private gardeners failed for the first time to make an exhibition in the competition list as per schedule, and the only material for exhibition was sprays of hardy blooming shrubs and plants from the West End parks and a few cut Tulips. Owing to the early season quite a variety of blooms were on hand and discussed, such as the Cercis or Judas Tree, Forsythia, one of the very earliest of Spring blossoms, Japanese flowering shrubs, Magnolia stellata and Soulangiana, Spiraea, hardy Saxifragas and a few other interesting sorts. F. Wissenbach showed some good Tulips grown in a cold frame. A. Colyn, representing C. Colyn & Sons, bulb growers of Voorschoten, Holland, was a visitor at the meeting and was requested to name the best market varieties of Hyacinths, Tulips and Narcissus.

One of the members brought up a subject that a few of the daily newspapers had written about—the boycott of the florists at the annual Memorial Day exercises. It was the general opinion of those present that it would have no effect on the florists' trade at all, for the Grand Army men buy very few plants themselves, almost all plants for soldiers graves being donated, and the general public will continue to use plants and cut flowers on Memorial Day the same as heretofore.

The Lily question was, as usual, touched upon, as to which were the best sorts for forcing, and as to their uncertainty in coming to bloom. Some of the members were of the opinion that good bulbs could be grown in the South of the United States as well as anywhere else.

To make the next regular meeting in May as interesting as possible every member was requested to bring some material, and there should be a good variety to select from by that time. It is not at all necessary for members to burden themselves by bringing in a whole lot of stock, but just bring something that can be readily carried.

E. C. REINEMAN.

G. and F. Club of Baltimore

The regular meeting of the Gardeners and Florists' Club was held in its hall last Monday night, with President George Morrison in the chair. The meeting was well attended, about one third of the members being present. From the time the meeting started

until a late hour a great deal of humor was apparent but considerable business was transacted. H. B. Lassahan and J. J. Blair were elected members of the Club.

The president appointed for the ensuing year the auditing committee as follows: Albert Fiedler, P. B. Welsh, F. Bauer, N. Lehr, Isaac H. Moss.

The treasurer's report was read and approved, and the Club was shown to be in excellent financial condition, with a membership of 160.

An invitation was extended to the Club to visit the beautiful country home of W. J. Lananhan, Glenheim, next month, during Peony time. Those who paid visits before realize that this visit means a good time, and it is expected a large turn out will result. A royal treat is in store for members and friends at the Club on May 23 in the way of a smoker and entertainment. The committee in charge is composed of C. M. Wagner, J. Boone, J. L. Towner and C. L. Seybold, and this committee assures the members a good time. Exceptionally good talent will be there.

The question box provided many questions of all sorts for discussion. One of the questions was, "Is the Street Fakir a Good Florist." Many gave their opinions and the discussion lasted about one hour. At the conclusion the fakir was concluded to be a good seller. Fakir conditions were taken up and met the approval of the majority. On the streets they are compelled to sell out of baskets. It is queer to see large vases and tin cans standing in baskets with flowers along the curbing; the public stare and wonder. J. L. T.

Lenox (Mass.) Horticultural Society

The annual Rose and Carnation night of The Lenox Horticultural Society was held on Saturday, April 2, and was a decided success, the members turning out in full force. Seldom, if ever, have Roses and Carnations been seen in Berkshire County of such high quality as those exhibited. Upward of fifty vases were staged for competition in the various classes. As a scarlet Beacon was largely exhibited, while White Perfection, Winsor, Enchantress, Bay State, Rose Pink Enchantress and Octoroon were strongly exhibited in classes for their various colors. An exhibit on which special praise was bestowed was composed of two magnificent vases of Mrs. C. W. Ward and Alma Ward Carnations exhibited by the Cottage Gardens Co., Queens, Long Island, N. Y., which were unanimously awarded a first-class certificate, the Society's highest award. Another exhibit which was greatly admired was an exceedingly fine vase of fifty flowers of the new Carnation White House, exhibited by Dailledouze Bros., Flatbush, N. Y. This variety was shown in the best of condition which speaks well for its shipping qualities. The flowers are borne on long, stiff stems, and measure 3½" across. It was unanimously awarded a first class certificate. The following is the list of the principal awards: Elm Court Farm—First for 25 Enchantress and Winsor Carnations and 12 Richmond and American Beauty Roses. A. H. Wingett—First for 25 Beacon, and 12 Bay State Carnations, and 12 President Carnot Roses. S. Carlquist—First for 12 White Perfection, Beacon, Enchantress, Octoroon, and Rose Pink Enchantress Carnations. J. J. Donohoe—First for 25 My Maryland Roses, second for 12 American Beauty Roses, Winsor, Beacon, M. A. Patten and Rose Pink Enchantress Carnations; he was also awarded a certificate of cultural commendation for an extra fine vase of Stock Queen Alexandra. The judges were E. Jenkins, R. Speirs, W. Jack and

A. J. Jenkins. George Breed read an interesting paper on the "Orchards of the Berkshires," dealing with the best varieties, soils, pests, and general management, etc. Considerable discussion ensued, most of the members asking questions which Mr. Breed answered in a very able manner. He was accorded a hearty vote of thanks for his instructive lecture.

GEORGE H. INSTONE, Sec.

Connecticut Horticultural Society

Our second March meeting was omitted on account of the date falling on Fast Day, a State holiday here. On April 8, our first April meeting took place, with President John F. Huss presiding.

The center of the room in the County Building, Hartford, was adorned with a beautiful collection of plants and cut flowers, as follows: *Amaryllis hybrid*, *Bougainvillea glabra*, *Sanderiana*, *Haemanthus diadema*, *Primula obconica*, exhibited by Mr. Huss; *Antirrhinum gigantea alba*, by Alfred Cebellus, gdr. for Prof. Jacobus; *Calceolaria hybrida*, by J. A. Weber, gdr. for Walter L. Goodwin; a freak *Geranium* bearing two kinds of blossoms, by T. B. Brown of Winsor. The judges, who were H. A. Pinney, John Gerard, and W. H. Shumway, made awards as follows: Diplomas to Mr. Huss and Mr. Weber; certificate of merit to Mr. Cebellus; vote of thanks to Mr. Brown. The *Haemanthus diadema*, Mr. Huss said, is quite rare, coming from Belgium, but originating in the Congo.

The society voted to give the president of the Lava Company of America, of Passaic, N. J., a hearing, in case he desires to come to Connecticut to address our members, at his own expense, on the lava fertilizer question, which is receiving considerable attention among some gardeners.

Arrangements have been started for our two Fall exhibitions; and the executive committee has commenced work on the schedules of prizes. The dates are set as follows: Dahlia exhibition, at Unity Hall, Hartford, September 22-23; and Chrysanthemum exhibition, at Putnam Phalanx Hall, Hartford, November 3-4.

Concurrent bills before the Senate and House, at Washington, granting funds to each State agricultural college for extension work, were brought to the attention of our members, and the secretary was instructed to convey to the Connecticut senators and representatives our Society's desire for the support of the bills.

James M. Adams, at the request of the chairman, read an article concerning horticulture in Japan, showing many curious uses to which flowers, shrubs, and trees are put, especially in the way of things legendary in that Oriental country.

Our next meeting, which will be held on April 22, will be Rose night, and a paper is expected from Howard A. Pinney on the subject of the Rose.

The season here is quite forward, owing to high temperatures. Apricots are in blossom.

GEORGE W. SMITH, Secretary.

FOUNDED IN 1888

A Weekly Medium of Interchange for Florists, Nurserymen, Seedmen and the Trade in General.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter.

Published every Saturday by the A. T. De La Mare Ptg. and Pub. Co., Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. De La Mare, president and managing editor; Jas. H. Griffith, secretary; David Touzeau, treasurer. The address of the office is the address of this paper. Short address: P. O. Box 1697, New York. Telephone 3765-6 Beekman

PRINCIPAL OFFICES

Chicago: Margaret T. Flint, room 614, No. 60 Wabash Avenue; tel. Randolph 2000. Office hours: 9.30 to 12.
Boston: Robert Cameron, Cambridge, Mass.

Philadelphia: Appointments can be made on letters addressed to Jos. H. Sperry, our representative, care of Keystone Hotel, Market st., near 16th, for Mondays and Tuesdays.

Yearly Subscriptions.—United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.50. Payable in advance. Remit by Draft on New York, Post Office or Express Money Orders; if paid in cash please register letter.

The address label indicates the date when subscription expires and is our only receipt therefor.

Registered Cable Address: Florex, New York.

Telegrams.—Telegrams received in this office up to 3 p.m. Wednesday, containing changes in advertising, will receive attention for the issue of the Saturday following; likewise, telegrams having informative matter intended for our news columns will be received up to Thursday 9 a.m. News telegrams should be forwarded after 5 p.m. Wednesday and marked "Night Press Message, Collect." These will be forwarded by the Telegraph companies at their newspaper rate, providing the material so forwarded contains news for the paper.

The Florists' Exchange is a trade paper, and its advts. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

Marketing the Product

Suggestions beneficial to the trade are constantly being made. Few of these are acted upon. The reason is not far to seek. It arises principally from the lack of an organization to consider them and determine whether they are worth while pressing to a conclusion or not. The consideration of such suggestions should be taken up with more energy than has been the case in the past, by both our local florists' clubs and the larger national organizations, the logical conservers and promoters of the welfare of the trade.

As a case in point, we would refer to the paper read before the Florists' Club of Philadelphia, last week, by Henry I. Faust of Merion, Pa., on "The Growing of Lilies for Easter." However growers may differ on some of the cultural points enunciated by the essayist, there can be no doubt in the minds of most that, fully as important as growing a Lily—more so, in fact—is the marketing of the product. Mr. Faust advocated the idea that if florists had a way of finding out the requirements of their local trade (as well as of the cities nearby to which they could consign in case of an over-supply in their own locality), the trade would be on a business basis and in a better position to regulate prices.

A Florists' Board of Trade, with scope as suggested by Mr. Faust, would undoubtedly be of trade benefit. One or two reputable commercial men in each city, working in harmony, collating the statistics of the previous year's crop, the quantity sold and prices received therefor, could in this way obtain a gauge on the amount of stock annually sold and the total cash received therefor; against this would be set the cost of production, marketing, etc. From these facts and figures recommendations could be made for the Easter following, the production of stock to be governed accordingly.

This advice might look on the surface as a recommendation to form a combination, but we do not wish it to be understood that way as, apart from its probable illegality, in a business like ours there are too many free lances who could not be held in restraint; then again, in this business, the reputation of the individual grower will obtain for him an enhanced price as against the product of the less known or less experienced grower, in his own home market at least; probably as well in another market if he consigns thereto.

The point we wish to bring out is simply this: If the leading growers throughout the country will get together, prepare cost of stock and of growing same, and will let the trade generally know that a Lily bloom ready for the market is worth so many cents, that fact

will establish a market quotation, and while there may be cuts made below the price so established, in the main it will hold, and the free lances will be just as eager to obtain this quotation after a season or two as the growers who stand together. Any attempt at absolute regulation of prices would have to be solely and wholly under what might be termed a "gentleman's agreement."

Mr. Faust's article is well worth reading, and we would recommend those who may not have perused it, to turn to page 666 of our issue of April 9 and read particularly that portion thereof headed "Marketing the Product."

Certain it is that there are few growers who have been prosperous up to this time who could be prevailed upon not to put up any more glass for some years to come. The tendency is there, and it will continue, for the reason that the trade is expanding right along and larger sales can be made yearly.

The great question is the proper marketing of the product so that it may be placed within the reach of all—rich and poor.

The Agitation for Parcel Post

Monday, April 25, is the date fixed for public hearings. If all concerned will pull together we prognosticate at least an opening wedge through the Rural Free Delivery System. This is by no means all we want, but if the trial is successful in the rural districts, universal Parcel Post will become a certainty within a few short years.

Secretary George M. Whitaker, of the Farmers' National Congress, is sending out the letter which follows:

"The post office has always been 'The People's Mutual Express Company,' but the high rate and the low weight imposed on merchandise by Congress, combined with its refusal to allow any indemnity whatever for the loss or damage to unsealed parcels in the mails, has hitherto kept this part of the service within very narrow limits.

"The postal merchandise traffic of 1907 amounted in number of parcels to only 1.12 per cent. in weight, 4.79 per cent. in number and 4.44 per cent. in revenue—the total postal business of the year, to less than \$8,000,000 out of a total of \$183,000,000. In 1907 the average American family posted less than nine parcels, weighing less than 3 lbs., the postal revenue therefrom being about 50c. In October, 1907, the local merchandise mailed at 12 representative postoffices of Alabama weighed only 65 lbs.; at 16 offices of New Hampshire, 27 lbs.; at 14 offices of Oregon, Montana and Wyoming, 1 lb. each.

"On the 25th of this month the House Postal Committee of the 61st Congress enters upon a series of hearings to consider the extension of this service in accord with the public interests. The legislation resulting from these hearings will depend largely upon you. Please be present if possible; if not, then send us a letter giving your views on the transport of merchandise by the post-office, to be used at the hearings.

"Under Mr. Hitchcock's Foreign Parcel Post Conventions, merchandise is posted to or from Italy to the United States, 11 lbs. for 79c.; from Austria, 11 lbs. for 86c.; from Germany, 11 lbs. for 81c.

"We ask for an equally extended and cheap domestic service."

Parcel Post hearings will be given by the U. S. House Postal Committee at the Capitol, Washington, D. C., beginning Monday, April 25, at 10.30 o'clock a.m.

The chairman of that Committee, Hon. John W. Weeks, favors the reduction of the postal rate on general merchandise. The Bennett Bill, H. R. 10762, reduces the 16c. a pound merchandise rate to the old 8c. rate of 1874; consolidates 1st, 3d and 4th class matter within city limits at 2c. for 4 oz., 1c. each additional 2 oz.; establishes a local service with all matter collected and delivered within a rural route in one class—parcels, 1x6x12 in., 1c.; 6x12x12 in., 5c.; 6x12x24 in., 1 cu. ft., size of the ordinary suitcase, 10c.; weight limit 25 lbs.; and as amended insures all mail matter against loss or damage in the mails, up to \$10, without increase of postage on ordinary parcels; registered parcels, up to \$50, on payment of the 10c. fee; up to their full value, for each additional \$50, 2c.

Already popular in Congress, the Bennett Bill, 10762, needs only a widespread, clear and decided expression of public opinion in its favor to lead to its quick enactment into law.

The post office is our mutual express company. "Upon the extension of the postal service, more than upon anything else," said the Postal Commission of the 59th Congress, "does the social, political and economic development of the country depend."

A real, effective quick delivery Parcel Post will be of undreamed of value to the people at large. To no class of business men does it appeal more strongly than to the florist, the seedsman and the nurseryman. Under its beneficent action every wide-awake florist could double his retail business in short order. The present prohibitive rates practically bar small purchases of plants and flowers.

There can be conducted no campaign half as effective as that of writing personal letters to representatives in Congress and Senators as well as to the chairman of that committee. If we all remain dumb how can we expect our representatives to take an interest in our wants?

We ask every reader to write at least four letters, before April 25, to his representatives; it is this evidence of personal interest which counts. Use courteous language but be firm in your utterance and concise in your expressions as to the anticipated value of the service to your own particular needs. Parcel Post must win.

New Books

The Modern Carnation, How to Grow and Show It

By HAYWARD MATHIAS and P. SMITH. The Horticultural Printing Co., Burley, England. Price 3s. 6d.

This book furnishes an interesting bit of reading dealing with the culture of the Carnation in England. Although our American methods differ widely with those employed across the water we find numerous points which agree with our methods and, also, much reading which gives food for thought through comparison. It is at

Four Winter-Flowering Sweet Pea Specialists

Anton C. Zvolanek of Bound Brook, N. J., and his three sons, all engaged in the work of production of fine varieties of Winter-flowering Sweet Peas. Photograph taken April 8.

April 16, 1910

once noticeable that the range of colors and types is extensive, yellows, piceotes and variegated evidently being much in use.

The raising of Carnations abroad for show purposes and purely for the love of the flower is made evident by the reading of this book. While Carnations are raised largely in a commercial way it is stated that the lead is taken by amateurs and private gardeners.

The Carnation is pointed out also as an important show flower and it is interesting to the growers on this side to note the attention given to the staging. "Dressing" the blooms is one feature in particular which draws our attention. Here our exhibits are mainly carried out with commercial ideas; we do not consider a Carnation except from the standpoint of a profitable commercial variety. Abroad the blooms are "dressed" and "fixed" in any way which is possible to make the staging attractive. The use of board backs, where single blooms are shown, is interesting, but not likely to come into use to any extent on this side.

The subject matter on cross-fertilization is very interesting and the ideas there given are worthy the attention of our seedling raisers.

As regards the culture of the Carnation in England we find the methods in vogue in the two countries vastly different, the propagating and general treatment differing from our methods in many particulars. Pot culture is considered decidedly the better.

The so-called "Winter-flowering Carnation" is making rapid strides in England and it is a pleasure to the American Carnation grower to note that our varieties are giving such good results.

DIANTHIUS.

New Seedling Magnolias

With this I am mailing, under separate cover, a sample flower of my pink Magnolia stellata, a three-year-old seedling plant which has bloomed this year for the first time, and appears to be a strong grower, symmetrical in shape, and quite floriferous.

I have also several seedling plants of Magnolia Kobus, which bear flowers with from 12 to 15 petals each, in the manner of Magnolia stellata. In other respects it resembles the typical Kobus; but this very attractive variation from the type gives it an added interest.

I observe that the old plant of Magnolia stellata shows a rather more than usual amount of pink tint on some flowers, and its delightful fragrance has been, if possible, more than usually agreeable, as Mr. Moon found it, too.

SAM'L C. MOON.

—The samples Mr. Moon sent were received and, though badly faded, the stellata seedling showed a decided pink color. If we understand aright that there is pink color both inside and outside of the petals it will be a very distinct variety and a valuable addition to the present list of these popular shrubs. The ordinary M. stellata has a light pink color in the bud, which it loses when the flower expands. This season the buds were more colored than usual, and the fragrance of the flowers more than usually agreeable, as Mr. Moon found it, too.

The double-flowered M. Kobus will become much called for, we should say. The common one bears but six petals. One with 12 to 15 petals is very different.

An interesting fact to the writer is that Mr. Moon raised the pink stellata from seed, as he (the writer) has never seen a seed pod on a stellata, though familiar with the species since its introduction. Will Mr. Moon say if bearing seeds is common with his bushes? M. Kobus is a prolific seed bearer, the pods being always of grotesque forms.

JOSEPH MEEHAN.

Laying Out Formal Beds

We have received, from Dr. Landmann of Berlin, samples of his invention, having as its purpose the assistance of gardeners in laying out geometrical and other designs in their flower beds. The device consists of sheets of tissue paper, on which the various designs are marked by rows of Cress seeds which are stuck to the paper with an adhesive liquid. In the case of a large symmetrical design the sheet of paper should be spread over the bed and a little fine soil sprinkled over the paper to keep it in place. In the course of a few days the Cress seeds grow and mark out the lines the planter is to follow. Having planted his bed, the Cress may be pulled up. It is obvious the tissue must not be spread upon the bed many days before the cultivator wishes to plant his design. The inventor states that his designs may be used in the veranda, balcony, or even window sill, or in dishes or plates, provided the tissue of seeds is attached to a sheet of pure wood pulp impregnated with salts. A specimen we have placed upon a plate and merely watered shows conclusively that all the seeds gummed to the tissue may be depended upon to grow. The invention is certainly ingenious and its use will save time, particularly where beds of intricate designs have to be laid out.

We have a few sample sheets in this office which we will send out, one to each applicant, so long as they ran out, asking in return an expression of opinion.

Proposed G. A. R. Boycott of Florists

In your last issue I notice the statement, at page 661, that Post 88 of Pittsburgh, Pa., is considering a plan to use artificial flowers on the graves on Memorial Day, on account of the exorbitant prices charged by florists for natural plants. Such a change is not thought of here, there being no dissatisfaction with the florists' charges at all; in fact, the generosity of the trade in this respect has gained them much regard.

In former years it was the custom of Ellis Post, No. 6, of Germantown, Philadelphia, to place bouquets on the grave, but it has been found that cut flowers for the purpose are becoming scarcer, and so pot plants are now used to a great extent. Instead of boycotting florists this Post recognizes both florists and nurserymen as their best friends. Wagonloads of cut shrubs are given it free, with great pleasure, as well as many pot plants coming from schools, through purchases by the scholars. Although this one Post decorates about 1200 graves I do not think it costs it a single dollar for its flowers. Instead of our florists charging high prices to the Post one has merely to say "Grand Army" when in some of their establishments to walk out with an armful of plants free.

JOSEPH MEEHAN.

The Late Mrs. Maggie S. Vesey

Best Fertilizing Material for Flowering Plants

Prof. Fondard of the Dept. of Agriculture, province of Basses-Alpes, France, who has been engaged for some years in researches as to the demands of flowering plants for fertilizing material, has just received from the French National Society of Agriculture a subvention to enable him to continue his experiments. The results of his work, so far, are summed up in a report published by the Revue Horticole, as follows:

"Flowering plants in general demand chiefly nitrogen and potassium, absorbing relatively little phosphoric acid. This may explain why agriculturists give preference to stable manure and cesspool matter. However, the excessive use of organic manure predisposes certain of the cryptogamic plants to rust and other diseases which have destroyed entire plantings. And again it happens, as at the Cap d'Antibes (So. France), that certain soils have become infertile owing to the repeated application of these two kinds of manure in too large quantities.

"Sesame cakes (manufactured from an East Indian annual) have come into use within the last few years. But horticulturists should learn to substitute mineral fertilizers in part for the organic substances, as these salts furnish well balanced nourishment for plants of rapid growth.

"In the plants under observation, the most concentrated and the most soluble materials yielded the best results.

The double superphosphates should be used for the phosphoric acid, sulphate of potassium for its potash, and nitrate of soda for its nitrogen. Chloride of potassium has often proved dangerous.

"On Marechal Niel Roses the superphosphate 16/18 with a dose of 8 kilos (17 3/5 lbs.) to 20 square metres (220 sq. ft.), nitrate of soda at 3 kilos (6 3/5 lbs.) and sulphate of potash the same amount, have produced excellent results, both from the point of the quantity of Roses obtained and the development of wood for cuttings."

DOUBLE STOCKS.—Superstition is inseparable from Eastertide even in the matter of planting flower seeds. In Bolin's edition of Brand we read that in Gloucester it is, or was, believed that if Stock seed were sown on Palm Sunday the blossoms "would be sure to come double." A similar belief attaches in some places to the sowing of Stock seed on Good Friday; while in some parts of France it is customary for the women to take to church on that day in their pockets seeds of Stocks mixed with earth, which they shake up during the singing of the "Stabat Mater," believing that by this means double flowers will be ensured!—*Journal of Horticulture*.

Mrs. David A. Spear

Mrs. Laura J. (Cook) Spear, wife of David A. Spear, died at her home, 91 Wethersfield ave., Hartford, Conn., April 7. Death came suddenly, the heart having been affected. Mrs. Spear had long been an invalid, but was apparently as well as usual when Mr. Spear left for his place of business early in the afternoon. Mrs. Spear was born in Hartford, July 12, 1849, daughter of the late Hezekiah S. and Eliza Chapman Cook. She was a member of the South Park Methodist Church, having joined soon after it was organized. Besides her husband she leaves a brother, Edson Cook; one daughter, Grace, wife of Richard C. Lincoln, secretary of Charles G. Lincoln & Co., and one grandchild, Laura Lincoln.

Mrs. Maggie S. Vesey

Mrs. Maggie S. Vesey, wife of Judge W. J. Vesey of Fort Wayne, Ind., dropped dead in a street car on Friday evening, April 8, while on her way to a theater. She had shown no sign of illness, and had attended a social function earlier in the afternoon.

Mrs. Vesey was a daughter of the late Judge Studebaker of Decatur, Ill. In 1882 she was married to Judge Vesey, and became the mother of six children, three boys and three girls. Through a love for flowers which she shared with her husband, she in 1892 formed a partnership with him under the firm name of W. J. & M. S. Vesey, built a small commercial plant, and grew a variety of cut flower stock, largely for wholesale. The business prospered and the plant was added to until today the establishment comprises 150,000 sq. ft. of glass. A year or two ago a handsome retail store was opened in Fort Wayne.

The deceased lady was extremely popular in florists' circles, and was the first president of the Ladies' S. A. F. With her husband, who is a director in the S. A. F., she attended all the conventions and made a wide circle of acquaintances.

One of the largest funerals ever held in Fort Wayne, was that of Mrs. W. J. Vesey on Tuesday afternoon, April 12, hundreds of her friends and neighbors attending. Her large and commodious residence was full to overflowing, and the spacious lawn surrounding the house was literally covered with people. Flowers were sent from St. Louis, Mo., Richmond, Ind., Indianapolis, Chicago, Denver, Col., Detroit, and other places. The Ladies' Society of American Florists, of which Mrs. Vesey was the first president, sent a beautiful wreath of Roses and Lily of the Valley. Several carriages were necessary to convey the flowers to the cemetery. Among her florist friends who were in attendance were Mrs. Chas. H. Maynard, secretary of the Ladies' S. A. F., and Mr. Maynard of Detroit, W. N. Rudd and Geo. Asmus of Chicago.

C. H. M.

The death of Mrs. W. J. Vesey is keenly felt by Indiana florists. They feel that floriculture has lost one of its staunchest supporters. She had gained by her forty-seventh year a reputation as a florist that any of the craft would be honored to bear. Nothing but sincere and honest effort could have culminated in a career such as hers. Mrs. Vesey seemingly found time for everything. Aside from being a splendid mother of a large family, she was prominently known in Fort Wayne's social circles. She will be missed at the many gatherings of florists which she regularly attended for many years. To Judge Vesey and children is extended the sincere sympathy of their many Indiana florist friends.

Article III

Form and Size of House

The forms of houses are generally classed under the following heads: Even span; three-quarter span; shadeless ridge; ride and furrow; and side hill houses. All these divisions have in themselves several sub-divisions.

The Even Span House

The even span house, or, as it is sometimes called, the span house, is constructed with the eaves on both sides of the house the same height above grade, and the ridge in the center of the house. Figs. 7, 8 and 9 show three forms of this type of house.

Fig. 7 shows the first or crudest form of an even span house, with the eaves of the house raised about 18" or 2' from the grade, between the eaves and the grade being solid wood supported on posts. This type of house is generally constructed with ordinary botbed sash and is only used for the cheaper grade of stock and where it is grown on the ground.

Fig. 8 shows a further development of this idea, with the exception that the side of the house between the eaves and the grade is furnished with glass and a center walk is provided by excavating; the crop is grown in solid beds at the sides. This type is also confined to a

Both these types of houses have been constructed with raised benches on the north side, the rear benches being operated from raised walks.

There is a difference of opinion among growers as to the advisability of placing glass on the north side of the house between the bench and the eaves, but quite a number think there is a considerable advantage in this, notably in the matter of light, which more than offsets the loss of heat. Many growers who formerly constructed their houses with a solid wall on the north side extending from the grade to the eaves have in more recent constructions placed about 24" of glass below the eave line.

As previously stated, these houses are generally constructed with raised or step benches, so as to bring the bench on the north side as close to the glass as the benches on the south side; but it has been found that these raised benches have certain disadvantages. One disadvantage is in the operating of the plant, such an arrangement adding considerably to the amount of labor required, and owing to this benches on the same level are to be preferred.

FIG. 7

FIG. 8

FIG. 9

class of crops that will not require much heat and that in growth will be of low height.

Fig. 9 shows what is considered to be the regular type of even span house today. The sides of the house, from the eaves to the grade, vary from 4' 6" to 9' high. The wood or concrete sidewall extending to the sill is about 2' 6" above grade. From this point to the eaves the house is furnished with glass either in the form of solid glazing or side ventilating sash. The size of the house is only limited by the requirements of the crops to be grown.

The Three-Quarter Span House

Figs. 10 and 11 show two forms of the three-quarter span house. Fig. 10 shows the usual type of house, in which the front or south wall is generally about 5' high, and the rear or north wall about 8' or 9' high, thus bringing the long slope to the south. However, for certain crops some growers in the past have favored placing the long slope to the north, although the advocates of this type are, it is believed, fast decreasing.

The three-quarter span type of house has been used many years, successfully, for Rose growing. The ridge of the house is located about two-thirds of the width of the house from the south wall.

Fig. 11 shows an extreme construction of this type of house, where the ridge is carried back so as to give a very steep slope to the glass on the north side. There is no advantage to be obtained from this, as far as can be seen; on the other hand, there is a considerable disadvantage in the fact that the bars on the south side of the house must be extra long.

In the matter of growing it is also found that the raised benches come so close to the ventilators that if in muggy weather any ventilation is given the plants suffer from the cold, moist atmosphere dropping directly on them. It has been found that under such conditions the plants in the lower benches give much better results, and for this reason many growers have lowered their benches, finding that even in a house constructed on the three-quarter span lines the north benches on the same level as the south benches gave practically as good results. If the glass was carried on the north side to the level of the benches, so as to give the additional light, the opinion is that these benches would give as good results.

In talking with a large grower, who has operated for many years a range of three-quarter span houses, he stated that from his experience in the matter of Rose growing an even span house was much better than a three-quarter span house. He has experimented so far by extending one of his three-quarter span houses to the north, so as to make it an even span house, and finds that the results obtained are, everything being considered, better than with the three-quarter span house. He has, therefore, decided to change all of his three-quarter span houses in the same way and thus not only increase the growing space in the range but make the plant easier to operate and put to good use quite a lot of ground between the houses which now goes to waste. The success met in this direction is proof that the old theory that the benches nearest the glass give the best results has no real foundation.

(To be continued)

FIG. 11

American Pomological Society

The American Pomological Society passed its sixty-second milestone at the time of its last meeting in St. Catharines, September, 1909. The formal meeting which brought this historical horticultural organization into existence was held in New York, in September, 1848, although that meeting was preceded by a preliminary conference held by those interested in the organization, some time previous, in the city of Buffalo.

Thirty-first Biennial Report

The report of its thirty-first biennial session is now going through press and will be distributed to its members in a few weeks.

In view of the many inquiries regarding the scope and purposes of this Society, the secretary makes the following statement:

The Society is non-sectional, and is as comprehensive in its aims as the broadest interests of fruit growing demand. Its purpose is to co-ordinate, unify and further the interests of the various horticultural societies by stimulating the best methods of culture, popularizing scientific advances, and urging the planting of varieties characterized by high quality.

Membership

The Society has no limitations in regard to membership. It is open to the amateur as well as to the commercial grower of fruits, to the nurseryman as well as to the orchardist. The fees are light, being two dollars for the biennial two-year period. The reports are ex-

ceedingly valuable as well to the teacher as to the practical fruit grower.

Life membership in the Society is of two kinds: to institutions, it is secured for a thirty-year period on payment of a twenty-dollar fee. Individuals may secure life membership on payment of the same fee. In addition to the forthcoming reports, the Society gives each life member on entering, copies of as many of the back volumes of the Transactions as are now available. These are becoming rare and consequently valuable.

Worthy New Fruits

The Society is of special interest to the fruit breeder. It promotes development of improved varieties by offering prizes for distinctly worthy new kinds. To this end it maintains a committee whose duty it is to examine and report on new originations and make such recommendations as in their judgment are appropriate. One of the earlier presidents of the Society, the late Marshall P. Wilder, left a small fund which is used to provide silver and bronze medals to be awarded to originators of worthy new fruits.

Officers

President, L. A. Goodman, Kansas City, Mo.; secretary, John Craig, Ithaca, N. Y.; treasurer, L. R. Taft, East Lansing, Mich.; executive committee, C. L. Watrous, Des Moines, Ia.; W. C. Barry, Rochester, N. Y.; C. W. Garfield, Grand Rapids, Mich.; G. L. Taber, Glen St. Mary, Fla.; W. T. Macoun, Ottawa, Can.

New York Florists' Club

A regular meeting of the New York Florists' Club was held at the club rooms, Grand Opera House Building, 23d st. and Eighth ave., on Monday evening, April 11, with a large attendance. President Miller occupied the chair.

Walter F. Sheridan, chairman of the committee having in charge the arrangements for the Club dinner held last month, made a report showing a slight deficit which, on motion, was ordered to be supplied from the treasury. In the report, the committee acknowledged with thanks the aid of Charles A. Dards, A. L. Miller, A. H. Langjahr and Henshaw & Fenrich, in furnishing supplies for the decorations. There were 261 present at the dinner, of which number 48 were members of the American Rose Society and the guests of the Club for that evening. The committee was, on motion, discharged with the thanks of the Club.

W. H. Siebrecht, Jr., secretary of the joint committees of the New York Florists' Club, the New York and New Jersey Association of Plant Growers, and the New York and New Jersey Market Florists' Association, made a report for his committees on the subject of the proposed plant and flower market in New York City. He reported that the city realized that there was no plant market actually in existence and that the metropolis was in need of one. The committees had had an interview with Sidney H. Goodacre, superintendent of markets of New York City, who offered the space under the Queensboro Bridge, at 59th st. and First ave., for market purposes. This space was 170x275 ft. in area, and varied in height from 40 to 60 ft. The floor, he said, was already cemented and the columns and ceiling were tiled. A side and one end were enclosed and the other side and end were arched between columns. The city officials had expressed a willingness to enclose the openings with glass, also to put down floors for offices, etc. There was a space outside of about the same area as that under the bridge, which could be used for wagons, and there was a sidewalk, 65 ft. wide, which could be used for display at Easter and other holidays. The necessary heating would be supplied by the city. Mr. Goodacre had explained that he had no direct proposition to make from the city, but as soon as he heard how many people would be willing to take stands something practical would be the immediate result. It was said that the site should be at all times a public market under the control of the city, and stands would be built to conform with official ideas, and of a kind used in the other city markets. The fees for the stands would be started at the usual market rate, subject possibly to slight increases, but at the outset they would not be more than \$2.50 per week for a space 8x20 ft. or 15x15 ft. Members of the Associations could take stands in quantity as they saw fit, and could sub-let them if they wished to do so, although transfers would have to be under the direction of the Comptroller. Mr. Siebrecht hoped that the proposition would be taken up at once, as the park authorities were after the site for playground purposes, although the neighborhood was not noted for the number of children it contained. It was suggested that a petition be signed by the florists which should show their desire for the site as a market, and there was no doubt but that it would be placed at their disposal.

A very interesting discussion followed the report. John Birnie said that, as far as the plant growers were concerned, the quicker they got into a place like the one suggested, the better. Referring to the present market at West and Canal sts., he thought the best plan would be that the city tell the growers using that market to get out, and there would be little trouble in collecting them again at the new market.

J. B. Nugent, Jr., also spoke in favor of the market and thought that if the florists took it now there would be little difficulty in effecting arrangements whereby they would have it for all time. He thought the occupancy of the quarters by the florists would tend to make a beauty spot of that end of the bridge and he believed that this idea was in the minds of the city officials.

Wm. Elliott pointed out the fact that the plant proposition covered only a period of three months or so. "What need," he said, "would there be of a plant market in July, August and September, for instance? Who would take care of the market in those vacant months?"

Mr. Birnie said that no doubt Mr. Elliott was right as far as his ideas went, in view of present conditions, because there was no place to sell stock at any other time; but if the growers had a place properly heated there was little doubt but that there would be plants in the market for sale the year round, just the same as in other cities. Anyway, he thought, as long as the growers paid their stand rents there should be no room for complaint. He had no doubt whatever that people would buy plants all the year round if they were offered for sale.

James Dean said the report from the committees was most interesting and that the offer made by the city was a golden opportunity for the florists within a radius of 20 to 30 miles of New York, and if they let it go they would make a great mistake.

F. R. Pierson entered the discussion with figures as well as facts. He said that he had figured out the proposed minimum rentals with the rentals paid in the

city of New York for lots, which were 60c. a square foot, and the proposed rentals would average much less, which he thought was a fair deal and based on the real estate values in desirable localities. He also commented on the relations between buyer and seller as they existed today. He believed that when prices went down the consumer should get the advantage of them and thus the general market would be widened. He believed, with others, that the whole matter of selling flowers in New York was going to be revolutionized. There was too much difference between the prices the grower realized and those the consumer paid. He thought that a wider market would be one of the solutions for the glutted market problem.

Mr. Nugent agreed with Mr. Pierson and said that at holiday times the growers should not exact such exorbitant prices as they did. The retailer could never afford to sell anything around holiday time at prices which might be considered reasonable and was forced to drive away much of his trade; there should be a maximum price set on flowers beyond which they should never go.

Some of the speakers looked upon the market proposition as a questionable one, and expressed the opinion that the city would get the florists to locate there and ultimately withdraw the privileges granted. Mr. Siebrecht said this was a wrong idea. It was the object of the city to establish a permanent market; the site covered an entire city block and a guarantee would be obtained that it should be a market for all time. If florists did not grasp this opportunity they were not likely to have any site presented. If the city were to grant a site in any other part of Manhattan they would have to put up a building. In this case the city was willing to fit up the site in any manner desired to accommodate the florists, supply the heating, furnish the stands and would allow the florists to make their own rules, subject to the approval of the Bureau of Public Markets.

Patrick O'Mara expressed the opinion that the proposition was a most desirable one and it was necessary that some action be taken in the matter by the Club, in conjunction with other associations. He did not see that the Club could do anything in particular beyond openly endorsing the proposition. It was a plain business offer to those who were most concerned. For many years the growers and others had been bemoaning the want of an opportunity to dispose of plants in New York City. Cut flowers, no doubt, would come as a secondary consideration. In all the important European cities, and in many large American cities, there were plant markets and the plants were sold the year around. It seemed to him that New York should have a similar market. The proposition now under discussion was the best the florists had ever had and he thought the best thing to do would be to call all the interested parties together and get the proposition into business shape.

Mr. Dean thought if somebody in authority should say that the Spring street market would be done away with next year there would be a prompt exodus to the new quarters, once they were secured. All trades were advancing in their methods of doing business and it was a safe bet that the florists were going to advance also.

Mr. Elliott, in commenting on the idea expressed that the city could withdraw the present privileges enjoyed in the Canal st. market, stated that that idea was erroneous, as the spot was under title set apart for market purposes.

Mr. Siebrecht said this supposition was wrong. He had had occasion recently to look up the title to that market and found the city could use it for any purpose it pleased, as a street cleaning depot or otherwise. In the present negotiations it was not a case of the florists going to the city, but of the city coming to the florists. The Comptroller wished to have a flower market at the Queensboro Bridge and he had said, "Bring in your petitions and let us know what you want and we will set aside a location for you." It was quite necessary that some speedy action should be taken.

C. H. Totty said that to cover the matter he would offer the following resolution: "Resolved, that the New York Florists' Club, as a body, endorses the movement to have a plant market at Queensboro Bridge, and asks such of its members as are interested in the movement to collaborate with members of other associations practically interested, with a view to completing plans for the arrangement of such market." The motion was carried unanimously. It was subsequently arranged that a special meeting of the Club be held in the Club's rooms on Monday evening, April 18, to which the other associations interested should be invited, with a view to immediate action in the matter.

Charles Krick of Brooklyn and C. McTaggart, 123 Warren st., New York, were elected to membership in the Club; J. W. Merritt and J. F. Weir of Brooklyn; and T. Mellstrom of New York were nominated for election at the next meeting.

Secretary Young expressed his thanks for the kind telegram sent him by the Club at its last meeting and for the vacation which they had granted him. He then read a letter from Hitchings & Co. of New York in which they offered a silver cup, valued at \$25, for competition in some line under the auspices of the Club, such competition to be in any direction the Club should decide. The firm also offered to make such a cup a yearly contribution. On motion, the secretary was directed to con-

vay the thanks of the Club to Messrs. Hitchings for their gift, and the matter was referred to the exhibition committee.

A letter was read from Professor L. B. Judson of Cornell University calling attention to the fact that there was a bill now pending before the State Legislature appropriating \$50,000 for the building of modern greenhouses for experimental use at the University, and asking the support of the Club in the movement to obtain passage of this bill. On motion of H. A. Bunyard, the secretary was instructed to write the chairman of the committee on ways and means, with an endorsement by the Club of such project.

F. K. Pierson in speaking to the motion said the idea of building the greenhouses was a most laudable one, and he thought the florists should use their best efforts to obtain such legislation. Cornell University wanted to do something for the florists which the florists at present were not able to do for themselves. It was a happy day for tradesmen when colleges were willing to help them along commercial lines. William C. Rickards also spoke in favor of the bill.

Frank H. Traendly called the attention of the meeting to the proposed S. A. F. convention at Rochester and suggested that it was not too early to appoint a committee on transportation to Rochester next August and moved that such a committee be appointed. The motion being carried, President Miller appointed Mr. Traendly, Sec. Young and H. A. Bunyard as such committee.

Mr. Pierson was then invited to address the meeting, and in an informative way told of what had been done in the matter of arrangements for the Rochester convention. He said there had recently been held in Rochester a very satisfactory meeting of the executive board, every member being present during a session lasting several days; one member of this committee had come all the way from Denver, Colo. Rochester had hotels as fine as any in the country. The sports would be pleased to know that there were big alleys for bowling, large enough to accommodate anything in the way of a bowling tournament. The convention hall and exhibition hall were the finest he had ever seen anywhere, and both exhibition and meetings could be held under one roof. It looked as though Rochester would present the best facilities for the S. A. F. convention that had ever been presented. Rochester was a very pleasant city in the Summer time and was a most enjoyable place for a visit. It was hoped that the Society would accomplish many things this year which would make the meeting memorable. The National Flower Show would naturally be an important topic for discussion at the meeting. The subject of glass output control by a trust was brought up. The committee could not see any excuse for doubling the price of glass within 12 months and wanted to see whether something could not be done to dissolve what appeared to be an illegal organization and this could only be done with united effort. He thought the appointment of a transportation committee at this time could be considered as an assurance of a big crowd from New York.

Mr. Birnie wanted to know whether the committee had made any inquiry in regard to the drinking water at Rochester. He said it was a very important question as many visitors to previous conventions had suffered through drinking bad water.

A. C. Zvolanek of Bound Brook gave a short account of his recent visit to California and stated that he had called on Rudolph Fischer and W. N. Campbell, both well known to New York florists, and on Edwin Lonsdale, late of Philadelphia. He remarked, incidentally, that he had seeded down about 200 acres with his Christmas flowering Sweet Peas in less than three weeks and hoped soon to reap his harvest of seed.

J. H. Pepper called the attention of the meeting to the reported sudden death of Mrs. Vesey, wife of Judge W. J. Vesey of Fort Wayne, Ind., a lady who was well known to most members of the Club, particularly those who with their families attended the S. A. F. conventions. He moved that a committee be appointed to draw up a resolution of sympathy to be forwarded to Judge Vesey. The motion was carried and President Miller appointed J. H. Pepper, Robert E. Berry and J. A. Shaw a committee to draw up the memorial.

EXHIBITION

There was quite an interesting exhibition made before the Club. Louis Dupuy of Whitestone, L. I., N. Y., exhibited two fine specimens of new Hydrangeas. Hortensia Lorraine was a beautiful light pink with forets about the size of silver dollars. Hortensia Avalanche was a beautiful snow white variety and it was said it was just as good a keeper as H. Paniculata. Both plants shown were in bloom and fit for sale on March 20. For H. Avalanche Mr. Dupuy was awarded a certificate of merit.

E. Fardell, gardener to Mrs. A. N. Booth, Great Neck, L. I., exhibited two handsome vases of Queen Alexandra and Empress Elizabeth Stocks. For the variety Empress Elizabeth he was awarded a certificate of merit. He also showed a vase of Anemones of the Persian varieties purplea, La Citronniere and Mars, for which general exhibit he was awarded a vote of thanks.

Kessler Bros. of New York showed two plants of a new Fern, a sport from Nephrolepis Scottii, for which they received a certificate of merit.

Hydrangea Hortensia Lorraine

Grower, Louis Dupuy, Whitestone, N. Y.—See p. 703.

Spring Show of the Pasadena Gardeners' Association

The Spring flower show of the Pasadena Gardeners' Association was held March 31 and April 1-2, in two immense tents. The weather was ideal, the typical southern California variety—clear sky, balmy atmosphere, and no wind to raise the dust. Heat accumulates rapidly in a tent when the sun shines, and because of that fact the atmosphere was too warm for comfort the first two days; moreover, it was hard on the cut flowers because of the high temperature and low relative humidity, which the records at the weather bureau of Pasadena showed to be 28 per cent. at the noon reading.

A peculiar feature of these shows is that all exhibits are from the gardens, outdoor grown plants and cut flowers, excepting the Orchids of Mr. A. K. Macomber, a private grower of this beautiful class of flowers. Mr. Macomber has the financial ability and the disposition to keep his collection of Orchids up to the highest type of excellence by keeping in his employ an Orchid grower of unusual skill and, withal, so modest that it is a pleasure to meet the man and a delight to see the perfect specimens of both plants and flowers which he grows—his name is Roderick McKenzie. At this show he exhibited fifteen fine specimens, two of which were very conspicuous: *Lælia superbiens*, the flower stem of which was six feet in length; and *Cattleya citrina*, a beautiful lemon colored variety with a white tip on the lip. The color of the latter Orchid is very pleasing indeed.

One of the mysteries to me in connection with cut flower growing at this end of the State, for commercial purposes, is why some one has not engaged in growing Orchids for the local trade, when the flowers retail at \$1.50 to \$2 each. All the flowers sold here come from the north, yet Mr. McKenzie demonstrates that they can be successfully grown in this dry climate.

That eastern readers of these notes may have some idea of the great variety of plants in bloom at this season of the year, I made a note of those on exhibition: Tulips of the late flowering sorts, with stems 20 ins. in length; Hyacinths; Sparaxis; Ixias; Freesias; Watsonias; Iris in great variety; Narcissus of the trumpet varieties; Ranunculus; Anemones; Scillas; Alliums; the malodorous *Amorphophallus Rivieri*; Gladioli; Tritileias. Of annuals: Stocks; Scarlet Flax; Pansies; Petunias and Verbenas. The single varieties of the Petunia and the Verbenas are perennials in this climate, so also is Sweet Alyssum.

I made a collection of a few of the flowering shrubs and vines in bloom at this time; the list exceeded one hundred specimens, which were catalogued. The names, both common and proper, and nativity, were given, that the student of plant life might learn the names of the great variety of plants we grow here. Careful observation, covering a period of five years, in this feature of the flower show leads me to the conclusion that twenty-five per cent. of the patrons of shows are sufficiently interested in these collections to study them carefully, and leave with a feeling of satisfaction and that the time and money spent attending these exhibitions have been profitable.

Another peculiar feature of the Pasadena flower shows is that nurserymen are debarred from the premium list. Only private gardeners may compete, and the result is that few nurserymen make any attempt at an exhibit. At this show there were but five such, two of them Japanese; D. W. Coolidge, our specialist in novelties, and Robert Pegg, both of whom had exhibits that were a credit to them.

One of the Jap firms displayed skill in the arrangement of his exhibit. There is one peculiarity about all Japanese nurserymen, at this end of the State at least, which does not lend itself to successful gardening here, and that is they cling to the methods and plants peculiar to Japan, with its humid atmosphere, wholly, or almost so, unsuited to our peculiar climate.

The one commercial firm which had an exhibit of wonderful beauty was Howard & Smith of Los Angeles. I have had occasion to refer to this firm of young men a number of times before, and shall do so in the future, for the reason that they merit it all. This time they surpassed any previous attempt at making a display, and it is O. W. Howard of the firm who executes these marvelously beautiful designs. The picture of this exhibit may give the reader a general idea of it, but really does not, indeed cannot show the beautiful contours of the little hill and the pleasing combinations of plants, Japan Maples, evergreens, rockwork and moss-covered pergola. At 4 p. m. on Wednesday, March 30, teams began hauling dirt into the tent, and by noon of the next day the exhibit as shown was completed; and to make it thoroughly realistic a gopher began his work on the side of the mound the second day, to the astonishment and delight of the visitors. The plants being in pots and boxes there was no danger of his cutting their roots, therefore he was left to his work undisturbed.

In this, as in all past exhibitions of the Association, exhibitors were not compelled to have their plants labeled and, as in every previous instance, many of them were too careless to do so, to the disappointment of many patrons who attended with the purpose of learning the names, of Roses especially.

These shows are held without any guarantee fund

Hydrangea Hortensia Avalanche

Grower, Louis Dupuy, Whitestone, N. Y.—See p. 703.

previously secured to meet any possible financial loss in current expenses, and for this reason the Association is handicapped by the fear that it may be called on to meet a deficiency, and moves with caution in contracts, which is the reason why the exhibitions do not measure up to that standard of excellence which is possible in and may reasonably be expected of southern California.

P. D. BARNHART.

Retail florists are invited to send us items of trade interest for publication on this page; clear photographs of good designs will also be appreciated. These latter should always be packed carefully between boards.

Combination Business and Pleasure Auto

Combination Business and Pleasure Automobile

I am sending you a photograph of my automobile delivery wagon showing the way it is used for Winter. For Spring use I put on an open body; after the bedding season we put on the regular touring body. The covered body was taken off a small wagon and fitted at a small cost. I find that there is not much more cost in running this machine than in keeping a horse and it does the work in one-third of the time. It is a Ford machine and we are very much pleased with it. This note may be of use to florists who cannot afford to run both a horse and an automobile. As a combination delivery and pleasure craft it is a great success with me.

Pittsfield, Mass.

L. W. ACHESON.

Exhibit of Howard & Smith at Pasadena (Cal.) Flower Show

April 10, 1910

Florists in good standing throughout the country can avail themselves of the advertisers' offers in this Department and accept, without hesitation, orders from their local customers, transmit same to an advertiser in these columns, and thus avail themselves of the opportunities for extension of trade which are open to all. Let your customers know you all orders by telegraph to any part of the country.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail firms advertising under this heading are all considered by the publishers of The Florists' Exchange as being responsible, and will accept and fill orders for Flowers, Plants and Floral Designs for Steamer Orders, departing Trains, or any given point within their reach, forwarded them by mail, telegraph or telephone, in the respective districts to which their trade extends, the usual commission being allowed. While no guarantee is expressed or implied by this paper as to the satisfactory fulfillment of orders sent to parties whose names appear in this Directory, we will state that only concerns of known good standing will be admitted in this Department. The use of Arnold's Telegraph Code No. 16, a copy of which is placed in the hands of every advertiser, will greatly facilitate this interchange of business.

Eyres

Retail Notes

GARY, IND.—Franzen & Little have opened a flower and tree business at 644 Broadway.

BELVIDERE, ILL.—John W. Lyon has sold a half interest in his greenhouses and retail store to Herbert Anderson.

GREAT FALLS, MONT.—M. Kranz, florist, is to open a retail store at 405 Central ave.

LOGANSPOUT, IND.—Harry Newby, florist, took first honors in the automobile parade here last week, with his decorated Buick car.

FAIRMONT, W. VA.—George Daffin is to establish a large candy and flower store in the Comerford Building here about May 1.

AMHERST, MASS.—A. Foster Johnson, florist, under the name of The Union Gardens, will grow plants, flowers and vegetables at Nos. 5 and 6 Woodside ave., for sale at wholesale and retail.

GRAND FORKS, N. D.—E. O. Lovell, florist, has fallen in with the city plans to beautify vacant lots by offering to plant a large flower bed on one if the owner will keep it up and care for it.

The Haarlem Show

The first of the series of shows to be held during this Spring in Haarlem was formally opened March 23, and proved to be a decided success, and a distinct improvement upon former occasions. Bulbs were, of course, the leading attraction, but there was also a fine display of forced shrubs and other flowers.

A better site for a show could scarcely be found, the park being in the immediate outskirts of the town, with tram line by the gates. The outside show is made in a glade about a quarter or third mile long, with lofty oaks and other trees on either side, the vista being closed at one end by a pavilion, now filled with flower paintings, and at the other by the fine buildings of the Museum. In the turf of this glade have been cut numerous beds, planted with tens of thousands of bulbs. At present the Crocus and early bulbs are the only beds showing color, but the larger spaces, planted with Tulips and Hyacinths, give promise of a gorgeous display in April, when the next exhibition is opened.

The main show was accommodated in a huge structure of wood and glass, divided in two buildings, connected by a wide corridor. These were laid out to present the appearance of a garden, with a turf lawn in the middle of each, in which were cut geometrical beds filled with Hyacinths, Tulips, etc. The various groups of forced shrubs, Rhododendrons, Lilacs, etc., were arranged round the outside with turf edgings so as to form a charming background. The supporting pillars of the structure were masked with drapery, and overhead the whole building was ceiled with fine muslin, in alternate bands of buff and white, allowing a pleasantly subdued light to fall upon the gay groups beneath.

The question is often asked why our own shows, which we may claim, without undue conceit, surpass those of any other country in the quality of individual exhibits, are so inferior to Continental exhibitions to scenic effect. We think the answer is not so much in the fact that a harmonious grouping of the whole show requires careful planning and forethought, as in the factor of time. The Continental shows are not rushed together as ours are. In this instance the show was practically complete on Monday; on Tuesday the judges, divided into groups for each section, made their awards unhurried before lunch time, after which the show was in the hands of the officials to re-arrange where necessary, and polish up until Wednesday mid-day, when the public was admitted. It will be seen by this that the management had a clear day more than is ever allowed to it under our system; whether the results are a fair compensation for the extra loss of time entailed on exhibitors, officials, and others is, we think, a fair subject for discussion by our R. H. S.

Some of the best Hyacinths shown were: La Victoire, a very fine new red; Orange Queen; Margot, double white; Pineman, blue; Queen of the Pinks, a sport from King of the Blues; City of Haarlem, yellow; Lady Derby; Gen. Havelock, deepest purple; Adelaide Ristori, very deep yellow; Excelsior, pale bluish, very large bells; Myosotis, light silvery blue; Jacques, bluish, very large loose spike.

In Tulips some of the oldest varieties were still well to the fore; for instance, Rose Gris de Lin was as pretty as any

April 16, 1910

shown. Joost van Vondel, white, was also very fine, as were Rose Luisante and Couleur Cardinal. Rose of Holland, white, with delicate edging of pink, was pretty; but better still was President Cleveland, in the same way of color, but a much larger flower. Bruinilde, a yellow and white Pottelbakker, was effective. Rose van Dekema is a very pretty single pink. Of double Tulips, we noted Saffron, a sport from Murillo, with much the coloring of a Gloire de Dijon Rose; Boole de Niede, a good white; Anna Rooze, double pink; Henri Witte, deep yellow and red; Rose d'Amour, pink; Le Toreadore, deep yellow and red; Golden King, rich yellow.

Some of the best Crocuses were: King of the Whites; Maximilian, pale lilac, almost blue; Potter, very deep rich purple; Charlotte Patti, very large striped; Albion Root, striped; Pampore grandiflora, fine medium purple; Agnes Maria, rich purple. These good varieties of Crocus, thickly planted and well grown, gave a wonderfully good effect, almost rivaling Tulips.

After the bulbous flowers, the leading feature of the show, to our mind, was the display of forced Lilacs, which was really wonderful, and even more so in the grand quality of the bloom than the quantity shown. There were a number of groups of lifted and pot plants, but the highest quality was seen in the exhibits of cut flowers. These came principally from Aalsmeer, an almost unique village, barely standing out of the water. As the floors of the greenhouses are only some six inches above water, the ordinary system of boilers and pipes is out of the question, and we were assured that the astonishing results seen were produced with common stoves only. The drier atmosphere induced by this method of heating is said to have a favorable influence upon the lasting qualities of the flowers, and Lilac has, we were told, been shipped to America, and arrived sufficiently fresh to satisfy the importer. The size of both pips and trusses was remarkable; we measured a pip of Gloire de Lorraine one inch across, and the color was equally good. Souvenir de Ludwig Spath, the well-known dark variety, was almost as rich in tint as when grown outside. As to varieties, the old Charles X was grandly done. Marie Legraye was the champion white; Lavandensis was noticeable for its immense trusses; but the most charming of all to our taste was President Grevy, a clear French grey, almost blue in tint; this last was seen in grand form in the leading exhibit in a large basket very artistically set up, and also in most of the principal entries.

The only novelty of note in Rhododendrons was Prinses Juliana, a lovely flower in the way of Pink Pearl, but deeper in its rosy tint, and with a most gracefully waved margin to the flower. The plant did not look too robust, but it is a most attractive flower. It was shown by Messrs. C. B. van Nes and Zonen, Boscop. We might also mention Henry Dupont, a distinct and rather effective variety, blush with heavy crimson blotch.

A most ingenious machine for grading bulbs, on the principle of a seed winnower, was worth noting. This is said to grade the bulbs more accurately than can be done by hand and without bruising. It must save much labor to those using it. However, it takes up rather a big space and costs £30 (\$150), so that it would only be economical to large dealers.—From the Horticultural Advertiser (England).

Cincinnati

The past week has been something fierce, especially in the Carnation line; in fact, all flowers suffered. Am. Beauty Roses came nearer selling for something than any other stock, although it was hard work to move them even at low prices. Saturday, owing to a number of openings which were giving away Carnations, enabled the wholesaler to clean up pretty well at some price. Advice from the Carnation growers are to the effect that their cuts will decrease considerably from now on, therefore prices will advance before the end of this week to a point where the grower as well as the wholesaler can realize some returns.

Retail merchants, in all lines, are complaining. Quite a number of our retail men claim they have never seen business so bad as it has been since Easter, but we are living in the hope that the worst is now over. Weddings and other social functions are beginning to liven up a little, and we shall expect good business from now until the first of July.

E. G. GILLET.

Brooklyn, N. Y.

At the store of M. T. Keenan, 40 Myrtle ave., business has been very brisk all the past season, especially at Easter. The Keenan store has been here about three years, Mr. Keenan having moved from a corner store a short distance away. Funeral work is a strong feature, as well as wedding and dinner decorations. Considerable landscape work is also executed. Mr. Keenan has been confined to his house for the past five weeks, having undergone a minor operation.

Miss E. C. Thienes, 245 DeKalb ave., reports the past Easter business the best she ever had. Azaleas and bulb stock were the leaders in pot plants. Violets went better than ever before, owing to the fair prices asked. Funeral business has of late been unusually brisk. Miss Thienes has a large window suitable for good decorations and during Easter she made a specialty of made-up baskets of greens and plants.

Robert G. Wilson, 5 Greene ave., has a well appointed store with a fair-sized conservatory in the rear, well supplied with potted stock. Easter business was very good at this establishment.

A. Mack, 295 Myrtle ave., reports the past Easter as being the best in the seven years he has been in this location. A recent design executed by him was a model of the battleship Ohio, made of Carnations and white Roses. The model was five feet long with masts about 4 ft. high, six guns and well supplied with flags. The design was made for an old employee of the Navy Yard machine shop.

P. Mallon's Sons on April 1 returned to their store at 14 Hanover Place, in which they have been making extensive alterations, raising the floor to the level of the street and enlarging the store. They report the sale of Violets recently the largest they have ever had. Business is unusually good here in funeral work and the Easter trade was excellent.

Cultural Direction Leaflets

Prepared especially for seedsmen to give away to customers. Written by experts with a view to the wants of the amateur. Seedsmen are requested to send for a free sample. Address:

A. T. De La Mare Ptg. & Pub. Co., 2 Duane St., New York

A Woodsmen of the World Design

The design shown was the work of Hilary E. LePage, Stamford, Conn. The Roses used were Bridesmaids and the lettering was on white Carnations. The emblem of the order is a log of wood so, to get as near nature as possible, there was secured, as you see, a good subject, trimmed in such a way as to make it look quite natural. The wire frame was composed of wreaths, placed one inside the other, the largest being 27 ins.

The Florists' Exchange No. 2 Duane St. New York

NEW CANAAN, CONN.—S. B. Hoyt is improving the approach to his greenhouse on South Main st.

NISKAYUNA, N. Y.—While working on his greenhouse here recently John V. Green fell and broke several ribs.

MONTVALE, MASS.—Mrs. David Fisher has sold her greenhouse plant to a Mr. Flood, who will continue the business.

KANKAKEE, ILL.—A. H. Burt, florist, 62 years of age, is seriously ill with an attack of measles.

Notice

A special meeting is to be held, under the auspices of the N. Y. Florists' Club, at the Club rooms, Grand Opera House Building, 23d St. and Eighth Ave., New York City, on Monday evening, April 18, at 7.30 p.m.

To consider the advisability of establishing a Plant and Flower Market under Queensboro Bridge, New York, upon terms offered by the City, and to take action in the matter.

Members of the N. Y. and N. J. Association of Plant Growers, and the N. Y. and N. J. Market Florists' Association are invited to attend and all florists who are interested in the project, whether members of any organization or not.

A. L. MILLER,
President N. Y. Florists' Club

At Auction

WITHOUT RESERVE

The Fruit Auction Co.

200-204 Franklin Street, NEW YORK

Horticultural Department, J. P. CLEARY, Mgr.

WILL OFFER

TUESDAY, APRIL 26th, 1910, at 2.30 p. m. sharp

ONE GREENHOUSE, about 140 feet long by 20 feet wide (part of which is a large Palm House, 34 by 25 feet), **Boiler, Pipe, Benches, Tools, etc., etc.**

Also the plants remaining, including **Carnations, Ferns, Araucarias, etc.**, and one large specimen **Latania Borbonica**.

This sale will be held on the premises at 140th Street, near Riverside Drive, New York City, Borough of Manhattan. Reached by Broadway Subway to station at 137th Street, thence a short walk North to 140th Street and West to the entrance at 623 West 140th Street.

The Greenhouse will be shown to prospective purchasers by the caretaker at 623 West 141st Street.

Terms:—25% cash at time of sale, balance to be paid within 24 hours.

Reasonable time for demolition and removal will be allowed; arrangement to be made at time of sale.

NOTE THE DAY AND DATE

Dreer's Select Potted Roses

FOR OUTDOOR PLANTING

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

A New Plant Food

At the last meeting of the Gardeners and Florists' Club of Baltimore Chas. Seigwart gave an interesting talk on two Salvia plants in 2-in. pots, showing the difference in growth obtained by the use of a new plant food that is not generally known to the trade. C. L. Seybold had also had some experience with the food and told the wonderful results at his plant, and what was accomplished.

This food is placed on the market by The Plant & Land Food Co., 407 East Saratoga st., Baltimore. It is put up in capsule form, under the trademark "U-TREE-T-ME" and is patented by

F. G. Dokenwadel. These capsules are used by puncturing the ground around the tree and putting in the capsules necessary for the different varieties and ages of trees and plants. The food was used on a large variety of plants, flowers and ornamental trees at Carroll Park last year, and the superintendent says that most wonderful results have been obtained and that in all his experience he has never seen its equal. The food is also said to contain an anti-toxin which will remove the scale and fungus growth on plants and trees; and at Carroll Park, where it was necessary to keep men sponging Palms and plants to keep them free from scale, these same plants have not been sponged or treated

except with the anti-toxin plant food for eight months, and they are healthy, free from scale, and have shown remarkable growth.

The food was also used with wonderful success at the country estate of Wm. Laaban, at Blenheim, Md., where great results were obtained on fruit trees that were diseased, especially on Plums and Figs that would not mature the fruit until treated with this material. When the fruit was ripened it proved to be of a better quality than could be grown anywhere without the food. It is not expensive or difficult to use and should prove a great saver in fertilizer bills as it contains plant food that is immediately available. A glance at the

lawn at Blenheim is very convincing as to its merit, presenting a sight seldom seen at this time of the year. The lawn was treated last year and a very remarkable difference could be noted than where other fertilizer was used. Even around the trees where the grass was always thin, where the food was put in the ground for the tree, there is now a growth of grass far superior to that on any other place.

VINELAND, N. J.—Miss Lealman has opened a new florist store at the Bijon, next the Journal office.

RUTLAND, Vt.—T. M. Barrett, formerly of this city, has purchased a florist business in Portland, Ore.

THE GREATEST SALE OF BAY TREES Tuesday, April 19, 1910

AT 10.30 A. M.

We will offer **AT AUCTION** the following consignment of **Bay Trees** direct from Belgium, ex S. S. "Vaderland"

1 Pair Standards, 6½ feet diameter of crown.
4 Pairs " 45 inches " "
5 " " 40 " " "
10 " " 36 " " "

8 Pairs Standards, 28 ins. diameter of crown.
10 " " 24 " " "
2 " Pyramids, 9 feet high.

Also the Following Palms

4 Phoenix Canariensis 4½ feet.
4 " " 5½ "

4 Phoenix Canariensis 6 feet.
4 " " 7 "
8 " " 8 "
25 Kentia Belmoreana, in various sizes.

In addition, a consignment of **Holland Roses, Ornamentals, Shrubs, etc.** Also several consignments of **Flowering and Bedding Plants.**

Question Box

We wish to impress upon our readers that all questions intended for this department must bear the name of the sender, not necessarily for publication but as a guarantee of good faith. We will endeavor to answer all questions submitted to us by subscribers, but we cannot recognize anonymous communications.

IDENTIFICATION OF PLANTS

When sending specimens for names correspondents should send some lower leaves of herbaceous plants as well as upper ones, and of all plants, flowers and seed vessels if possible. In addition to this, if stated whether it be shrub, tree, herbaceous, wild or cultivated, location where growing, it would often enable identification of specimens difficult to determine otherwise.

(99) **Geranium Cuttings and Culture.**—How many cuttings ought Nutt, Ricard, and Poitevine stock Geraniums, from 5½-pots, under field culture, give in September, also from 2½-pots under same conditions? In an even span house with ventilation on south side of ridge, which bench is preferable as a cutting bench? How deep should sand be in bench and at what depth should cuttings be inserted? A. B. R. N. Y.

—With good soil and culture Nutt Geraniums from 2½-pots should give twelve, and 5½-pots thirty and cuttings each; Ricard and Poitevine from same sized pots ten and twenty-five each, respectively, in September. Use north bench for cuttings, filling it with about three inches of clean sand; insert the cuttings about one inch.

(100) **Cleaning off Ribbed Glass.**—Can you give me directions for cleaning soft coal smoke and metal rust off of ribbed glass; it can be gotten at only with a long handled window brush? I have tried soap and water with no effect. —G. S. E. Mass.

—As soap and water has been found ineffective, wait till a heavy rain has softened the smoke somewhat; then try kerosene, applying it with window brush or rag, following this with a strong solution of concentrated lye and water, and rinse off with hose.

(101) **Carrying Roses Over.**—H. S. N. Y.—Under the conditions you describe, we would advise that you do not run your Bride, Bridesmaid, Richmond and Maryland Roses a second Winter. Plant new stock in June.

(102) **Flower for Identification.**—H. S. N. Y.—The flower received is *Rhodanthé Manglesii*, which is sometimes called an "Everlasting" and is used in bouquets of dried flowers.

(103) **Norway Spruces Dying.**—I have a number of Norway Spruce trees on the lawn, besides a hedge, and both are dying in spots. The hedge has been kept trimmed for several years. The Spruces are attacked on the tip of the branches by some insects and wither and dry up. Could you tell me what they are and what remedies to apply? R. McC., N. Y.

—The Spruces in hedge are probably dying out because too much shaded by buildings or by the Spruces on the lawn. They usually do in such a position, and some of the branches of Spruce trees may die when trees are too near each other. Norway Spruces need room. They do not make a very satisfactory hedge.

(104) **Dying of Geranium Leaves.**—I had nice bushy plants until a few weeks ago; then the leaves began to turn yellow at the bottom. What treatment shall I give Apple Geraniums?—H. E. W. N. Y.

—Give your Geraniums more space; repot, if not bound; see that each plant receives its proper proportion of water; give abundant ventilation. Give Apple-scented Geraniums like treatment, and keep down the aphids.

(105) **Pinus pinea.**—Is this variety of Pine hardy around Philadelphia?—W. E. K. W. Va.

—Pinus pinea is not hardy in the North. It is a native of the Mediterranean. Thrives best in a sandy soil, near the sea, in a sheltered situation; it is somewhat tender, not being able to stand exposure to cold blasts of wind.

New Jersey Floricultural Society

A regular monthly meeting of the New Jersey Floricultural Society was held on April 8. George Smith, addressed the Society on "The Florist vs. the Gardener." The speaker dwelt upon the importance of both in the community, engaged as they were in the formation of "next to God's greatest creation," mentioned as a test of ability the successful staging so little understood and the production of effect by color scheme and harmony, and said that most of those in the trade were in it for what they can get out of it. The man who wields the rake, the shovel and the spade is not necessarily a gardener; he must bring a love for his art to bear on his work. When Mr. Smith gave up gardening six years ago, an occupation which he had then followed for fifteen years, his first impression of the florist's trade was the number of abortions which passed for floral art. He had witnessed men who had served a whole life for one or two people. The florist on the contrary must please a multitude. The highest faculty held by a gardener is his ability to start in fifteen months ahead of time to produce results, and this the successful gardener must do. If any one present contemplated launching out into the florist's business he was warned to consider first the necessity of capital in the present age for any undertaking; then the coal bills, and to read carefully of the millions of blooms consigned to the ash barrel in the past few weeks for want of sale. The man who goes into Orchids at the present time, he said, will come out all right, because of the popular demand for which there is no adequate supply; and then Orchids are light and showy. Both gardener and florist can benefit by trips to those beautiful scenes in nature such as the Adirondacks, etc.; northern New Jersey he thought was not far behind in the beauty of its scenery.

The floral display was large and varied and consisted of the season's flowers. No outside talent came in to compete for the numerous silver cups offered, and to which Messrs. Hitchings & Co. have added one more, a letter from this firm making the offer being read at the meeting. Lager & Hurrell of Summit, N. J., staged one of their superb exhibits, which consisted of *Clematis*, *Dendrobiums* and *Phalenopsis*. A specimen plant of the *Phalenopsis amabilis* of the Ashworth variety, with blooms of pure white, was exhibited for the first time in this country; and a spray of *Dendrobium Thysiflorum* had fifty flowers. J. B. D.

Newport (R. I.) Horticultural Society

This Society was indeed fortunate in securing the services of E. O. Orpet, of South Lancaster, Mass., to deliver a lecture on "Orchids" at its meeting on Tuesday evening, April 13. The attendance was quite good. President Robertson was in the chair. After the routine business was disposed of, Mr. Orpet was introduced, and gave one of the most practical talks that the Society has ever been favored with on such a subject, and while the cultivation of these plants was gone into, yet the most interesting feature of

the lecture was that covering the raising of new varieties by hybridization.

On the exhibition table there were cut blooms of the following *Laelio-Cattleyas* Latona, Coronis, Balliana, Mercia, Kerchoviana, Blechleyensis; *Cattleya* × *Thay-eriana* intermedia alba; *Laelio-Cattleyas* Milton and Nephthys; and a *Cattleya* Triana unnamed seedling. All were among the good things produced through the speaker's efforts, and which happened to be in bloom at this time, serving to give a much better idea of what can be done than any words could, where proper facilities exist, and where there is persistent, patient, intelligent effort. The fact that it took 11 years for some of Mr. Orpet's best seedlings to produce a flower shows that very much patience is necessary.

In speaking of the culture of Orchids, generally, the speaker said that many had been misled by being grown in too high a temperature, particularly too high a night temperature, night being the time when all plant growth is made. In the case of *Cattleyas*, and even *Laelia purpurata*, the night temperature of a Carnation house should answer. Watering should be done in the evening, during the Summer, but in the morning during the Winter. Plants should be given all the sunshine that they will stand, and when shading has to be resorted to, green or blue paint should never be used. Roller shades are best, as they can be taken up and lowered at pleasure, according to the state of the weather. The *Cattleyas* had no real resting period, he said, consequently should never be totally dried off at any season of the year. The potting should be done during the resting season, which with many species is from November to April. Earthenware pots or pans were the best receptacles, and the best material was Fern roots, or *Osmunda* fibre as it is known; and in cases where the quality of the water was such that *Sphagnum* Moss thrives—as it does in Newport—then it might be used to advantage in top dressing.

By hybridization new and improved forms might be had, some of which instead of blooming once a year would bloom twice, and, besides, would show more vitality than imported stock. Of course, to produce one good new variety, sometimes hundreds of seedlings had to be raised.

The speaker highly commended the work which had been done in perfecting the "Orchid Stud Book," but bewailed the fact that credit was not always given to the raiser or originator of a variety, to whom such credit was surely due.

In the discussion which followed, and which was taken part in by Messrs. R. Gardner, J. T. Allan and C. Oscar Schultz, the Orchid fly came in for some attention. This pest has given some growers much trouble and the main question seemed to be how to exterminate it without destroying the plant. A free use of the knife on the growth in effect, it was thought, was but little better than the fly itself. At the close of the lecture Mr. Orpet was given a rising vote of thanks.

John T. Allan, gr. for Mrs. John R. Drexel, showed some seedling *Amaryllis*, and to the best one was awarded the Society's silver medal. Paul Volquardson, gr. for Mrs. Weld, showed an *Amaryllis* plant bearing 23 blooms, a mammoth specimen, and was awarded the Society's silver medal for superior culture. The committee on awards was composed of Richard Gardner, C. Oscar Schultz and

Charles D. Stark. The offer of \$50 as a prize for the Fall show by Mrs. W. Storrs Wells, was accepted.

ALEX. MACLELLAN.

Atlanta, Ga.

The Atlanta Floral Company, one of the best known floral concerns in Atlanta, which was recently purchased by and is now under the management of Messrs. A. Borg and Ivar Erikson, will be conducted on a larger and more up-to-date scale. A new department of landscape gardening will be added, and will be in charge of Mr. Erikson, who holds diplomas from the largest botanical schools, both in this country and Europe, and is a professional landscape architect and grower.

Mr. Borg, who also holds diplomas from Berlin and New York botanical gardens, and is thoroughly familiar with every detail of the floral business, will have charge of the Peachtree st. store.

EISELE'S WHOLESALE TRADE LIST

FERNs, Boston and Scottii. From 3-in. pots, \$5.00 per 100.
FUNKIA variegata, atroot plants, 4½-in. pots, \$1.00 per doz.
CLEMATIS, large-flowering varieties, 2-year-old plants; Jackmanni, Henryi, Mme. Veillard, \$3.00 per doz.
CLEMATIS paniculata, strong plants, \$10.00 per 100; 3-in. pots, \$5.00 per 100.
DRACAENA Indivisa, 4-in. pots, \$10.00 per 100.

PETER REINBERG, 35 Randolph Street, Chicago

A Few of the Greenhouse Construction Improvements Made by Lord and Burnham Co. in 1909

New Eave Construction

With the advent of wide iron frame houses came two problems; first, that of making the eave strong enough to safely stand the tremendous pressure of the roof brought at that point; and, second, how to handle in erection the unwieldy rafter and post which had always been welded together at the eave.

To enlarge the eave itself would have been impractical as that meant more shade, so the rafter and wrought post were joined by a double gusset plate. The posts are first set and the rafters afterward bolted fast to them, resulting in greater strength at the eave and greater erection speed, with consequent economy of labor.

To still further improve it, a drip gutter was added, preventing sill spattering.

View of new side construction used in P. M. Pierson's house.

Rack and Pinion Ventilating Gear

The torsion or twisting in ventilating shafts operated in the customary way has always been a drawback to long run operations. Uniform closing down of continuous sash was hardly practical beyond fifty or seventy-five feet, no matter how powerful the gear.

To overcome this, the rack and pinion principle was adopted to a modified form of our regular standard gear. It does away with the arm and rod, and in its place is used a rack or rod filled with teeth, into which the teeth of a cog-wheel on the shaft fit. The heavy load you see is lifted by this powerful device, in an almost direct way and not with the long angle movement of the arm and rod method.

It is practical for very long runs of continuous sash, and twice as long runs of alternate sash. Fred Burki installed it in his last iron frame house. Joseph Heacock will use it in his new L. & B. house. F. R. Pierson has it in his latest wide houses.

Rack and Pinion Ventilating Apparatus in Robert Craig's new range at Norwood, Pa.

Automatic Header For Overhead Mains

This fills a long felt want with the man who uses overhead piping. The problem of air venting such piping has always been an annoying one, as air cocks must of necessity be placed out of reach and consequently all too often forgotten.

This No. 314 overhead header works on the same principle as our regular automatic header, which has given such entire satisfaction for so many years, and absolutely prevents air locks.

Bar Splice Plate

This plate is used for splicing bars in the wider pipe frame or semi-iron houses. The splice is made at the purlin, to which it is bound by the purlin binding clasp, which in turn is secured to the lower part of the plate by bolts, which run through the plate cap and bars. It not only makes the splice the strongest part of the bar but is weathertight as well.

New Putty Container

Putty packed in the usual wooden tubs was found to be impractical, as in hot weather the oil was likely to leak out, if stood on end. This new sheet iron container is a tight, attractive one, in keeping with the good putty it holds. It makes a hang-up tub for Hydrangeas, etc., when empty.

New Curved Eave Detail

The main feature is a combined iron reinforcement and splice plate serving to both brace the eave and securely unite the curved and straight portions of the glazing bars. It is made in part on the same principle as the bar splice plate shown in the opposite cut.

The sill and gutter are now cast in one piece, making a more finished piece of workmanship.

NEW YORK, April 13.—The cut of flowers this week has shortened. This may not be true in all lines but it is true in general. In some cases prices have advanced and the market has a better tone. The higher grades of flowers have a price again, and are no longer sold for whatever is offered. American Beauty Roses, specials, sell in small quantities at 30c. each, but in larger sales the best price realized is around 25c. Fancy Killarney and My Maryland sell for 10c. The supply of white Roses is somewhat short. Bride is moving at 8c. and Bridesmaid at 6c. for fancy special grades. The demand for Richmond has slackened but some long-stemmed specials reach the 15c. mark.

Carnations are moving at better prices, and 3c. each is obtained for fancy stock. One or two special varieties bring a penny or two more.

The supply of Gardenias is sufficient to meet every demand and the best grades are selling for \$2 per doz. In Orchids, Cattleyas of the best grade are not over-abundant, and realize 60c. each. There are only a few Cypripediums offered and these are selling for \$1.50 per doz.

Lilies and Callas have recovered somewhat from slump prices, the former realizing in smaller sales 6c. and the latter 10c. for best grade, but most sales are, respectively, around the 3c. to 6c. mark. There is a better demand for Lily of the valley, and some top grade stock realizes 4c.

Violets are nearly over and Southern bulbous stock has ceased to arrive. The cut of Sweet Peas is not equal to the demand, and prices are firmer; \$1.50 per doz. bunches is the selling price for best grades.

Bulbous stock is not so much in evidence. Some best grade of Daffodils and Tulips are moving well at 3c. each. Miscellaneous Spring flowers of all kinds are on the market, and meet with a fair demand. The better condition of the market is not due to increased sales, but to the shorter cut of flowers.

PHILADELPHIA, April 11.—Last Saturday night found the market well cleaned up on practically all kinds of stock. The cut of Roses, Carnations and Sweet Peas has shortened, especially the last named. Violets are nearly over, and southern Daffodils have ceased to arrive. There is no sharp advance in prices, but there is an upward tendency and a firmer market, especially on the higher grades of flowers.

American Beauty Roses, specials, are selling at \$4 per doz., but in larger quantities about \$30 per 100 is the price paid. Killarney, My Maryland, and Bride are moving well at 10c. for top grade; and special Richmond and Mrs. Jardine realize 15c. Bridesmaid and Kaiserin in some transactions have sold for 8c. but most sales are around the 6c. mark.

Carnations are arriving in better condition and are realizing decidedly better prices, fancies selling in some few cases for 3½c., but most sales are at 3c. each.

In Orchids, Cattleyas, best grade, are selling at 60c. each, and Dendrobiums at 40c. Gardenias have advanced somewhat and top grades are selling for \$3 per doz.

The supply of Lilies is shortening very perceptibly and best grades are selling for 12c.; Callas for 10c. Lily of the Valley is moving well at \$3 per 100 for best grade. Sweet Peas are off crop, and \$1 per 100 is easily realized for good flowers.

The demand for such bulbous stock as is still offered is rather slow, and there is little change in prices except in double Tulips, which are realizing \$4 per 100 for fancy stock.

The supply of hardy Ferns is short and there is an advance in price to \$2.50 per 1000. Miscellaneous stock is clean-

ing up fairly well. On the whole the market is in a better condition than one week ago, and a moderate advance in prices is looked for.

BOSTON, April 12.—Market conditions have not changed much since last week. There is an oversupply of all kinds of flowers. The quality of the flowers is of the very best, even bulbous stock with the largest growers looking very well; but there is an immense quantity seen everywhere. Roses, which were scarce throughout the Winter, are over-abundant now. The boys on the street have a great harvest of the present time and they are disposing of immense quantities and are paying good prices for their flowers. They certainly can get rid of quantities of stock as they come into contact with the general public, and in the Spring people are more fond of flowers than at any other season and buy more freely. Hence the reason of the large disposals on the street.

Roses are very plentiful and have dropped considerably in price. The better grades of some varieties are still bringing fair prices.

Carnations are quite plentiful and the very hot weather affected them somewhat, the color in some varieties becoming lighter. Prices have dropped considerably.

Violets are all gone; the hot weather finished them up quickly. Sweet Peas in all grades are abundant; poor grades go at very low prices but the finer grades still bring remunerative prices. Lilies are plentiful and prices are lower. Pink, white and yellow Antirrhinum are the favorite colors, and fine quality stock brings fair prices. Good Callas are plentiful and prices are slightly lower. Bulbous stock is very abundant and prices are away down. Gardenias are plentiful and are not bringing the choice prices of some weeks ago. All green goods are in good demand. There is an especially steady demand for Asparagus Sprengeri and plumosus, and Adiantum. R. C.

CHICAGO, April 12.—There is a decided change in the market, not so much in the advance of prices, or of the demand, but the stock in nearly all indoor lines has diminished, relieving the market to a marked degree of the over-abundant stock, that has been conspicuous in the past few weeks.

American Beauty Roses still come in fine form, but in less quantities; prices hold stiffly at \$3 per doz. All other Roses are in lighter supply and move off on a better paying basis than for some time. Some of the growers report crops going off rapidly, which will bring the next crops in nicely for Decoration Day.

Carnations are variable, some days arriving in unlooked for quantities, next day about equal to demand. The cool weather the past week has been a great factor in reducing the stock. Fancy stock is holding at 3c. while \$1.50 and \$2 per 100 is commanded for general stock.

Sweet Peas are the one thing, at present, in demand, and the supply is not nearly sufficient to meet all requirements. There are, however, some good quality flowers to be had, which easily sell at \$1 per 100.

Bulbous stock is disappearing gradually, and there is not nearly half the quantities in any line as were to be found last week. Some excellent double Tulips and Jonquils are commanding attention. Hyacinths are practically done for, as also Freesias and Paperwhites.

Lilac from the southern part of the State arrives in much better condition than in the previous week. The demand is not very great, however. Lilies and Callas are a drag on the market, very few being sold the past week, and the prices have dropped to 6c. and 8c. each. Orchids are scarce; many more could be

disposed of if they were obtainable, as nearly all wedding orders are calling for Orchids in some form. Daisties are beginning to arrive in excellent form and are in demand for bridal bouquets and decorations. Mignonette is still being cut and fine full-flowered spikes are coming. Many Spring flowers and much miscellaneous stock can be seen at all houses, with very little call for them except for window trimming. Greens are up to the standard in all lines, excepting Ferns, which are not at all what could be desired; this trouble will however be eliminated shortly by the arrival of the new stock.

ST. LOUIS, April 11.—Trade continues inactive all over the city. A few of the West End florists had weddings to work on and those down town were busy some days with funeral work. In the West End they say blooming plants have the call over cut flowers at present and at good prices. The commission men had their hands full all week disposing of their consignments. Stock of all kinds has been plentiful and cheap and all the stores were loaded down daily.

Harrisii Lilies and Callas have been almost a glut, and were offered as low as \$5 per 100. Roses did not bring over \$6 per 100 for long, fancy; white and pink sold fairly well; with no sale for reds. American Beauty Roses, fancy long, brought \$3 per doz., and medium \$2; shorts from \$3 to \$6 per 100. Carnations sell well but the market is over-crowded. To dispose of them all, good grades sold as low as \$1 per 100, and \$8 in 1000 lots; colored stock was generally dumped; white and light shades sold well. Lily of the Valley has been bringing \$3. Lilac is in abundance and sold well for a few days. All bulb stock is in plenty and demand slow. In greens, the market is long on everything with Smilax and Galax in good demand. ST. PATRICK.

INDIANAPOLIS, April 11.—Outdoor flowers are fully a month in advance of other years in development. The early flower season is at variance with any previous year, as recollected by local florists. Lilacs, Spiraea, Crab-Apple blossoms, Redbud and numerous other flowers generally welcomed for Memorial Day are now in full bloom. Field grown bulbous stock can be no longer held in check and is being marketed at low figures.

Fortunately, the heavy supply of outdoor material is offset by light crops in the greenhouses. Carnations in particular are cut in small numbers and are

readily wholesaled at \$2.50 to \$4 per 100. Roses, because of the continued beautiful weather, are showing an in-different quality. The Killarneys sell best at \$6 to \$8 per 100 for select stock. American Beauty are fairly good at \$5 to \$35 per 100. Bride and Bridesmaid are more plentiful than the rest at \$2 to \$3 per 100. \$1 to \$3 per doz are the general retail prices for all but American Beauty which bring \$2 to \$9 per doz. Violets are troublesome in that the shop men can never be certain as to the condition in which they may arrive. Indiana wood Violets are used for some purposes at 20c. per 100. Eastern doubles retail at \$1.50 to \$2 per 100.

Funeral work in liberal quantities causes Lilies and Callas to become good property at \$10 to \$15 per 100. Surrounding towns and villages lend their aid at this season in promoting small counter sales. About everything from a lawn mower to Orchids is inquired for at the flower shops. The conservatories receive much attention from the retail trade and specimen plants are moving exceptionally well. I. B.

National Council of Horticulture

The third installment of the press service of the National Council of Horticulture has been distributed by J. H. Burdett, 1720 West 104th Place, Chicago. The subjects covered are "Arrangement of Shrubs and Flowers in the Yard"; "Root Celery"; "A New Way to Grow Pole Lima Beans"; "What to Grow in Vacant City Lots"; "Nasturtiums"; "Planting and Care of Perennials."

Firms Who are Building

CALVERTON, N. Y.—W. J. Benjamin is doubling his greenhouse plant.

NORFOLK, CT.—Robbins B. Stoeckel is planning to erect a greenhouse on the Litchfield road.

PORT HURON, MICH.—Asman the florist is building a large greenhouse just south of Lakeside Park.

NEW CASTLE, IND.—The F. J. Bentley Co. is rebuilding its greenhouses damaged by snow last February.

EARLINGTON, KY.—The management of the Pleasant View Greenhouses is to build three additional houses this Spring.

 CUT FLOWERS AT WHOLESALE

New York

Many retailers are already busy filling window boxes with the harder plants, such as Pansies, English Daisies and Hyacinths; and some, at the demand of more venturesome buyers, are using even the more tender plants for this work. The most pleasing combination of plants for this use so far noticed is scarlet Geraniums, Paris Daisies and English Ivy vines.

Kessler Bros, 50 W. 28th st., report a very satisfactory business in window box and bedding plants, beginning directly after Easter and steadily increasing.

P. Hamilton Goodsell, who deals in nursery stock, with office at Room 503 Singer bldg., finds Spring trade opening early with a good demand for ornamentals in which he especially deals.

Miller & Carr, the new and efficient managers of the American Nursery Co., which represents in this city the Bloodgood Nurseries of Flushing, L. I., and the P. & F. Nurseries of Springfield, N. J., with offices at Room 539 Singer bldg., report a steadily increasing business and a good outlook. This company handles, especially, ornamentals, shade trees and forest seedlings, and has recently gotten out some interesting pamphlets along these lines. Among other large orders they are filling are some from Thomas F. Ryan of the Metropolitan Street R. R., for his 17,000-acre estate at Oak Ridge, Va.

Mrs. A. Warendorff is at present ably managing the florist business at 1192 Broadway while Mr. Warendorff is taking a much needed rest in South Carolina. She reports business reasonably good and orders booked for several weddings in the near future.

Brower's Sons, 158 Broadway, report about the usual business for this season. Mr. Brower is interestingly reminiscent of the florist business of thirty years ago, when he obtained his flowers from the growers as best he could, sometimes acting as his own broker.

The Rosary Flower Co., 24 East 34th st., is displaying some interesting importations of Boxwoods, grown in some forty different forms, among which are chairs, vases, peacocks, ducks, and an immense goose.

C. A. Dards, at Madison ave. and 44th st., who makes a specialty of supplying hotels with Palms, and other green stock, has about eighty hotels now on his list and employs ten men at this branch of his business. Mr. Perry manager of the branch store at 114 W. 72d st., reports nine weddings already booked for May.

The Empire Floral Co., 71 Broadway, S. Anderson secretary, is, as usual, catering to the trade of the financial district. This company also does a large steamer and foreign order trade.

Hitchings & Co, 1170 Broadway, have recently completed a large range for J. Oden Armour, Liberty Mills, Ill.

Carl Jurgens, Newport, R. I., will in future dispose of his cut of flowers through his own salesman at the New York Cut Flower Co.'s quarters, 55-57 W. 26th st., beginning May 1.

John Mangau, now with Frank Millang of the N. Y. Cut Flower Exchange, will go into business May 1 as successor to Muller & Stokes, 413 Gates ave., Brooklyn. This business has been conducted by Mr. Stokes and wife, who is a daughter of John Muller, under the above firm name.

Mrs. Alfred Winnefeld, wife of Alfred Winnefeld of the firm of Lebnig & Winnefeld, Hackensack, N. J., died on Thursday, April 7, of pneumonia, after a nine days' illness, and was buried Sunday, April 10. H. Kuhnert of H. Kuhnert & Sons, Hackensack, N. J., father-in-law of Fred. Lebnig, Alfred Winnefeld's partner, died April 7, and was buried Sunday.

Susan Scott Lustgarten, daughter of Charles Lustgarten, the florist of Elmhurst, L. I., was fatally burned at Adelphi College, Lafayette ave. and St. James' Place, Brooklyn, on the evening of April 8. The freshmen of the college were giving an entertainment to the Juniors. A bowl of burning alcohol was standing on a table around which the freshmen were giving a shadow dance. Miss Lustgarten's gown caught fire, and although her chums, Miss Besch and Miss Cook, bravely subdued the flames, being painfully burned in so doing, her burns were so serious that she died soon after reaching the hospital.

The schedule of passenger steamship sailings from New York, Boston, Philadelphia and San Francisco, appearing in the retail columns of the Florists' Exchange, has already elicited favorable comment.

Charles Millang has recovered from his

Did It Ever Occur to You

that the large retail stores, in almost every line, to draw trade, offer some article at an attractive price?

Look through the daily papers to convince yourselves. Such sales are not without profit, and it familiarizes the public with your establishment. It means many sales and small profits; but a good profit for a day's work and an abundance of good advertising.

You have opportunities now to offer your trade "SPECIAL SALES" in cut flowers. Give the suggestion some thought. Let us know the quantity you can use, and we will quote you.

some and commodious building. Mr. Sim does not believe in having things done in a slipshod fashion and the grounds about his residence are laid out with shrubbery and other plants as artistically and tastefully as any private residence in this vicinity. We are always pleased to see a florist taking a pride in keeping his home grounds looking well, there is no better advertising scheme. We have a few such in this vicinity of whom we are proud in this respect. His Violet houses were all emptied and filled now with Tomatoes of which he grows 75,000 plants under glass and about the same number of plants out of doors. In the Summer he ships to Boston daily two tons of Tomatoes.

Many of the Boston retail stores have been pressed with funeral work this week.

Zinn, the Park st. florist, was exceptionally busy; he had fifteen most elaborate funeral pieces to make to be sent to the home of the late Hugh Brown, president of the Hotel and Railroad News Company, at Brookline. The most elaborate pieces were sent by the news-

papers and publishing houses of the city. There were also many fine pieces from the Scotch societies and Scotchmen of Boston. Mr. Brown hailed from the land of the Heather, Galvin, Doyle and McMulkin had their share of the business and, indeed, it is a long time since so many flowers were sent to any one funeral.

Zinn's window this week is mostly made up of Aaron Ward Roses and the manager reports extensive sales of this variety.

Thomas Young, Jr. of New York has a stall in 1 Park st. market and is shipping some very fine Gardenias there which find a ready sale.

A. Hansen of Copenhagen, Denmark, has been here in town this week and is visiting all the seed stores; his specialty is Cauliflower seed.

Thomas J. Benwell, salesman for the A. H. Hews Co., North Cambridge, has suffered excruciating pain from rheumatism during the whole Winter which incapacitated him from getting about his business as early as he used to. We are pleased to report he has much improved within the last week or two. He reports

brisk business at the pot factory this
Spring.W. J. Aylward has bought out the
Hovey retail stores at Woburn and is
going to carry on the business with first-
class flowers and plants which will come
from his own greenhouses. This is a
good location and, with the fine stock
he grows and which he will serve to
his customers we feel he is entitled to a
remunerative business; at least that is
the wish of his numerous friends.Caroline Ball of Southboro, Mass., has
some houses of Carnations which are
grown in solid beds and which look ex-
tremely well. Her Enchantress Carna-
tions which are consigned to Park st.
market are of fine quality and the color
is good.Leonard Cousins of Concord Junction
is making extensive alterations at his
greenhouses. He is pulling out his
Kroeschell and Furlan boilers which are
to be replaced by two large steam boilers;
he is also to have a new greenhouse,
to be erected by the King Construction
Co., this Summer.Charles Holbrook of Brighton is erect-

He is an expert on Cattleyas and has
some handsome specimens coming along
for the big Orchid exhibition in May.
He has also some good specimens of On-
cidium concolor. Twelve plants of On-
cidium nobile virginale, the true white
variety, are in bloom. Phalaenopsis
Schilleriana is also carrying fine long
graceful spikes of its showy flowers.
He finds a ready sale for all his Orchid
flowers.

L. Cousins, Jr. of Concord Junction,
Mass., reports his Pansies in fine shape.
Owing to the mild Spring weather com-
ing so early, Pansies are as far ad-
vanced as they would be in May of
ordinary years. They are covered with
blossoms and his fine large field of 250-
000 plants is a sight worth a journey
to see. Shipments are being made daily
to florists all over the country.

Mrs. E. M. Gill, the Medford florist,
has been confined to her home for the
past three weeks with gripe. She
was able to reach Horticultural Hall
last Saturday for the first time in several
weeks and her friends there welcomed
her. She says that in her fifty-five years'
experience in horticulture she cannot re-
member a Spring with weather like that
we have had to date.

Horticultural Hall is rented for the
evening of Tuesday, April 19, therefore
the Gardeners and Florists' Club meet-
ing, which was announced for that date
has been postponed until the evening of
Tuesday, April 26.

Chicago

It is impossible to make any decided
statement regarding the conditions of the
trade, as one day finds a good demand
for flowers in nearly all lines, with the
next day's stock waiting for purchasers.
Still, taking all into consideration, the
market is in a more satisfactory state
than a week ago. The cool days of last
week had the desired effect of shorten-
ing up stock, relieving the congestion of
flowers that the warm weather of the two
previous weeks piled up in all directions.
Crops are going off rapidly, especially in
the Rose line and Roses are now being
sold by count, which is a great advantage.
The most unfortunate feature of the mar-
ket is the quantity of Carnations that
still pours in.

Fertilizer Co., is most busy keeping up
with the orders coming in for his product.
Norris F. Comley of Lexington, Mass.,
spent a few days in town, purchasing
Carnation cutting stock for his green-
houses.

Again to the front comes our florist
alderman, Peter Reinberg, he being re-
elected to the city council on April 5 by
a vote of 4539. The people evidently
know when they have a good man in
office. Our florist, C. A. Strail, who was
also up for alderman, was defeated.

At Winterson's Seed Store they state
they never were so rushed as this Spring,
the whole force being compelled to work
every evening last week to keep from
falling too far in arrears with the or-
ders.

It would seem that the florists are all
going to have a chance to dispense justice.
This time it is F. T. Ayres of Charles
McKellar's who started on Monday on a
two weeks' term of jury duty.

The J. B. Deamud Co. is receiving ship-
ments of Lilacs from southern Illinois
that are of exceptionally fine quality.
This house also had the first consignments
of trailing Arbutus that arrived in town.

Alderman Arthur Schutz of Hammond
left Tuesday morning for a week's vaca-
tion, which he will spend duck shooting
along the Kankakee River.

Visitors: J. W. Davis, Davenport, Ia.;
H. Frank Darrow, New York.

Bowling

The Florists' Bowling League
bowled a double-header last Thursday
night, April 7. At present the Carna-
tions lead by one game, with Violets sec-
ond, Orchids third, and Roses fourth.
Next Thursday there will be six more
games played which will finish up the
schedule of 81 games. Thursday next
will also determine the winner of the
Deamud Cup, T. C. Yarnell and John
Zech being the contestants. Last Thurs-
day's totals were:

FIRST GAME

Orchids	744	713	702
Roses	737	762	692
Carnations	706	779	781
Violets	745	699	702

SECOND GAME

Carnations	754	758	745
Orchids	742	732	754
Violets	641	720	706
Roses	787	697	645

O. Johnson has bought an interest in
the Batavia Greenhouse Co., Batavia, Ill.,
and will build 50,000 ft. of glass in ad-
dition. The concern has rented a space
in the Flower Growers' Market where
its stock will be shipped.

Mrs. Anton Kill, mother of Leonard
Kill of Los Angeles, California, died at
her home, Winemac ave., at the age of
64. The funeral was held on Saturday,
April 9.

Vaughan's Seed Store has received three
carloads of Box trees. At the green-
houses the nursery stock has advanced so
rapidly that it will be necessary to stop
shipping stock in two weeks time. At
the store business in all lines is booming.

Peter Reinberg has been at Excelsior
Spring, Mo., the past week, attending a
committee meeting of aldermen.

It seems hardly possible that at this
early date Peonies are already showing
buds. Such is the case, however, and all
we can hope for is that there will be no
frost. This is fully four weeks in ad-
vance of the 1909 season.

Club Meeting

The Chicago Florists' Club held a
regular meeting on Thursday evening,
April 7, at the Union Restaurant. There
was a good attendance. J. Straus of
Chicago was elected a member. It was
decided to take \$600 of the Club funds
and put it out at interest. A committee
was appointed to confer with the Chicago
Horticultural Society, to make arrange-
ments regarding the flower show this
Fall.

The sudden death of Mrs. M. S. Vesey,
wife of Judge Vesey of Fort Wayne, Ind.,
which occurred Sunday, April 10, was
sadly received here. Her prominence as
an exhibitor at many flower shows both
in Chicago and elsewhere for some years
past made her well known here.

SOME OF HITCHINGS & COMPANY'S NEW THINGS FOR 1910

56 Foot Iron Rafter House Having Only Two Columns

The above cut shows a cross section of an improved commercial iron frame greenhouse, 56 feet wide. The ridge is 22 feet 6 inches high above floor and the eaves are 7 feet above grade.

This design is especially suitable for wide houses. Its new features are—few columns, greater lightness and strength, and concrete sides capped with iron sills.

This house contains no undesirable net work of truss rods.

A New Patent Sliding Shaft Sash Operating Apparatus

It is especially adapted for long runs of heavy panels or sash. It opens every sash on the line the same distance, and uniformly and tightly closes them. The last sash on the line is as tightly closed as the one nearest the operating mechanism. It is possible with this apparatus to open runs of side sash as long as 300 feet.

A Complete House for \$250.00

It is a novel little house thoroughly made and thoroughly practical in every way. Two hundred and fifty dollars includes benches, heating coils, boiler and all. It is made up in sections, all glazed, ready for bolting and screwing together. Its erection is exceedingly simple. No foundations are used as it is bolted to cast iron foot pieces. Makes a splendid little propagating house, or an ideal one for bedding plants and general purposes.

"THE EVERGREEN BRAND FLOWER FERTILIZER"

is pure plant food, immediately available. It permanently enriches the soil. It prevents the onslaughts of plant disease, or insects and pests. Can be used at any time during the growing season, dry or in solution.

Put up in 12 pound cans. Price \$2.00

For sale by leading jobbers. For further information, address

The Mastin Automatic White-Wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rod, and the Mastin White-Wash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. Mastin & Co., 3124 West Lake St., CHICAGO, ILL.

Los Angeles, Cal.

Concerning Two of the Passifloras

Your issue of April 2 was of more than ordinary interest to me. First, because of the confusion in names of the two Passifloras, quadrangularis and edulis, as it appears in the notes of Joseph Meehan on page 609. P. edulis is frequently met with here. It is a rapid grower and a prolific bearer of round fruits, the size of a black Walnut, which have hard shells. The specific name is suggestive of something good to eat. While the pulp is pleasant to the taste, there is so little of it and the seeds are so numerous that it is not sought after as an article of food, even by boys.

P. quadrangularis is a more rapid grower, and, in this part of the State, is a perpetual bloomer when Winters are not too severe; moreover, the flowers are fragrant, a characteristic of no other member of the order Passifloraceae that has yet come under my observation. It does not fruit here, at least the one I know, and it is the only specimen I have met with in all my journeys in California. A number of years ago, while in Mexico, I bought a fruit of this variety and gave some of the seeds to B. A. Elliott of Pittsburgh. The young plants ran riot in the greenhouse, to the detriment of all other plants in the house, until it was thrown out and branded as worthless. The stems are angular, hence its specific name.

Three of the Tacsonias

Of this same family of plants we have three varieties of Tacsonias growing on this Coast which are marvels in making growth at least nine months of the year. T. mollissima is wonderfully fruitful; the fruit is long, and pointed at both ends, yellow in color with pulp much like that of the May Apple, the Podophyllum peltatum of the Eastern States. Because of this fruitfulness its period of flowering is during the early Spring months only. T. manicata, which bears fiery scarlet, and T. Jamesoni Cherry red flowers, are both prodigious growers and perpetual bloomers. Neither of these two varieties set seed.

Some years a large brown butterfly lays its eggs on Passiflora here and the plant is devoured by a black caterpillar unless constant vigilance is exercised on the part of the gardener, and insect powder applied to it.

There Were Insect Pests Before Our Days

The second item of especial interest to me is the reminiscences of Stephen Taplin. We on this Coast have come to think that insect pests which prey upon plant life are modern inventions, peculiar to California, and that no gardener who ever lived had as many troubles as we on this coast at this time. Thrip, mealy bug, red spider, brown and white scale, green and black aphids, were in evidence, it seems, before California was thought of, and gardeners in those days had quite as hard a row to hoe as we have now. That is some comfort to us and an encouragement to put our wits to work to subdue the pests and at the same time not kill the plants. This reminds me of a recent visit to the home of a successful Orange grower who hired a crew of professional fumigators to fumigate his orchard last December. This work must be done after night, on this Coast, at least. They began work at 5 p.m. and finished three rows by 8 p.m., leaving the tents on the last row until morning. The night was cold and frosty; the result was the first row lost a few of its fruit, the second a larger per cent. of fruit and some foliage, the third row was completely denuded of fruit and foliage and some of the tender twigs, and

is only now (April 7) beginning to leaf out. The hours of toil expected of employees in these early days of Mr. Taplin's life would dismay a youngster now if such demands of service were made upon him without ample compensation for over-time; then, too, the recital of the variety of fruits grown against walls and under glass is the source of wonderment to people of this State, where they all grow to the greatest perfection in the open, except Pincapples. Mr. Taplin may not think his story of any special value, but the fact is, we young fellows are greatly profited by it and appreciate it very much. It is an illumination of the subject which is sure to do good wherever read and pondered.

P. D. B.

Springfield, Mass.

Business in this city has been brisk during the past season. Lilies, of course, at Easter, led as a plant stock, with Azaleas and bulbous stock coming close seconds. Violets were the best sellers as cut flowers, Carnations and Roses coming next. Fair prices were obtained at a good average per plant.

The store of Mark Aitken was closed April 5, owing to the death of his mother, Mrs. Violet Logan Aitken.

Frank Sullivan of Worthington st. has about finished making alterations to his store, the improvements including lowering the floor to the level of the sidewalk, enlarging the doorway and refinishing the interior. Easter trade was very brisk considering the handicap of building alterations.

William J. Schlatter & Son, 422 Main st. report business as having been "very fine" during the Easter season, and an unusually large amount of funeral work before and since. Mr. Schlatter has enjoyed a large sale on his greening pins which are being shipped to all parts of the country. These pins are very handy articles for any progressive florist to use, being great time savers in making up design work. They are used principally in pinning greens to designs and are a great improvement over the old method of wiring the stems. The pins are a happy invention of Mr. Schlatter's, and can be bought very cheaply; they will not readily pull out. He is also putting on the market a wire support for Carnation plants which is built in units, allowing additions to be made as the plants grow.

Ostermann & Steele of State st. report an unusually brisk Easter season, a big improvement over past years.

Nelson Higgins did considerable business during Easter week and is producing some very fine blooms in his Pine st. houses.

Louis D. Robinson of 182 Main st. reports that his Easter business far eclipsed that of any previous year, resulting in almost a complete "cleanout." His greenhouses are now being rapidly filled with Decoration Day stock, which is in a very healthy condition. Mr. Robinson utilizes all waste space in his houses, his benches being arranged in double tiers. On the upper tier, about level with the shoulders, are placed the plants which require the most sunshine, while the bench proper is used for such stock as will stand shading. He has a large quantity of hardy shrubs in his nursery department and does a nice business in landscape gardening. George A. Wilson has been foreman ever since Mr. Robinson started, several years ago.

P. M. R.

Gloversville, N. Y.

Pool, the florist, has purchased several acres of land, known as the McNab property, fine soil and with a southern exposure. On this property he will commence to build a greenhouse, 40x350 ft., which, with his present houses, will give him one of the largest establishments in central New York.

A Paying Proposition to the Florist.

This is a subject on which one could write a great deal without overdoing it, as many of the smaller retail growers

Shade for Pansies

For the Plants to be Bedded Out.

If you have a customer who gives an order for Pansy plants to be planted in some shady spot where other plants can't be grown, on account of a lack of sunlight, it is as well to call attention to the fact that a Pansy must also have sun if expected to do well. A little shade during the hot noon hours is of benefit to them, but shade all day will soon finish the best of them. Pansies, in order to do well for a customer, need a well prepared bed. By that is meant soil which had a good dose of well rotted manure; and if of a heavy nature a little sand won't do any harm. A little shade at noon is advisable, but the morning and late afternoon sun, if possible, should be given. The more care used in lifting the little plants and replanting them the better. Frequently we have customers who have Pansy beds around trees. That is all right when the trees are small and the beds properly prepared; then you have almost ideal conditions for them. But old trees, especially hard Maples, under the dense shade of which even grass will not grow, is not the place for Pansy plants, and yet we see attempts made to flower them under such conditions. It is the duty of every one of us to call attention to the folly of it, whenever we have a chance to do so. Only when the plants we sell do well for those who buy them can we encourage them to buy more.

The Poinsettias

Time for Starting the Dormant Plants.

It doesn't seem possible that almost four months have elapsed since we laid the Poinsettias to rest below the benches, and yet it is so. The time is at hand for them to be brought to light again and started up, by surrounding their roots with moist soil, promoting new growth which will furnish the cuttings for the next Christmas crop. More than ever will be sold, and growers will make no mistake by giving the stock every bit of attention possible in order to have it good. There is no use talking about any temperature a house should be kept at for the plants, our warm weather makes it almost impossible to decide on anything possible. Select a nice sunny bench in a Carnation house and let the plants come along as they will. Don't worry because you have put a few extra plants under the bench; pot them all up and let them come along; it is better to have a few over than not enough. If you should find that you have more young plants than you can use, a small advertisement will soon dispose of them to advantage to you and the buyer—that is, if you send out nice stock.

The Demand for Large Shrubs.

There isn't a Spring or Fall when we have not calls for larger shrubs than those usually supplied by the nurserymen. A customer will ask for something to make a show right away, for immediate effect, and for grouping but for a specimen to be planted at a certain point or spot. It isn't a question of what it costs, but rather to be able to supply the right article, and one cannot blame a customer who has small grounds and only room for a few plants, and willing to pay the price, for asking for extra large shrubs. By the way, I am of the opinion that hardy stock is as a rule, sold far too cheaply. Some of the stock cannot be grown for the price at which it is sold, nor proper wages paid to the man who does the growing. Often do we notice small grounds where the owner, anxious to follow the example set by his neighbor who has large grounds, masses a lot of shrubs along his lot line or on the lawn, out of all proportion to the size of his grounds. A few choice specimens of good varieties would be far more suitable in such cases than heavy irregular borders. There cannot be anything worse than a neglected overgrown shrub border, one which hasn't been pruned for 2 or 3 years. We have a number of customers who have ripped out such borders and put in place of them specimens of shrubs which are being cared for properly; in fact, we have had such a call for shrubs of this kind of late years that we decided to leave the growing of the small stock to the specialist and devote our time to the taking care of the specimens.

The Difference between Overgrown and Specimen Shrubs.

There is the greatest difference between a shrub which is overgrown and one called a specimen. For instance, an overgrown Spiraea Van Houttei is a long straggling top-heavy plant, while a specimen is one which, through proper pruning back every June after flowering has developed into a bushy well-shaped plant covered with foliage from the ground up. This holds good with any of the other varieties, whether it be a Lilac, Honeysuckle, Hydrangea or Philadelphus. The landscape gardener may consider such plants too stiff and formal for his work, but a plant of that kind will always find admirers and we find that we have never enough to go around. It is a question of supplying the demand with use and isn't it better to sell one large Lilac for \$6 to \$10 than to fill 12 to 20 orders for 50c. plants? I don't care where you are located, if there are shrubs used at all there can be a demand created for specimens—it is bound to come. There will be people who see others have large shrubs and they will wish to have some as large, but don't want to wait 3 to 5 years for them to develop.

How to Get Specimen Shrubs.

If at all possible, have a few on hand. I claim that every retail grower who has any room at all should plant out sufficient shrubs of the best known varieties, such as are best known to the public, and grow them into specimens. There is money in it. One couldn't have a better advertisement than a number of such plants on the grounds. Even if not sold they would pay for themselves in that way. The most important part in the way of taking care of the plants is to allow sufficient room between them. A crowded condition will ruin them. It will take a 3 to 4 ft. nursery grown

make hardly any effort to consider this side line a proper one for the florist, and yet many of us are doing quite a business with hardy perennials as well as with shrubs, and even trees. There is an increasing demand from year to year for shrubs, and while the nurserymen are expected to furnish the wants wherever new places are being laid out and stock of this kind is required in large quantities, the local florist is called upon quite frequently when a few shrubs are desired either to be planted in beds, groups or as specimens for the lawn. It is in the case of the latter where a good profit can be realized, if one has on hand what is wanted. The average florist, even if he should have a small nursery in connection with his greenhouses, cannot be expected to grow a 2 to 4 ft. Spiraea or Barberry at prices such as the nurseries are offering them. He does far better to buy his wants, and sell at a fair margin of profit. But when it comes to specimen plants, that is a different proposition entirely. In the first place there are but few nurseries which handle them, and the cost of shipping them long distances is expensive; and even the usual sizes wanted for planting there is only a limited demand for them. I have ordered time and again from distant nurseries certain varieties of shrubs which were offered as specimens, and while they arrived well packed and were good stock, it was necessary in every case to severely prune them back when planting them out, on account of the lack of roots. If these plants could have been lifted with a good ball of soil clinging to the roots and planted that way, the severe pruning wouldn't have been necessary.

Tubular Boilers Steam and Water

The Most Economical and
Efficient Boiler for
Greenhouse Heating

CENTRALIZE YOUR HEATING PLANT

The economy in heating large
ranges of glass from a central
plant is so great that the first cost
is repaid in a few years.

Following are a few plants which
we designed and installed:

THOMAS YOUNG, JR.
BOUND BROOK, N. J.

150,000 sq. ft. glass heated by
steam from a central plant; the
exhaust from pumps is passed
through a condenser which heats
2-150 foot propagating houses with
hot water.

F. R. PIERSON CO.
SCARBOROUGH-ON-HUDSON, N. Y.
150,000 sq. ft. glass heated by
steam from a central plant; the
steam is passed through condens-
ers and the hot water is forced
through the houses with circula-
tors.

JOHN N. MAY
SUMMIT, N. J.
75,000 sq. ft. glass heated by
steam from a central plant.

ing stock of our advertisers, they will
mention seeing the advt. in the Exchange.

shrub about three growing seasons to
develop into a specimen plant and out-
side of the time it occupied the space
on the grounds it costs but little outlay
to care for it. In regard to pruning, it
might be said that this with most
shrubs should be done after they are
through blooming. That, of course,
doesn't mean that one cannot often im-
prove on the shape of a plant at most
any time during the months in which
actual growth is made by the plants,
but by pruning after a Lilac, Snowball
or Spiraea is through blooming no flow-
ering wood is sacrificed, as would be
the case if the pruning is done late in
Fall or early Spring. The pruning in
Spring should rather be confined to the
removal of any old or unnecessary wood
inside of the plants. It isn't necessary
when planting out the small stock to
allow 5 to 6 ft. between the plants; a
3 ft. space is sufficient. This out next
year, by taking up every other one
and so on. Now is the time to plant
this stock, and among the many which
might be used for that purpose, I
might mention, flowering Almond, Ber-
berry, Japan Quince, Hydrangeas, Li-
lacs, Philadelphus, Spiraea, Lonicera,
Weigela, Privets, Snowballs, Dogwoods,
Rosa, Snowberry and Golden Elder.

Baltimore

John P. Wilhelm, Raspeburg, Md.,
has erected another new house, 25x150
ft., for Chrysanthemums. He is one of
the largest growers.

R. J. Irwin of Philadelphia was a
visitor this week and was present at the
Club meeting last Monday night.

John Donn, 1223 Harford ave., is of-
fering his plant for sale. He is one of
the oldest florists in the business and
many will be surprised. There are two
houses, 60x124 ft. and 60x17 ft., heated
by a No. 17 Hitchings boiler, also one
lath house, 60x120 ft. There is also a
two-story stable.

August Eberhardt has made an awn-
ing-rig for his stall with 1 1/4 in. galv-
anized pipe, which he puts up in five min-
utes.

Trade Conditions

The weather has handicapped
business somewhat. The hot spell last
week started trade on the go until last
Thursday, when the sudden change made
everybody feel as though Winter had re-
turned, and business was again on the
old footing. However, little complaint
is heard except as regards street mar-
ket trade. The retailers are doing a
fairly good business, disposing of a large
quantity of cut flowers and executing
much funeral work. There seems to be
larger quantities of cut flowers on the
market this season than last, and an
abundance of pot plants, which are be-
ing sold at close prices. Our Exchange
has been having a large stock which sold
at fair prices, little going to waste.

Roses are coming in steady and move
well. They are offered as low as 35c.
per dozen. Carnations are abundant,
and have sold as low as 25c. a dozen.
Lilacs from present indications will be
a glut. They brought last Tuesday \$4
a hundred sprays; many farmers are
hauling them to town by the wagonloads,
and the boats are bringing them to the
city in barrels. Spiraea are still on the
market, but are selling slow. Callas
are steady. Sweet Peas are not so plen-
tiful, but are moving well. Pansy
plants at \$3 per 100 are selling fast.
Pot plants and shrubbery are filling the
market and are well disposed of. As-
paragus is short in supply. Laurel is
coming in steadier.

J. L. T.

Mastica is elastic and tenacious, admits
of expansion and contraction. Putty be-
comes hard and brittle. Broken glass
more easily removed without breaking
of other glass as occurs with hard
putty. Lasts longer than putty. Easy
to apply.

European Notes

The sharp spell of Winter centered around Nimes on the night of March 31, and as briefly reported in last week's Notes, moved rapidly eastward to the well-known St. Remy district where 9° Fahr. below freezing point was recorded on April 1, and was followed by a heavy fall of snow which ended in rain. As a result the Potatoes were completely cut down and the young French hush Beans were destroyed.

This means a terrible loss for the little growers, many of whom raise a crop of extra early vegetables before transplanting their plants of annual flower seeds such as Phlox, Zinnia, Verbena and like cultures.

Biennials which have stood the rigors of the Winter will not be improved by this additional check, but many of the growers have already made up their minds for another disastrous season. Should their anticipation be realized it will be even more difficult to obtain

"The proof of the pudding is in the morning." The proof of Lily Quality is in the flowering:—Count the number of cut-flowers per thousand bulbs and compare "Horseshoe Brand" bulbs with others. It's the only right way to tell the true value.

If you are a bulb buyer, send for a copy of the "Horseshoe Brand" Catalog, showing views of the bulb fields in Japan and other illustrations. It's free.

SUBSCRIBERS PLEASE NOTE.—The Florists' Exchange is a trade paper, and its advts. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

growers than it is now, and already a move has been made to the other side of the Rhone, but it will be some years before the sheltering Cypresses will be sufficiently developed to ward off the dreaded mistral. Further north, some light rains have helped us very much in the work of sowing and transplanting, but a cessation of the blighting easterly winds would make our labors more fruitful.

The greatest source of anxiety to us just now is the Turnip crop, which is suffering severely from the before named winds and the ravages of birds. Both early Turnips and Rutabagas are affected but the latter hardly so seriously as the former, mainly because trade in this article is rather slack at present.

It will be quite clearly understood that the rapid advance in vegetation during March has now been effectually checked and we are not now any further ahead than at the same time last year.

Ernest Benary, Erfurt, notifies, under date April 1, that Ernst Benary, Jr., son of Kommerzienrat Friedrich Benary, and Heinrich, son of Herrn John Benary, have been taken into partnership. The signature of the first named (who paid a visit to your side last year) bears a striking resemblance to that of his respected father. The same firm has just distributed a very handsome colored plate of the newer Gloxinias.

EUROPEAN SEEDS.

American Notes**Excellent Seed Sales Continue**

The great volume of orders in which every member of the seed trade has been participating, particularly since the month came in, still continues unabated. Never has there been experienced more satisfactory retail counter business than this season; everything handled by the seedsmen has sold readily in very large quantities, and at profitable rates. There have been, as expected, many shortages in popular varieties of seeds, both vegetable and

flower, but as a rule customers have accepted readily the situation, and taken in place of the sold-out variety the next best sort in stock. The more settled weather has greatly encouraged the orders for vegetable plants, and many seedsmen this season are finding this line much more profitable than before; in fact, no longer is this item of the seedsmen's business a side issue—it is a great and yearly larger growing industry. Night work still continues and will for several weeks yet; for so busy are many of the larger houses during the day, that outside of waiting upon the so-called counter trade little else can be done; and it is only after the closing hours that the orders received by mail can have attention. There has also been very much more Sunday labor required this season than in any past year. It is greatly regretted that Sunday labor should be necessary, as the unavoidable night work tires the employees to the limit, but in every possible way has employer and employee alike tried to keep the orders promptly filled; to even partially deliver the seeds ordered, since March started, as the customers have expected, has been an impossibility with many seedsmen.

Our Government's Free Seeds

So much has been said and written in the earnest endeavor to try to convince "the powers that be" at Washington, of the great injury and damage that the annual distribution of the thousands on thousands of free packets of both flower and vegetable seeds is, and has for years been doing the legitimate seed trade of this country, without the least apparent effect, that there would seem to be little hope of the abuse being stopped in the near future. This free seed distribution, as now conducted, simply means the giving away of enormous quantities of common commercial varieties of seeds; and in just so much as these seeds are given to garden makers, the legitimate seed trade is defrauded of its rightful sales. The original plan of using Government money to introduce new and rare varieties of seeds would seem to have been entirely lost sight of. To show the purely "something for nothing" spirit of the present giving away of Government seeds, there is hereto appended an extract of a letter recently received from a member of Congress, regarding the matter: "For many years Congress has appropriated money to provide seeds for distribution throughout the country. . . . I intend within the coming month to mail you a package of flower seeds, if you cannot use them yourself, please give them to some friend. . . . If you also desire some vegetable seeds, upon request I will be glad to send you a package." The whole letter simply conveys the one idea that the United States Government would supply, free, both flower and vegetable seeds. Further comment is unnecessary. The whole plan as now conducted is wrong from start to finish.

New York Seed Trade

The stormy weather the first part of the week was taken advantage of by the seedsmen to catch up as much as possible on the accumulated orders. Quite a little headway was made, as many worked last Sunday also. It is thought that from now on it will be possible to keep the trade well in hand.

Everything in vegetable plants and nursery stock is still selling in very large volume, especially the former, as the sales of Tomato plants have begun in real earnest.

H. B. Buck, who for some time has been in the flower seed department at A. T. Boddington's, sailed last Saturday for England, on the White Star S. S. Adriatic, to join his brother in the seed business at Ipswich. Mr. Buck carries with him the good wishes of his many friends in the trade here.

Stump & Walter Co. has arranged a very attractive display of its full line of insecticides, and also poultry supplies. Of the latter it publishes a very valuable catalog which can be had upon application.

DAVID HERBERT & SON
ATCO, N. J.

Please mention the Exchange when writing.

One of the visitors of the week was Peter Small of Westbury, Long Island. Mr. Small feels that more seeds than a year ago are being used in his vicinity.

Vaughan's Seed Store has this week been having a special sale of Bay trees in all sizes, of both pyramids and standards. It is found that pairs, value \$25 to \$35, are the most ready sellers.

J. M. Thorburn & Co. have much increased their sales of Sweet Peas, and in fact the entire line of flower seeds over previous seasons. It is certainly a flower seed year.

C. McTaggart, the past week, has been having a special sale of Magnolias, which have found many customers.

It has been admitted by several representatives of Holland houses who have the past week been visiting our seedsmen, that bulb orders are not being placed in the volume expected from the early indications. It is indeed a well-known fact, that Dutch bulbs will be even cheaper the coming Fall than last season. It will be remembered that around Christmas and the first of the year bulb flowers were exceptionally high in price, with the consequent result that many growers rushed in and ordered large quantities of Holland bulb stock for this Fall's planting, which orders are now, in many cases, being countermanded. Especially does this apply to Western growers, from whom the rescinding of many orders has come. There is considerable disappointment expressed by our Holland friends for this condition of affairs.

French bulb stock is quoted considerably higher than last season. White Romans, 12 to 15 centimeters, at the present time are about 7 francs per thousand more than a year ago, and Paperwhites are fully as high if not higher than last season. There will be no surplus of French bulbs the coming Autumn.

The "Buds" are fitting up their new store, at 76 Barclay st., very rapidly. They will have most complete arrangements for both flower and vegetable seed; in fact, their flower seed department is

 Please mention the Exchange when writing.

already arranged for over 1000 drawers for packet and bulk seeds.

At Roddington's things continue very busy. This house is handling much more nursery stock this season than ever before, and the same may be said in regard to bulbs.

Boston Seed Trade

Seedsmen were never as busy as they have been this Spring; they are short of many kinds of seeds already. Counter trade and mail orders were never as heavy before, which are omens of good times. The trade has been working overtime all the Spring and many of them will have been pleased to get the holiday, Patriot's Day, April 19, for a much needed rest.

Philadelphia Seed Trade

The counter trade at the seed stores, which has been steadily increasing for several weeks, was thought to have reached a climax in the great volume of business transacted last Saturday. The refreshing rain of Sunday and Monday forenoon has still further stimulated buyers, till the stores are almost uncomfortably crowded and everybody who can sell is behind the counter.

Never was a greater assortment of flower and vegetable roots and bulbs offered by a finer display of seeds, which under proper culture produce the fragrant blooms and the toothsome vegetable. Indeed, it is hard for anyone with a garden turn of mind to get by a seed store, if he has any change in his pocket.

The Johnson Seed Co. is doing a large business in Cycas stems, and is also offering a variety of Grape vines.

The Stokes Seed Store has some good potted Tomato plants of Stokes Bonny Best Early. On Monday the two hundred and thirtieth yearly meeting of the Friends, at Fourth and Arch sts., began, and Mr. Stokes was in attendance, notwithstanding the great pressure of business at his store.

An announcement of a new patent scale killer named "Never-Scale," a lime sulphur spray, made by the "Sulfo Chemical Co., No. 1 Fairmount ave., is observed at the Moore Seed Co.'s store.

Henry A. Dreer is displaying a very complete line of lawn mowers. This house is also offering a well-selected list of field-grown Roses, which have been wintered-over cold.

Henry F. Michell Co., 1018 Market st., is making very large sales of its celebrated lawn gross seeds, and is offering at wholesale to the trade a very complete list of flowering bulbs and roots, among which are two hundred and fifty varieties of Dahlias.

absorbed all of the water, which has been a great benefit to all of the growing crops.

The hoeing of the crops will be completed on all the seed ranches, not only our own, but also on those of other growers in this section, within the next two weeks and, if nothing unforeseen occurs we will harvest a good crop.

On our Menlo Park ranch we have a field of Lettuce, of various varieties, over 2½ miles in length and from ¼ to ½ mile wide, where we have a magnificent stand. It certainly would be a great sight for any seed dealer to inspect this one field.

All varieties of Onions are looking excellent. The critical time for this crop, however, is when the seed is in the dough, at which time, if we should have hot winds, the yield might be injured to some extent; but, from present prospects, everything is in a most promising condition, the season to date having been ideal.

The Radish crop is better than it has been for many years. Our various Beet crops are looking excellent; also Salsify, Kale, Mustard, Celery, Carrot, Lettuce, and various other crops we are growing on an extensive scale, are in a fine condition.

We hope that many seedsmen can arrange to pay us a visit this year and look over the crops, not only on our ranches, but those of other growers, as this is the season above all others for them to make such a trip to California.

CHARLES F. BRASLAN.
Pres. and Gen'l Mgr. Braslan Seed Growers' Co.

Turnip Seed

The supply on hand of many varieties of Turnip seed, of last year's crop, stored in American warehouses, will prove entirely insufficient to meet the demand for sowing this approaching Midsummer, especially so when is considered the fact that the new American crop to be harvested next July will not be one-tenth of what it was formerly.

As for the new crop from Europe, it will not figure in the estimates for this Midsummer, consequently no cheap help can be brought forward to relieve this tense situation, even if there can be purchased in Europe two or three varieties of old crop Turnip seed of types used in America, because the current prices in England, notably for Pomeranian and Amber Glohe, have risen over fifty per cent., 15c. and 16c. being the demanded price free on board London, to which must be added 4c. custom house duty, raising the purchase cost to 19c. and 20c.

A small quantity of seed of last year's Cow Horn and White Egg has been quoted at 19c. f. o. b. London, which with the 4c. duty will bring the landing

cost to 23c., and a very insufficient quantity at that.

Old seed of Large Early Red Top Globe is not in sight at any price and many letters from Europe confirm each other in the statement that the outlook for Turnip seed, crop 1910, is most dismal and disheartening. All indications are that low wholesale prices on Turnip seed of past seasons are incidents which will not be repeated, not only for this approaching Midsummer but for all future time, and just so with seeds of all sorts, for all seeds, both American and European productions, are costing more.

D. LANDRETH Seed Co.

The Maryland Pure Seed Bill

On page 689 of our issue of April 16 we explained the mix-up in the Pure Seed Bill which was then before the Governor awaiting his signature to become law. From later advices we gather that through the instrumentality of the energetic seed firms who have kept in touch with this seed legislation all along, namely Messrs. J. Bolgiano & Son, Griffith & Turner Co., W. G. Scarlett & Co. and S. L. Lambert & Co., the bill was vetoed, the Attorney-General of Maryland deciding that neither the Collier Bill itself, nor the Biddison Bill which was masquerading as Collier's, had been legally passed by the Legislature.

As we understand it the terms of the defeated bill were vicious in the extreme, the principle being that if the seed merchants were compelled to guarantee the quality and kind of all the seed they sold, the seed merchants, in turn, would compel the growers from whom they secured their seed to guarantee the quality and kind of seed so purchased, and even if that would not work out in practice, the farmers and truckers would be protected, no matter what became of the seed merchants and their business.

As an instance of how even good seed might create trouble and expense, Messrs. Bolgiano & Son quote a case where they sold one of their most desirable market gardener customers ¼ lb. of a superior variety of Tomato seed at \$4, whereas the buyer could have purchased ordinarily good seed at 40c. for same quantity. This seed they knew to be as near perfect as was possible; it produced for certain Florida growers perfect fruit and gave entire satisfaction. For their market gardener it produced, as a first crop, the worst kind of knobby fruit. Continuing, they say: "If we had guaranteed that seed for his \$4 purchase, he could have recovered several thousands of dollars. Instead of plowing down this worthless crop of Tomatoes, however, he let it remain in the field, and lo and behold, the second blossoms set and produced a beautiful crop of perfect Tomatoes." The explanation of the failure was that the first crop of blossoms had been touched by frost.

MANITOWOC, WIS.—It is understood that the Manitowoc Seed Co. is contemplating a large addition to its warehouse and plant.

GRAND JUNCTION, COL.—Whit Rozelle has purchased the interest of his partner H. M. Cannon, in the Grand Junction Seed Co., and will conduct the business in the future.

CHICAGO.—The A. Ostberg Seed Co. has been incorporated to conduct a general seed, florist, farming and agricultural implement business. The incorporators are Andrew Ostberg, Charles Swanson and E. F. Bell, and the capital \$100,000.

BIRMINGHAM, ALA.—At a special meeting of the stockholders of the Amzi Godden Seed Co. held recently two new directors were chosen to fill the places of Major Joseph Hardie and Dr. T. F.

Cheek, whose stock was recently acquired by J. H. White. The new directors are: J. H. White and J. B. Dolsen, and with G. B. McVay they will constitute the directorate of the company. Mr. White secured a controlling interest in the stock of the firm and has been chosen president; Mr. McVay was elected vice-president and general manager, and Mr. Dolsen secretary and treasurer.

Best Varieties of Asters

A subscriber asks for the names of the best varieties of Asters, such as are sold for cut flower trade.

Will some of our readers please enlighten Subscriber with a leaf out of their experience?

Cleveland, O.

For the past few weeks the weather has been so warm and agreeable that it has forced Roses out in great quantity, to such an extent, in fact, that some of our craft handed them out gratis in 18,000 lots; however, that was just to show the production.

Today conditions are different; the crop has shortened up considerably. Carnations are still the big seller and the supply is fully equal to the demand. Valley is arriving in limited quantities, while Mignonette, Daisies, Snappdragons and Myosotis are plentiful. Also, now that Easter is over there seems to be lots of Easter Lilies and Callas, while at that time they were very scarce.

Violets are becoming very passé and, while still in demand, the fragrance is not such that it attracts one to this modest flower. A few premature Gladioli may be seen here and there, but the demand is slight. It is surprising how much Asparagus, both plumosus and Sprenger, is used; it seems hard to get most of the time, because the demand keeps the crop cut so close.

While transient trade on cut flowers has fallen off somewhat, funeral work still demands its usual portion, and keeps the florist from filling up the can he carries "blue paint" in.

The firm of Smith & Fetters, Euclid ave., florists, held a reception on Saturday last in honor of four new members of the firm, Wm. S. Krusen, Louis A. Koons, Jr., Clarence Meyers, and a brother to Mr. Frank Smith, Timothy Smith, popularly called Tim. The store was beautifully decorated and friends and patrons alike were welcomed.

Fire in a bird store in the rear of the Cleveland Cut Flower Co., on High st., occurred last Wednesday p.m. and, but for the quick work of the firemen, might have proved disastrous.

The Bate Bros. of the Cleveland Cut Flower Co. have purchased a Buist machine and expect to utilize same for their various purposes.
 Miss Anna Westman of Westman & Getz, contemplates a trip to California and expects when she returns to tell us all about the various kinds of flora seen there.

Mr. Geo. Smith of the Florists' Exchange has also purchased a new auto and will combine pleasure with business.

It seems, by the papers, that the City Forestry Dept. has settled all disputes and claims, and the City Forester may cut down all trees he thinks unfit for city life. Those trees which have San José scale and those that will not stand the city smoke and gas will go first.

Out of Town Notes

Berno Floral Co. of Mansfield, O., have just purchased a new delivery wagon, a very handsome affair, painted black, and with a team of white horses it is expected to be a very fine turnout.

A. J. Winget of Mansfield, O., has a fine lot of bedding plants and some extra choice Hydrangeas.

Julius Ballery of Ashland, O., has some new houses and is filling them with choice bedding stock; he has a splendid location right next to the cemetery.
 Lamprecht Bros. of Ashland have been exceedingly busy looking after their bedding stock of which they have a very fine lot.

Mellen's of Ravenna, O., have a fine, new store on the main street and are doing lots of nice business.

W. E. Hall of Clyde, O., has been very ill with pneumonia but is convalescing and will soon be up to resume duties in the greenhouses.

Chas. E. Barton of Norwalk, O., has much improved in health in the last few weeks and is taking a more active interest in his business.

Lalbe Floral Co. report fine business right along and are constantly enlarging same. Mrs. Lalbe has transferred her interest in the business to her sister, Miss E. Zwick, as her household duties demand her time.

Frank Leshar, Tremont, O., along with his florist's business, has to look after a number of banquets each month which keeps him pretty busy. O. G.

CANNAS

We are sold out of all Cannas, with the exception of the following varieties, and offer until sold at the prices quoted—

Pink Climbing Rose—Dorothy Perkins

Without doubt the most valuable of all the new Climbing Roses of comparatively recent introduction. The beauty of the double pink flowers is admirably set off by the rich green foliage, which is free from the attacks of insects.

In addition to this charming kind, we have all the popular varieties in climbing and bush Roses. Our General Catalogue, which will be mailed on request, contains descriptions of all the best Roses—also

New Rose American Pillar

NO Climbing Rose is attracting the attention that "American Pillar" does, and most deservedly so. It is by far the best single-flowered climbing rose for outside purposes; and on account of the great durability of its flowers, it is the best single-flowered forcing rose.

July 12, 1909.

Gentlemen:

Let me tell you, too, that the American Pillar is a better Rose than you know, perhaps. The plant I had from you, which was planted this Spring under unfavorable conditions, is now giving us a succession of most exquisite bloom.

Yours truly,
J. HORACE McFARLAND,
Pres. of American Civic Association, Harrisburg, Penna.

COMMENT FROM THE LONDON GARDEN

"A most notable feature in this glorious display (Temple Flower Show in London) was the New 'American Pillar' Rose. The large and attractive rich rose pink blooms are produced in immense clusters, the white centers of the blooms adding to their attractiveness. —Florists' Exchange.

2½-inch pot plants, \$1.50 per dozen, \$8.00 per 100, \$75.00 per 1000.

4-inch pot plants, \$3.50 per dozen, \$25.00 per 100.

AMERICAN ASSOCIATION OF NURSEYMEN

F. H. Stannard, Ottawa, Kan., President; N. P. Stark, Louisiana, Mo., Vice-president; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., treasurer.

TOPPENISH, WASH.—The Washington Nursery, one of the largest in the Northwest, has just completed planting 300 acres of nursery stock. More than 5,000,000 trees are planted.

FULTON, ILL.—A nursery business is to be established here under the title The Riverside Nursery Co., John Newendyke and E. J. Thompson, proprietors. Fruit trees are to be a specialty.

TYLER, TEX.—J. M. Yates, manager of a nursery company near Sherman, has a tract of land west of here on which he will plant a large nursery. He has secured the services of F. E. Icheda of Rowland, Cal., a Japanese berry grower and truck farmer, to conduct the nursery. The East Texas Nursery Co. of this place has been incorporated with a capital stock of \$50,000. Ed. W. Minus, C. C. Crews and others are incorporators.

KINGSTON, N. Y.—The New York board of water supply has established two nurseries in the Ashokan district in order to raise trees which will be required in protecting the reservoir and dikes and which will also be used in beautifying the grounds around the reservoir. Twenty thousand seedlings are being cared for, most of them young Pine trees, but there is also a large proportion of Locust trees, for use in many ways after the reservoir is completed, principally for fence posts.

The Biltmore Forest School, located on the Vanderbilt estate at Biltmore, N. C., and whose director is Dr. C. A. Schenck, is about to visit the tree nurseries of New York State. The students, with Professor Schenck, have been spending the winter in the German woods at Darmstadt, Germany, where the well-founded forestry methods existing there are carefully studied. A cablegram received from Dr. Schenck by Commissioner Whipple states that the students will arrive on one of the Holland-American line steamers April 18, and will locate at Coreys, Franklin County, which is near the center of the Adirondack forests and in close proximity to the State's largest tree nurseries.

Clerodendron trichotomum In late Summer, when hardly a shrub is in flower, there is one, and a beautiful one too, that can always be depended on for flowering, the *Clerodendron trichotomum*. Why it is not more to be found in collections is hard to say, for it must be hardy enough to be planted much north of Philadelphia, for in that city and in adjacent counties it bears zero and below it with impunity.

As said, it is a late Summer-flowering shrub, in fact it is in flower in September often, which would place it in the Autumn list. It is one of many Japanese shrubs that have proved well adapted to our climate, coming, evidently, from a part of Japan where it underwent severe weather.

Fruit of *Chionanthus Virginica*

The illustration we published on page 653, in our issue of April 9, shows conclusively what a pretty shrub it is, having large, handsome leaves and attractive flowers. The foliage is of a purplish red color, including the petioles, while the calyxes of the flowers are rose tinted, the petals being of a cream color and of a waxy appearance. The flowers are delightfully scented, perhaps to recompense one for the odor of the leaves, for when rubbed not every one likes the smell of them; still, as a lawn specimen, as our plant is, no one need rub the leaves.

As this *Clerodendron* may be increased from either hard or soft wood cuttings as well as from portions of its roots, there is no reason why nurserymen should not have a large stock of it. There is another species sometimes seen in collections outdoors, but as it is not hardy, above ground it requires to be treated as a herbaceous perennial, the roots covered with a thick mulch on the approach of winter to preserve them. This is the *C. Bungei* of old lists, now called *C. foetidum*.

There are a few others from China and Japan which should be fairly hardy, among them *serotinum*, *fragrans* and *squamatum*, and perhaps these have been tested by some, but they do not appear to be cultivated in any nursery or to be offered for sale by anyone.

There are a great many species found in botanic gardens of Europe, about two dozen or so of them; and in the large exhibitions of the prominent horticultural societies there, in collections of plants some species of the *Clerodendron* often appear.

Copper Beech The purple-leaved Beech is such an uncommon one in its way, surpassing in growth any other tree with purple foliage, that nurserymen found it one of the best selling of all the purple-leaved kinds. The original purple-leaved Beech is said to have originated in Germany. As is well understood, it is a variety of the European species, *Fagus sylvatica*. There are many variations in the purple Beech, some are of more intense purple than others, while still others are of a coppery color. These variations are accounted for by their being raised from seed, though probably a

Flowers of *Chionanthus Virginica***Chionanthus Virginica—White Fringe**

Spring. It is rather behind the earlier shrubs to display blossoms. The shrub itself is slow of appreciating

We do not get the flowers of the White Fringe among the earliest of those of the earlier shrubs to display blossoms. The shrub itself is slow of appreciating the presence of Spring, being among the latest ones to leaf out, and the flowers come with the first unfolding leaves.

The name, White Fringe, is well given it. The flowers are in long racemes, snow white, sometimes nearly a foot in length, and in the South are not unaptly called "Old Man's Beard." In some foreign works it is said of the flowers that they are scented, but if they are they are so faintly so that it cannot count as making it of any additional value. A small illustration conveys a good idea of what the flowers look like, so far as two shoots set side by side can do it. The lace-like flowers are of light white color, and as nearly every twig carries a bunch of them the appearance of a large bush is most attractive.

The White Fringe belongs to a class in which are shrubs that do not

all bear seeds. There are of this shrub some with perfect flowers, others having but pistillate or staminate flowers, so that when obtaining a plant, if one can be had that has already fruited so much the better.

Our principal photograph is of a fine specimen of the *Chionanthus*, taken when full of its ripe fruit. It was so heavily laden as to weight the branches down, as a glance at the illustration proves. The fruit almost represents bunches of Grapes, with purple-colored fruit. Inside the pulp is a hard bony seed; and birds are not slow in eating the pulp when it is ripe. The White Fringe is found wild from southern New Jersey, southern Pennsylvania through the South. For a time it was not included in the New Jersey flora, but it grows there, between Camden and Cape May. While there is not any difference in the flowers of the White Fringe, excepting that those of the perfect form are hardly as handsome as those of the others, there is great variation in the foliage. Some have broad leaves, others comparatively narrow, etc., giving rise to such varietal names as *latifolia*, *angustifolia* and the like; and there is one called *maritima*.

In these notes and in nursery lists the *Chionanthus* is mentioned as a shrub. It is usually found as such in collections, yet it becomes a small tree in time. In low ground in the South it is often found 25 ft. high, with a trunk 6 in. in diameter; but when used in ornamental plantings it takes on a shrub form if let grow as it will. Plant the White Fringe in deep, moist ground if such a place is available.

good purple one will sometimes produce a shoot differing in intensity of color, perhaps darker or lighter than the original. The best purple-leaved variety is the one known as *Rivers' Purple*. It is almost of a black color, and in habit not as bushy when young as are Beeches usually. It is increased by layering, inarching and grafting; and conceded, as it is, to be the best of all purples, good specimens of it are always in demand.

In former days Purple Beech, Blood Beech and Copper Beech were synonymous names. A customer using any one of these names was understood to wish a Purple Beech, but nowadays a distinction is made by some who, when speaking of Copper Beech, mean the lighter purple kinds, such as seedlings of the purple one generally are. By sowing a pound of the seeds of the purple one, seedlings of varying degrees of intensity will result, some perhaps as dark leaved as the original tree from which the seeds came, while others may be much lighter, and some even as green as the common *Fagus sylvatica*. When Copper Beeches are raised from seeds the plants are much bushier than *Rivers' Purple* of the same height, a difference by which they are easily distinguished should they become mixed.

All Beech trees appreciate early Spring planting and a thorough good pruning at the same time.

Darwin Tulips—Baronne de la Tonnaye

American Grown Darwin Tulips

The Hubert Bulb Co. of Portsmouth, Va., recently sent us a box of flowers from Darwin Tulips, American-grown bulbs, of the following varieties: Flambeau, Baronne de la Tonnaye, Spring of Roses, Nauticus, Painted Lady, La Noire, Clara Butt, Faust, Europe, Margaret, Calliope, Farncombe Sanders, Salmon King, Carmine, Sultan, Louis Mimmerel, and Pride of Haarlem.

Several of the varieties are eminently suited for commercial purposes as cut flowers, and have figured this season in the Eastern markets.

Clara Butt, one of the most popular varieties in the London market, is considered to be an excellent cut flower variety. Its color is bright rose and its form very pleasing.

Painted Lady approaches more nearly pure white than any of the Darwins, and is destined to become a favorite with florists. Before maturity the flowers bear a purplish tinge, but this gradually disappears as they finish, the color when fully developed being practically a pure white. Many prefer them cut just before reaching the finishing point, and it is then that the name "Painted Lady" is most significant. Unlike the Cottage varieties this one never opens after being cut, retaining the shape most desired by florists.

Baronne de la Tonnaye in color is somewhat similar to Clara Butt, but a trifle less glowing, and more round-

ing in shape at the base. The edges of the petals, too, show a little lighter in shade. It is an excellent variety for cut flower purposes and remains as cut until the petals drop.

Nauticus is a distinct rose pink, flowering about mid-season. It is beautiful in form and produces excellent commercial blooms. It rarely opens to the full and is an excellent keeper.

La Noire, Faust and Sultan are what may be termed "black" varieties, but most beautiful in their sombre, deep crimson tones, which vary in the order of their naming. Their satiny sheen relieves the color to such an extent as to make them most useful in a vase of mixed flowers of harmonious colorings.

Farncombe Sanders is a bright, fiery scarlet. In the field or in beds, when in bloom, it is so glaring as to compel the closing of one's eyes. It opens rather more than some other varieties, but, when cut, never fully, and is pleasing to the last.

Margaret is a pale rose, and flowers quite early. It is a beautiful variety and excellent as a bedder.

Barrone de la Tonnaye is a full Rose in color, of splendid form, and retains its semi-closed shape when cut.

Calliope is a grand flowering sort, a deep rose with petals edged white, a good commercial variety, especially for cutting.

Europe is another scarlet, similar to Farncombe Sanders, but retaining its shape better.

Queen of Roses is an early variety similar to Nauticus.

Pride of Haarlem is a rosy crimson, one of the largest

Darwin Tulips—Farncombe Sanders

of the Darwin type, and useful on account of its size.

Flambeau is a light crimson with purplish shading. Its flowers are of excellent shape and are held well.

Salmon King is a salmon pink, of good shape and very attractive. Carmine is a pleasing variety, its color well described by its name. Louis Mimmerel is an early sort, similar to Queen of Roses.

The ordinary Cottage Tulips have much less stamina when cut than those of the Darwin type, hence the growing popularity of the latter among florists.

Shrubs in Tree Form Nurserymen are growing shrubs in tree form to a greater extent than has been their custom heretofore. There are many positions for these specimens. Often, in places of moderate dimensions, a shrub in standard form is preferable to a bushy one, leaving more ground space, frequently a matter of some importance. Even on lawns of large extent the addition of standard shrubs to those of bush shape gives more character to the planting; so that the growing of this kind of shrub will probably increase in extent.

There is not much art required to get the tree form. But a strong, straight shoot is necessary, headed off at a given height. A stem of from 3 to 5 ft. is what is oftenest seen. Hydrangeas, Spireas, Japanese Snowball, Lilacs, Weigelas, Forsythias, Mock Oranges, Deutzias, Privet, and all strong growing shrubs may be so treated.

It is often a good plan to cut down an old bush, seeing to it that but a single strong shoot is allowed to start up from the base, to become the "trunk" of the standard desired. When the desired height is reached, by heading it off a head is formed, which can be let grow in a

Darwin Tulips—Painted Lady

free way or pinched back now and again, to form a globe shape, according to what may be desired.

English Holly At this, the planting season in the North, one may be excused for again calling attention to the well-doing of the English Holly, when set in sheltered places. Speaking for Philadelphia and the adjacent counties of Bucks and Montgomery on the north and east, and Delaware on the south, there is no question of the well doing of this Holly outdoors. What it wants is to be where but little sun will reach it in Winter and where the heavy winds of that season will not reach it unless broken to some degree. All evergreens, even native ones, thrive the best when in groups, because of the protection one is to the other, and this Holly is no exception. Last week the writer saw two that had been planted last Spring in just such a favorite position as described, and they were perfect in every way, every leaf as green as in Summer. Others are here that have stood out without any more protection than the situation gave them, and they, too, are not in the least hurt, and have passed through several Winters.

The best time to plant them is in Spring, whether in pots or not, in order that good roots will be made and the plants well established before Winter sets in. Referring again to the grouping of them, there might be a gain in this in getting Holly berries, supposing there would be both staminate and pistillate kinds among them.

Darwin Tulips—Faust

Ready With the Finest Lot of Palms We've Ever Put Out!

You have probably never seen a more handsome collection of Palms than we are offering this season—grown right here from seed in our houses by men who make that their business. Even with our past experience as Palm growers, we feel that we have made a new record with our present stock.

You will get better satisfaction—better service—from our Palms than from most others you can secure. They are

of the best quality obtainable; our large customers—purchasers who demand and pay for the best—come back to us, year after year, for their extensive stocks.

Our Palms are strictly home-grown; they are clean, thrifty, vigorous, and are worth more, plant for plant, than foreign-grown Palms of equal size; yet ours cost no more than imported plants, as the following prices will prove:

ARECA LUTESCENS.

3 plants in pot. Each
6-in. pot, 20 to 28 in. high. \$1.00
7-in. pot, 30 to 32 in. high. 2.00
8-in. pot, 36 in. high. 2.50
8-in. pot, 42 in. high. 3.00

COCOS WEDDELIANA.

2½-in. pot, 8 to 10 in. high,
\$10.00 per 100.

KENTIA BELMOREANA.

6 to 7 leaves. Per Per
doz. 100
6-in. pot, 18 inches
high. \$6.00 \$50.00
5-in. pot, 20 inches
high. 9.00 70.00

We are already booking large orders and are now in excellent shape to give the best possible attention to your wants. Can ship anywhere by freight with perfect security.

Write for full particulars, with prices; or, if possible, call and inspect our stock. We are easily reached from Philadelphia and you will find a trip to our plant decidedly interesting. Let's get better acquainted!

Joseph Heacock Company, Wyncote, Pennsylvania

Please mention the Exchange when writing.

PALMS! KENTIAS, in 2½ inch pots, \$8.00 per 100, \$75.00 per 1000.

JACKSON & PERKINS CO., Newark, (Near Rochester) New York

Please mention the Exchange when writing.

GARDENIAS

SCOTT'S FAMOUS VEITCHII STRAIN

Strong, established plants from 3-inch pots, ready for a shift into 5's, or for planting in the bench.

Prices on Application

JOHN SCOTT, Rutland Road and East 45th St. BROOKLYN, N. Y.

Please mention the Exchange when writing.

Some Plant Bargains

DRACAENA Indivisa, 5½ and 6-in. pots, 24 to 36 inches high, \$4.00, \$6.00, \$9.00 per doz., also by the 100.

BOXWOOD Bushes, 20c., 25c., 35c., 60c. and 75c. each; also by the doz. or 100.

BOXWOOD Pyramids, 3 feet above tub, \$3.00 a pair.

DRACAENA Fragrans, 6½-in. pots, 60c.; 6-in. pots, 75c.; 7-in. pots, \$1.00; 8-in. pots, \$1.50 and \$2.00 each.

DRACAENA Lindenii, 6½ and 7-in. pots, \$1.25 and \$1.60 each.

DRACAENA Massangeana, 6-in., \$1.00 each; 6½-in., \$1.25 each; 7-in., \$1.50 each.

PHOENIX Roebelenii, 4-in. pots, 60c.; 4½-in., 75c.; 6-in., \$1.00; 6-in., \$1.50 each.

CYCAS Revoluta, 60c. to \$1.50 each.

RUBBERS, single plants, 7-in. pots, 3½ to 4 feet high, \$1.00 each; 7 and 8 in. pots, 4½ feet high, \$1.50 each.

RUBBERS, combinations, 10-in. pots, 3½ feet high, 3 plants in a pot, \$3.00 each; 11-in. pots, 4 feet high, 4 plants in a pot, \$4.00 each; 9-in. pots, 3 feet high, 4 plants in a pot, \$3.50 each.

ROSES

Timed to bloom in about a week, fine bushes; Flower of Fairfield, new ever-blooming Crimson Rambler, best ever introduced, \$12, \$18 and \$24 a dozen. Crimson Ramblers, in bud, fine bushes timed for Decoration Day, \$75.00 per 100.

Tausendschon, pink, very fine, \$1, \$1.50 and \$2 each.

Mrs. Cuthbert, pink, \$9 and \$12 a dozen.

Lady Gay, Dorothy Perkins and Hinawatha, assorted, \$9 a dozen; timed for Decoration Day.

Standard Roses, in variety, established in pots, \$1 each.

ANTON SCHULTHEIS, COLLEGE POINT, (L. I.) N. Y.

Please mention the Exchange when writing.

THE PRICES ADVERTISED IN THESE COLUMNS ARE FOR THE TRADE ONLY

CROTONS

Fine varieties, first-class plants, highly colored, 26c., 36c., 60c., 75c. and \$1.00 each. **DRACAENA SANDERII**, 3-in., 26c.

R. G. HANFORD, Norwalk, Conn.

Please mention the Exchange when writing.

The usual monthly meeting of the Pacific Coast Horticultural Society was held in the Poleta Hall last Saturday evening, April 9. A proposal to hold a picnic some time in June was favorably received and an entertainment committee was appointed to make the necessary arrangements. Mr. Kettlewell of San Mateo had a very attractive exhibit of choice vegetables on the exhibition table, which received a vote of thanks. Other exhibits included an excellent strain of *Primula obconica* from H. Plath. Four new members were elected. The next meeting of the Society will be held the first Saturday in May, at 8 p.m., when arrangements will be made for holding the Society's annual exhibition.

The J. R. Sievers Co. on Polk st. have erected another house to be used for the cultivation of Orchids.

Robert Armstrong has taken over his duties as head gardener to the Realty Syndicate.

E. Gill, the well-known Rose grower of West Berkeley, reports having had an excellent Spring trade, the call for roses and general nursery stock having exceeded all previous records. Mr. Gill has purchased eighty-five acres of good land near San José, which he will plant to roses. The Camellias at West Berkeley are at present one mass of bloom and are worth going a long way to see.

Mr. Stekfried, the well-known Orchidist of Alameda, sailed for Japan on the steamship Siberia April 12.

A consignment of three thousand *Phalaenopsis* was received in excellent shape by the McRorie-McLaren Co. last week, from the Philippines.

H. Plath of Ocean View is keeping up his reputation as a Fern grower. A recent visit to his nurseries was made by the writer. Mr. Plath has somewhere about one hundred thousand small Ferns in twos and threes ready for sale and all looking in the pink of condition. The *Adiantum* in this establishment is worth going a long way to see, whole stretches of glass being devoted to this Fern for cut purposes. Two houses of small Palms in thumbs looked remarkably good, as also did a house of *Dracaenas*.

J. Mischoen, for the past six years with the J. H. Sievers Co. of San Francisco, has accepted a position with the McRorie-McLaren Co.

Among the notable visitors who have recently expressed their admiration at the beauties of Golden Gate Park were Lord Kitchener and Lady Sarah Wilson, who spent considerable time in the park after their arrival in San Francisco.

Podesta & Zaldocchi had an excellent window display of pot *Rhododendrons* in their store last week.

The Sievers' store on Powell st. continues to show excellent taste in store decorations. A window display of *Anthuriums* and Orchids this week attracted considerable attention.

The Art Floral Co. reports having had a great demand for choice floral designs. In this line it has few equals and its window display of made-up pieces during Easter week was both interesting and attractive.

The McRorie-McLaren Co. reports having had an excellent Spring trade in its landscape department. Two carloads of Orange trees and one carload of Palms arrived from the South this week, for one of its contracts in the Burlingame district.

The hills and fields in the San Mateo district are ablaze with the golden tints of Poppies at present. There are few sights more inspiring than a field of Californian Poppies.

Wm. Herterich of San Gabriel was a recent caller in town.

The C. C. Morse Co. on Market st. is having a heavy demand for garden seeds of all descriptions this year. The store is a hive of industry these days.

A recent visit to the J. B. Coryell Estate showed the Orchids in elegant shape. A house of *Phalaenopsis* in this establishment is "a sight for sair een" and would create somewhat of a sensation if it could be taken to the coming Boston show. Wm. McW. Brown.

Wholesale Florists

Store, 2729 Lick Place

SAN FRANCISCO

Greenhouses

MELROSE, CAL.

Headquarters for Japanese Plenis and Bulbs, Choice Roses, Carnations, Chrysanthemums, Lily of the Valley and all Seasonal Flowers. Palms, Ferns and Decorative Plants a Specialty. We respectfully solicit your patronage.

Please mention the Exchange when writing.

SUBSCRIBERS PLEASE NOTE.—The Florists' Exchange is a trade paper, and its advts. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

San Francisco

The Market

In the cheaper grades there are just about twice as many flowers coming into the city as the market requires and consequently prices are a trifle low. The splendid weather which we have been having for some time past has, in a way, influenced the market to some considerable extent, inasmuch as we have been favored with an overabundance of outdoor flowers which, naturally, has helped to lower prices on the higher grade stock. Roses continue to sell moderately well. American Beauty is becoming a little more plentiful, while Richmond and Kilmarney fetch fairly good prices. Carnations are beginning to suffer from the abundance of cheap flowers and prices are lower than they have been for some time past. Darwin Tulips are beginning to make their appearance in considerable quantity and meet with a good demand, especially scarlets and yellows. Sweet Peas sell moderately well, while Violets are being peddled on the street at five cents per bunch. In the choicer grades of flowers prices continue to hold good. Orchids and Gardenias are in good demand and fetch top-notch prices. In the stores pot plants are plentiful. Rambler Roses are seen in quantity, while Azaleas, Spiraeas, and Wistarias meet with a limited demand.

Various Notes

Samuel Lundy is in town interviewing the local florists.

Hollander Arrested for Customs Fraud

Jacs Smits, a florist, of Hollaand, was arrested in New York by United States Marshal Henkel, April 20, charged with presenting false consular invoices on importations of Blue Spruce, Japan Maples, and Rhododendrons. The invoices valued the consignment at \$163. The customs authorities said this was too low. Smits pleaded not guilty to Commissioner Shields and was held for examination on Saturday.

Canal Dover, O.

Peonies and other plants are so far advanced that Betscher's expect to cut their main crop before May 30. Lilacs are showing color now and Mock Oranges are far enough advanced to bloom by May 1. Plums were in bloom April 1. Apples April 10, last year just a month later. Peonies usually bloom about four weeks later than Plums.

Owing to the very favorable conditions Gladioli were planted March 9 and many are now 6 in. high. Each frost marks a line across the growths of same, but

some will likely be in bloom about June 15.

Indications are for a phenomenal crop of all things. Never did fruits show better display of bloom than this year. Conditions have been ideal: some frost now but apparently very little damage is done thus far.

Business has been very good this Spring.

Utica, N. Y.

Peter Crowe, who for nearly 40 years has been active and prominent in the flower business in Utica, has determined to take a personal interest in the retail business and has formed a company with Henry G. Martin which will be known as the Crowe & Martin Company, and which will carry on the business which for five years has been successfully conducted by Mr. Martin at 221 Genesee st., corner of Bladina. Mr. Crowe will be the manager of the business, while Mr. Martin will be in immediate charge as heretofore. Mr. Martin's business has increased to such an extent that he found it necessary to enlarge his facilities, and he is fortunate in entering into business associations with Mr. Crowe, whose long

experience and thorough knowledge of the demands of the people of Central New York in the flower line make his judgment invaluable. In addition to the greenhouses of Mr. Martin on Erie st., the new company will be supplied by Mr. Crowe's 15 Rose houses on Genesee st. The combination of the experience and knowledge of Mr. Crowe with the enterprise and activity of the junior member will be a strong one, and that it will be successful there can be no doubt.—*Utica Herald.*

Firms Who are Building

LOOMIS, CAL.—B. H. Bassett is building an addition to his greenhouse. SCHULTZVILLE, N. Y.—Elmer Woodson is preparing to build a Victorian house. STAATSBURG, N. Y.—Three large greenhouses are being built on the Dinsmore estate. WILSON, N. Y.—Roy Church is building a new greenhouse twice the size of his present house. WOBURN, MASS.—Wm. Ward of Montvale will build an additional greenhouse in the near future. COUNCIL BLUFFS, IA.—The J. F. Wilcox Floral Co. is building seven additional greenhouses.

TEN POINTS OF EXCELLENCE OF THE
NEW SEEDLING BEGONIA
"Glory of Cincinnati"

- 1.—It lasts longer in the dwelling than any other Begonia.
- 2.—It is a most beautiful shade of soft satiny-pink.
- 3.—The individual flowers are much larger than those of Gloire de Lorraine.
- 4.—Easily propagated.
- 5.—Easy of cultivation.
- 6.—Strong, robust grower.
- 7.—It can be grown in a 4-inch pot to look like a plant.
- 8.—It flowers from October to April.
- 9.—Not surpassed by any other Begonia.
- 10.—The best plant for the Christmas Trade.

\$1.00 each, \$9.00 per dozen, \$50.00 per 100. July delivery.
 You cannot invest your money to better advantage.

St. Louis

There will be a grand wild flower show given at Arcadia, Mo., on May 24 and 25, by the Woman's Missouri Development Association, assisted by the Missouri Immigration Commission. There will be a number of prizes offered: Mrs. Herbert S. Hadley, wife of the Governor of the State, is at the head of the award committee. The show is expected to be the largest held in the State.

Henry Ostertag says the large arena of the Coliseum will use up a carload of wild Smilax for decorations for the Metropolitan Opera season which opens there April 25. Henry says he expects to be one of the successful candidates in a voting contest of a daily paper to send ten of the most popular men in the city to see the Jeffries-Johnson prize fight in July at California.

The lady florists held a meeting of their circle on Monday, April 11, in Trimp's Hall. The meeting was not so well attended as usual. Miss B. Meinhardt entertained the ladies with a reading on Violets. The death of Mrs. Vesey of Fort Wayne was a great shock to the members and a letter of sympathy was sent the bereaved family.

At the commission houses of Kuehn, Smith, Berning and Angermueller consignments the last week were heavy, especially in Roses and Carnations. Long, fancy American Beauty were in plenty, but small demand prevailed; in fact, everything was slow and a great deal of stock was dumped.

Billy Murphy, sporting editor of the Star, is booming the florist business by advertising that all should wear a green Carnation on Thursday, April 21, in honor of Jack O'Conner, the new manager of the American League Baseball team and more may be sold than on St. Patrick's Day.

The St. Louis Horticultural Society has sent out the preliminary list for its Fall Flower Show to be held in the big Coliseum, Nov. 8 to 12. ST. PATRICK.

WE are entirely sold out in all the stock we have been advertising. Your paper certainly is a hustler.

Minneapolis

Exhibitors at the flower show to be given in the Armory next November, under the auspices of the State Florists' Association, will have \$4,000 in premiums to contest for. This was announced at a meeting of the Minneapolis florists in the rooms of the Commercial Club. The guarantee fund has been subscribed up to \$15,000. J. S. Mitchell is chairman of the financial committee. W. G. Nye is put in charge of press work. The managing committee consists of Theodore Wirth, E. Nagel, Charles Vasatka, H. Rasaker, William Desmond, J. P. Jorganson, John Monson, O. C. Swanson, R. H. Latham, C. F. Higart and Hugh Will.

New Orleans

At the recent formal opening of a high-class drug store Chas. Ehle used, for decorations, almost exclusively Phoenix Roebelenii. The effect was one of great grace and beauty. He also supplied the Carnations which were given the ladies as souvenir.

Abele Bros. of Joseph and Laurel sts., who do a large shipping trade and carry an immense stock of almost anything one might ask for in the plant line, have all their stock in a condition that does credit to them.

Herman Doeschler of Gentilly road, has taken a partner, the firm name being Doeschler & Jones.

James A. Newsham has been busy, both receiving fresh importations of Orchids and packing to fill large orders recently received. Among the Orchids in bloom recently were an especially pretty Epidendrum purpurea Lionatum, and Ocidium graminifolium, with graceful spikes, some of them six feet long, also Cattleyas Mossiae, Mendelii and Skinnerii.

On April 17 the members of the Horticultural Society and others will be the guests of A. Alost and family at Rose Villa, at the annual dinner tendered by Mr. Alost.

CRESCENT CITY.

Cincinnati

There is very little improvement in business to report over that of last week. Plenty of stock is coming in; Carnations and Am. Beauty Roses are selling, but the greater part of the other Tea Roses are going to the hospitals or into the ash barrel. If there was any demand to speak of we would not have any more flowers than could be disposed of, but the demand seems to have fallen off quite considerably.

A letter from Dr. Howald of the Atlanta Floral Co., states that he has sold his place, but that it would still be run under the name of the Atlanta Floral Co., as before.

Present indications (April 18) are that we are in for a cold snap; it is raining and turning cold, and snowing in the northern part of the State. A freeze now would do immense damage as the trees are out in full bloom.

Fred. Gear and wife are in New Orleans having gone down with the Shriners.
E. G. GILLET.

Detroit

Nothing startling in the business line is the principal characteristic of the past week.

The last Florists' Club meeting was interesting because, being devoted to questions and answers, it developed some instructive discussions.

"What are we going to do for help if the automobile people keep on hiring ours for more money than we can afford to pay?" The consensus of opinion was that we do not pay enough attention to the training of young boys. As the writer says, none of us work in this business for the money alone, because we could earn better salaries in occupations demanding less time per day than the florist's business. But, having through an early training acquired a certain love and enthusiasm, we have that interest which brings about results, and is not measured by the narrow scale of dollars and cents.

Pres. Plumb, in relating his experience in that line said that years ago, as superintendent of our public parks, he proposed to engage six boys and to give them a two-years' training, but the law forbids the hiring of help by the city unless they are citizens and voters.

Mr. Knope pointedly remarked that the existing low pay is the cause of wholesale desertions from our ranks. As he wisely put it, everything pertaining to the erection and maintenance of a greenhouse plant has been advanced except the wages.

Mr. Dilger dwelt at length on the fact that every florist ought to have one or more apprentices, and encourage these boys to learn the trade thoroughly. He was satisfied that the system should be inaugurated at once, and said that if it had been done when he first spoke about it, ten years ago, today's scarcity of skilled help would not exist.

FRANK DANZER.

New Bedford, Mass.

The cut flower trade has been good the past week. Flowers are plentiful with a good demand for same. Funeral work has been extra good. Carnations are retailing at 50c. per doz.; good Roses at \$1.50. Violets are done and most of the growers have finished splitting up their plants for another season's stock. Sweet Peas sell at \$1 per 100. Callas and Lilies, \$2 per doz. Snapdragon, in the lighter shades, sell well at \$1 per doz. Bulb stock is getting rather scarce. Paperwhites are nearly done, as also are Tulips; these retail at 50c. per doz. Daffodils, 50c. per doz. Tulips and Daffys are now in bloom out of doors.

Gardening work is in full swing, and the florists are busy with big gangs of men at work in this branch. There is a good call for trees, shrubs, etc.

Ten Week Stocks for Memorial Day are coming along nicely now. We are having warm weather and some of us have stopped firing.

The N. B. Hort. Society will give a general flower show Sept. 15 to 17. Great interest is being taken here in the home gardening contest, which has been started among the school children; present indications are that from 500 to 1000 children will enter the contest, and from many come enthusiastic reports of what they hope to accomplish in the way of beautifying their home surroundings. Nearly \$100 has been collected for prizes, bulbs, shrubs, tools, etc.

HORTICO.

ROSES Planted Now And Grown On

Will make the best stock for forcing next season.

If you have the ground or a good "open lot" be wise and "line out" a few good forcing roses. Don't delay, but do it now. You send the order, we will do the rest.

Our stock of the following varieties is in excellent dormant condition, stocky and well-grown and ready to start, when you are.

Order today and don't delay.

Remember you may deduct 5% if cash accompanies the order.

Hardy Hybrid Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name:

Price, 75c. for 5 (of one variety), \$12.00 per 100, \$110.00 per 1,000

Abel Carriere. Crimson.
Alfred Colomb. Carmine-crimson.
Anne de Diebach. Bright carmine.
Ball of Snow (Boule de Neige). Pure white.
Baron de Bonstetten. Blackish crimson.
Baroness Rothschild. Satiny pink.
Clio. Satin blush.
Duke of Connaught. Rosy crimson.
Franz Karl Druschki. The finest white.
Gloire de Margottin. Dazzling red.
Gen. Jacqueminot. Brilliant crimson.
John Hopper. Bright rose.
La France. Pink.
Marshall P. Wilder. Cherry-rose.
Magna Charta. Dark pink.
Mme. Gabriel Luizet. Satiny pink.
Paul Neyron. Dark pink.
Perle des Blanchés. White.
Persian Yellow. Yellow.
Prince Camille de Rohan. Dark crimson.
Ulrich Brunner. Cherry-red.

For prices see above, or our selection, including Franz Karl Druschki, \$10.00 per 100, \$90.00 per 1,000.

Hybrid Teas

American Beauty. Carmine, \$1.50 per 12, \$12.00 per 100.
Queen of Spain. Pink. \$2.50 per 12, \$20.00 per 100.
Stella de France. Red. \$2.00 per 12, \$15.00 per 100.
Liberty. Red. \$2.50 per 12, \$20.00 per 100.
Perle des Jardins. Yellow. \$2.50 per 12, \$20.00 per 100.
Lady Faire. Rose. \$4.00 per 12, \$30.00 per 100.
Dorothy Roberts. Pink. \$4.00 per 12, \$30.00 per 100.

Baby Rambler Roses

BABY DOROTHY. The same in habit as Baby Rambler, but the color of the flowers is similar to Dorothy Perkins. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c. for 5, \$16.00 per 100.

MRS. WM. H. CUTBUSH. Color intense crimson and exceptionally free-flowering. 85c. for 5, \$15.00 per 100.

MME. NOBERT LEVAVASSEUR (Baby Rambler). Strong, field-grown plants, 85c. for 5, \$15.00 per 100.

THE TEEN BABY RAMBLER. (Grown as a Standard.) The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40c. each, \$3.75 for 10, \$35.00 per 100.

BABY DOROTHY. (Grown as a Standard.) For description, see above. 75c. each, \$6.25 for 10, \$60.00 per 100.

Something New in Roses for Florists Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60c. each, \$6.00 per doz., \$45.00 per 100.

BABY RAMBLER (Half standard). Crimson. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY CATHERINE SEYMETH (Half standard). White. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY "STARS AND STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50c. each, \$5.00 per doz., \$40.00 per 100.

Freu Karl Druschki

Ramblers and Other Climbing Roses

CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 4 feet, \$1.25 for 10, \$12.00 per 100; 4 to 5 feet, \$1.75 for 10, \$15.00 per 100.

DOROTHY PERKINS. Lovely shell-pink color. \$1.25 for 10, \$12.00 per 100.

TAUSENDSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

Flower of Fairfield The Everblooming Crimson Rambler

This variety is a sport from the beautiful Crimson Rambler, is similar in color, more brilliant and lasting than the old favorite. It also possesses the further advantage over the Crimson Rambler in the fact that it flowers profusely on the young wood the first year. Flower of Fairfield is a vigorous grower and free bloomer. It starts to bloom early in the Spring and continues until late in the Autumn. It is rightly termed "perpetual blooming." 40c. each, \$3.60 for 10, \$30.00 per 100.

Veilchenblau (Violet-Blue)

It has long been the desire of rosarians to secure a blue Rose. In Veilchenblau we have practically approached this color. The steel-blue flowers of this new Rose appear in large clusters, are semi-double, of medium size and keep in bloom a long time. The showy yellow stamens contrasting with the blue flower, give the whole a striking appearance. 60c. each, \$5.75 for 10, \$55.00 per 100.

English Moss Roses

Large dormant plants, 75c. for 5, \$15.00 per 100.
Old English. Red.
Blanche Moreau. White.
Gloire de Mousseaux. Pink.
Chapeau de Napoleon. (Napoleon's Hat.) A beautiful crested pink.

Telegrams.—Telegrams received in this office up to 3 p.m. Wednesday containing changes in advertising, will receive attention for the issue of the Saturday following; likewise, telegrams having informative matter intended for our news columns will be received up to Thursday 9 a.m. News telegrams should be forwarded after 5 p.m. Wednesday and marked "Night Press Message, Collect." These will be forwarded by the Telegraph companies at their newspaper rate, providing the material so forwarded contains news for the paper.

The Florists' Exchange is a trade paper, and its ads. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

A correspondent of an English trade paper makes complaint of the stealing of a climbing Rose plant out of a 16-in. pot (there were a number packed together in one deep box) whilst in transit to him by freight. The root was taken clean out of the pot, leaving the shoots tied down as if nothing had happened. We rather think his particular remark as to railway employees would not apply here. He says: "It would interest me (and others) to know if any of your readers have ever suffered in this manner. I think it a good plan when sending out new varieties of plants to put, instead of the name, a number on the label. This would check dishonest railway servants, as it is well known they are keen horticulturists."

The Floricultural Greenhouses at Cornell

Wm. F. Kasting of Buffalo, who is working in his usual energetic get-there way in the endeavor to secure the passage by the N. Y. State Legislature of the Wilkie bill appropriating \$50,000 for the erection of greenhouses and service buildings at Cornell College, for the purpose of experimental and teaching work in floriculture, requests us to urge on our readers the necessity of writing their State Senators and Assemblymen, telling these representatives just how valuable to the State the proposed institution would be and in every way demonstrating their interest in the Bill. If the florists of this State are apathetic in the matter there is danger the Bill may die in Committee on Ways and Means.

Home Gardening in Massachusetts

As evidence of the increasing interest in the home garden and yard improvement contest in New Bedford is the announcement that over 3000 penny packages of seeds have been ordered by seven schools. Present indications are that from 500 to 1000 children will enter the contest.

Stereopticon views of gardens, etc., have been exhibited at many of the schools in Salem and New Bedford and these tend greatly to awaken enthusiasm in the work.

The interest which the children have displayed in the contest far exceeds the expectations of the local committee. Already the committee has ordered 4000 entry blanks, and many additional demands are made for the seed envelopes. Up to the present time 4000 have been distributed.

The New Bedford committee has nearly \$100 available for cash prizes, bulbs, shrubs, garden tools, etc. In Salem, a city half the size of New Bedford, nearly \$200 was provided to be given out as prizes. The New Bedford Horticultural Society and The Standard, a local paper, are bearing all of the expenses of the lectures, printing the four-page newspaper and other necessary work.

Proposed N. Y. Plant and Flower Market

A special meeting of the N. Y. Florists' Club was held on Monday, April 18, at its rooms, Grand Opera House Building, 23d st. and Eighth ave. President A. L. Miller was in the chair, and there were present, beside the members, officers and members of the N. Y. and N. J. Assoc. of Plant Growers, the N. Y. and N. J. Market Florists' Assoc., members of other trade bodies, and many florists not members of any organization. The meeting was an open one and was called for the purpose of considering the question of establishing a plant and flower market under Queensboro Bridge, at First ave. and 59th st., under terms to be offered by the city of New York's Bureau of Markets, and to take action in the matter.

W. H. Siebrecht, Jr., secretary of the joint committees of the Club and the two associations mentioned, by invitation of the chairman, presented the report of the committee, verbally, as made at the last meeting of the Club, and which appeared in the last issue of the EXCHANGE. In the discussion which followed several of those present took part. Mr. Siebrecht answered many questions put to him, mostly covering details which would have to be considered after the market had been secured. As he explained, the principal object of the meeting was to take some definite action in the matter.

Further support of the project was not wanting. H. C. Steinhoff of West Hoboken spoke strongly in favor of the market. He stated he had been engaged in marketing plants for about 25 years in which time he had gained considerable experience. There was a market at Canal and West sts., it was true, but every year trouble was experienced in the matter of establishing the same for the season. The ground was hired from the city and tents erected, but no opportunity for a regular market such as was now proposed had ever been presented. He, with others, had visited the spot proposed for a market, and everyone agreed that it was an ideal one. He said he thought it was large enough to accommodate the entire trade, and the rents were very reasonable. He, too, was of opinion that the trade should not let such an opportunity slip past. The plant growers had been agitating for a long time for a market such as London, Paris and other cities had.

Mr. Moore, of Moore, Hentz & Nash, speaking from the standpoint of cut flower interests, said it was his understanding that the city rules required that the market should be a place where any one could buy, no matter how small the purchase. He asked the question whether it was to be a retail or wholesale market.

Mr. Siebrecht said nothing had been mentioned as to the rules for selling. It was simply to be a public market where merchants, he presumed, could refuse to sell in small quantities.

Others who took part in the discussion were Charles Lenker, A. M. Henshaw, John Donaldson, J. B. Nugent Jr., John Birnie, P. Einsmann and I. Eisenberg.

The consensus of opinion was that the question of selling could be easily arranged. It was not thought that the city would insist on sales being made at retail as well as wholesale, and the Gansevoort Market was quoted as a market where the business was strictly wholesale. It was thought that the various little mat-

ters of difference would, after the market was started, adjust themselves. The principal thing to do at present was to petition the city in accordance with the city's suggestion, so that action could be taken in the matter. Finally, on motion of Mr. Schrader, it was directed that a petition be signed and presented without delay. A short recess was taken during which a petition was handed around and signed by practically everyone interested.

Walter F. Sheridan, who was asked to speak on the subject from a wholesale florist's standpoint, detailed the position in which most of the wholesalers of cut flowers found themselves at present, principally in the matter of having leases running, in many cases for several years, which would make it difficult to consider any plan for immediate change. As to the selling question, he thought it would be certainly unfair to cut into the retail trade. The New York trade, he said, had been waiting for such an opportunity as now presented and the plant growers had a good chance to show what they could do.

A. M. Henshaw thought that if all the wholesalers could be quartered together in such a market it would be good for the trade. The matter of selling, he thought, would adjust itself. Most of the 28th st. wholesalers were just now in a precarious position as far as quarters were concerned. If all were together in a market, expenses would be cut down and, perhaps, later growers' stocks would get the benefit of that condition. In the cut flower line there were many more things to be considered than would be the case with the plantsmen.

As to the manner in which the petition and further action upon the same should be handled, many suggestions were made. In regard to expenses, it was, on motion, arranged that the different associations should bear the same, pro rata. A motion by W. H. Siebrecht, Jr., that each commercial body or association should be represented by committees of five to act with the three joint committees already at work, all the committees to meet together within a few days, and to report back to their respective bodies, was carried.

The photograph here reproduced shows the proposed market quarters beneath the Queensboro Bridge, looking through to 59th st. The floor space is 170 by 275 ft., and the height to the tiled ceiling 40 to 60 ft. The floor is cemented and the columns tiled. The city is willing to close the openings with glass, and erect one or more tiers or floors for office or other purposes. The sidewalk on the 59th st. side is 65 ft. wide, and a space beyond the market quarter, of about the same area, was available for wagons or even extension of the market if required.

Books Received

SUCCESS IN MARKET GARDENING. Doubleday, Page & Co., New York. Price, postpaid, \$1.20.

This very successful book, first written by W. W. Rawson of Boston, and now revised and enlarged by his son, Herbert Rawson, has just been published. The new

Site of Proposed Plant and Flower Market for New York

The location is at 59th St. and First Ave., under the piers of the Queensboro Bridge, Manhattan. The city will enclose the openings with glass.

book brings the practice of market gardening up to date. W. W. Rawson & Co. have employed the largest capital and marketed the largest annual product in New England for years, and on account of the standing of this firm and the successes it has met with in its particular line, this volume, by one of its members, is entitled to the consideration of all.

The late W. W. Rawson, in 1907, a year before his death, appreciated the fact that any further editions would require to be thoroughly revised, and had actually started rewriting the book. Death overtook him before he had spent much time on the new volume beyond making a number of miscellaneous notes and amendments.

The contents of the new edition embrace practically all the information which may be required by market gardeners and those who have already had some experience in the line. The book is not intended primarily for amateurs or beginners, and the reasonable man will estimate its worth by what it contains, not criticising it for the absence of matters which lie beyond its scope and purpose.

We unhesitatingly recommend "Success in Market Gardening" as the best work on the subject of which we have knowledge. It is comprehensive in every respect, even to dwelling on the implements, ordinary and special, required by the market gardener. Further methods and Appliances, Insects and Preventives, Fumigation, Fungi and Plant Diseases, Preventives, Drainage, Irrigation, Rotation, Manures and Fertilizers, Application of Manures, Selection of Seeds, Construction and Operation of Hot Beds, and many other important preliminaries, are all taken care of, followed by chapters with cultural directions for raising the various kinds of vegetables.

The book commends itself for its legible type and its conciseness. It contains some 271 pages, fairly well illustrated, and is bound in cloth. Copies can be obtained through this office.

Parcel Post Hearings

Florists and seedsmen whose business would be benefited through the operation of a Parcel Post should bear in mind that the hearings commence on Monday next, April 25, before the U. S. House Postal Committee, at the Capitol, Washington, D. C. For further particulars see the EXCHANGE of April 16, page 700.

Thousands of our readers are interested in this vital business proposition, and all such should write at once to the chairman of that committee, Hon. John W. Weeks, giving specific instances and figures if possible, in support of their contention for the establishment of a Parcel Post.

Pink Flowering Magnolia Stellata [I]

Editor The Florists' Exchange:

Noting in your issue of April 16 (page 701), that Samuel C. Moon has found a pink-flowering Magnolia stellata would say that my father, the late Patrick H. Lawlor, found a sport of Magnolia stellata that had a fine pink color a shade or two lighter than the Dorothy Perkins Rose, which he named M. stellata rosea. We have a plant of this variety in Flushing which is one of the original twelve grafts taken from said sport. It is now seven feet high, has a spread of seven feet, and is eight years old from graft. It was a perfect mass of bloom this Spring.

Flushing, N. Y., April 18, 1910.

THEO. P. LAWLOR.

Scotch Broom—Plant Food Capsules

Editor The Florists' Exchange:

Mr. Meehan is slightly mistaken in saying that I used ashes for covering the stump of the Erythrin Crista galli in Winter. Perhaps the ashes, if coal ashes, might answer, but, in fact, I used a better material—sawdust. This keeps out cold far better than ashes would.

At the Botanic Garden in Washington there has long been a plant of this Erythrin, in a coldframe by the side of one of the propagating houses. When the frame is empty and the sashes removed in Spring the Erythrina shoots up and blooms finely till cut down again in the Fall.

Now, Mr. Meehan advises the planting of the Scotch Broom. It would not do for him to give that advice to the people along the line of the Chesapeake & Ohio Railroad, from Charlottesville, Va. to some distance south of Richmond, for in many places there it has taken possession of the fields, and is crowding along the railroad banks. The people say that it was introduced by Thomas

Jefferson at Monticello, near Charlottesville, and has spread from there. It is certainly pretty when in bloom, and is pretty at any time if it was not so aggressive. In the section I have mentioned it is almost as plentiful as the Saw Palmettos in the piney woods of Florida.

Anyone who chances to see Forsythia suspensa in bloom at the Botanic Garden in Washington cannot help admitting that it is prettier than viridissima.

I am gardening nowadays solely for fun, and I get a great deal out of it. Just now I have hundreds of seedling Dahlias in my frames and am looking for fun in watching what they will turn out, for the seed came to me from various sources and was claimed to be the finest in the country of all the various types of this flower. It is so easy to grow seedling Dahlias, and only one season is needed to test their character, for we get the flowers about as quickly from the seed as from roots.

I shall grow a good many seedling Cannas too. Of course, most people think that the Canna has been brought to its greatest perfection and new ones are not needed, but now and then a real improvement is found, such as the King Humbert, which represents, to my notion, the highest attainment as yet in Cannas.

And now they are giving plants capsules! Can we not get all the plant food needed in the various carriers of nitrogen, phosphoric acid and potash? If these capsules are plant food they are made of these elementary materials in some form, and the fact that they are capsules and to be inserted in holes in the soil does not make the contents of the capsule anything but some combination of nitrogen, potassium and phosphorus; and while we can get these cheaply by the ton I cannot see the need for the capsules. Then the idea that anything applied to the roots of a tree will remove the scale insects is pure nonsense, and the man with scales on his trees who depends on the capsules to destroy them, and fails to spray, will lose his trees. In short, if my trees need feeding I will get the food materials and mix them and apply them, and if the scale attacks my trees I know that I can boil lime and sulphur, spray them and kill the scale, but anything applied to the roots will never kill them.

Salisbury, Md.

W. F. MASSEY.

Rust Joints

Rust joints seem almost to be peculiar to greenhouse heating. Many florists and gardeners know how to make these very tight and lasting joints, but very few plumbers or steam fitters seem to understand just how they are made. A vast majority of greenhouses are heated by hot water, and of these nearly all private installations are constructed of 3½-in. cast iron pipe, quite commonly called 4 in. greenhouse pipe, the outside diameter being 4 in. This pipe is almost always made up by means of rust joints.

No tighter or better joint than the rust joint is possible. When made properly it will never leak, and when it does leak, because not properly made, it is not difficult of repair.

The joint, being of the same material (cast iron) as the pipe, is subject to the same degree of expansion and contraction, but the best feature of this joint is its general utility. This joint can be made by any person who can handle a hammer, a caulking tool and a cold chisel. The work requires no more expensive and no more difficult tools than these, and it also requires very little time to make. The labor is not heavy compared with that of cutting even smaller sizes of wrought iron pipe with modern tools, or that of turning up joints of wrought iron pipe.

Cast iron pipe will outlast the very best wrought iron pipe. It resists corrosion much better than wrought iron pipe.

Coil fittings, headers automatic and non-automatic, are now made with hubs to receive 2-in. wrought iron pipe, and 2-in. pipe is now quite as frequently caulked into the header fittings as it is screw-jointed into the same. Thus, right and left hand and union joints are done away with. The work is simplified and cheapened both because it requires less time to perform and because it requires fewer tools.

A florist with a cast iron pipe heating plant needs only an extra length of cast iron pipe, a couple of sleeves, a few pounds of iron borings, a hammer, caulking irons and cold chisels, and he feels competent to meet almost any leak.

The man with a wrought iron pipe system must carry an assortment of large and expensive tools or have easy access to a pipe fitter's establishment.

Directions for Making Rust Joints in Greenhouse Piping

Place four or five strands of rope around in the space between spigot and hub of pipe and caulk in solidly. Moisten the borings slightly so that when squeezed in the hand they will cake, then put in a layer of the moistened borings on top of the rope and caulk in solidly, then another layer of borings and caulk in, and so continue the process until the space is filled up. To insure a tight joint both rope and borings must be hammered in as tightly as possible.

Do not use salamoniac or salt.

F. E.

Henry G. McPike

Henry G. McPike, the noted horticulturist, died at his home in Alton, Ill., April 18. He was born July 6, 1825, at Lawrenceville, Ind., and was known as the "Illinois Burbank" when he gained fame in horticultural circles after originating the now well-known "McPike Grape." He was twice mayor of the city and was a great lover of flowers. The funeral took place Wednesday, April 20, and the burial was in a grove of fruit trees planted and cultivated by his own hands. This was his last wish.

ST. PATRICK.

William Penn Watson

William Penn Watson, prominent among the Pacific Coast horticulturists, died at his home in Long Beach, Cal., April 14. He was the first to introduce the growing of fruit in the now rich Hood River Valley in Oregon, and he was among the first to grow Dates in the Coachella Valley, California. By results obtained from dry farming he induced many to believe in the merits of extensive cultivation without water. It was his claim that to water land was eventually to ruin it. He was a native of Morgan County, Illinois.

John Murray

John Murray died at his home at Pawtucket, R. I., April 10, in the seventy-fifth year of his age.

Mr. Murray was a gardener of the old school, of great ability, and a thorough horticulturist. Thirty-three years ago he was one of the best known gardeners about Boston, Mass., and had been head gardener to some of the large private places about Wellesley, Mass. His last connection was with the Conant Estate at Pawtucket, R. I., of which he had charge for twelve years, and until his retirement from active work.

A large delegation of old-time florists from Providence and points in Massachusetts attended the funeral on April 12.

G. A. J.

Hermann Wild

Hermann Wild, for forty-two years a resident of Sarcoxie, Mo., died at his residence, in that city on Sunday, April 10, of old age.

Born in Rosswein, Saxony, December 24, 1824, he left his native country at the age of 20, and came to New York, whence he went to Milwaukee, Wis., and in 1848 was married to Miss Maria Haase, who survives him. One of the early settlers at Sarcoxie, he purchased a tract of land and commenced farming, later establishing a florist business. He was a man of kindly nature and benevolent disposition. Recently he and his wife presented the city with land for a park.

Beside the widow, one brother and six children survive him. He was a member of the Odd Fellows order for forty years, and the remains were laid to rest with Odd Fellow honors.

Catherine Powers

Catherine Powers, widow of the late Michael J. Lynch, died at her home on the South Road recently, after a very brief illness. Mrs. Lynch had not needed the care of a physician in twenty years, but a week before her death she took a heavy cold and pneumonia developed. Heart trouble and complications followed and death resulted.

The deceased was the daughter of John and Mary (Murphy) Powers, of Rhinebeck, natives of County Wexford, Ireland. She married Mr. Lynch about forty years ago and they located on the South Road where she passed away. Mr. Lynch was one of the best known florists in the State and on his death Mrs. Lynch and her sons continued the business with great success. She is survived by three sons, Thomas M., John M. and James E., and two daughters, Mary T. and Catherine E., the latter attending school at New Rochelle.

In Memoriam

The L. S. of A. F. has passed the following resolutions on the death of Mrs. W. J. Vesey:

WHEREAS, The Ladies' Society of American Florists has been called to mourn the loss of its beloved first president, Mrs. Wm. J. Vesey of Fort Wayne, Ind., and is desirous of expressing its sympathy, therefore be it

RESOLVED, That in the death of Mrs. Vesey, the Society has lost a member prized for her wisdom and advice. The Board of Directors will miss her executive ability in their session this coming Summer. To know her was to love her instantly. She has gone in her prime of life, and our hearts go out in sympathy to the husband and children. We grieve with them, and be it

FURTHER RESOLVED, That a copy of these resolutions be sent to the family, and also spread upon the minutes of the Society and published in the trade papers.

MRS. PETER FISHER,

MRS. J. F. SIBSON,

MRS. J. C. VAUGHAN.

Article III—Continued

Shadeless Ridge Houses

The term shadeless ridge does not signify that the ridge is made of any special kind of material, or of any particular size or shape, but rather indicates that it is so located that when the sun is at an altitude of about 60° the shadow of ridge is cast at some point to the north of the north bench, as shown by the dotted line in Fig. 12, which illustrates the approximate form of house to which this name has been applied, and which is a development of the three-quarter span house in which the beds are placed all on the same level.

This form of house is run east and west with the long side of the roof to the south. The north and south walls are made of equal height with same amount of glass below the eaves on both sides. Whilst this peculiarity of construction prevents the casting of the shadow of the ridge on the beds it has also the disadvantage of giving a higher altitude to the ridge than would be the case in an even span house of the same width and pitch, the result being that a house added later to the north would have to be kept a greater distance away than would be necessary in the case of an even span house, in order to avoid the shadow of ridge on the south bench of same. This height of ridge could only be obviated by reducing the pitch of the roof on the south side of the house, but as will be seen, when considering the proper pitch of the roof, the amount of light transmitted through the glass is considerably less when the pitch of the roof is much reduced.

We have now covered practically every type of house in a level range, constructed separately, that is with a space between each house. The next form of structure to be considered is what is known as the

Ridge and Furrow Type

Fig. 13 shows what is generally known as short span ridge and furrow houses. These houses are usually constructed so that the distance from the eaves or gutter to the ridge does not exceed 8 ft., which makes a house approximately 14 ft. 6 in. wide from center to center of posts, with the roof having a pitch of about 7 in. to the foot, the exact width of the houses depending upon the width of the gutters used.

This style of house has been mostly confined to all-wood structures, that is houses provided with wood

ported by either a column or truss which, of course, adds to the amount of shadow. Another disadvantage of this form of construction over that shown in Fig. 13 arises from the fact that the ridge is higher and, therefore, when the sun is at its lowest point, the shadow of the ridge is cast on the next house to the north, whereas,

if the house was constructed with an even span, with the roof having a pitch of about 7 in., the shadow of the ridge would strike the gutter when the sun was at an altitude of about 30°.

The only advantage derived from a construction on the lines of Fig. 13A would be because of the additional height of the roof ventilating sash above the benches,

and of the slightly increased cubical contents for the same height of gutter, but this advantage is so slight that we do not believe it compensates for the disadvantage of the increased shadow due to the height of ridge and the additional roof support necessary.

posts, eaves, aill, purlin, ridge and center gutter, the roof bars being of sufficient size and strength to span 8 ft. without the use of purlins or other supports between the gutter and the ridge; the more progressive manufacturers of this class of house are now, however, using iron posts, eaves, purlins and light iron gutters, which changes in material have added much to the value of the same as growing houses, and these improvements will, no doubt, be carried much further in the near future.

Houses of this character are frequently run north and south, but when so placed the results are better when wide glass is used, especially with low roof, but under certain conditions it is necessary to run the houses east and west when they are generally constructed as shown by Fig. 13A, in which case the long slope is placed facing the south, but the advantage obtained from such a construction is rather doubtful as the distance of the long slope from the gutter to the ridge is such as to necessitate a support midway in the form of a purlin and

The ridge and furrow type of house has been more largely used in the West, where acres of ground have been covered with houses constructed in this form and, while excellent crops have been raised in houses of this type, they are generally used by the growers who aim at quantity rather than quality.

Fig. 14 shows the wide houses set in the form of ridge and furrow. These may be constructed any width desired and, by relieving the gutters between the houses of water, through pipes which support them about every 8 ft., the gutters may be made of small dimensions. Apart from the matter of center gutters the construction of these houses would be the same as for the separate even span houses of equal width.

The advantages claimed for this type over the short even span houses are that the ventilators are further away from the plants, with the same height of eaves, and also that the cubical contents is greater, therefore enabling the heating to be accomplished more economically; it is certainly an excellent form where it is desired to use every foot of ground.

(To be continued)

GREENHOUSE CONSTRUCTION and HEATING INQUIRY DEPARTMENT

In Article 2 of Mr. John A. Payne's "Greenhouse Construction and Heating," I noticed a plan of a series of houses arranged on a steep grade. This plan shows ground plans only. I would like to see a plan of the gable ends arranged on a grade of 5 per cent.—such a plan as is represented in Fig. 5.—E. G. W., Mass.

The plan shown in Fig. 5 is intended for a much steeper grade than 5 ft. to the 100 ft. It, of course, could be used on any grade, but when speaking of steep grade or side hill houses the term is generally understood as meaning a grade of about from 2 in. to 5 in. to the foot.

We will take up the consideration of the construction of the gable in side hill houses in a later article.

JNO. A. PAYNE.

I hope Mr. Payne will explain, for the benefit of those who do not thoroughly understand, the advantages of steam traps. I have about 12 to 15 in. fall in my returns, but sometimes it appears as though circulation is very slow. In what way does it improve the heating service and lessen the consumption of coal?—A. M., Ia.

—A properly designed gravity steam heating plant does not require a steam trap for the proper operation of same.

If there is sufficient distance between the water level

of the boiler and steam main and coils to overcome the loss of pressure due to friction in circulation and condensation, and if the pipes are of proper size, and given the proper grade, there should be no difficulty in securing a good circulation in the plant.

If, however, the plant has been so poorly designed and installed as to impair the circulation, some form of mechanical device for returning the water of condensation would be of assistance. This mechanical device could either be in the form of a receiving tank and steam pump or a steam trap.

A steam pump is only practicable where steam pressure is carried at about 25 or 30 lbs., therefore, for a pure and simple low pressure heating plant, a return steam trap is the best device to use.

There are several makes of traps on the market any of which, if properly connected, will give good results. It is always well to have a trap considerably larger than the actual amount of surface the plant calls for, as when steam is first turned on the water of condensation is considerably more than when running under ordinary conditions. If the amount of heating surface in your plant, including mains, is equal to about 20,000 lineal feet of 1-in. pipe, you should have a trap capable of carrying at least 50 per cent. more than this.

We will consider the question of traps under the head of heating in the series now running.

JNO. A. PAYNE.

April 23, 1910

A Single Gardenia Plant

Grown at John Scott's, Brooklyn, N. Y.

Gardenia Culture

By Andrew Benson

Introduction

Success in growing Gardenias depends largely on the proper observation of many small things as well as on the variety and quality of the stock. There is only one variety which can be successfully grown and that is Gardenia Veitchii. Many florists have for years been trying to grow Gardenias without knowledge, as to the right variety for forcing; others have been growing Gardenia Florida (Cape Jessamine), a variety which makes an especially fine growth, but very seldom produces flowers. Gardenia Florida flowers very freely in May and June, but cannot, with success, be forced.

Gardenia Veitchii is the one variety for Midwinter forcing and can be made to flower at almost any time from September to May; therefore, any florist who grows, or intends to grow Gardenias, should obtain healthy stock of that variety. If such cannot be secured better leave Gardenias alone, as they would not prove a paying investment.

Any attempt to convert Gardenias into a tractable subject for Winter forcing through recourse to ordinary methods must result in absolute failure.

Cultural conditions and treatment of mostly any other plant does not exactly meet the requirements of the Gardenia and, where special provision has not been made for its culture, attempts to grow it have brought very discouraging results.

It must not be thought that the culture of the Gardenia is exceedingly difficult or beyond the mastery of the grower. This is not the case, but the man who puts one or more houses into the growing of Gardenias must absolutely know a little of the requirements of the plant and should think twice before acting.

Heat, light, moisture and soil are the big four Gardenia requirements and the grower must be able to control three of them, viz.: heat, moisture and soil.

If you grow Gardenias, or intend to grow them, do not exactly know their treatment and have to let one of your men be in charge, watch him for a while. Watch him closely; find out if he has the right idea and understanding. If he has, then "leave him alone." Do not bother him with stories about how other growers do, but rather give him a day or two off so he can go around and find out for himself. It will pay both employer and employee.

The House

Specially built houses are not required for Gardenias, but small houses are preferable. My opinion is that the width of the Gardenia house should never be more than 25 feet. As to the length of the house, I would say that this makes no difference, providing the heating be economically arranged.

As mentioned before, light is a great factor in plant growth and is a necessity for Gardenias. While the florist cannot increase or decrease the actual hours of sunshine, he can, by properly planning his houses, afford his plants the maximum benefit of the light provided by nature.

The heating system should be so arranged as to maintain a temperature not far below 65° in zero weather. The pipes should be run underneath the benches, and

equally distributed, so that every bench will get some benefit from the bottom heat; the pipes to be placed eight to ten inches from the bottom of the bench and as near as possible in the middle thereof. By placing the pipes under the center of the bench, it is possible to keep the soil around the middle or two middle rows of Gardenias sweet, then the outside rows nearer the edge will look after themselves.

The width of the bench should be 42 to 48 inches. Narrow benches are easier to control. Make them five inches high and use 5-inch boards for the bottom. Leave a space fully an inch between each board, as you cannot give the Gardenias too much drainage; too little drainage has mainly been the cause of Gardenias turning yellow and dropping buds.

Soil

In most cases the question of soil is not decided by the grower. Where the Gardenia grows in its native state, it is in a light, sandy soil so, very naturally, to plant Gardenias in stiff, heavy soil would be as unnatural as planting Roses in leaf mould.

Gardenias want a light, sandy and very rich soil. Do not use any clay at all, as clay holds too much water, keeps the soil cold, close and stiff, thereby causing club-root, but use a soil through which water runs very freely, a soil that heat will penetrate. If your soil is not right, improve it; if it appears too heavy, add sand; if not sufficiently fibrous and porous, add leaf mould—under any circumstances do not use too heavy a soil.

Good cow manure is the best fertilizer. Let it be in a fairly fresh condition and use plenty of it. Make your compost, say, one part manure and two parts soil.

Propagating

There are no two florists who hold the same ideas regarding Gardenia propagation. My experience has taught me to start the propagating in September and October. So doing, one is able to have big, strong plants to bench out the early part of May. In order to secure good healthy cuttings, select the very best and biggest leaved plants you can find for your stock plants. A good policy is to watch the growing and action of the plants during the Summer and at that time label those which show a vigorous and healthy growth, taking the cuttings from these.

Always aim to improve your stock. Do not use any yellowish or bottom shoots, as a poor, small-leaved yellow cutting never makes a good flower-bearing plant.

Use a good, clean, sharp sand for your propagating bench and insert over a bottom heat of about 80° to 85°. Shade and keep close, spraying daily. From 20 to 25 days should be sufficient time to root the cuttings and the young plants may then be potted into 2¼-in. pots. Give a few days of nursing after potting, keeping the atmosphere around them a little close and lightly shade, if days are bright; after this the plants will be able to take care of themselves in an ordinary Gardenia house.

About six weeks in 2¼-in. pots will be long enough for the plants to become well rooted and ready for a shift to a size larger pot; even if they get a little hard in the pot it will do them no harm. However, do not

let them get pot-bound and starved or they will receive a check from which it will take them weeks to recover. Use a light, porous soil for the young plants and by degrees mix in some well rotted cow manure with it.

Planting

The space to give Gardenias depends entirely on the size of the plants. I should advise three rows of 4-in. plants in a 4-ft. bench, with 20 in. between the plants; in a 42-in. bench three rows and 24 in. between the plants. Always allow Gardenias plenty of room.

If possible, the planting should be done in the early part of May. Any yellowish or feeble plants should be rejected for bench culture. If the bench has been built, as advised, with plenty of drainage, plant the Gardenias in 4½ in. of soil, allowing some space for top dressing later on.

Great care should be taken not to place the roots any deeper than barely below the surface of the soil.

If new houses are being erected, be sure that everything is in the best possible condition before filling them. Very often the benches are slapped up hurriedly in order to get the plants in and started. One had better let the plants grow alone in pots for another week than to slight the construction in any way.

Cultural Directions

The best Gardenias are not grown through any secret process, but rather by the most careful attention to the little details necessary to their needs. In the exercise of care and in the use of sound judgment lies the road to success.

When the plants are set and have begun to grow, the owner feels a sense of relief, yet it is just at this time that the most vigilant attention is demanded. Great care is now needed in the use of water and in giving air.

Gardenias will stand plenty of air during the Summer months, keeping the ventilators open fairly well on warm nights. Ventilating in Fall requires considerable judgment, the amount of air at night being regulated in connection with the use of artificial heat.

I strongly advocate starting the boilers early so you can keep an inch of air on, thus avoiding the condensation that will surely collect on the foliage and often causing the buds to drop.

The water should be given around the plants only, and not all over the bench, for the longer the soil can be kept on the dry side between the plants the better rooting system they will have.

Plants always saturated with water may do well apparently during the Summer months, and be a riot of green leaves and shoots, but when the short days and cold nights of September come then such plants will be soft and will fall a prey to club-root or turn yellow.

When the plants have been set out about three months, give them a top-dressing. This is to be of the same compost as used in the filling of the benches. Top-dress every now and then when they need it; I should say a half inch at a time would be nearly right.

Keep the plants sprayed regularly; dampen down the walks before leaving the house for the night. Never

A Gardenia House at John Scott's, Brooklyn, N. Y.

The plants are grown in pots; these are plunged into the benches and covered with moss.

allow the moisture to slack or else the foliage will get spoiled and the buds will get dry and not develop into flowers.

Avoid manure water.

Gardenias should commence to flower in the first part of October, so do not pinch any buds off after the first of August. However, do not let them all flower at the same time. It takes seven to eight weeks for the buds to mature.

Keep the plants well tied up.

Insects

Insects should be destroyed as soon as detected—do not wait until the plants are covered. Every effort should be made to keep the plants clean. Mealy bug and greenfly are the Gardenia's worst enemies. Of the two the mealy bug is the harder to kill. It can be most successfully fought and conquered by not allowing it to get ahead of you. Mealy bug can be kept down by using a good pressure from the hose and syringing carefully. Toward Fall, when the days become shorter, it would be beneficial to once a week spray the Gardenias with some mealy bug insecticide. There are several such advertised in the columns of this paper which are effective for that purpose.

Greenfly can be kept down by frequent fumigations, but I would not advocate tobacco stems for the purpose.

Snails will, at times, in the Winter months and toward Spring, be a pest to the Gardenia. Keep a sharp lookout for them as they can in a night's work spoil several dollars' worth of flowers.

Conclusion

The florist who is anxious to keep abreast of the times and who is quick to note the growing tendency of the people for more variety—something out of the ordinary—is constantly asking himself the question, "Shall I grow Gardenias and encourage my customers to buy them? Or shall I leave the Gardenia question alone and buy those I may have call for from a firm making them a specialty?"

It is the opinion of the writer that the main reason why Gardenias are barred from many an establishment lies in the fear of failure, and not because the owners do not desire to have the prestige and profit a well-grown Gardenia house would bring them.

If as much attention was paid to the Gardenia and its requirements as is paid to Roses, Carnations, etc., it would be an easy matter to have them produce flowers whenever they were wanted.

Commonsense and sound judgment, coupled with a little knowledge of the conditions under which the plants grow in their natural state is nearly the complete guide for the would-be successful Gardenia grower.

As a rule, the smaller grower is more successful with this plant than the florist with a large amount of glass. It stands to reason: the smaller grower has to be successful, he cannot afford to lose, and so he puts all the powers of his knowledge and energy to work. Whereas, the big grower does not have to depend upon his Gardenias entirely, but has his Roses, Carnations and other standbys to help him make both ends meet; he may neglect the Gardenias, not giving them the attention they should have. Often he takes a notion to grow them and will rush his work, does it half way, tries different schemes, and, when the year is over, finds his bank roll decreased.

I may mention the fact that I have grown Gardenias for five years and that I have met defeat once, but through this defeat much knowledge was gained. I found the cause.

The Gardenia is growing in popularity and is fast forcing its way as a leader among the flowers of today.

Stray Notes from Abroad

BY T. A. WESTON

According to the dictionary, the term "stray," means to wander or ramble. Although I endeavor to stick to the path of virtue, I fear that I myself have a tendency to ramble and, with the inherent tendency of the scribbler, am not content unless my pen accompanies me. The old adage has it that a rolling stone gathers no moss, but since circumstances have brought me London-ways again, I shall endeavor to disprove the saying, when applied to the party who is newsgathering. At the same time it must be understood that when I substitute the word "news," for "moss," I do not intend to serve out moss-grown news. After this preamble let me get down to business.

Lady Hillingdon, the New Rose

My esteemed confrère, J. Harrison Dick, recently referred to the new Rose Lady Hillingdon, but his praise was far from sufficient; it is bound to make good both as an outdoor sort and as a forcer. So far the public have only seen it as a forcer, but as it has now been up before the R. H. S. for three successive meetings we have had an opportunity of judging its value. I have no hesitation in saying it will prove as valuable to growers as White Killarney. The parentage of Lady Hilling-

don is Papa Gontier and Madame Hoste, but its extraordinary color is right away from either.

As shown on April 5, the flowers were brighter than those exhibited previously, the color being a rich old gold, for all the world like deep creamy butter. In the bud, it has the form of Killarney, long and pointed, possessing all the characteristics of a pure Tea. The color is self throughout, and I am assured that it loses very little color even when open.

The flowers are not very full, possessing just enough petals to make a good-shaped bloom. Growth is vigorous and slender, carrying splendid coppery foliage, while the blooms are freely produced. Mount & Sons staged some 250 blooms and a glorious show they made. Plants are being sold, retail, at 5s. (\$1.20) each.

Many New Forms of Daffodils

The Daffodil season is now with us, and the year 1910 promises to be rich in novelties which, in Daffodils, means that a very long pocket is necessary if one desires to purchase; nevertheless, they cause one to gasp not a little. Not only do raisers improve upon older sorts but they give us totally distinct breaks.

In Rags and Tatters and Shock-Headed Peter, Messrs. Cartright & Goodwin give us two giant doubles in the way of the old Eggs & Bacon, and Codlins & Cream respectively. These new sorts are monsters, about four inches.

In Inglecombe we have a pure Buttercup yellow, as double as a Rose and as large as a well-grown Sulphur Phoenix. In white trumpets, this raiser has got right away from Madam de Graaf for size.

Countess of Stanford is as large as King Alfred; The Fawn, Icicle and Empire are three other beautiful sorts.

Wonderful is indeed a wonder, for it is a polyanthus-flowered sort with blooms as big as Ornatus, the cups being bright red. In short, or chalice cup sorts Gadfly is a beauty, the cup, which is brilliant red, showing up against the gleaming white outer petals.

Retail florists are invited to send us items of trade interest for publication on this page; clear photographs of good designs will also be appreciated. These latter should always be packed carefully between boards.

A Coming New Book for Decorators

Mr. R. F. Felton, the well-known florist to the king, bids fair to shine as an author. Not content with penning an article for the Carnation Annual, he is about to issue a book on Decorative Floral Work. If the meat is equal to the crust, then Mr. Felton's book will be worth reading.

T. A. W., Eng.

Origin of Mothers' Day

A Worthy Memorial Assuming National Importance

"Mothers' Day," inaugurated in Philadelphia four years ago will, this year, be observed on Sunday, May 8. Its recommendable feature is that it is intended to commemorate the memory of the best mother that ever lived, your own, and it is your privilege to pay public but modest tribute to that mother by wearing a white Carnation.

Miss Anna Jarvis, 2301 North Twelfth st., Philadelphia, was the originator of Mothers' Day. She is a modest, middle-aged woman, whose own mother died five years ago, on May 9. Her own grief brought a realization of the sorrow which a mother's death must always bring to some one, which Miss Jarvis was not slow to act upon. She began her campaign for a national celebration of the day by writing anonymously to editors, ministers, men in public places and heads of fraternities, asking their help. The idea appealed to the deepest and best sentiments of every one and gained such unanimous support that Mothers' Day last year was celebrated in nearly every State in the Union.

The day and its lesson furnished ministers with texts, and it was observed in hospitals, prisons, institutions and almshouses.

In the last four years the plan has taken a firm hold on the public consciousness. A meeting of representative men was recently held, after a lunch in Miss Jarvis' honor, and plans were discussed for making the day a national festival. The originator, however, says: "I want Mothers' Day to exist for all, princes or paupers, Christians or Jews, young or old—the figure of a mother must stand to all for what is most worthy and true."

Florists can, with propriety, place signs in their stores and windows, drawing attention to the observance, and the significance of "the white Carnation" to be worn on that day.

"Was it for this through all the countless years
The sun and dew poured spices in your cup?
Was it for this with patience and with tears
You garnered all your priceless incense up?
Oh, white Carnation, symbol of the flesh,
Your bourgeoning at last has found its own;
Today we break your glutinous to refresh
Our memory of mother and of home."
—The White Carnation Song.

The Drexel-Gould Wedding Decorations At the Church

The marriage of Miss Marjorie Gwynne Gould, eldest daughter of Mr. and Mrs. George Jay Gould, to Anthony J. Drexel, Jr., of Philadelphia and London, took place in St. Bartholomew's Church at 4 o'clock on Tuesday afternoon, April 19.

Alexander McConnell, 577 Fifth ave., furnished the floral decorations, which were the most elaborate, beautiful and unique ever seen on any similar occasion in New York City. On either side of the center aisle of the church were eleven great vases, festooned with Asparagus plumosus and filled with Mme. Abel Chatenay and Mrs. Jardine Roses, about one hundred to each vase.

These Roses were so skillfully arranged that each stood out by itself, retaining its own individuality, each a solitaire. Not only in the arrangement of the Roses, but also in placing all the other flowers this plan of bringing out the individual beauty of each bloom was most felicitously followed. It was evident that an experienced floral artist had planned the arrangement of all the decorations, and that he had the executive ability to see to it that his plans were well carried out. In short there was manifest the "art which conceals art," which, after all, is the true art.

As one entered the doors opposite each side aisle he was overshadowed by a great Palm rising out of a tropical luxuriance of wild Smilax, and at the head of each side aisle similar decorations were used.

Between the pillars of polished granite along each side aisle were other great vases, eight in number, wreathed with Asparagus and filled with gigantic Callas of wondrous beauty. Indeed, the nearly two thousand Callas used in the decorations were a unique feature of the decorative scheme.

The choir gallery at the entrance was heavily festooned with wild Smilax intermingled with boughs of Apple, Dogwood and Cherry blooms. The architraves of the granite pillars were wound with wild Smilax with headings of boughs of Azaleas and Apple blooms. On the side walls were ten great bouquets of white Daisies and Asparagus so skillfully placed that they looked like those great and beautiful clumps of Daisies which grow in God's own meadows, unarranged by man.

At the head of the main aisle on either side of the steps leading to the dais in front of the altar were heavy bankings of Callas, white Lilacs and Asparagus, extending up to the altar.

On the right and left of the altar were great overshadowing Palms, under which were twenty-four vases of Callas of glistening whiteness, symbols of purity. On the marble altar itself, at the foot of the cross, stood smaller vases of Callas.

But, after all, this description by the dissection process only feebly described the surpassingly beautiful effect of the whole. It is as futile as an attempt to bring before the eyes of another the whole beautiful countryside with its wealth of flowers, shrubs, and trees in the rare days of June.

The Bridal Bouquets

The bride's bouquet was made of Bride Roses, Orange blossoms and Adiantum Farleyense, tied with the conventional white ribbon.

The bridesmaids' bouquets were made of pink Moss Roses, Orange blossoms and Adiantum Farleyense, with a shower of pink baby ribbons in the loops of which were caught pink Moss Rose buds. The bouquets were tied with the usual pink ribbon.

The boutonnières were of Orange blossoms.

At the Gould Residence

At the Gould home, Fifth ave. and Sixty-seventh st., a temporary arch erected in the great hallway was wreathed with Smilax and Asparagus, interspersed with pink Roses. Three floors of the mansion were decorated with a great abundance of Asparagus, Smilax, and pink Roses, so as to perfectly harmonize with the surroundings. The color scheme was pink and white, carried out with pink and white Roses, and Apple blossoms.

The Regency Room, at the left of the hall, with its dark walnut woodwork picked out in gold and its rich red hangings, was decorated with American Beauty Roses.

Large Australian tree Ferns were used at the base of the wide stairway, and great Ferns and Palms were arranged through the hall. The foyer hall was also decorated with tree Ferns, Spring flowers and Roses, where Mr. and Mrs. Gould stood to receive. In the ball room a lower of pink and white Roses was erected under which Mr. and Mrs. Drexel and the bridesmaids received. The salon was decorated in pink and white.

Florists in good standing throughout the country can avail themselves of the advertisers' offers in this Department and accept, without hesitation, orders from their local customers, transmit same to an advertiser in these columns, and thus avail themselves of the opportunities for extension of trade which are open to all. Let your customers know you fill orders by telegraph to any part of the country.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail firms advertising under this heading are all considered by the publishers of *The Florists' Exchange* as being responsible, and will accept and fill orders for Flowers, Plants and Floral Designs for Steamer Orders, departing Trains, or any given point within their reach, forwarded them by mail, telegraph or telephone, in the respective districts to which their trade extends, the usual commission being allowed. While no guarantee is expressed or implied by this paper as to the satisfactory fulfillment of orders sent to parties whose names appear in this Directory, we will state that only concerns of known good standing will be admitted in this Department. The use of Arnold's Telegraph Code No. 16, a copy of which is placed in the hands of every advertiser, will greatly facilitate this interchange of business.

Eyles ALBANY, N. Y. 11 North Pearl Street

Cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Hatcher Leading Florist AMSTERDAM, N. Y. SCHENECTADY, N. Y. Estab. 1877

Atlanta Floral Co. ATLANTA, GEORGIA 41 Peachtree Street

We cover all of Georgia and are within easy reach of New Orleans, Jacksonville, Birmingham, Chattanooga and Charleston. Retail orders placed with us will receive careful attention.

Thos. F. Galvin BOSTON, MASS. 124 Tremont Street

We cover all New England points. Retail orders placed with us receive careful attention. The delivery of flowers and plants to Boston sailing steamers a specialty.

J. Newman & Sons Corporation BOSTON, MASS. 24 Tremont Street

Orders by wire receive prompt and careful execution. We can refer to leading florists in all principal cities. Established 1870.

Zinn the Florist BOSTON, MASS. No. 1, Park St. No. 2 Beacon St. Equipped with best facilities for quick delivery to any part of New England. Also special delivery to any outgoing steamship without extra charge.

Robt. S. Wilson BROOKLYN, N. Y. Fulton St. and Greene Ave Deliveries anywhere in Brooklyn, New York, New Jersey and Long Island. Trade orders cared for from all parts of the country and delivered at Theatre, Hotel, Steamer or Residence. Tel.: Prospect 2840 and 4065.

Palmer's Flowers of Quality BUFFALO, N. Y. W. J. PALMER & SON. 304 Main St.

Hauswirth CHICAGO, ILL. The Auditorium Florist, 232 Michigan Ave. The quality of our work is of National repute, and are prepared to execute commissions in first-class style in Chicago and its environs.

Wreath of Killarney Roses, Lily of the Valley, Lilac and Maidenhair Fern

Retail Notes

LONG BRANCH, N. J.—W. W. Kennedy & Sons have opened a florist store at 232 Broadway.

SUMNER, WASH.—The Sumner Floral Co. has been incorporated with a capital of \$8,000. The incorporators are J. W. Thompson, Elizabeth Brentlinger and Andrew Hiker.

WORURN, MASS.—Stillman S. Hovey has sold his florist business to M. J. Aylward & Sons, florists, of this city, who will continue the business under the style of Aylward the Florist.

LEAVENWORTH, KANS.—Miss Kate Dicks, a florist of 429 Shawnee st., has purchased the Custom Flower Store at 404 Shawnee st. from J. F. Meinhardt, and has moved to the new location.

INDIANAPOLIS, IND.—Anthony Wiegand celebrated his fifty-first anniversary in the florist business on the evening of April 13, with a theater party at the Grand Opera House for his twenty employees, ending with a lunch and smoker at the Elks' Club.

CLEVELAND, O.—The flower store of the Smith & Fetters Co., in Euclid ave., was

transformed into a reception room on the afternoon of April 14, in honor of the formation of the new organization, which makes former employees members of the company. The shop was a bower of roses and spring flowers. Many beautiful bouquets and pieces were sent in by friends of the concern. Favours of bunches of violets were given to those who called at the store during the receiving hours, 3 to 5. The new company consists of Frank Monroe Smith, president and treasurer, who will have personal supervision of all contract work, as formerly; William S. Krusen, vice-president; Louis A. Koons, Jr., secretary; Clarence A. Myers, decorator; and Timothy Smith, manager.

Received

ERNST BENARY, Erfurt, Germany.—A large lithographed sheet showing that firm's hybrid Gloxinias. The range of colors shown in these hybrids is remarkable.

LEONARD COUSINS, JR., Concord June, Mass.—A box of his superior strain of Pansies grown from seed saved by himself from selected plants. The size and range of color shown by these plants was certainly noteworthy.

Lilacs are a glut; one farmer hauled in 1000 dozen to the city which were bought up quickly, while others brought in barrels, boxes and wagon loads of them and the stores and streets had an over supply, selling them as cheaply as 2½c. per bunch—good-sized bunches. One of our growers said the glut was a drawback to the business and would be so until the season was over.

While M. G. Kalb, Catsville, Md., was at the store of James Glass last Wednesday week, with a load of flower pots, his horses became frightened and ran away, turning out to Brehm's Lane and from there to Belair rd., where they ran into a building. They then ran down the road at a great rate of speed, and finally dashed into an iron railing, one of the horses being killed. The wagon was a wreck. Mr. Kalb is well known to the trade and much sympathy is expressed by those who heard of his misfortune.

G. Cook has a horse that is thirty years old and is nearly played out. He has had him all his life and is wondering what will be done with him. At his death he will make a five foot horse-shoe for him.

Hartford, Conn.

Business the past week has been very satisfactory on account of the large amount of funeral work that has been done; this part of the business has kept the dealers bustling.

Bulbous stock, such as Tulips and Daffodils, are still to be had, but the supply is about exhausted. The demand

the past year had been much better, so that her death came as a great shock. Mr. Spear has the sympathy of a host of friends.

J. F. COOMBS.

Schaaf's Seedling Carnation

M. J. Schaaf of Dansville, N. Y. has sent us a photograph of his Carnation seedling No. 12, which, he says, is a cross between Enchantress and Mrs. Thos. W. Lawson. Mr. Schaaf says: "In habit of growth this Carnation is identical with that of Enchantress except the calyx, which absolutely does not split; the color is red; a three year trial has been given it. Photograph shows natural size of flowers." [The flower in our reproduction shown taken "head-on," was 3¼ in. wide. The calyx seems strongly built and well able to bear a bloom of large size.]

Seedling Carnation originated by M. J. Schaaf, Dansville, N. Y.

Baltimore

The weather conditions have hampered business somewhat. The six weeks' drought came to an end last Sunday, with extremely heavy rains, and up to Tuesday night the weather was quite wintry. The country is in its full dress of green and many plants and trees are in full blossom. Present indications point to a full supply of horticultural and floricultural products, if Jack Frost does not make his appearance.

Trade has fallen off this week; the pot plant line has almost come to a standstill and funeral work seems to be the only kind of business done. The retail stores are doing little business and some of their clerks are standing idle. However, funeral work is disposed of quickly.

Cut flowers are still in heavy supply.

for these flowers has fallen off considerably the past week. Violets are still in the market but are poor in quality. There is a good supply of Roses, Carnations and Sweet Peas, and the quality remains good. The local seed trade has opened up fairly well but it is a little early to expect very much doing in this line yet.

Page E. Potter has opened a store on Main st. corner of Gold; he has part of the store of the Linus T. Penn Co., a large house-furnishing store. Mr. Potter is a young man and has the appearance of a hustler, and there is no reason why he should not succeed; he has one of the best locations in town.

Mrs. Spear, wife of David A. Spear of the firm of Spear & McManus, died very suddenly at her home last week of heart trouble. Mrs. Spear had been in poor health for a number of years but

Greenhouse man, experienced in the propagation of Shrubs and Perennials. Good position, steady work, for the right man. Give age, references, and salary expected.

CHASE BROTHERS CO., Rochester, N. Y.

Question Box

(106) Sweet Peas.—Sweet Pea specialists advise using cow manure as a fertilizer for Sweet Peas. Where this is not obtainable, can horse manure be substituted with good results? How should this be prepared to make it a safe fertilizer, or is there something better? When Sweet Peas grow short-stemmed, is it best to cut down on the vine to get longer stems—cutting small buds? Does this decrease the crop to too great an extent?—M. W. S., Pa.

If M. W. S. cannot obtain cow manure, well rotted old horse manure can be used with some advantage, also pulverized sheep manure, about 15 lbs. to the 100 ft. of row, worked in the soil; Bone Meal also is to be recommended in the proportion of 10 lbs. to the 100 ft. of row. When Sweet Peas begin to shorten their stems, liquid fertilizer must be used once a week, either of cow or sheep manure, the latter not so strong. The loss of the buds will be not of much account.

A. C. Z.
(107) Sow Bugs.—To get rid of the wood lice or sow bugs, C. D. N. Y.

Mix one part Paris Green and eight parts of granulated or brown sugar. Strew this mixture at night along the edges of greenhouse benches or among the plants. The next morning great numbers of dead wood lice, sometimes called sow bugs, will be found. Repeat as often as necessary.

(108) Carnation Plants in Poor Condition.—J. B. N. Y.

On one partly grown bud on the portion of Carnation plant sent were twelve live aphids. Insects, rather than disease, are ruining your plants. Fumigate with tobacco dust or stems, or use some of the insecticides advertised in our columns often enough to keep down the aphids.

(109) Geranium Leaves Spotted.—Penna.

Give your Geraniums more space, and more air. Keep them on the dry side, if recently spotted, but if the pots are full of roots, water freely.

Notes

NEW CANAAN, CONN.—Mrs. Chas. Crawford is to establish a greenhouse at Darien soon.

MORGAN PARK, ILL.—Robert Bebb of North Ridge has bought a large greenhouse property at Muskogee, Okla.

PINE BLUFF, ARK.—The greenhouses of A. A. Harper were blown down in a cyclone which visited the town on April 11. The loss is reported as being \$2000.

MIDDLETOWN, CONN.—Charles Kieft, the florist, has purchased the old Morgan greenhouse plant. Mr. Kieft will make use of his plant at his place at Pike place.

SEDALIA, Mo.—The Archias Floral Co. has purchased of John Gelven & Son their entire establishment, consisting of thirteen greenhouses, office and store rooms on Park ave., at a cost of \$20,000. The establishment will continue to be under the able management of Charles Gelven.

SEATTLE, WASH.—Wm. Stuppe, formerly at Woodlawn, New York City, has removed to this city and started into business as a landscape architect.

Dreer's Select Potted Roses

FOR OUTDOOR PLANTING

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

Lime Sulphur Washes and San Jose Scale

This pest can be controlled best by thorough applications of a lime-sulphur wash prior to the buds opening, or at least before the young apple leaves are half an inch long.

HOME BOILED WASH.—This has been well tested and may be made by putting a few pails of water in a large, iron kettle, over a fire; bring it nearly to a boil, then add thereto 20 lbs. of lime, followed at once by 15 lbs. of sulphur; stir thoroughly and repeat occasionally to prevent the material from caking on the bottom. Some prefer to moisten the sulphur before adding it to the lime. After

30 to 60 minutes of active boiling, a deep brick red color should be obtained in the clear solution. Stir thoroughly and strain the wash through coarse burlap or a fine wire netting. This wash can be boiled equally well with steam, provided the latter is piped down close to the bottom, so as to keep the sediment well stirred. The washes boiled with caustic potash (lye) or sal soda, instead of fire or steam, are good if they are carefully prepared.

HOME MADE CONCENTRATED WASH.—A very satisfactory wash may be made by slaking 60 lbs. of lime in a large cooking vessel and stirring therein 125 lbs. of sulphur, previously made into a paste; add enough water to make 45 gals., and boil rapidly one or two hours.

After standing, draw off the clear liquid and dilute to 50 gals. This wash may be kept indefinitely if protected from the air. It should test at least 25° on the Beaume scale, and previous to application may be diluted to 4.5°. This wash has been used the past few years with excellent results in the main, and is a great improvement over the older wash, since there is no danger of the lime sulphides crystallizing.

COMMERCIAL CONCENTRATED WASHES.—These are now on the market under various trade names. The standard washes should test from 32° to 34° Beaume and prior to application may be diluted to 4.5° or approximately 1 to 8. Purchase only the clear liquid, since the sediment has little value as an in-

secticide. Test carefully, because a variation of even 1° materially affects the value of the wash. Accurate Beaume hydrometers may be purchased from Bausch & Lomb, Rochester, N. Y. and Eimer & Amend, New York City.

MATERIALS.—The powdered commercial sulphur or a sulphur flour is as effective as the more costly and finer flowers of sulphur. Use only good stone lime which will slake readily and leave very little or no sediment. Magnesium lime should be avoided. Generally speaking, the efficacy of the wash is proportional to the lime and sulphur brought into solution, or inversely so to the sediment remaining. E. P. FELT, Albany, N. Y. State Entomologist.

Hardy Climbers, Etc.

Mr. Florist, we suggest these to you to make sales. Do the same to your customers—it will pay us both.

AMPELOPSIS Strong Dutch-Grown

Ampelopsis Veitchii (Boston Ivy). Extra-strong imported vines, 3-year-old, \$1.25 for 10, \$12 per 100. Ampelopsis Veitchii robusta. A very compact-growing variety of the well-known Boston Ivy, and very highly recommended to us; will undoubtedly take the place of the ordinary Veitchii in the near future. \$1.75 for 10, \$15.00 per 100. Quinquifolia (American Ivy, or Virginia Creeper). Good for covering walls, verandas, or trunks of trees; affords shade quickly. 25 cts. each, \$1.75 for 10, \$15.00 per 100.

CLEMATIS

Henry. Pure white; extra large. Alba. White. Jackmanni. Purple. Sieboldi. Lavender. Ville de Lyon. Brilliant carmine-red; as good as Mme. Edouard Andre, but contrary to this one, is very free-growing. Extra-strong plants, 30c. each, \$2.75 for 10, \$25.00 per 100. Clematis paniculata. Strong, 2-year-old plants, \$2.00 per doz., \$15.00 per 100.

ACTINIDIA ARGUTA

A desirable Japanese climber of strong, vigorous growth, with dark green, shining foliage and white flowers with purple centers, which

are followed by clusters of edible fruit. An excellent plant for covering arbors, trellises, etc., where a rapid and dense growth is desired. Strong plants, 25c. each, \$2.50 per doz.

BIGNONIA (Trumpet Creeper)

Radicans. Dark red, orange throat; free-blooming and very hardy. 20c. each, \$2.00 per doz.

ARISTOLOCHIA SIPHO

Dutchman's Pipe. Strong, field-grown, 3 to 4 feet. 35c. each, \$3.25 for 10, \$30.00 per 100.

WISTARIA SINENSIS

Extra Strong, Field-Grown

Blue, 6 to 7 feet, 40c. each, \$3.75 for 10, \$35.00 per 100. White, 6 to 7 feet, 40c. each, \$3.75 for 10, \$35.00 per 100.

HONEYSUCKLE

Very extra-strong, Holland field-grown plants, 6 to 8 feet long, many branches. Halliana. Yellow, \$3.25 for 10, \$30 per 100.

HYDRANGEA PANICULATA GRANDIFLORA

Two-year-old, 3 to 4 branches. Bushy, \$1.50 per doz., \$10 per 100.

Nassau County (N. Y.) Hort. Soc.

A lively meeting of this Society was held on Wednesday, April 13, President Duthie in the chair. Mrs. D. G. Geddes was elected an honorary member. The winners of the monthly competition were G. Wilson for the best Cineraria and V. Cleres for the best vase of Antirrhinums. Cultural certificates were awarded to E. Fardel for a vase of Ranunculus, also three fine plants of Boddington's Matchless Calceolaria Hybrid. Paul Reid for a Geranium, also a seedling Geranium and climbing Rose Hawatha. Honorable mention to L. Barton for Spinach, to H. Gaut for Petunias, Stocks and Peas, to V. Cleres for Carnations, and to F. Petrocchia for Mushrooms. A very interesting test of Aphine was made during the afternoon. White fly, green fly, aphids, mealy bug, lice and scale all succumbed to a dose of the solution without any injury to the foliage or flower treated. A Pelargonium bloom dipped into the undiluted solution was not injured in the least. It was a very successful test. Henry F. Matz of Glen Cove has secured the agency for this vicinity and will no doubt receive many orders. J. F. Johnston read a very interesting essay on "Evergreens," and was well applauded. OSCAR E. ADDOR.

Yonkers (N. Y.) Hort. Society

A very interesting meeting of this Society was held in Higgins Hall on Friday evening, April 15, with Pres. Bennett in the chair, and about forty members present. Six new members were admitted and a number of applications for membership received. The executive committee in reporting on the June show stated that prizes had been donated for all the classes, also three specials, one of them being \$25 by the Yonkers Nursery Co., to be used as the Society thought best. The schedule of the Fall Show was submitted and read, and after some discussion adopted. There are 65 classes in all. The prizes offered by Vice-president Cochrane and Louis Melliot were very keenly contested for, and the judges decided in the following manner: First, H. Nichols, for a vase of Antirrhinums; second, J. Goff, for Pandanus Veitchii; third, H. Scott, for a vase of Hydrangea Otakusa. The judges were W. H. Waite, E. Berger and W. Shepard. During the discussion of exhibits Mr. Nichols explained how he grew such fine Antirrhinums, and Mr. Goff told of his production of the Pandanus. Prizes for the next meeting were offered by J. Houghton and Mr. Knapper. Mr. Nichols read a very interesting and instructive paper on "The Vegetable Garden," giving his ideas on preparing the soil, time of planting the different seeds, and the best varieties for this locality. After the reading a discussion was indulged in by the members. Mr. Frankel, of the Standard Nitrogen Co., was present, and explained the use of the company's different fertilizers, and spoke of the benefit to be derived by using its concentrated nitrogen and inoculated humus. The next meeting will be held on Friday, May 6.

LEE WHITMAN, Cor. Sec.

New Haven Horticultural Society

The regular monthly meeting of this Association was held at its rooms, 400 There was a large attendance of the members and a very interesting meeting was the result.

The Society has grown very rapidly the past two years and a great deal of credit for this belongs to our past president, John H. Murray, through his hard and energetic work, especially in connection with our last Fall show, which was unanimously proclaimed by our members the best we have ever had.

This year we have elected as our president John N. Champion, one of the largest florists in New Haven, to carry on the good work. Mr. Champion is a hustler and already the board of managers has finished its preliminary work for our next show in November. The president has also arranged to have a paper read at every meeting this year by prominent men; the subjects will be announced later.

Great interest is being taken in the amateur garden and window box competition; last year this feature was a great success and, judging by the number of entries received to date, it promises to be quite interesting. The judges have been appointed and will begin their work in May.

Our genial secretary, Fred. Wurtz, has earned the goodwill of the members through his energetic work in that position.

Mr. Slocum, one of our most successful growers, has returned from Europe, and we expect a very interesting talk from him at our next meeting.

J. C. MORTON.

Buffalo Florists' Club

A special meeting of the Buffalo Florists' Club was held at Kasting's Hall, April 12, at which it was decided to hold a flower show in the Fall. It is proposed to make this one of the greatest and most up-to-date shows Buffalo has ever had. A most able committee has been appointed to arrange all the details, and a report is expected from them at the next regular meeting, May 3. At this meeting, Charles C. Guenther will read a paper on "Summer Roses," and it is expected that George McClure, Jr., will be prepared with criticism on the paper recently read by R. A. Slattery on "Color Harmony."

WM. LEGG, Secretary.

Morris Co. (N. J.) G. and F. Society

"Rose Night," April 13, brought out a large attendance of the members of this Society. There were no novelties in Roses shown; the standard of the commercial Rose around Madison is usually such that unless a novelty is at its very best there would be no use in exhibiting it. Joseph F. Ruzicka of the L. A. Noe establishment brought down some grand vases of American Beauty, Bride, Bridesmaid and Killarney Roses, which were worthily given cultural certificates. Wm. Mühlmichel, grower for Chas. A. Work, showed Richmond and My Maryland about as fine as was ever seen here. A cultural certificate was awarded him. H. B. Vyse exhibited some magnificent specimens of single stemmed Hydrangea Hortensia. Mr. Vyse is a very successful grower of the Hydrangea in this form and brings lots of them in for Easter.

The next meeting will be on May 11, and the Rose growers are to take charge of it and arrange the Rose section for the final schedule. We want to get as many Rose growers as possible to assist in the making up of the lists, for no one knows what they want as well as themselves. Very satisfactory progress is being made by the committee in charge of the coming flower show. It has offers of support in the way of exhibits from most of the societies from Philadelphia to Boston, and if they all respond as they promise Morrisstown will have a show going on a long way to see. The Whippany Club is amply spacious to take care of every exhibit that comes. No more suitable place could have been chosen in all New Jersey.

E. R.

St. Louis Florists' Club

Held its regular monthly meeting Thursday, April 14, in Odd Fellows' Building. The meeting, as was expected, was not well attended owing to the busy season among the greenhouse men. Secretary Beneke stated that all the April meetings previous to this one were also shy on attendance. There were quite a few out-of-town members present.

President Windler stated there was much important business to transact which required a better attendance, so, after the preliminary opening business, it was voted to lay these matters over until the May meeting. Several committees failed to report and they, too, were given until the May meeting.

On vote the secretary was instructed to send a letter of sympathy to Mr. W. J. Vesey, Port Wayne, Ind., on the death of his wife, who was well known to all the members of the Club.

Trustees will, at the next meeting, talk "picnic." This yearly outing will, as usual, take place in July, and will likely be held on the East side, near Belleville.

The chair called for a review of the Easter business and questions. This is always a pleasing feature of these April meetings and interesting points are always brought out.

The meeting then adjourned until May 12.

REVIEW OF THE MARKET

Violets
Chrysanthemums
Richards
Lilies

NEW YORK, April 20.—Saturday night found the market with considerable stock unsold, and Sunday morning did not very materially help the situation. On Monday, Tuesday and Wednesday there were about the usual arrivals of flowers, but sales on these days were increasingly slow, and prices consequently took a drop. The street men are having their chance again, and even the aristocratic Gardenia has fallen into their hands. Violets are now out of the market and Sweet Peas are still somewhat scarce. Of everything else there is more than enough to go around.

Roses especially have taken a tumble. Special American Beauty with difficulty realizes 25c. each for the very best, and the lower grades are way down. A few exceptionally good Killarney sell at 8c. in small transactions, but few sales are made at a price above 6c. for the best grades. My Maryland seems to be growing in favor, and notwithstanding the slump realizes, on small sales, 10c. for top grades, and Richmond at the same price. Special Bride and Bridesmaid reach only the 5c. mark.

Gardenias find few buyers. About \$1.50 per dozen is the best price for the best grade on the market. Lilies are no longer abundant, but the demand is small and for best grades 5c. is the price. Top grade Callas realize 8c., but most sales are around the 4c. mark. The supply of Cattleyas is sufficient and prices remain about the same as last week.

The supply of Carnations is more than the market demands, and the quality is not over good. Very few, if any, sales are made at over \$2 per 100. The best grade Sweet Peas realize \$1 per dozen bunches. Miscellaneous and and bulbous stock is moving very slowly. A still further downward movement in prices before the end of the week seems inevitable.

PHILADELPHIA, April 18.—The sales of last Friday and Saturday were sufficiently brisk so that Saturday night found the market, generally, pretty well cleaned up. The rain of Monday forenoon curtailed sales somewhat during the early part of the day, but with clearing weather in the afternoon conditions improved somewhat, though in the general round up at night sales were found hardly up to those for a normal Monday. The supply of flowers is coming in sufficient quantities to easily meet all demands, excepting a slight shortage in Sweet Peas, good Smilax and Dagger Ferns. Lilies and Callas are no longer so much in evidence, and bulbous stock is receiving small attention.

The supply of American Beauty Roses is sufficient, and \$3 per dozen is the best price realized on specials. The best grade flowers of Killarney are selling for 8c. each, and special Bride and Bridesmaid at the same price. Richmond is no longer so much in demand and little is moved above the 8c. mark. Some top grade My Maryland realizes 10c. and Mrs. Jardine 15c. each. The fancy grades of Carnations realize 3c. each, but most transactions are around the 2c. mark.

Best grades of Gardenias sell in small quantities at \$3 per dozen, but most sales are at a much lower mark. Lilies, which are no longer in over supply, realize 6c. each for top grade, with Callas a trifle in advance of that figure. Lily of the Valley is moving easily at 3c. for best grade.

Sweet Peas are off crop, and 75c. per 100 is readily obtained for the best. Snapdragons still sell well at \$1 to \$2 per dozen. Miscellaneous stock finds buyers only at moderate prices.

It is the general consensus of opinion among the wholesale and commission men that sales at present are certainly

not above the normal point for this season of the year.

BOSTON, April 19.—Business is much better this week. There is a slight shortage of crops, cooler weather and a little better demand, conditions which have helped to make business better. There is very little surplus of any kind. Roses are not quite as plentiful as they have been and this has helped to keep the prices from sagging any more. Good quality flowers with long stems bring fairly good prices. Carnations are plentiful, Maryland is abundant, and Mrs. Aaron Ward is in great evidence in the best retail stores.

Carnations are not as plentiful as they have been for the past two weeks but there is an abundance to supply the demand. The quality of the flowers still continues good and prices run from \$1 to \$3 per 100.

Sweet Peas are not quite as plentiful, and long-stemmed flowers bring fairly good prices. Lilies, longiflorum types, are not much sought. Lillium candidum is in good demand and brings 4c. per flower. Anthriscums are still plentiful but the quality is not as good as we have seen it a few weeks ago. Callas are plentiful. Spanish Irises are just coming into the market and are of fine quality; they sell for \$6 per 100. Bulbous stock, such as Daffodils and Tulips, is in abundance and bring from \$1 to \$1.50 per 100. Lily of the Valley of good quality goes at \$2 to \$3 per 100. Narcissus poeticus is selling for 50c. to \$1 per 100. Marguerites are in good supply; yellow is the favorite color and sells better than the white. Asparagus Sprengeri and plumosus are still scarce. Adiantum is also scarce and of very poor quality. Other green goods are plentiful. R. C.

CHICAGO, April 19.—While in many respects the market conditions are better than a week ago, stock shortening up decidedly, prices have not advanced in a single instance, and at this writing business is very quiet in all respects. The weather turning so extremely cold the past few days has in a way been a great factor in relieving the market of all surplus stock. The outdoor Spring flowers have been affected in many localities through the cold rains that we have experienced, and there is very little chance of a glut of this stock, such as is always felt at the time they are in season. Lilies from Chicago and suburbs are already offered for sale, being but a very few days behind the stock from the southern part of the State.

American Beauty Roses, while not in over abundance are sufficient in quantity to supply the demand. The best meet with a ready demand and the rest drag. Prices hold at \$3 per doz. for first class other grades bring prices according to quality. The same applies to all other varieties of Roses, with the exception of best grades of Killarney and Richmond, which bring from \$6 to \$8 per 100, and in a few exceptional cases \$10 for extra fine is obtained. Bride and Bridesmaid and other kinds at \$3 to \$6 is a fair range of prices.

Carnations are still plentiful enough to meet all requirements and are even disposed of at less than quoted prices to get rid of them. The fancy grades hold at \$2 and \$3 per 100 for shipping orders; fine stock can be had for \$1.50 to \$1.75. The supply of Lilies has shortened perceptibly, but there is no change in the price, \$6 to \$8 per 100 being hard to realize. Sweet Peas still continue in active demand and the quality is good; the quantity could be much greater and still meet with a ready sale. Gladioli are in evidence, several of the houses being in receipt of some exceptionally fine spikes in several varieties. While not really in quantity enough to quote, \$2 per doz. is being asked for the best. Bulbous

Phones 325-5582-5583 Madison Sq.

Please mention the Exchange when writing.

stock is confined to Tulips and Jonquils, but an overabundant supply of even these flowers is not to be found at this date. Iris and Stocks with Callas are still seen, with an accumulation of miscellaneous stock that practically stands still.

Orchids and Gardenias continue to meet with favor for wedding occasions, and Orange blossoms are looking up in some instances.

Green goods remain as usual, always in demand for certain purposes, although it appears that not so much stock of good quality is available. Ferns continue in the same bad condition having to be sorted after receiving before salable.

The condition of the market is not discouraging to the commission men, as business is usually at a standstill at this season.

INDIANAPOLIS, April 18.—A noticeable difference was caused in the supply of flowers throughout last week because of the large amount of field grown flowers obtainable. Prices had a downward tendency and stock was often disposed of at a small margin to effect a clearance. Those fortunate enough to be busied with quantities of funeral work made a profitable week of it, although this portion of the business was exceptionally light. Counter trade has been good of late, there being many calls for social occasions as well as for the hospitals and sick room.

Tomlinson Hall Market looked more like a holiday period as the florists and also the vegetable gardeners brought in profuse quantities of stock; everything, from the old fashioned Daisy to the choicest cut flowers was represented.

Carnations are once more offered instead of called for at \$2 to \$4 per 100; 75c. per doz. is the customary retail figure.

Eastern Violets arrive in an indifferent condition; but few of them are being retailed at \$1 to \$1.50 per 100. Sweet Peas are evidently more to the public's notion as they sell far better at the same price.

Harrisii Lilies and Callas, nice large vases of them, make taking window displays; \$10 to \$12.50 per 100 is asked by the growers, \$3 per doz. by the shopmen.

Orchids are not such good property in the Spring months; it takes diplomacy to replace Spring flowers with them. Some excellent Cattleyas, grown in this vicinity, sell at 35c. to 40c. each.

Offers received from surrounding Rose centers indicate a decline in price. Good Bride and Bridesmaid are wholesaled at \$5 to \$7 per 100. Select Killarney are not always to be had at \$6 to \$10. Am. Beauty sell slowly at \$5 to \$35 per 100 wholesale; \$1 to \$9 per doz. retail.

Dogwood blossoms, also Crab Apple, are in full bloom and form an artistic decoration in the downtown windows.

Potted Roses of various kinds are an addition to the plant supply. This portion of the trade has been good of late and each day the best specimens are readily disposed of.

ST. LOUIS, April 18.—The report of the flower market for this week is not very encouraging. Since my last report trade has decreased somewhat and prices at the commission houses are almost cut in half. The slow business caused a small glut in Carnations; the consignments in these were heavy and first-class stock sold at \$10 per 1000 in all colors. Funeral work, alone, helped to dispose of the bulk of the lighter shades. Roses, too, were most plentiful and sold cheaply. Fancy long American Beauty went down to \$2.50 per doz., and others according to length of stem. In the smaller Roses the prices ranged from \$2 to \$6 per 100. It is only fair to say the commission men had to lump the stock and sell cheaply to dispose of most of their consignments.

In the bulb line, Lilies sold as low as \$5 and \$6 per 100. Lily of the Valley is of extra good quality and brings only \$3 per 100. The market is not overstocked in Tulips, Dutch Hyacinths and Sweet Peas; these sell pretty well when of first grade.

The last Violets for this season were seen last week.

The above prices are for the week of the 11th.

The cold weather, with snow this Monday morning (April 15), will, no doubt, send the prices up a little for this week; that is, if the retail business picks up.

CUT FLOWERS AT WHOLESALE

New York

Among the plant dealers, wholesale and retail, trade is fully up to the usual volume for the season, and the refreshing rain of the first days of the week has put the ground in excellent condition and brought more buyers into the market.

Kessler Bros., 50 W. 28th st., are displaying some Paris Daisies in large sizes, and other reasonable plants, and are doing a brisk business.

Philip Kessler, 55 W. 26th st., who handles Callas and Lilies all the year around, furnished nearly two thousand Callas to Alexander McConnell for use at the Drexel-Gould wedding.

H. E. Froment, 57 W. 28th st., is receiving a nice cut of Roses from Coddington, Murray Hill, N. J.

Henshaw & Fenrich, who have been handling an immense number of Violets, now that the Violet season is practically over are specializing in Spanish Iris of excellent quality, in white, blue, and yellow, also Sweet Peas in standard colors.

In one of our items last week we gave the address of P. Hamilton Goodsell, nurseryman, as Room 503, Singer Building. The correct address is Room 503, No. 200 Broadway.

The Morris Nursery Co., 1 Madison ave., reports the earliest and best trade it has ever had, both in fruit and ornamental stock.

Isaac Hicks & Sons, Westbury, L. I., are planting European Lindens in front of J. Pierpont Morgan's residence; also Maples at St. Mark's Chapel and St. George's Church and in other parts of the city. They are making very large shipments South and West.

Charles Millang, who of late has suffered severely from an attack of rheumatic gout, is able to give some attention again to business.

August Buckholtz of Woodside, L. I., reports the hulk season over with him, and that he is exceedingly busy preparing for the large trade in bedding plants at Calvary Cemetery. He is growing a large number of Echeveria plants for outdoor design work.

Eugene Chauroux of Flushing, who grows Callas all the year around, is daily seen in town carrying one of his immense bundles of beautiful Callas of gigantic size.

After a sojourn of four weeks in this country, Frank Hubert, of the Hubert Bulb Co., Portsmouth, Va., sailed for home on S. S. St. Louis last Saturday. Mr. Hubert expresses himself as well pleased with the progress of his bulb industry; much of the prejudice against the American-grown article has disappeared and sales and acreage of planting are both advancing rapidly.

Hugo Mulerit, author of "The Goldfish and Its Systematic Culture," and who is probably the highest living authority on this subject, has decided to again make America his headquarters, after many years spent in Germany with biennial visits to this side. His business here in aquarium supplies he finds sufficiently important to call for this decision.

Van den Abeele, now in the employ of Charles Zeller & Sons, will soon go into business for himself at Zeiner's place, Vandever Park.

For the second time within eighteen months the store of George Saltford, wholesale florist, 43 W. 28th st., was burglarized on Sunday night, April 17. The cracksmen entered the store by forcing a window from the rear yard. They jimmied Mr. Saltford's desk open, where they found a box of cigars, and after a smoke they went to work to open the safe. They tapped a wire and attached an electric drill, and set to work drilling the door. The drill broke and they then knocked off the combination, put in nitroglycerine, and with a fuse touched it off, after covering the safe with blankets. Only a section of the safe door was blown off and they did not get inside. They obtained no money, but they ruined the safe, and also broke in pieces the outside money drawer. The debris from the explosion was blown over the office and the contents of the desk were thrown about, causing Mr. Saltford much annoyance.

Mrs. Johanna Friedlander, widow of Ludwig Friedlander, died on Monday at the home of her daughter, Mrs. Edward Abeles, 200 W. 52d st. She died on her eighty-seventh birthday. Her husband had a florist's store at Broadway and 48th st. for many years.

The sale of Bay trees by the Fruit Auction Company, last Tuesday, was an unqualified success. As was previously announced in the EXCHANGE, the assortment offered included Standards and Pyra-

muds in practically all sizes, and the prices obtained varied from \$9 to \$12.50 per pair, the latter price for a pair of splendid Standards. Palms also sold well and at good prices. In addition to the above were Roses, ornamental shrubs and bedding plants. Perhaps the reason for the extremely good prices was the particularly fine quality of everything offered, the Bay trees and Palms attracting attention from all growers present owing to their quality.

William Elliott & Sons had their usual mid-day auction sale on Tuesday and although the day was stormy the attendance was good and much stock was disposed of. Beside nursery stock a good offering of bedding plants was made. As the weather becomes more settled bedding plants will, of course, be a special feature of future sales.

The greenhouse property at 140th st., near Riverside Drive, New York City, which will be sold at auction, Tuesday, April 26th next, at 2.30 p.m., by The Fruit Auction Co., presents a sale of much importance. It is worthy of consideration by those contemplating the purchase of greenhouse material.

Mr. and Mrs. John Meese of Brooklyn announce the marriage of their daughter, Marguerite Williamson, to James Ebb Weir, Jr., on April 16. Mr. Weir is a great grandson of the original James Weir and a nephew of our well-known and respected John Weir, affectionately called "Pop."

In Flatbush

Among the growers of potted plants, now that the after Easter clean-up has been made, every one is busy putting the left over plants in shape and preparing new ones for Memorial Day. The Fanny trade now is very brisk. The bedding plants are getting a shift, more space and better attention, as the season for their use is near at hand and in some cases already begun. Vegetable plants, especially Tomato plants, which add not a little to the florist's income, are given their share of attention.

At John Scott's, East 45th st. and Rutland rd., several houses of Gardenias showing excellent culture are yielding a tremendous cut of flowers. A fresh importation of Arancaria excelsa is exceptionally good. Nephrolepis Scottii here, in its own home, is to be seen in perfection. Alternantheras and Coleus show good, clean culture and are in the pink of condition.

At Dailledouze Bros. the cut of flowers is still large and of excellent quality. A cutting of large well built blooms of the Carnation White House, which recently won a bronze medal at the Pittsburgh convention of the American Carnation Society, were especially beautiful, and a new unnamed pink seedling, several shades lighter than Lawson, gives much promise.

At Hession's, as well as at the other Carnationists, shading where the old plants are has already begun, but the young plants are given the full light. Here also the old plants as well as the young show excellent care, and the former are giving a good cut of flowers.

Many Carnationists will give Mrs. Ward and Dorothy Gordon a trial this season. The old custom of potting young plants seems to be giving way to the better way of planting them out on the benches till the time comes for setting in the field, thus avoiding pot binding and great damage to the young plants.

Many growers with old ranges of glass are gradually pulling down their benches and using solid beds, with concrete sides and ends, partly because of the high price of lumber, and partly because of a belief in their use.

Philadelphia

The S. S. Pennock-Meehan Co. is handling some especially fine American Beauty Roses and Cattleyas.

At the Leo Niessen Co.'s store some especially good My Maryland Roses are noted, and some fine Snapdragon, which latter has met with a ready sale this season.

W. E. McKissick & Bros. are receiving some high-grade Mrs. Jardine Roses. They have secured a good supply of Dagger Ferns, on which the market is somewhat short.

Twenty-three years' hard work in the florist business and only half a day's sickness during all that time is the record of one of our well-known commission men.

Among the recent visitors in town were H. Warendorff, New York City; George Brinton, Wilmington, Del.; George H. Seidel, Hazleton, Pa.; and Mr. Seik, manager for Charles E. Smith & Co., Baltimore, Md.

H. H. Battles is showing some perfect specimens of Colorado Blue Spruce, the queen of Evergreen trees, and several varieties of Japanese Maples, from his nursery at Newtown Square. He reports a very good business in this line as well as in cut flowers.

The Robert Craig Co. is making large shipments now of potted Roses, Ferns, and some wonderfully fine Picea canadensis, some of which latter are six and seven feet in height.

Edward Reid is receiving a good supply of Cattleyas. He handles quite a quantity of Orchids with his full line of Roses and other seasonable flowers.

John McIntyre is still specializing in indoor-grown Lilac, though the blooms of the outdoor stock are in evidence everywhere.

Boston

Things have changed materially since last week and all for the better. The flower market is like the stock market; it has its good and bad times, recovers just as quickly as the latter does, and it is often hard to find out just why a rise in prices and recovery comes so quickly. As far as we can ascertain the reason of the quick recovery this week is that during the hot weather we had right through March a full crop of flowers was cut whilst now there is a slight shortage. Also, the weather has cooled off considerably and it so being more seasonable has caused an increased demand.

Rain was much needed here and Monday night, April 18, we had fully half an inch. There is much fear of the fruit crops, with Peaches, Plums and Pears in bloom, and the thermometer down to 32° and 22° in some sections in this vicinity.

Nurserymen are pushing orders as fast as possible and working long hours as many shrubs are in full leaf now.

On a recent visit to Hugo L. Cameron of North Cambridge, Mass., we found his place brimful of good things in the way of bedding plants. He has about 25,000 sq. ft. of glass and one modern house was built last year. His specialties are Chrysanthemums and Geraniums; of the latter he grows 60,000 plants. He finds a ready sale for them and every year is sold out before Decoration Day. His principal stock consists of the following varieties: Alphonse Ricard, S. A. Nutt, Beauté Poitevine and Mrs. Lawrence. The last variety named is certainly a good thing and has a fine compact dwarf habit, carrying many flower trusses which are of a bright satiny pink slightly tinged with white. Mr. Cameron speaks very favorably of Jean Oberle and says he considers it one of the best for bedding, its color is so satisfying; it is of a pleasing Peach pink. He has also a good word for Jean Viand. For white varieties he thinks Fleuve Blanc and Mme. Buchner are by far the best. Other bedding plants which he grows in quantity are Petunias, Coleus, Heliotrope, Vinca and Fuchsias.

Mann Bros. are handling at the present time some very fine Lilium candidum, which sells readily, while the long-flowered forms hardly can be disposed of. They have great success with their candidums, not one of their bulbs missing flowering, although they grow many thousands. Mr. Mann attributes their success to the treatment they receive more than to anything else. He says they leave them outside in the Fall until they make all of their first set of leaves, and would never think of taking them into the houses until they were thoroughly frozen, afterward growing them quite cool at first. Their L. candidum

dum flowers have extra broad petals with much substance, but he says that they have no special variety; it is the treatment which makes them develop broader petals. They use French hulls altogether.

Norris Comley of Lexington has just returned from a trip to Chicago where he purchased several new varieties of Carnations which are to be grown at his establishment at Lexington. He speaks very interestingly of the great establishments in the West and the large things they are doing out there. He has three houses of Sweet Peas in full crop and of excellent quality.

William J. Walke of Salem has a very fine form of Snapdragon which is of a pleasing pink color; he is cutting this stock in quantity and disposes of it at 2 Park St. market.

D. Morrigan of East Foxboro, the Marguerite specialist, is shipping extra quality Spanish Irises to 2 Park St. market, which are handled by J. M. Cohen.

A. J. Hill, formerly of Veitch's of London, is now with the W. W. Rawson Co.

Willow Hill Greenhouses, West Roxbury, are shipping this week Spanish Irises. They grow this product in quantity and find ready sale for the goods.

Sam'l J. Goddard of South Framingham is shipping some very good Carnations to 1 Park St. market. We inspected some fine bunches, this week, of

the following varieties, which were all well grown: Beacou, Enchantress, Winsor, Pick Delight, Helen Goddard and White Perfection.

This week we saw at 1 Park St. market some extra well-grown Bride and Killarney Roses from W. J. Aylward of Woburn.

The boys in the markets were pleased to see Augustus Zingiehl from Oyster Bay who visited them this week. In past days his face used to be familiar and they all welcomed him.

William Cahill, representative of Stump & Walter Co. of New York, was in town this week. His health has been poor this Winter and he has just come from the hospital at Waterbury, Conn., where he has been for five weeks. He is a Boston boy and we all wish him the best of health and prosperity.

David Duncan of Arlington has a neat thriving establishment, handily located to Arlington Centre, and has an excellent home trade and also a stall at 2 Park st. to dispose of any surplus. He has been growing bulbous material this Winter with which he has had much success. He has a house devoted to Callas which are bearing heavily now and have been for many weeks. He has a quantity of bedding plants which are now occupying the space the bulbs took up in the Winter time.

Thomas Stock of Dorchester is a large grower of Spanish Irises and has a large cut at the present time; most of them are used in the Galvin stores on Tremont st. and Boylston st.

A new flower appearing on the market this week is Dahlia Jack Rose, which was from W. C. Ward of Quincy, and which was bought up quickly. It is handled by Thomas Peglar at 1 Park St. market.

Rawson's "Success in Market Gardening," a revised edition, has just been issued; it is a practical book which should prove most useful to those interested in market gardening.

Another large new building has been opened this week, which will be excellent for large exhibition purposes; it is located one block from Horticultural

Hall on Botolph st. It is called the Boston Arena and has a floor space of 53,000 sq. ft. and will seat 12,000 people. It would be well for the committee of the S. A. F. National Flower Show to have a look at this building before they decide on a hall.

The floor in the large main building at Horticultural Hall has been torn out and arrangements are being made to get it in readiness for the Orchid exhibition, May 26. There are already quite a large number of entries and there is every indication of a good exhibition. It must not be forgotten that the date for entries close on April 30. R. C.

Chicago

The change in the weather is the main feature regarding conditions of the market, as the prolonged spell of cold rains has hurt the outdoor stock, thus creating a greater demand for greenhouse products. Never has such a season in the flower business been encountered, and one hardly knows what to expect next. It is positive that there will not be a vestige of outdoor flowers for Memorial Day, with the exception of Peonies. The prediction is that Peonies will, unless destroyed by frost, be right on time for that occasion. Notwithstanding the cold wave that has prevailed the past week, the Lilacs all about Chicago are in full bloom. Southern Lilac is coming in less quantities, and the Jonquils from the South are practically done for.

City Forester Prost had a most interesting article, in several of last Sunday's papers, on the artistic arrangements and planting of trees and shrubs, which could not fail to meet the approval of all nurserymen and florists interested in the cultivation of this line of stock.

Friday, April 22, being Arbor Day, will be observed in many parts of the city. Several of the women's clubs will celebrate the day by the planting of trees. City Forester Prost will be present at many of the gatherings and will deliver at each an address appropriate for the occasion.

On Saturday, April 23, the art and literature department of the Chicago Woman's Club will decorate Shakespeare's statue in Lincoln Park with flowers, to commemorate his birth.

President Louis Geyler of the Chicago Auto Trade Association has appointed a committee to handle the auto floral parade which is planned for Saturday, May 7. It is expected that at least 500 cars will be in line. Already more than 50 entries have been secured from dealers, who have promised to spend at least \$50 each in decorating their cars. It is the committee's chief aim to interest the private owners and thus bring about a united effort to have a distinctive "Annual Automobile Day," and it is thought this can best be done by means of a floral parade. There will be three prizes for the cars best decorated with natural flowers, three for the best floats, three for the best decorated electric runabouts, and three for cars with most unique decorations. It is an ill wind that blows no one some good; this should be encouraged by our florists.

Still later news from Ned Washburn announces that he expects to start for home in a very short time, as his physician states that he has fully recovered from his recent attack of tuberculosis and feels he will not suffer any relapse by his returning.

W. Gerhardt of Wilmette says it is surprising what an early call there is for hanging baskets this season. Already they have had about 200 planted that are meeting with a ready sale.

The A. L. Randall Co. reports the sale of the Evergreen brand of fertilizer as something phenomenal. The indoor vegetable growers have taken up the use of it with marked success.

Vaughan & Sperry are showing a fine grade of American Beauty Roses from the houses of Wm. Dittman, New Castle, Ind. This is the first cut of a new crop and is certainly in good form.

At the greenhouses of Bassett & Washburn, Hinsdale, outdoor work is progressing rapidly. They are already planting their Carnation plants outdoors, three weeks in advance of 1909.

Some fine spikes of Gladioli have been seen in the past ten days at the J. B. Deamud Co's. One can always find the new arrivals at this house.

Still the same rush continues at the Winter's Seed Store, in all lines. Small fruits meet with a lively demand and mail orders are as profuse as ever. Charles McKellar says he is thank-

ful the southern stock in the bulb line is over this season; it has been harder to handle than usual.

John Mangel has been kept exceptionally busy the past week with the floral arrangements and decorations at the Blackstone Hotel, for the many functions held since the formal opening. The main feature of the decorations throughout, has been the grouping of Hydrangeas and Daisies with Palms and Ferns.

Miss Virginia Poehlmann, the young daughter of August Poehlmann, who underwent an operation at St. Augustine's hospital ten days ago, has fully recovered and is again at home.

Ben Zallinger, who has been with Sinner Brothers for the past five years, is branching out in business for himself, soliciting orders for plants and flowers for clubs, funerals, social functions, etc.

Wm. Feniger of Toledo, O., spent several days in Chicago recently.

John Algotz, manager of the many small parks around Chicago, has been appointed as superintendent of the city nurseries on the Gage farm, and will at once begin the erection of greenhouses and a dwelling for his family. This is a new enterprise of the city and will be watched with interest.

The John C. Moninger Co. has purchased a piece of property adjoining their plant. The buildings contained on same they will use as a warehouse.

Among the visitors last week was C. A. Brazee of Wilmington, California, who is taking a business and pleasure trip to the East and will visit Pittsburgh, Boston, Philadelphia and New York.

Vaughan's greenhouse force is busy this week unloading and unpacking the large shipment of Bay trees just arrived. At the store, owing to the weather turning so cold, the counter trade has slackened up a little, thus giving a chance to catch up with the accumulation of mail orders.

James J. Manusos was absent from his store on Tuesday, owing to the illness of his wife.

Joseph Mendall has started the erection of a bungalow, 37x37 ft., at Fox Lake, which he will occupy with his family this Summer. This is adjoining the house and property formerly owned by Mr. Mendall.

Bowling

The bowling season wound up last Thursday, April 14, in a blaze of glory, the Carnations taking first place. Violas were second, Orchids, third and Roses fourth. The Deamud cup for individual championships was won by T. C. Yarnall, Victor Bergman winning highest single game and high average for three games. Next Thursday a meeting will be held at J. Kruchten's, when the affairs of the League will be settled. The Foley umbrellas and the Reinberg fobs, with the other prizes will be distributed. Arrangements will be made for a series of games to be bowled by the ten highest average men, to determine the team that will represent the Chicago Florists' Club at the meeting of the S. A. F. at Rochester.

HARRISBURG, PA.—Joseph Schmidt, the oldest florist in this part of the State, celebrated his eighty-third birthday in most informal manner on April 12, at his home, 222 Forster st., with his wife and children around him. Mr. Schmidt was born in Bavaria April 12, 1827. He came to America in 1860 and arrived in Harrisburg from Philadelphia Oct. 10, 1865, making his permanent home in this city. Many friends called during the day to extend congratulations and wish the venerable florist many more happy years.

MEDFORD, MASS.—Richard Iverson, superintendent of parks of La Crosse, Wisconsin, formerly of Medford, has received notice from City Clerk Fred Fries, of San Antonio, Texas, that he has been awarded the third prize in the contest for a landscape scheme for the new mission cemetery of that city. Prizes were \$500, \$300 and \$200, respectively. The winners of the first and second prizes had the advantage, viewing the cemetery, a difficult feature in planning which was due to the fact that it provides a section for every nationality and religious belief.

Louisville, Ky.

Though business during the past two weeks has been more or less irregular, most of the Louisville florists have had plenty to do. A general demand for Spring stock has been in order, and plants and flowers appropriate to the season have been sold in satisfactory volume. There have been an unusually large number of funerals of prominent citizens, and the floral decorations for these have been handsome. Roses, including American Beauty, Killarney and Richmond varieties, have been selling well, while the Wallflower has taken firm hold this season. Darwin Tulips have become popular with the trade, and the lavender, purple and wine-colored varieties have attracted great attention. Sweet Peas and Lily of the Valley, which were in favor during Easter, are still in demand.

Fred Schulz has been selling a good many Roses and Carnations. His store in the Weissinger-Gaulbert is enticing and draws considerable trade.

P. G. Walker has just returned from New Orleans, where he attended the gathering of the Shriners. He saw some of the Crescent City florists, who told him that trade was very good. Over-blooming Roses have been in good demand at Mr. Walker's establishment.

Nanz & Neuner have been doing a good deal of work for out-of-town people, several large orders being sent to Cumberland Gap this week. The plant trade, owing to the favorable weather, has been exceedingly heavy.

Pot Roses, Ivy, etc., have been selling well, according to Henry Fuchs, who added that much Spring planting is being done, making the demand for stock of that character extremely heavy.

Mrs. C. B. Thompson said that Stocks had been selling well, as also had Sweet Peas. Roses are plentiful and good, she said, and she has been kept busy with funeral work, many handsome designs being shipped into the interior of the State. Eminence, Campbellville and other Kentucky cities ordering heavily. Mrs. Thompson is rounding out twenty-five years in the business, and has just leased her store on Fourth ave., in what is now known as "Florists' Row," for five years longer.

William Walker recently made up a handsome design which was sent to St. Louis for the funeral of William Grayson, Sr. The design was sent by the Louisville Baseball Club, of which William Grayson, Jr. is president.

Lily of the Valley has been the best seller with F. C. Haupt. American Beauty, Killarney and Richmond Roses have also sold well. Mr. Haupt did a large part of the work for the funeral of Col. Morris B. Belknap, covering the entire grave with Lily of the Valley, which was used exclusively. The family had requested that no flowers be sent,

The Mastin Automatic White-Wash and Spraying Machine
is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods, and the Mastin White-wash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

seeds is usually good, it was reported there.

The opening of the Children's Free Hospital, which recently completed its new building, was marked by generosity on the part of the florists of the city, who sent flowers of all sorts in quantity. Apple blossoms, Buttercups, Lily of the Valley, Roses, Dogwood and Cherry blossoms and Violets converted the building into a bower. Local florists vie with each other on occasions of this sort, and give to all the hospitals as opportunity offers.

The Week's Work

BY
FRITZ BAHR

Rose Notes

Preparing Stock for Next Winter and Spring Forcing.

If you are a retail grower you couldn't possibly invest a few dollars to better advantage than to purchase a good number of dormant hybrid perpetual Roses, as well as a few Ramblers. These Roses, if cut back severely and potted up into 5" and 6" pots, plunged up to the rim outdoors, and properly cared for during the Summer months, make after all the only real good material for forcing, whether wanted for as early blooming as January or as late a date as April 16, on which Easter falls next year. Roses grown in pots during the Summer are ready for forcing during the Winter months whenever the grower is. They are not like Fall potted stock, which has to make roots first before anything can be done with it. If you have use for Roses in pots at all around Easter try to grow your supply in pots during the Summer that is, if you are sure that the stock will receive the proper attention. If there is any doubt about this in your mind, don't think of this method of growing for a minute; it would surely result in failure if the strictest attention is not paid to it—let the other fellow do the growing for you, and buy the finished plants in Fall; they are worth every cent asked for them if done well.

Carnations

Hardening Off the Young Stock.

With us, every hand is busy just now bringing the young Carnations to the cold frames. For years we have made it a practice to give them a few days in the frames before they go to the field, and find it a good plan. The unusually warm weather we have had so far this Spring makes one almost take the risk of planting the young stock right out into the field. However, this would be wrong throughout the middle West. Stock which has been indoors up to this date is too soft and tender to be planted out into the field before May 1. While a light frost might not ruin the plants altogether, it certainly doesn't benefit them any. A far better way is to give the little plants a week or so in a coldframe where if a sudden cold or wet period should set in, one can protect them with glass or wooden shutters, even cloth. It doesn't take many days outdoors to harden the stock to such an extent as to make the plants fit to withstand any ordinary bad weather which might set in during the early part of May. We go over the plants when loading the flats in which they are brought outdoors, and if any of them need pinching back this is a good time to do it, as well as remove the weeds if there are any, and what is of great importance opportunity is given for the stirring up of the soil in the pots containing the 2" and 2 1/2" stock, such as has been in the little pots quite a while; this is almost as good as a shift, don't overlook it. The stock lately shifted don't need it, but the others do. An plant in a pot where the surface of the soil is either covered with green moss or weeds of any kind suffers, and you cannot afford to let that happen to the young Carnations—even if you should intend planting them out into the field within 8 or 10 days should not be any reason for neglecting this work.

Lilies

Stock Intended for Decoration Day.

With most of us, it will be a matter of holding the plants back rather than forcing them in order to have them just right for Decoration Day. This Spring, so far, has kept us all guessing as to just what to do. Usually a hot spell of a few days is followed by a cold one, but this year up to this time it has all

been one way. I should call Lilies which are just showing buds about right for the last day of May. I would almost like to see them a little more advanced than less, for the reason that if we should get a few more dark and cold days than we ought to have in May, it might affect the Lilies. With the man who grows a house full of them it is an easy matter to control the temperature by firing, not so with the smaller grower, the one who has only a few dozen plants; he might find it difficult to do much forcing, and it would not pay him to do it just for the Lilies; with him it is far easier to keep the plants back. Let them come along now, for while there is with most of us an increased demand for the flowers on Decoration Day, well worth going to the trouble of preparing for, we need and can use the flowers right along. Plants which will be found ready to open two weeks before Decoration Day can be easily kept in good shape by placing them in a cool cellar, or deep frame where they can be kept well shaded. Keep the plants nicely staked up, it is as important now as it was for the Easter stock, and do not overlook fumigating or spraying with a nicotine solution. Green fly should not be allowed to get a foothold and that means the application of a preventive and not the remedy.

Ampelopsis Veitchii

Pot Up a Good Supply of This, and Other Hardy Climbers

Don't overlook this: There are always calls during the Summer months for Boston Ivies or other hardy vines. Dormant stock is out of the question and the pot grown has to be made use of. Ampelopsis Veitchii is the most desirable, if a vine is wanted which is to cling to a wall. Ampelopsis Engelmanni is far coarser, but yet in demand where heavier foliage is wanted. Get a good number potted up; what are not sold will come in handy for next Spring, but it is far more likely you won't have enough. If you have other dormant field grown plants of hardy climbers on hand pot up a few and let them come along in the greenhouse: Honeysuckle, Crimson Rambler and other climbing Roses are always in demand, and so are Wistaria and Clematis paniculata.

Canterbury Bells and Foxgloves

Sow Seed Now of Both of These Useful Plants

While you think of it, get a trade package of Campanula media and sow

it out. It isn't one bit too early to do so, if large plants are wanted by next Fall. There is a greater call for Canterbury Bells this Spring with us than for any other what we term "hardy" plants. The Fall potted plants which were kept in cold frames all Winter and brought to the Violet house in early March are now in full bloom, and what a sight they are! Far more of them should be grown by the average florist. You couldn't possibly get a more showy Easter plant than they make, and the same as a border plant. Sow the seed in a cold frame in drills, the seedlings won't need transplanting until we are through with the Spring rush. Get the mixed seed; all the colors are beautiful. If in want of blooming plants of Digitalis or Foxglove for next year, better sow out seed at once; a large percentage of the later in the season sown seed will not bloom, at least we find it that way. A little package of seed will produce hundreds of plants. Sow thinly, every seed will produce a plant and as with a lot of other things when we see the plants in bloom or get a call for some we say "I must grow some another season," but we soon forget about it in the rush of other work. The only way to do is to get busy ordering the seeds while thinking of it; it just takes a few minutes to sow them out.

Annuals

Every Retail Grower Has Call for Them in Spring

For the out-of-town florist it pays to have a good stock of the different annuals on hand, such varieties as a customer will use for the old-fashioned flower border. There are a great many which form suitable material to cut from, but there are really only a few which one is expected to have on hand; among them, outside of Asters, are Marigolds, Zinnias, Cosmos, Chinese Pinks, Bachelor's Buttons, Snapdragons and Scabiosa. A sowing of all of these can be made now in the hotbed. When given plenty of room, say 4" to 5", between the rows, and sown real thinly, the little plants can stay there without being transplanted, and may be taken up as your customers want them. We are selling these seedlings, when a few inches high, at 25c. per doz., and find it a paying proposition. There is an increasing demand for them every Spring. Nasturtiums are also in demand, especially that splendid dwarf sort Empress of India. We sow them broadcast in flats, about the end of April, and pot them up afterwards, about 4 to 6 plants in a 3 1/2" pot. There are always some of our customers who either have bad luck with the seed they sow out or have forgotten to sow; they will come in at the last minute, so to speak, asking for plants—sow out a few.

Tuberous Rooted Begonias

Potting the Plants Started in Flats

The plants intended for bedding out should be far enough advanced to go into 3 1/2" and 4" pots. We came across a few flats of Begonias which had been removed from the hot water returns several weeks ago, and were at the time placed on shelves near the glass. While in other years these flats remained there

Bind Your Trees With Strokum

IT stops caterpillars. Strokum is easy to apply, guaranteed not to injure trees; is not unsightly, lasts entire season.

\$3.00 buys a sample package of 15 pounds, enough to band fifteen trees three feet around. Express paid East of the Mississippi; West of the Mississippi, 50c. extra.

Order now, don't wait until the caterpillars have begun to crawl. Let us send you our illustrated booklet.

George Stratford Oakum Co.

Please mention the Exchange when writing.

April 23, 1910

for four or five weeks before the plants needed potting up, the mild weather and sunny days have produced an unusually heavy growth and nothing can be worse for a Tuberosus Rooted or any other Begonia than a crowded condition of the plants. A short, stocky growth is the proper thing for them. They are not any too hardy at that, as bedding plants. While the ideal place for the potted stock would be the hotbed, a light sunny bench will do. Don't shade the plants yet, give them all the sun there is and plenty of ventilation. Not before the middle of May is shading needed, and then only a little during the noon hours; any more will only have a tendency to produce a spindly growth. If you intend filling some 10" or 12" tubs with Begonias for porch or veranda plants, fill them now; five to seven strong plants for pairs of these sizes is sufficient, they will grow into splendid specimens by June 1. With us they are in great demand during the Summer months. We always find about one third of the tubers in the flats without a sign of growth, but as long as they are solid they're good; put them back and they will soon show life if exposed to bottom heat. This is far better than to put them, in which case, if placed on a bench without bottom heat it will take them a long time before they make a growth.

Asters

Time to Sow Out the Midseason and Late Sorts

This is just about the right time to make the sowing intended for the main crop. Few of our Summer flowers are of more value than the Asters to us, and among them the midseason and late branching sorts are the best; and white, light pink and a pale lavender are the colors most useful for the florist. Asters, like Chrysanthemums, are successfully grown in almost any soil, whether light or heavy, and yet a stiff loam is to be preferred. While we use the greenhouse and shallow flats to sow out the early varieties, which by this time have been transplanted, for the present sowing the mild hotbed is the thing. Sow thinly, in rows about three inches apart; every seed will come up, and the little plants will be ready for transplanting about the middle of May and go to the field about one month later. Don't buy the mixed seed; such as is offered in separate colors costs but a few cents more and is much to be preferred. If you have a call for the small plants, as most of us who conduct a retail place have, it is well to get a small portion of a good red, deep pink and deep lavender. For the real late ones seed can be sown for three weeks yet, for far more depends on the weather conditions during August and September as to what success one has than the time of sowing the seeds. Look out for the early ones; don't let them suffer on some shelf near the glass. A better place by far is the cold frame; either place the flats in the frame or, what is better, plant the little plants right out—they love the cool soil and suffer in a 90° house.

Albany, N. Y.

During the past week business in Albany has been very brisk in funeral flower line, but in cut flowers it has been rather quiet, probably on account of the rush at Easter time just past. A number of prominent Albanians have passed to the world beyond which necessitated using up surplus stock of all kinds.

Fred Keller, who had taken the greenhouse establishment of R. W. Zobel has gone into bankruptcy. His stock was sold at auction to the lowest bidders on Wednesday last to satisfy creditors.

The Albany Florists' Club will hold a special meeting on Thursday evening, April 21, to arrange for a Club flower show for members only. Vases of Carnations, Roses and cut flowers of different varieties grown by members will be on exhibition. The show is to be given to create interest among the members, and will be followed by a stag smoker and entertainment, and the event promises to be a great success for all interested.

John Butts, decorator and designer for W. C. King, was laid up with pneumonia for two weeks, including Easter time, and getting over that for a period of time has been again stricken with appendicitis. He was operated on and is expected to pull through all right. He has the best wishes of all in the business for a speedy recovery.

There has been in the past week a number of Hollanders coming through here, en route to their Fatherland, all reporting a great sale of Box, Bays, and shrubs of all kinds. W. C. K.

Our Now

Rochester, N. Y.

The market is just recovering from being badly overstocked; in fact, since Easter until the latter part of last week all grades of stock were a glut on the market and the buyer had pretty much his own way as to matters of price. At the time of writing, however, the prospects look much brighter and the market has stiffened up and will no doubt keep in this condition if stock does not get overplentiful again. Carnations have shortened up to a marked degree and the same may be said in regard to Roses and Sweet Peas. The latter are in good demand and no trouble is experienced in getting rid of all that come in, providing of course, the quality is good; up to the present time we have had no cause to complain on this score. Violets have shortened in supply, so also has the demand, and the quality is not all that can be desired, due to the hot weather. The season is very nearly over for these flowers.

Inquiries are coming in in regard to budding stock. Although it is much too early yet to tell what the prospects are it may be said they look promising for a brisk trade and preparations are being made by the various growers for a good demand.

C. H. Vick, sup. of the trade exhibition of the S. A. F., reports very satisfactory work in connection with the souvenir album for the convention, and he is greatly encouraged by the orders coming in daily for advertising space.

Thomas Cogger has been forced to move from his Main st. location at the corner of Main and Worth sts., owing to the tearing down of the building to make way for the extension of the Sibley, Lindsay & Curr Co., who will occupy the entire block. Mr. Cogger has secured premises further up the street and contemplates opening for business again on Saturday, April 23, or thereabouts.

Club Meeting

The regular monthly meeting of the Rochester Florists' Association was held on Monday, April 11. Owing to the inclemency of the weather the attendance was not as large as would have been desired. The members were entertained by an address by Professor Judson, of Cornell, on "The Use of Ether in Forcing the Various Kinds of Bulbs." The main topic, however, was Professor Judson's remarks in regard to the Bill now in Assembly, for the appropriation of \$50,000 for a range of glass houses and service building at Cornell University for the purpose of carrying on experimental work in floriculture. The benefits to be derived therefrom by the florists were very ably put forward by Mr. Judson, and a resolution was unanimously adopted by the Association heartily endorsing the appropriation. Members were also requested to write personally to their representatives urging them to take immediate action in trying to get the bill reported out of the committee on ways and means. H. B. S.

Washington, D.C.

The prolonged drought which has proven such a menace to agriculture broke on Saturday last and heavy rains followed. Lilacs and other hardy shrubbery flowered profusely during the week and are now passing; the blossoms were never finer or in greater profusion.

Two new organizations are being formed in Washington which, if successful, will mean an increased local demand for seeds and plants. The first is a movement to beautify all vacant lots and unsightly places with quick growing shrubbery and vines. The second organization has already inaugurated its work, having secured no less than three plots of ground in as many different sections of the suburbs, upon which the poor are invited to raise vegetables for their own use. A certain proportion of land will be allotted each applicant, and the whole placed under a competent superintendent to direct the work. This, like the foregoing is to be carried on by public subscription, with some of the Washington ladies in charge. Prof. D. G. Fairchild of the Dept. of Agriculture

is president of the latter very worthy undertaking.

It is understood from good authority that in Baltimore a company is forming for the purpose of introducing and putting on the market a new fertilizer, the discovery of a German, and which it is claimed has been tested in that city for several years with most satisfactory results. While the chemical fertilizer is used for all purposes, and put up in different forms accordingly, the chief feature of merit seems to lie in its beneficial results for all kinds of trees and shrubbery. For such use it is put up in capsules which are placed in the soil about the tree and conducted by moisture and rising sap. It is claimed to absolutely kill all scale and disease, to produce a vigorous growth, and that the chemicals continue active in the soil for four years without renewal. The local Department of Agriculture is now conducting a series of tests.

JAS. L. CARBERY.

Providence, R. I.

Waller Sword, florist, of Valley Falls was married on April 16 to Mrs. Almira

J. Bishop. After the ceremony the couple left for Boston and New York on a wedding trip.

John Macrea is cutting a very fine stock of Daffodils, Carnations and Harrisii Lilies.

J. A. Budlong & Sons Co. have an immense crop of good Roses on. At the present time they grow My Maryland, Richmond, Killarney, American Beauty, Bride and Bridesmaid. This concern is one of the largest in Rhode Island.

T. L. O'Connor, manager of the O'Connor salesrooms on Westminster st., reports the greatest Winter and Spring business ever had. This concern does most of the business of the "four hundred" here.

Olney H. Williams & Sons of Pocasset, R. I., have closed their store on Mathewson st. here. Mr. Williams bought this flower store two years ago from Thomas F. Kellar, a florist, to use as an outlet for the great quantity of cut flowers and bedding plants he grows, and as a convenience to the retailers here, as the Williams greenhouses are five miles from the center of this city. Mr. Williams was forced to abandon the store owing to his increasing business at his greenhouses. Mr. Williams was appointed, during the past week, custodian for his father's estate, the late Alfred A. Williams, under a bond of \$15,000.

Ernest Johnson, first assistant and shipping clerk at T. J. Johnston & Co.'s store, is a bright active young man and with his new checking system of delivery mistakes are unknown here. Mr. Johnson took a position here three years ago as an errand boy, and today he is an expert designer and salesman.

Alex and Walter S. Macrea are of the committee of arrangements on the Sixty-sixth anniversary of Roger Williams Lodge, I. O. O. F., to be held at a future date.

Howard Pepper, manager of the Melrose Garden Co., has leased a lot of land at the corner of Elmwood ave. and Wilson st., where he has set out 2500 Rose bushes for show and commercial purposes.

J. L. Reynolds, clerk at T. J. Johnston & Co.'s, who has been in the R. I. Hospital since Thanksgiving week with a complication of blood poisoning and pneumonia, is not convalescing as fast as his many friends had hoped. Mr. Reynolds was up and around the hospital grounds for a week or more but had to take to his bed again recently.

Mrs. Timothy O'Connor, wife of Timothy O'Connor, Sr., is confined to her bed with rheumatism, from which she has been a great sufferer for years.

John Canning, son of J. B. Canning, who is only out of school a year, has become an expert designer. He is also bookkeeper and head man in the making-up department of his father's place.

The Market

The great influx of cut flowers of all kinds coming in a week ago has greatly diminished, owing to a very good week's business and a decided drop in temperature, but there is still a great sufficiency. Funerals, weddings and social functions were very numerous during the past week and transient trade was good. On Monday the market was cleaned out of Lily of the Valley, Sweet Peas, American Beauty, Richmond and Killarney Roses and Orchids, owing to a charity ball at the Narragansett Hotel that evening. Sweet Peas have shortened up considerably and are selling for \$1 to \$1.25 per 100. The Violet season has passed but there are still plenty of flowers in the market at \$2 per 1000. Roses My Maryland, Killarney and Mrs. Taft are bringing \$5 to \$8 per 100; Richmond, \$6 to \$10; American Beauty, \$15 to \$35; Bride and Bridesmaid, \$4 to \$6. Carnations are coming in plentifully and in good condition and are selling for \$1.50 to \$2.50 per 100. Bulbous stock is very abundant and good stock of Tulips and Daffodils are bringing from \$1.50 to \$3 per 100. Harrisii Lilies bring \$8 to \$10 per 100, and Callas 75c. to \$1 per doz. Double White Stocks are to be had at 50c. per doz. Trailing Arbutus is about finished for this season, the last selling for \$5 per 100 bunches. Mignonette, Pansies, Candytuft, Forget-me-nots and Daisies are to be seen in great quantities, as well as hardy trees and shrubs. Green goods, Asparagus, Adiantum and Ferns are selling fairly well. Nurserymen report business 50 per cent. better than last year. G. A. J.

Stephen Green of H. Bayersdorfer & Co., Philadelphia, was a recent visitor and reports trade very good.

Johnston Bros., Dorrance st., have a large decoration on hand this week, using over 5000 Winsor Carnations.

Reed & Keller's representative was in town Saturday and Sunday of last week.

It is reported that the best Sweet Peas coming to Providence are grown by A. Holcher, who has the best display of Sweet Peas the writer has seen this season.

Willis S. Pino, of the leading florist supply and retail seed house of Providence, reports business far ahead of previous seasons.

No serious damage has been reported from the effects of the present cold weather. Wednesday morning the thermometer registered 30 degrees, some reports from the suburbs were as low as 22 degrees.

Noonan Bros. are bringing in some very fine Pansies. H. C. N.

Are you going to build a Sash Bar, Semi-Iron Frame or Iron Frame Greenhouse? We have interested others in our methods of construction and in our prices—why not you?

Tubular Boilers

Steam and Water

The Most Economical and Efficient Boiler for Greenhouse Heating

CENTRALIZE YOUR HEATING PLANT

The economy in heating large ranges of glass from a central plant is so great that the first cost is repaid in a few years.

Following are a few plants which we designed and installed:

THOMAS YOUNG, JR.
BOUND BROOK, N. J.

150,000 sq. ft. glass heated by steam from a central plant; the exhaust from pumps is passed through a condenser which heats 2-150 foot propagating houses with hot water.

F. R. PIERSON CO.
SCARBOROUGH-ON-HUDSON, N. Y.

150,000 sq. ft. glass heated by steam from a central plant; the steam is passed through condensers and the hot water is forced through the houses with circulators.

JOHN N. MAY
SUMMIT, N. J.

75,000 sq. ft. glass heated by steam from a central plant.

The Book of WATER GARDENING

By Peter Blasot. Price, postpaid, \$2.50

A. T. DE LA'MARE PTC. & PUB. CO. Ltd

Indianapolis

E. T. Barnes of Spencer, Ind., has in the past few years earned quite a reputation as a grower of field flowers. His Dahlias, Gladioli and Asters are well known in the surrounding States. Mr. Barnes was in the city last week arranging for the sale of a quantity of field grown bulbous stock, his latest venture. The quality is certainly fine and much lower in price, naturally, than is possible for the indoor goods.

Anthony Wiegand celebrated his fifty-first anniversary in the florist business last week with a theater party at the Grand Opera House, followed by a lunch and a smoker at the Elks' Club.

The nurserymen and landscape gardeners are enjoying a most profitable season; propitious weather and liberal orders keep them busy.

Robert Ellis of Bertermann's has had his men busy planting a large shipment of hardy shrubs and conifers at the Cumberland plant.

W. Fachmann, the wire man, has invented a popular puzzle appropriately termed "Treeing the Possum."

Henry Rieman has been busy with large funeral orders of late.

Bauer & Smith are cutting fancy Gladioli.

Roepke and Rieman offer several thousand fancy Sweet Peas daily.

Alvin Schrieber has recovered and is again with the boys.

Irwin Bertermann visited Knightstown and Richmond last Sunday. I. B.

Milwaukee

Unusual weather conditions have prevailed in this territory since the first part of March. With the exception of two or three days we had continuous sunshine daily throughout the month and the average temperature was that of April and May.

The season is advanced just about thirty days over last year. Tulips have been in bloom for over a week now. Lily of the Valley is in bud. Lilacs are well in bud and will be in full bloom in a few days. Forsythias and Weigelas, as well as Apple, Plum and Cherry trees, are in full bloom. All outdoor shrubs are thus well advanced.

The unusual early season made it difficult for the nurserymen, who were not prepared to handle the early rush; stock that was heeled in and kept shaded was sprouting rapidly. Indications are that there will be no outdoor flowers for Decoration Day, except possibly Peonies, which heretofore were shipped up from Southern States, but with continued warm weather here might come in about right.

Cut flower trade was only fair the past two weeks; nothing special was doing to stimulate the demand, and there was plenty of stock in all lines to meet the demand. White Carnations and Sweet Peas were about the only items which cleaned up daily. Callas were a glut on the market. Outdoor Tulips and Daffodils were also plentiful. The demand for bedding stock is beginning and a heavy trade in that line is looked for.

Manke Bros., Mueller and Shrader are adding two houses each for Carnations.

C. B. Whitnall, a member of the Florists' Club, was elected city treasurer on the Social Democratic ticket.

Jas. Karins of H. A. Dreer was a recent caller. C. C. P.

For Good Serviceable SECOND-HAND PIPE

SUBSCRIBERS PLEASE NOTE.—The Florists' Exchange is a trade paper, and its advts. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

Readers will confer a favor upon us of more than passing value if, when ordering stock of our advertisers, they will mention seeing the advt. in the Exchange.

The Truly Successful Method of Greenhouse Building

You send your order for certain cypress parts of your house to one firm, just because they say: "That's all they make, and ought to know how to make it."

You buy glass from another concern; fittings from still another, shopping about with half a dozen or more firms and then to cap the climax, you go to your local hardware man for the paint and putty.

At once your troubles begin—one order comes and another doesn't; others come straggling along, and you have no end of correspondence with all these different firms, each doing business in a different way. Finally, when at last everything is on the ground, ready for erection, you have a grand mixture, each lot fairly good in itself, but being made by different firms, there is no uniformity, no relation one part to another, and things won't go together the way materials do that are all turned out by one concern, with the one idea of making that one house of yours the best possible. So this matter of placing your order all with one concern is economy for you. And there is no one concern equipped to handle your job as we are.

The Sectional Iron Frame House is the safe and sure house for all widths.

League Directors' Meeting

A Board Meeting of the Wholesale Seedsmen's League will be held in New York City on Thursday, May 5, to suggest what, in the opinion of the Board, should be the wholesale values, at this present time, of certain scarce varieties of garden seeds sold for immediate shipment, also as respects trade prices for advance orders for certain biennial seeds now being daily booked for shipment next Winter.

This proposed course of naming trade values is only suggestive and will be taken by the Board consequent upon the marked advance in price of all unsold European stocks of seed of biennials, past crop 1909 and all uncontracted stocks of incoming crop 1910, the values, notably of Beet, Cabbage and Turnip, having in many cases enormously increased in France, Germany and England.

European Notes

Further news from southern France confirms previous reports of the extensive damage done by the frost on March 31, but in the main it appears to be confined to the early vegetables (primers), very little injury having been done to the growing crops of seeds. This disturbance appears to have broken up the cold drought which has in many districts given place to warm, showery and rather dull weather; all of which is just what we require. If growers were only as amenable to our overtures as their land is to the kindly offices of plow and hoe, all would be well. What the final result will be we must "wait and see."

The brisk demand for Onion seed still continues and stocks of the long keeping varieties are now very low. The demand for these special strains has been better than for some years past and shows that the gardeners are preparing to follow a

If you see a pile of empty Lily Bulb boxes stencilled "Horseshoe Brand" in a grower's back yard, it is an indication that he buys the best the market affords. You will find good quality within, and it is a safe place to buy. It gives the grower a reputation for buying the best the market affords. "Horseshoe Brand" Giganteums are produced from the choicest seed-bulbs in the world. They will produce the best average in quantity and quality of flowers of any brand known.

Readers will confer a favor upon us of more than passing value if, when ordering stock of our advertisers, they will mention seeing the advt. in the Exchange.

falling market, for the present prices offer no inducement to increase the culture. The earlier and softer varieties of Onion are practically neglected; the same is true of Leek.

Spinach is rather an interesting subject for us just now. Such a large percentage of last year's crop was destroyed by the rains, that when all orders were completed our stores were empty. And now inquiries for Summer supplies are beginning to come in. An early harvest may possibly enable us to ship seeds of Bloomsdale, Early Giant Thick-Leaved and Viroflay sufficiently early for Autumn sowing, but the experience of the past three years makes this very doubtful, except in the case of the Bloomsdale.

An extraordinary increase is shown in the demand for New Zealand Spinach, and as growers of this article are prepared to accept a very moderate price the sale of this most reliable and useful vegetable is worthy of the seedsman's attention.

In the "Novelty Number" of The Florists' Exchange (far and away the best publication of the kind that has ever appeared, and for which the seedsman of two continents have reason to be very grateful) special mention is made of the *Dimorphotheca aurantiaca* and *Gerbera hybrida*. It may be of interest to state that the sales of these two splendid novelties have beaten all records; nothing approaching them has been known for many years. As they are both well adapted for your climate the writer ventures to predict an immense demand for them in the near future. When understood, they are as easy of culture as the *Eschscholtzia* or *Shasta Daisy*.

A steadily growing demand is reported for the lovely *Nice Stocks* which have been so energetically pushed to the front by E. Benary. These are just now (April 11) in full bloom, and are a charming spectacle. All the colors needed to make an effective display are now available; the culture is simple and the graceful habit of the plant combined with the delightful fragrance of the flowers should commend them to florists and amateurs alike. Another Stock that is worthy of the attention of both seedsman and florists is the white *Wallflower-leaved East Lothian*, renamed "All the Year Round," an appellation that it well deserves. As a pot plant it is easily grown, very lasting and very beautiful; the percentage of doubles is very high and the color absolutely pure. It has been in bloom for the past two months, a time when white flowers are appreciated. The clove-like perfume is not in the least offensive even in a small room.

EUROPEAN SEEDS.

American Notes

April a Record Month

It is universally conceded by the entire seed trade that the month just closing has far eclipsed in sales any April ever experienced. It would seem to be actually impossible to designate any one special line of seed selling as being deserving of particular mention, as it has been the really wonderful expansion of sales in everything handled by the seedsman that has produced the perfectly enormous totals of business accomplished this April. During the last decade, the seedsman more than ever before has recognized the fact that his

J. BOLGIANO & SON

WHOLESALE SEED MERCHANTS AND
POULTRY FOOD MANUFACTURERS

BALTIMORE, MD.

Please mention the Exchange when writing.

customers look to him not only for seeds proper but also for their wants in bulbs, plants, nursery stock, garden tools and requisites. The natural result has been that as all these special lines have received increased attention, in just such proportion has the total volume of trade increased. Such a state of affairs will continue to intensify itself as the years go on, and it should be so; in fact, it must be obvious that the seedsman of the large cities should act, so to speak, as the representatives of the growers of nursery stock, plants, etc. There has been a most wonderful increase this season in the demand for everything handled by seedsman.

Immediate business continues very active, although it may now be said that the orders are under control and are being filled fairly promptly. Sunday work is practically over, and it will not be long now before the night work will begin to lessen; it has certainly been the most strenuous season that the seed trade, as a whole, has ever experienced.

Shirley Poppies

Among annuals, no class of plants will be found more ready sellers for retail counter trade than the Shirley Poppies. The range of color includes all shades of delicate rose, pink, carmine, and the most brilliant crimson; many of the large single-flowered varieties are edged with white. There are both double and single-flowered varieties, but the latter will be found to give customers the most satisfaction, and can be sold for five cents per packet. These Poppies will please every customer; they are sure to succeed in any fair location, and can be planted all through May and June. In fact, to enjoy them until frost, successive sowings should be made every ten days until well into July. For these reasons and the wonderful brilliancy of colors of Shirley Poppies they may be pushed strenuously in retail counter trade, with the surety that every customer will be pleased.

Retail Counter Business

May is the acknowledged banner month of retail counter business of the whole year, and there is no trade the seedsman does that requires more exacting attention. This retail business demands much time and care devoted to each customer's order but, well attended to, becomes a most lucrative part of the season's total sales. The most experienced employees and best seedsmen should look after this retail counter business, as no part of the entire season's orders requires more knowledge of things horticultural, so varied will be the questions asked by customers, regarding seeds, plants, nursery stock, and a hundred and one other matters. But be patient and give all the information desired; the result will be a goodly and very profitable month.

DAHLIAS

Charles Clayton is my best introduction; for brilliancy, form and stem, this new Cactus leads them all. Other superb Novelties are: Mrs. W. K. Jewett, Manton, Princess Yvette, Corona, Olive Tracy. These with other fine varieties were awarded a Bronze Medal at the Alaskan-Yukon Exposition, last season. Select list of Standard Dahlias; and Field-Grown Hollyhocks, both Double and Allerheny. New York Seed Trade

The storm of Monday interfered considerably with the retail trade, which is now in full swing, but the falling off was quickly made up. Bedding plants and nursery stock now occupy the center of the stage with the seedsmen, as the heavier sales of seeds have slackened somewhat. The yearly retail business with the seedsmen may be said to be now at its very best.

Harry Van Koolbergen, representing Messrs. Koolbergen & Slidrecht, Boskoop, Holland, who has been making his yearly business trip among the seed trade, sailed for Holland this week on the S. S. Kronprincessin Cecilie. Mr. Koolbergen reports a most satisfactory number of orders booked for Holland bulbs.

The interior fittings of the "Buds" Seed Store, at 76 Barclay st., are almost completed, and when finally finished will present model arrangements for

handling both flower and vegetable seeds.

A. F. Hills, who for some time has been in the flower seed and bulb department at Boddington's, has accepted a position with W. W. Rawson & Co., Boston.

C. McTaggart is this week holding a special sale of bedding plants including some particularly good Pansies and started Cannas.

S. D. Woodruff & Sons at Orange, Conn., and also at their Vesey st. store here, have been doing so far this season a business in seed Potatoes, Onion sets and their other specialties, much in excess of that of a year ago.

Burnett Bros. find the recent addition to their store helps them materially in handling the heavier seeds and nursery stock which their trade has this year demanded.

Wm. Elliott & Sons are making, in their auction department, a special offering of hardy Roses at \$7 per hundred. The assortment which they offer at this price includes a large number of the very best varieties.

Vaughan's Seed Store is very busy this week with plant sales, having encouraged this line of trade by large and attractive sidewalk displays at their Barclay st. store.

Philadelphia Seed Trade

The seedsmen are still very busy, but are no longer so pressed as they have been for several weeks. Even now, however, the consensus of opinion among the seedsmen is that the seed trade river has not yet recovered from its freshet, and withdrawn within its natural banks.

The call for vegetable and flowering plants is very large, and the supply will, it is said, be hardly adequate to meet the demand. It is noted that for two weeks past even potted Tomato plants have met with a brisk sale to amateur gardeners, who no doubt are trusting to the tender mercies of an all wise Providence to keep off the usual frosts from the gardens.

It has been decided that the Henry F. Michell Co. will make permanent the new store opened this Spring at 518 Market st. This is one of the most spacious and convenient seed stores in America. The entire five stories and cellar are devoted to the seed business, giving something like sixty-five per cent. more room than at the old store at 1018 Market st. All shipping orders received at both stores will be packed at the new store after July 1. The new store will be very convenient for those coming across the ferries from the New Jersey side. Here, and also at 1018 Market st., the call for both hand and horse lawn mowers has been early and larger than ever before, and the demand for bulbs and roots, of which there is a complete variety, is very brisk.

At Henry A. Dreer's, a full supply is noted, not only of everything seasonable but especially of hardy flowering plants, among them varieties of Columbinas, including some of the newer ones, such as Queen Helena. Rose bushes are being shipped in very large numbers; last week a carload was sent to Dubuque, Ia.

The "peeping" of chickens at the Johnson Seed Co.'s store gives the visitor a hint where he can buy good incubators, as well as good seeds.

Stokes' Seed Store is making this season very large sales of Gladioli. From its greenhouses at Moorestown, N. J., this company is a large shipper of the blooms of Lily of the Valley, which just now are bringing top prices. Here also 50,000 or more of potted Tomato plants,

which by the way are said to be in short supply with many plant growers this season, are grown, of which 25,000 are being handled through the store and the rest sold direct to the New Jersey vegetable growers.

The Moore Seed Co. is showing for sale the only potted Strawberry plants thus far seen. They are of a new variety named Big Victor. The company is sending out large quantities of field Corn. The dear old Sweet William of our grandmothers is seen on sale at several seed stores, and is again becoming one of the popular hardy plants.

SEDALIA, Mo.—L. H. Archias, President Archias' Floral Co., accompanied by Mrs. Archias and two daughters, Elise and Edith, sail from New York May 14, on S. S. Konig Albert for a three months' visit in Europe.

ATLANTA, GA.—H. G. Hastings & Co. advise us, under date of April 25, to the following effect: "We have disposed of our interest in the Alexander Seed Co., of Augusta, Ga., which for the past few years has been under the management of Mr. C. E. Brush, formerly with this firm. We understand that Mr. Brush will hold the controlling interest in the Alexander Seed Co. and, as he is a young man of ability and energy, we have no doubt but that the business will develop both rapidly and satisfactorily.

We wish our friends in the seed business to know that we have no longer any connection with this firm."

Crop Damages in the Chicago Garden District

The Leonard Seed Co. advises us as follows:

At this date (April 25) the extent of the damage to early crops in the Chicago garden district cannot be fully determined. In most cases the gardeners are optimistic and hope for the best. It is generally conceded, however, that the first planting of Radishes is lost and that Carrots and Beets that have broken through the ground will stand a poor chance of making a crop. Head Lettuce, which has been transplanted to the open ground from the hotbeds, will be greatly damaged. Early Cabbage and Cauliflower, similarly set out, will likely stand the adverse condition, but the serious check to the growth will lessen the uniformity of the crop and cut it down considerably. Onions and Onion sets will not be hurt to any extent. Peas may pull through, but any Beans that were sprouted will perish. Early Sweet Corn and other half-hardy vegetables, where sufficiently advanced to be above the ground, will not recover. Spinach, which in some places was about ready to be

500,000 PANSIES BEST MARKET STRAIN GROWN

Grown from seed of our own raising, this strain is the result of over 35 years' careful selection and for size, form and substance and wide range of color in clear, brilliant tints and novel shades and markings, they will be found unsurpassed. out for market is wilted and practically unsalable. This will entail considerable loss, as many of the gardeners have been depending upon this for early money returns.

In the localities where the soil is somewhat sandy and where early planting is the rule, the crops are much further advanced than in the cold clay soil. It is a question whether this advanced condition will be of benefit. Some of the gardeners seem to think that the further advanced the small vegetables are, the greater the damage will be. On the other hand, some of them are of the opinion that where the crops are the farthest advanced the damage will be less. Taken as a whole, the loss will be serious at best, and if re-planting is to be done there are many of the varieties of seeds that are out of the market and it will be hard for the growers to secure the proper varieties if re-planting is necessary.

The weather, which has continued cold and cloudy since the hard freeze, is doing the right thing, for a sudden return of sunshine and warmth would have been, wholly disastrous to the stricken crops.

More Government Competition

The seed trade is not the only sufferer from Government competition, although probably the worst hit. The following appeal, made by a National Joint Committee (of printers and lithographers) so closely parallels the experience of the seed trade, that it may do good to publish it here.

"Perhaps it is necessary for the Post Office Department to control the making of stamped envelopes, but it certainly is not necessary for the Department to print corner cards or addresses on stamped envelopes without charge, and it is very unjust to submit makers and printers of and dealers in envelopes to such unfair and destructive competition.

"You have not time to read a labored argument against this wrong. We feel that we only need to ask how would manufacturers and dealers in other commodities feel if the Government unnecessarily entered into competition with them, and supplied consumers with their goods at cost or less than cost? If the Government were a direct competitor of manufacturers and dealers in other lines of goods, selling at cost or less, and were using the mails, without postage, to induce their customers to leave them, and if every postmaster were an agent to give destructive force to such outrageous competition, would they not want help to secure relief? Surely they would; and all of us who handle different lines of goods would be glad to aid them all in our power.

"Manufacturers and dealers have suffered this destructive competition in still other ways for many years, but of late the Post Office Department has been so aggressive and persistent in its efforts to increase the use of printed stamped envelopes that they are forced to make vigorous protest. The Department has even repeatedly distributed broadcast through the mails without postage, and by the agency of postmen directly, immense quantities of artfully written and illustrated circulars urging people to use more Government stamped envelopes. Reports from various parts of the country indicate that this promotion campaign has been so successful that from 1 to 25 per cent. of all business envelopes used are furnished by the

Post Office Department.

"The industries directly affected by this outrageous competition are trying to secure the passage of a bill now before Congress, forbidding the Government to print corner cards or addresses on stamped envelopes. We ask you to help us for two reasons. First, because you are of course glad to assist fellow business men suffering injustice, and, second, because if this tendency toward paternalism continues, your own business or industry may be attacked at any day. We must stand together for a square deal."

The printers and lithographers have identical bills pending in both the House and the Senate, and a successful outcome of their agitation for the removal of this unnatural competition is expected. If this most desirable result is brought about it will establish a precedent and open a way for the seed trade to follow suit.

The grievance of the printers is just, so is that of the seedsmen. The loss inflicted on the seed trade is as serious as that being perpetrated on the printers, probably more serious. Both call for an early redress at the hands of just men.

Free Seed Waste by Uncle Sam

In an article by F. D. Coburn of Kansas, under the above heading, which appeared recently in the N. Y. Evening Post, several strong points are taken, among them:

Begun with the best intentions, benevolent in theory, capable of no little good if rightly supervised and kept within bounds, under the present method it has become a joke. * * * It is the old influence at work, of apparently getting something for nothing, and wherever that appears possible, there will always be a crowding up to the trough. * * *

How long would the distribution of seeds, as now practiced, continue if based entirely upon the advancement of agriculture? Not twenty-four hours. There is no serious claim that it is of advantage to the farmer, and more often it is not the farmer who receives the principal part of the seeds, nor he that wants them. * * *

Great good could be accomplished with the money now spent for seeds if it were appropriated and pro-rated equitably between the various agricultural colleges and experiment stations, for experimental work in originating, developing, and improving superior strains of wheat, corn, oats, cotton, and other crops especially adapted to or which give promise of worth to each particular State or Territory.

By diverting the appropriation as suggested impetus will be given a well-directed work already under way, and there will be none to mourn the passing of the day of "free" seeds. * * *

Secretary Wilson says there are now distributed something over forty million packets of garden and flower seeds annually, and of standard sorts, available everywhere, and this "is the largest single business this office has to handle." The secretary further says: "As there is no practical object to be gained in distributing this kind of seed, it seems very desirable that some kind of change be made, as the fact remains that this work does not accomplish the end for which the law was originally framed."

Buffalo, N. Y.

Business the past week has been fair, funeral work and a good steady counter trade contributing thereto. Carnations have been scarce; Roses plentiful. Outdoor stock, such as Lilac, Narcissus, etc., has been in receipt in good condition and is selling well. Violets are getting poor. While there are not many big weddings booked there are quite a few coming within the next two months.

W. J. Palmer & Son, 304 Main st., had the largest wedding of the season, when the daughter of E. H. Butler, the proprietor of the Buffalo Evening News, was married the past week. Seven hundred American Beauty Roses were used in one room and the rest of the house was decorated on the same generous order. The decorations were in charge of E. A. Slattery.

E. A. Slattery and Edward Walther have just returned from New York City where they went to place a casket cover on the coffin of one of Mr. Palmer's customers.

James Longley, one of W. J. Palmer's employees, lost his mother by death the past week; he has the sympathy of the craft.

Geo. McClure & Son, the landscape gardeners, are rushed with orders.

The matter of the Fall flower show is in the hands of the committee, and next week I hope to be able to give some definite information about it.

W. H. GREVER.

HELLO! Here is a chance for

Dreer's Select Potted Roses

FOR OUTDOOR PLANTING

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

Commendable Factory Enterprise

The Thomas J. Plant Co., shoe manufacturers of Jamaica Plain, Mass., is engaged in a unique piece of work for the betterment of its employees. It owns five acres of land around its factory which has practically been a dumping place for all kinds of rubbish; this it has had leveled off and soil to the depth of 2 ft. has been put on all the land. R. & J. Farquhar & Co. are doing the landscape work and the planting; Mr. James Farquhar has had 100 men working on the job for the past three weeks and has done wonders already. No expense is spared as the com-

pany wants this ground to be of use to its employees as soon as possible. Trees have been planted, from 40 ft. to 50 ft. in height, with large balls of earth. The kinds used are mostly Maples and Elms. Two hundred very large trees and shrubs have been planted and thousands of smaller kinds and of many varieties. A large number of seats are to be made, principally from concrete, and are to be placed near the large trees so as to afford shade.

A greenhouse, 40x150 ft., is to be built by Mr. Wilson of Nahant, and Carnations are to be grown for the employees. The number of blooms this house will produce will be about 700 per day; a day's cut will be given to

each room in succession, so until the whole factory has been supplied and then the distribution will commence all over again. As far as we know this is the first time in this part of the country where such generosity has been shown to the employees of a factory, and we have no doubt but this scheme will be copied by other manufacturers over the country. This is ideal for business, and nurserymen throughout the country should advocate such things to manufacturers and, in this way, it would be helping their own business along. Mr. Plant is fortunate in getting a man with such ability as James Farquhar. This work comes to him, no doubt, through the excellent work he did on the Japan-

ese garden at Horticultural Hall last year. By the way, he is preparing two elaborate plans for two Japanese gardens at the present time. R. C.

Pink Climbing Rose— Dorothy Perkins

Without doubt the most valuable of all the new Climbing Roses of comparatively recent introduction. The beauty of the double pink flowers is admirably set off by the rich green foliage, which is free from the attacks of insects.

In addition to this charming kind, we have all the popular varieties in climbing and bush Roses. Our General Catalogue, which will be mailed on request, contains descriptions of all the best Roses—also

Fruit and Ornamental Trees, Shrubs and Hardy Plants.

New Rose American Pillar

NO Climbing Rose is attracting the attention that "American Pillar" does, and most deservedly so. It is by far the best single-flowered climbing rose for outside purposes; and on account of the great durability of its flowers, it is the best single-flowered forcing rose.

July 12, 1909.

Gentlemen:

Let me tell you, too, that the American Pillar is a better Rose than you know, perhaps. The plant I had from you, which was planted this Spring under unfavorable conditions, is now giving us a succession of most exquisite bloom.

Yours truly,

J. HORACE McFARLAND,
Pres. of American Civic Association, Harrisburg, Penna.

COMMENT FROM THE LONDON GARDEN

"A most notable feature in this glorious display (Temple Flower Show in London) was the New 'American Pillar' Rose. The large and attractive rich rose pink blooms are produced in immense clusters, the white centers of the blooms adding to their attractiveness. —Florists' Exchange.

2½-inch pot plants, \$1.50 per dozen, \$8.00 per 100, \$75.00 per 1000.

4-inch pot plants, \$3.50 per dozen, \$25.00 per 100.

NURSERY DEPARTMENT

CONDUCTED BY
JOSEPH MEEHAN

AMERICAN ASSOCIATION OF NURSEYMEN

F. H. Staggard, Ottawa, Kan., President; N. P. Stark, Louisiana, Mo., Vice-president; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., treasurer.

Minor, N. D.—The United Nurseries Co. has been incorporated with a capital stock of \$25,000. Arthur C. Hanson, Geo. Walker, and L. J. Paldi, Jr., are incorporators.

NEW YORK.—The F. W. Kelsey Nursery Co. says: "Judging from our own experience, this has been a 'rush' season in the nursery business. The early Spring accentuated early orders and a number of large orders brings up the average here to a very satisfactory season's business with more in prospect. While in a few lines there is a shortage of good stock, with a free market nearly all kinds of stock is available for the demand. All those in the nursery business of resource and established reputation, and who are up-to-date in methods of handling business will, from results and indications thus far, have no reason to complain of the business for the Spring of 1910."

Æsculus glabra Horse-Chestnuts have long been favorite lawn trees, for where they thrive they surpass in beauty many other park favorites, their flowers and their handsome foliage distinguishing them from all other trees surrounding them. The one of our notes is the native one, *Æsculus glabra*, usually called American Horse-Chestnut, to distinguish it from the European species, *Æ. Hippocastanum*. Our species is demanded in all collections, nevertheless it is not the equal, in its flowers, of the other, neither are its leaves as large. It is well fitted to plant where one not so large as the European is required, for it never makes the imposing appearance a large tree of the European does.

The tree we illustrate is growing in a position Horse-Chestnuts like, that is, a deep and damp soil, and with small shrubs growing around it, which keep the soil cool in Summer.

It is useless to plant a Horse-Chestnut of any species in hard, dry ground, or in a position where the soil will become very hot in Summer, for in this case the growth would be poor and the foliage would drop early in the Autumn.

Horse-Chestnuts are rarely suited as street trees, because of the lack of the requisites aforesaid. Often, one is planted along a sidewalk of a street, but rarely is it satisfactory; usually the tree is bare of leaves before the Summer is over—very different from the handsome, thrifty one of our photograph, which is well suited in the deep and damp soil it is in.

Nothing grows ensier than Horse-Chestnut seed sown as soon as they are ripe, but if let become dry for a few weeks they spoil, the "kernel" drying up. Even when kept damp in a box all Winter but few are sound when Spring comes.

Japanese Maples In early Spring, when foliage is unfolding, one of the loveliest sights on a lawn is the blood-leaved Japanese Maple, *Acer polymorphum atropurpureum*. The intense dark red of its leaves has no competitor in either shrub or tree. Of the many Japanese Maples it leads all in color. There is another one with dark red leaves in the Japanese section, the *Acer dissectum atropurpureum*, but the foliage is so much dissected that it cannot give the mass of color the other does, and if it could the color is not such a rich red.

The habit of the last named differs from the first. Instead of an upright growth, it is almost entirely of a spreading nature, so that planted side by side, plants of the same height, it would soon be left behind in growth by the blood-leaved one first mentioned. In fact

it, the *dissectum atropurpureum*, if carried up to a single stem to a height of a few feet and then allowed to form a head, takes on a weeping form—at least as much so as many things sold as such—but its best appearance comes with its growing in a natural way, bushy from the ground.

In addition to the two named there is another one, overlooked by many who plant for Spring effect, the *Acer polymorphum reticulatum*. As it expands in Spring there is a yellowish green to the foliage which contrasts nicely with the foliage of the other two, or with the foliage common to most all trees.

It is hard to say what conditions suit these Maples the best. As the climate of Japan is of a humid nature, we are told, one would look for the best results here under like conditions. The Spring hereabouts has been a very dry one, yet it is a common remark that these Maples never looked better. In Summer it is the aim to keep them in a situation free from the sun in the height of the day; yet if too much shade be given the color of the leaves fades from its deep red.

There is no doubt that if florists would keep a number of these Maples in pots they would sell well. Everybody wants one who has room for it. The *polymorphum atropurpureum* is the best seller. It needs a lot of plants set together in a store to give an idea of what a bed of them on a lawn would look like.

Is Halesia diptera Hardy?

Halesia diptera is known in the trade as the Southern Snowdrop Tree, though both it and *H. tetraptera* are southern trees; but the latter is more hardy than the former. *H. diptera* will not endure the cold *tetraptera* will, though it is not hurt by cold at Philadelphia when planted in a fairly well sheltered place.

Æsculus glabra—American Horse-Chestnut

A few years ago there was one growing in the old Bartram Gardens; and at Morrisville, Bucks County, Pa., at the Moon Nurseries, there is a large tree of it, planted, we understand, by the father of the present proprietors, Mahlon Moon.

This species flowers a little later in Spring than the one so common, *H. tetraptera*, but there are so few of them to be found in collections that comparisons between the two sorts are not easily made. Both of these species make large trees, though they are often set out as shrubs, because they bloom when but two or three feet high, much the same as *Magnolias* do, and then their style of growth is that of a shrub.

It is hard to define the line between a tree and a shrub; something more than height is wanted. The two kinds now referred to, the *Halesia* and the Chinese sec-

tion of *Magnolias*, are not trees in the way we look on an Oak, Elm, Ash and like trees. Both the *Halesia* and the *Magnolias* are always thought of as shrubs when planted—the Chinese and Japanese ones are meant—yet specimens of both exist near Philadelphia, perhaps 40 ft. in height.

However, returning to the subject of the hardiness of *Halesia diptera*, it is certainly hardy about Philadelphia, but not nearly so far north as the *H. tetraptera*.

Daphne Mezereum All the *Daphnes* are favorite shrubs, chiefly because of their fragrant flowers, for all are sweet-scented save one, the *D. Genkwa*, and even this one is listed in works as a sweet-scented one, but the writer has never found it to have odor of any kind. The one these notes relate to chiefly, the *D. Mezereum*, is a favorite because of its hardiness, its early blooming and its fragrance. It is classed as one of the earliest of Spring-flowering shrubs. While its flowers are not large, they are so numerous and so fragrant that every one's attention is attracted to them when passing in their vicinity. The typical form is the red one; the white one, though oftener seen in collections, is considered but a variety of it.

European botanical works say of this *Daphne* that it is a straggling grower. This does not at all fit its character with us, for it is one of the most upright growing of all shrubs.

It is valued for its red berries, which form and soon ripen in Spring, adding much to its attraction, in fact its appearance is more pleasing with its red berries than when it has its flowers; it is only the fragrance of the blossoms that makes them interesting.

The lovely trailing *Daphne*, *Cneorum*, is often grafted on small plants of the *Mezereum*, giving rather stronger plants than when on their own roots. The hardy character of both of these *Daphnes* is much in their favor; and the *Cneorum* has to its credit its evergreen character.

Pruning the Japanese Snowball

Passing a garden, recently, in which a large Japanese Snowball bush had been pruned, the bush presented such an object lesson of wrong pruning that I must need refer to it. It had made some strong shoots the past Summer, two to three feet in length. These shoots are the ones to give flowers, as all gardeners know. Well, every one of these had been cut back almost entirely; here and there one or two eyes had been left at the base, but on the rest of the bush not a bit of the young wood had been left. As it appeared to the writer, if a dozen flowers were produced this season it would be all there would be; whereas a thousand or more would have been there if the shoots had not been pruned away. The person who pruned this bush evidently thought it too large, and cut it back to lessen its size. What he should have done was to wait until the flowers had faded and then cut back all the tall shoots, leaving some of the smaller ones, in order that the shrub should not be weakened too much by losing such a lot of its new foliage. As it is now, the bush having had only its last year's growth cut away it will be no taller than it was last year, after this year's growth is made.

What is said here applies to all the shrubs that are blooming now and will be flowering, one after the other, in Spring. Prune them as soon as possible after the flowers fade, so that new growth will not be wasted in the cutting.

Making Evergreens Bushy

Because evergreens will not permit of pruning them beyond their living foliage, many suppose they cannot be pruned at all, but this is a mistake; they may be pruned and made so bushy that a bird could hardly pass through them. A sight of a bushy White Pine recently brought this to the writer's mind. Let grow at will, this Pine, while of good form, is not over bushy; but put the knife on it and there is no evergreen forming a bushier, handsomer tree than it does. Common Pine that it is, it is still one admired by everyone for the beauty of its foliage and its outline.

This Pine, and all Pines, may be pruned safely and to advantage by being careful not to cut the shoots back beyond the live needles. Very few Pines or other coniferous trees will break afresh from the old wood. One sees the Pitch Pine doing it sometimes in the forests, where they have been broken off, but it is an exceptional case. It is safer to be sure there are live needles beyond the cut. As the needles live but a year or two this means that the pruning can only be applied to, say, the one year growths. If it be early Spring the cut-off part will be from the shoots made last Summer. If done in Summer or Autumn it will be the shoots just formed and ripened.

Keeping this in mind, evergreens can be pruned annually if so desired, by which fine specimens may be secured.

In nearly every case Pines are rendered more serviceable by adding to their business through pruning, as also are many of the Spruces. The Douglas Spruce, *Pseudotsuga Douglasii*, is one that wishes to make a rapid, upright growth if left alone—it and the *Pinus Strobus* being two of the fastest growing evergreens we have—hence, the effect of pruning in adding to its bushiness soon becomes apparent.

Dianthus, Sweet William and Hardy Pinks

A fine assortment of strong plants, from 2 1/2 inch pots, at \$3.00 per 100. F. O. B. our shipping point, Trenton, N. J.

200 SWEET WILLIAM—Single, red and white.	700

San Francisco

The Market

There is considerable improvement in market conditions this week, compared with those of last. There continue to be abundant supplies in practically all grades of flowers and plants, but business on the whole appears to be on the increase, and most of the town florists seem to think that a steady demand for flowers will be in evidence from now on. Carnations are in heavy crop all over and the market is oversupplied with blooms of average quality, although good blooms of the finer varieties fetch fair prices considering the lateness of the season. Tulips continue much in evidence in the stores, with prices about the same. Darwins appear to be the most popular with the general public, and nice bunches of the Parrot section sell rapidly. Quite a few Spanish Iris are to be seen in the stores at present and will sell well until the outdoor crop makes its appearance. Roses of all descriptions are in abundance, and prices are absurdly small, considering the high-class of stock being brought into the market by the growers. Quite a lot of Lilac is coming from out-of-town growers and is eagerly bought up as soon as it is displayed in the stores, as also is Cherry blossom. Spring weddings appear to be plentiful this year and there is quite a demand for choice flowers of all kinds. Orchids are plentiful and sell rapidly, while Lily of the Valley is fetching better prices than it has for some time past.

Various Notes

H. Plath is busy at present installing a new boiler at his Ocean View establishment.

V. Matraia, the genial president of the Pacific Coast Horticultural Society, is a busy man these days and seems to have his store on the rush at all times. The versatility of "Pete" was shown this week, when he officiated at a musicale given by a well-known lady in town.

April 18 was the anniversary of the great earthquake and fire of 1906 and, four years after, celebrations were in vogue all over the city.

Mme. Roeckel Davis, of the State Floral Society, gave a concert and dance on April 20, which was largely attended by the members of the Pacific Coast Horticultural Society and State Floral Society.

A batch of 500 plants of Schizanthus Wisetonensis in the conservatory at Golden Gate Park is making a great show at present, and has been much admired by the thousands of people who pass through there daily.

A field day will be held by the Pacific Coast Horticultural Society the second week in May, when the Society will visit the extensive nurseries of the E. Gill Rose Co. at West Berkeley. All members are requested to turn out in force, and bring a few friends along with them to see the famous Berkeley Roses in full bloom. Full particulars as to date and place of meeting will be mailed to each member later.

David Basset of Ross Marvin Conny was in town this week.

The many friends of F. Ludemann of the Pacific Nurseries will be pleased to hear that he is rapidly recovering from his recent illness. Mr. Ludemann is one of San Francisco's leading horticulturists and a well-known figure in this vicinity.

Domoto Bros. are adding two new houses to their Elmhurst plant.

J. B. Coryell of Menlo Park will add two more houses to his up-to-date establishment at Fair Oaks this Summer. Cattleyas will be grown principally.

H. E. Zothin has been making extensive alterations to his estate at Ross Valley. The MacRorie-McLaren Co. of San Francisco were the architects for the landscape part of the work.

A recent visit to Robert Murray of Redwood, the well-known Carnation grower, proved very interesting. The writer has seldom seen Carnations look in such a perfect state of health. One large house of Enchantress looked particularly fine, as also did a house of White Enchantress, which Mr. Murray informed me had beaten all records this Winter for cutting. The variety O. P. Bassett looked as if it would do well in California and Mr. Murray intends to plant it in quantity next year. He has some exceptionally fine seedlings on trial at present, and I think that at least two of them will be heard from later.

The MacRorie-McLaren Co. has started work on its new nursery at Beres-

ford, near San Mateo. The Lord & Burnham Co. will supply the plans and material for the glass department.

The Stockdale Nursery has had an exceptionally busy season tree planting in Burlingame and the surrounding districts, shade trees being a prominent feature in the work.

Real estate men on both sides of the bay are beginning to realize more and more the value of beautifying their property with suitable trees and shrubs, as a means of inducing people to settle on their land. The MacRorie-McLaren Co. are doing great work in this line, and contracts for Fall planting are already beginning to come in.

Frank Mills of Palo Alto was in town recently. He states that business is rushing in the University town.

Society of American Florists' members, also members of the American Rose Society, please take notice that San Francisco in 1915 will be the most talked of city on earth, and will be the scene of one of the greatest exhibitions ever held in any country. I refer to the World's Fair being planned by the people of the West to celebrate the opening of the Panama Canal. What would be more fitting than to have America's premier horticultural society hold its annual convention in San Francisco that year, also the American Rose Society. It is, perhaps, a trifle early to talk on this subject, nevertheless the suggestion is worth considering.

WM. MCM. E.

Rochester, N. Y.

Trade conditions are decidedly better and the demand brisk for cut stock. Carnations are very scarce and move easily. Roses, while not scarce, find a fairly good demand, the medium grades moving more quickly than the long stock. Sweet Peas are still in good demand and the supply is not equal to the demand for these popular flowers. Violets are still coming, but are of uncertain quality, owing to the weather conditions, which cannot be avoided at this time of the year. Bedding stock is making its appearance on the market, but it is much too early for many calls for this stock at present, the weather also being cold and wet.

Owing to lack of interest the Bowling Club has been forced to discontinue its meetings.

H. B. STRINGER.

Syracuse, N. Y.

The weather continues very warm, in fact it is quite hot, and everything is fairly jumping. Never before can I remember so many things in bloom at this date. All kinds of fruit trees are fairly covered with blossoms, and if we escape a heavy frost the crop will be a heavy one. The Lilacs, Forsythias, Deutzias and Pyrus Japonica are in full bloom as well as Tulips, Hyacinths, Daffodils and other bulbs. Our parks and many private places present a gorgeous sight. I cannot recall our parks looking so well as now. Supt. Campbell has steadily increased his bulb stock, till it is now a very large one. To him must the credit be given for the increase in the number of private places adorned with the beautiful harbingers of Spring.

Large numbers of Pansies are being sold; almost every grocery store seems to be handling them. As a general rule the quality is very indifferent. Quinlan & Co., Burt and Morris have the best I have seen, so far. It is always inexplicable to me why growers will grudge paying a little more for a first-class strain, for the finer flowers would command a better price.

There has been great activity the past two weeks in getting Carnations planted in the field. Quinlan has had a small army of men rushing the work. A heavy rain storm Saturday night will be of material help.

Business still continues very good indeed, very little stock going to waste. The outlook for Decoration Day is very bright and the florists are bound to reap a good harvest, as outside flowers will be practically over. Prices for pot plants have never been, nor will be advanced on that day.

Planting of shrubs is being rushed in all directions and it is safe to say there has never been such a heavy demand for them as this Spring. In very many grounds surrounding old homesteads, where they have been content with plain lawns, ornamental beds filled with flowering shrubs have been made—and so the good work goes on.

H. Y.

Bargains in Pot-Grown Plants

Ready for market at once.

Albany, N. Y.

Preparations for the second annual flower show were discussed at a special meeting of the Albany Florists' Club held on Thursday of last week, at the establishment of W. C. King, Fred. A. Danker, chairman of the show committee last year, gave a preliminary report on the finances of the show held at the State Armory in November. The report showed that the committee had a large cash balance on hand and that there is a large balance still due the Club for advertisements in the official program and for tickets yet to be accounted for by members. All bills had been paid except a few premiums. A full report of the show to clear everything will be on hand at the next regular meeting, the first Thursday in May. A committee of five members was appointed, with John Sambrook, of Sambrook Bros., Troy, as chairman, to call upon the different florists who did not exhibit last year, to see if they won't be interested in the next show sufficiently to exhibit, thus making it a full show for all concerned. The evening was passed very pleasantly and was conspicuous by two features. One was a small private show given by members only. President Fred Galding of Slingerlands, N. Y., brought in from his greenhouses some seedling Carnations which were exceedingly large. Fred A. Danker placed on exhibit a beautiful vase of light pink seedling Carnations of his own growing, which deserved comment. Henkes Bros. of Newtonville, had on exhibition two handsome vases of seedlings of a maroon red of their own growing, which were fine. W. W. Hannell, Waterliet, had three very fine and large vases of white, light pink and dark pink seedlings of his own growing. He also exhibited a vase of Bride and Bridesmaid Roses which certainly were fine, both in size, color and stems. After the show and meeting a fine repast was prepared by the genial Pat Hyde and committee on refreshments, and about fifty members went in for the good things to eat, drink and smoke. The gathering ended with a few selections by the good entertainer, J. J. McCarthy, and all were satisfied with the good time and treat which they had. Visitors: Morris Cohen, of Wertheimer Bros., and J. Dilloff, of Schloss Bros., New York. W. C. K.

Kalamazoo, Mich.

A week of raw cold weather, at times accompanied by snow, has not been of much benefit to the florists, while the damage to the fruit crops (which were all in full bloom) must be enormous.

As showing the peculiar effects of the season on the fruit trees in this section I mention the fact that the earliest of the Cherries and the latest of Apples were in blossom at the same time, viz., April 18, a circumstance never before noted so far as I can find out.

While trade in the cutflower line is in a very moderate way those who do landscaping and planting are being rushed with work and there is lots doing along this line. William Thomas is specializing on this work and says he has all the work he can attend to with his present force, and has to turn much away on account of the difficulty of securing efficient help.

The help problem is becoming a kooky question among the florists here as elsewhere.

In reference to your editorial on the cost of production and marketing the stock it seems more than strange that so vital a question should be passed without comment from some of the leading growers and shippers. That there is such a thing as "first cost" appears to have escaped the view of most florists, hence we have the prices of today, for the most part, on the basis of those of twenty years ago. Sometime, I suppose, in the future, we shall learn enough to know how to adjust the price list to the cost price, and maybe to keep the supply and demand in closer touch than at present. Doubtless, however, such commonsense methods will only be reached through a new generation of florists who will be in the business to make a living.

The Central Nursery Co. will soon be doing business in their new store on Burdick st.; this is one of the choicest localities in the city and should bring that firm lots of business. S. B.

WACO, TEX.—Wolfe, the florist at Garden City, is making extensive additions to the greenhouses there.

A Few Good Things

5 to 7 inches, \$1.00 per 100, \$7.50 per 1000;
6 to 8 inches, \$1.25 per 100, \$12.00 per 1000.

GLADIOLI

America. This beautiful new Gladiolus is likely to produce as great a sensation as the now famous Princeps. The flowers, which are of immense size, are of the most beautiful Red-pink color, and, as a florist who saw it said, it is "fine enough for a bride's bouquet." 50c. per doz., \$3.25 per 100, \$30.00 per 1000.

1900. Nothing finer for florists' use. Rich shade of red with very prominent white spots on three lower petals. \$2.00 per 100, \$15.00 per 1000.

Groff's Hybrids (originator's strain). \$1.25 per 100, \$10.00 per 1000.

Shakespeare. White and rose. \$4.75 per 100, \$45.00 per 1000.

May. Pure white, flaked rosy crimson, the best flower selected bulbs. \$1.75 per 100, \$15.00 per 1000.

Bronchovensis (true). Flery scarlet; first size bulbs. \$1.25 per 100, \$9.00 per 1000.

Boddington's White and Light. Extra-selected bulbs. 1 1/2 inches and up. \$1.50 per 100, \$14.00 per 1000.

American Hybrids. A mixture of the choicest varieties of Gladiolus. \$1.00 per 100, \$9.00 per 1000.

Pink and Rose Shades. \$1.50 per 100, \$14.00 per 1000.

Lemoine's Hybrids. \$1.50 per 100, \$12.00 per 1000.

Childall. \$2.00 per 100, \$18.00 per 1000.

Finest All Colors Mixed. 75c. per 100, \$7.00 per 1000.

DAHLIAS

After considerable consideration and observation, and "talks" with the trade, we have decided to offer the following Dahlias to florists this season. Our retail Catalog, which will be mailed free, contains a larger collection, but few are superior to the following and all are good size, divided clumps that have been field-grown and are strong and healthy.

Price of all the below-named varieties of Dahlias, large divided clumps or roots, except where noted, 10 cts. each, \$1.00 per doz., \$3.00 per 100, \$75.00 per 1000.

Jack Rose (Decorative type). The variety Jack Rose is rightly named and is a florist's Dahlia, "from the ground up." The color is similar to the Jacqueminot Rose, and is a unique color in the Dahlia, which lights up beautifully at night. The habit of the plant is stocky, very free-flowering. Producing its blooms in great profusion, upon erect, long, stiff stems, making it invaluable for cutting. You cannot afford to be without it. If you sell cut-flowers, 35c. each, \$3.50 per doz., \$35.00 per 100.

DECORATIVE DAHLIAS

Sylvia. Best described as a Giant Nymphaea, being stronger, larger and deeper colored. Flowers 4 to 6 inches in diameter, of fine form and full to the center, which is white, shaded to soft pink on the outer petals. One of the best cut-flower varieties. 10c. each, \$1.00 per doz., \$7.50 per 100.

Catherine Duer. Crimson-scarlet.

Clifford W. Bruton. Best yellow. 10c. each, \$1.00 per doz., \$7.50 per 100.

Frank L. Bassett. Bright purple, shading to blue.

Lyndhurst. Bright scarlet.

Maid of Kent. Cherry-red, tipped white.

Nymphæa. Color clear, light shrimp-pink.

Orange King. Rich glowing orange; early and profuse.

William Agnew. Rich, dazzling red; immense size.

CACTUS DAHLIAS

Berlichingen. Deep crimson-carmine shading to bright carmine at the tips.

Blitz. A rich, brilliant geranium-lake.

Bravo. Rich Jacqueminot-red; one of the best for cutting.

Countess of Lonsdale. Amber and salmon.

10c. each, \$1.00 per doz., \$7.50 per 100.

Earl of Pembroke. Bright plum. 15c. each, \$1.50 per doz., \$12.00 per 100.

Helene. Center creamy.

Kröner. One of the finest pink Cactus Dahlias. 10c. each, \$1.00 per doz., \$7.50 per 100.

Libelle. A fine purple.

Ortwin. Beautiful salmon-flesh.

Standard Bearer. Brightest scarlet; profuse bloomer. 15c. each, \$1.50 per doz., \$12.00 per 100.

SHOW AND FANCY DAHLIAS

A. D. Livoni. Beautiful soft pink; early and profuse bloomer. 10c. each, \$1.00 per doz., \$7.50 per 100.

Arabella. Pale primrose, tipped and shaded old rose and lavender.

Camelliaeflora. A fine large pure white.

Grand Duke Alexis. Very large white, tinted pale lavender.

Glowing Coal. Brilliant red.

Green's White. One of the best whites for cutting.

Harlequin. Brilliant crimson, striped and tipped white.

John Thorpe. Very large; soft rich pink.

Memebddy Beauty. Fancy buff, with crimson spots, free long stems, large bloom. 35c. each, \$3.00 per doz., \$30.00 per 100.

Frank Smith. Rich, dark purple maroon, tipped pinkish white. A superb flower. 25c. each, \$2.50 per doz.

Queen Victoria. Deep yellow; fine for cutting.

Red Hussar. Pure cardinal, red flower, very free bloomer, splendid for cutting.

White Swan. Snow-white, with long stems.

SINGLE DAHLIAS

The 20th Century. Intense rosy crimson, with white tips and white disc around yellow center. 10c. each, \$1.00 per doz., \$7.50 per 100.

DAHLIAS TO COLOR

We can also furnish, without names, in mixture, all colors separate, or all colors mixed, as follows:

Mixed Pinks. Mixed Whites. Mixed Reds.

Mixed Yellows. 75c. per doz., \$5.50 per 100, \$50.00 per 1000.

Mixed, all colors. 60c. per doz., \$4.50 per 100, \$40.00 per 1000.

PAEONIES

The roots offered below are extra strong pieces, having 3 to 5 eyes.

PAEONIA OFFICIALIS

Double to Color.

Rubra. Deep crimson; can be forced for Easter \$0.75 100

Charles Leveque. Delicate rose. 30c. each, \$3.00 per doz., \$24.00 per 100.
Cytheri. Creamy white, tinted rose. 15c. each, \$1.50 per doz., \$12.00 per 100.
Duchesse de Nemours. Pure white; perfect flowering; fine. 15c. each, \$1.50 per doz., \$12.00 per 100.
Duke of Wellington. Ivory-white, creamy center. 15c. each, \$1.50 per doz., \$12.00 per 100.
Festiva Maxima (true). The finest white Paeonia in cultivation. 15c. each, \$1.50 per doz., \$12.00 per 100.
Lady Leonora Bramwell. Lovely silvery pink; the best of all pinks. 15c. each, \$1.50 per doz., \$12.00 per 100.
Marie Lemoine. Satiny white; grand flower; late. 35c. each, \$3.25 per doz., \$25.00 per 100.
Mont Blanc. Snowy white; very early. 35c. each, \$3.25 per doz., \$25.00 per 100.

HARDY

CLIMBERS, Etc.

AMPELOPSIS Strong Dutch-Grown

Ampelopsis Veitchii (Boston Ivy). Extra-strong, imported vines, 3-year-old. \$1.25 for 10, \$12.00 per 100.

Ampelopsis Veitchii robusta. A very compact-growing variety of the well-known Boston Ivy, and very highly recommended to us; will undoubtedly take the place of the ordinary Veitchii in the near future. \$1.75 for 10, \$15.00 per 100.

Quingafolia (American Ivy, or Virginia Creeper). Good for covering walls, verandas, or trunks of trees; affords shade quickly. 25c. each, \$1.75 for 10, \$15.00 per 100.

ACTINIDIA ARGUTA

A desirable Japanese climber of strong, vigorous growth, with dark green, shining foliage and white flowers with purple centers, which are followed by clusters of edible fruit. An excellent plant for covering arbors, trellises, etc., where a rapid and dense growth is desired. Strong plants, 25c. each, \$2.50 per doz.

CLEMATIS

Henryi. Pure white; extra large.

Alba. White.

Jackmanni. Purple.

Sieboldi. Lavender.

Ville de Lyon. Brilliant carmine-red; as good as Mme. Edouard Andre, but contrary to this one, is very free-growing.

Extra-strong plants, 30c. each, \$2.75 for 10, \$25.00 per 100.

Clematis paniculata. Strong, 2-year-old plants, \$2.00 per doz., \$15.00 per 100.

BIGNONIA (Trumpet Vine)

Radicana. Dark red, orange throat; free-blooming and very hardy. 20c. each, \$2.00 per doz.

ARISTOLOCHIA SIPHO

Dutchman's Pipe. Strong, field-grown, 3 to 4 feet. 25c. each, \$3.25 for 10, \$30.00 per 100.

WISTARIA SINENSIS

Extra strong, field grown.
Blue. 6 to 7 feet, 40c. each, \$3.75 for 10, \$35.00 per 100.
White. 6 to 7 feet. 40c. each, \$3.75 for 10, \$35.00 per 100.

HONEYSUCKLE

Very extra-strong, Holland field-grown plants. 6 to 8 feet long, many branches.

Halliana. Yellow. \$3.25 for 10, \$30.00 per 100.

HYDRANGEA PANICULATA GRANDIFLORA

Two-year-old, 3 to 4 branches, bushy. \$1.80 per doz., \$10.00 per 100.

DIELYTRA SPECTABILIS

(Bleeding Heart)
Field-grown, 75c. per doz., \$6.00 per 100.

INCARVILLEA

INCARVILLEA Delavayi (Hardy Gloxinia). The foliage resembles that of the acanthus, while the blossoms appear like clusters of pink Gloxinias. Strong roots. 10c. each, 75c. per doz., \$5.00 per 100.

CINNAMON VINE

Large-size bulbs. 50c. per doz., \$3.00 per 100, \$25.00 per 1000.

CALLAS, SPOTTED LEAF

(Richardia albomaculata)
Very free Summer-blooming variety. \$3.00 per 100, \$25.00 per 1000.

HYACINTHUS CANDICANS

HYACINTHUS Candicans (Cape Hyacinth)
Large bulbs, \$1.50 per 100, \$12.00 per 1000.

MADEIRA VINES

Large bulbs, \$1.25 per 100, \$10.00 per 1000.

MONTBRETIA

Crocsmædora. Orange-scarlet. 75c. per 100, \$5.00 per 1000.

Etoile de Fen. Rich scarlet, yellow center. 75c. per 100, \$6.00 per 1000.

Rayon d'Or. Deep yellow, very large. 75c. per 100, \$5.00 per 1000.

Pottsi grandiflora. Bright yellow, flushed with red. 75c. per 100, \$6.00 per 1000.

Soleil Couchant. Bright red. 75c. per 100, \$5.00 per 1000.

JAPANESE IRIS

(Iris Kaempferi)
Named varieties, our selection, \$1.25 per doz., \$10.00 per 100, \$75.00 per 1000. 25 at 100 rate, 250 at 1000 rate.

AMARYLLIS

Vittata Hybrids. These are grown especially for us and contain a remarkable range of colors from self pure white to darkest crimson, or flaked and striped. These are easily grown. Florists should certainly grow a few of this delightful plant that sells on sight. 40c. each, \$4.00 per doz., \$30.00 for 25, \$30.00 per 100.

Beladonna major. \$1.00 per doz., \$7.00 per 100.

Johnsoni (Bermuda Spice Lily). Crimson flowers, white stripes. \$1.75 per doz., \$14.00 per 100.

Firms Who are Building

ATLANTIC CITY, N. J.—Chas. C. Mason recently completed one large greenhouse and expects to put up more in the Fall.

New Bedford, Mass.

There was a fairly good demand for cut flowers the past week, with the supply equal to it. Funeral work was good, using up large quantities of flowers. Carnations retail at 50c. and Roses at \$1.50 per doz. Violet are done; Sweet Peas at \$1 per 100. Bulb stock is getting low; Paperwhites are about all done; Daffodils and Tulips are still to be seen; these retail at 50c. per doz. Snapdragons at \$1 per doz. Ten-Weeks' Stock around here will be about right for Memorial Day.

R. E. Nofftz has some excellent window displays these days. Boston and Whitman's Ferns, sell well at prices within reach of all.

Vegetation is opening up quickly under the warm sun and the nice mild weather we are having. Pansy and Daisy roots sell well.

Plans for the June Rose show are being made by the Hort. Society. It is probable that the show will be free to the public and it may be held in a local department store, perhaps on a Friday or Saturday afternoon or evening; the date of the exhibition will be announced later. It is hoped to have a display from the gardens of Miss Fay at Woods Hole. Mr. Walsh, Miss Fay's gardener, has made exhibitions in this city before and what he has to show always attracts wide attention. Mr. Walsh probably grows a larger collection of Roses than any other grower in this section.

Tulips and Daffodils are in full bloom out-of-doors. HORTICO.

Detroit

Prices ruled considerably firmer last week compared with those of the previous week, still the demand was below normal. Inclement weather reduced counter sales to a minimum, and a lack of large funeral work helped materially to bring about a reduction in business. Fortunately for the growers hereabouts, they are all off crop and therefore we have the peculiar situation of a low business barometer, with no glut, in the middle of April.

Violets and bulbous stock are about at an end. Outdoor bulbs would now bring better returns than those grown indoors last Winter, but few growers hereabouts pay any attention to them. Spanish Iris, Daisies and Sweet Peas find a very good market here. Hydrangeas have sold well but are about gone. Calls for Boston Ferns and Kentias are plentiful but they are very scarce. Mayor Philip Breitmeyer recently spent two days in Buffalo, on account of the death of his mother's sister.

Prospects for a good Spring trade are very good indeed and the prevailing cool weather is really a relief, because it stops the impatient one from demanding his bed of Geraniums planted at once.

The D. M. Ferry Co. is distributing Candytuft seed free, to bring about a general planting of this flower in honor of the Elks convening here next July. Several outside firms are canvassing local business houses for orders for decorations for this convention, but they are only the old-fashioned hunting and flag affairs. There will be more than plenty of work for those florists who design something original and tasty.

FRANK DANZER.

FERNS FERNS

Skaneateles, N. Y.

J. G. White is very pleased with his Winter's trade. He has had quite large crops of Carnations, Sweet Peas and Callas, all of which sold readily, and hardly a flower was wasted. Upon my visit a few days ago I found everything in fine shape. All the stock is healthy and vigorous. The Carnations are remarkably good and the Sweet Peas are the finest lot I have seen for some time, flowers large with stems a foot long. His bedding stock is very good, in fact, the whole place is a credit to him.

Mrs. Daneer, who carries on the nursery established by her father, the late James A. Root, reports trade as very good. At this place a specialty is made of evergreens; millions of seedlings are sold yearly, gathered from clearings in the forests in exposed places, and they are found to produce quicker and better results than those usually raised in the nursery. Very large shipments are made to Pennsylvania, one firm alone in Philadelphia this Spring taking 80,000. All the stock is looking good and has stood the long hard Winter well. H. Y.

Catalogs Received

S. J. McMICHAEL, Findlay, O.—Wholesale and Retail Trade List of Vegetable Greenhouse and Bedding Plants.

THEO. KOSS, 488 National ave., Milwaukee, Wis.—Catalog of Garden and Farm Seeds, Poultry Supplies, etc. Illustrated.

MORRIS & SNOW SEED CO., Los Angeles, Cal.—Catalog under the title of "A Few Hints on Gardening," covering Seeds, Bulbs, Plants, Trees, Shrubs, Insecticides, etc.

HEINRICH JUNGHE, Hameln, Germany.—Illustrated Catalog of Novelties and Hardy Perennials, including Bush Asters, Spiraeas, Iris, Peonies, Aquatics, Evergreens and Flowering Shrubs.

KOOLBERGEN & SLIEDRECHT, Boskoop, Holland.—Catalog of General Nursery Stock, including Rhododendrons, Azaleas, Roses, Clematis, Boxwood, Peonies, Hardy and Forcing Plants and Shrubs.

GEORG ARENDS, Ronsdorf, Germany. Catalog of Plants and Seeds, including Hardy Herbaceous Plants of various kinds, Spiraeas, Iris, Peonies, Alpine Plants, Swamp Plants, Aquatics, and Dahlias. The volume contains 84 pages, is well illustrated, and embraces several novelties.

STATE NURSERY CO., Helena, Mont.—Catalog of Seeds, Plants, Trees, etc. The publication covers flowering and decorative plants, including Palms and Ferns, Hardy Perennials, Hardy Shrubs and Vines, Hedge Plants, Shade and Ornamental Trees, Fruits and general lines of seeds, both flower and vegetable. Profusely illustrated. The greenhouses of the company cover 155,000 square feet.

McCRAY REFRIGERATOR CO., Kendallville, Ind.—"Refrigerators for Flower Shops" is the title of a catalog which aptly describes the contents. It is a very handsome publication of 16 pages and contains, besides descriptions of the different kinds of refrigerators made by the company, some interesting information in regard to florists' refrigerators. There are many fine illustrations, including some of store interiors of well-known florists.

RALPH M. WARD & CO., 12 West Broadway, New York.—Catalog of Horse Shoe Brand of Products, embracing Japanese Bulbs and Plants; Formosa and Lochoo Lily Bulbs; Bulbs from France, Germany and Holland; American Callas; Azore Bulbs; Belgian Azaleas; and Bay Trees. This is a 24-page publication, 12 by 18 inches in size, and contains much valuable information in regard to Lily and other flowering bulbs. The Japanese section occupies the greater portion of the book, and the illustrations are very fine, including many field and warehouse views from Japan, and greenhouse interiors at home. A fine line of Japanese Nursery stock is listed and described, and Japanese canes and poles for staking are listed and the methods of handling them illustrated. Messrs. Ward are the American representatives of Seltaro, Aral of Yokohama, Japan, and Martial Bremond, Ollioules, France.

Lycoris Squamigera or Amaryllis Halli

(The Magic Lily of Japan)

A perfectly hardy Amaryllis, producing beautiful pink flowers. One of the hardy Amaryllis never widely introduced and almost lost to floriculture.

Lycoris squamigera produces in early spring foliage which grows until July, when it ripens off and disappears, and one not familiar with its habits would think the bulb had died, but about a month later, as if by magic, the dower-stalks spring from the ground to a height of 2 or 3 feet, developing an umbel of large and beautiful lily-shaped flowers 3 to 4 inches across and from eight to 12 in number, of a delicate lilac-pink.

As the bulb is perfectly hardy without any protection, it can be planted either in the Fall or Spring. Cover the crown about 4 inches. Very useful for cut-flowers in the Summer.

Strong blooming bulbs, 10c. each, 75c. per 12, \$5.00 per 100.

LYCORIS SQUAMIGERA

SUBSCRIBERS PLEASE NOTE.—The Florists' Exchange is a trade paper, and its advertisements are quoted wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

Baltimore

Business has fallen off considerably and many cut flowers and pot plants are thrown on the market, inferior grades being offered at a very low figure. The weather is accountable for the condition. Rain for the past several days has handicapped business in nearly all lines. The seed business has taken a big drop due to the fact that ground is in very bad shape and cannot be worked for a few days.

Trade among the retailers is dull, excepting for funeral work. At the city market many plants are taken home just as brought in, and the street men stay a little later than usual trying to dispose of their stock. The street fakirs are out in full force, but business has been slow even with them. So far as can be learned we have not been hurt by the frost and weather conditions and crops are in apple-pie order.

August Eberhardt had an attractive stall in the market last Tuesday, showing 1000 Pansy plants on an incline. The appearance was enough to catch good trade.

Conrad Hess, is offering a choice lot of various Ferns, but they move slowly. C. E. Smith & Co. have an attractive window display of seasonable blooms and nursery stock.

The Holland is making fine window displays.

J. Bolgiano & Sons are certainly making a hit in the local newspapers with details of various bargains in potted

plants. Their store from early morning until a late hour is crowded with a continuous stream of buyers.

Griffith & Turner Co. had a record-breaking season this year in all branches of their business. Many private estates in this section were supplied with the G. & T. well-known seeds.

S. L. Lamber Co. are showing a complete line of lawn mowers and their sample room of "set-up" articles makes quite a hit.

Club Meeting

A regular meeting of the Gardeners and Florists' Club of Baltimore was held last Monday night, April 26, in the Club rooms over the Florists' Exchange. Owing to the unfavorable weather conditions the attendance was small. However, those present did not regret turning out, as an interesting meeting was held and considerable business of importance was discussed. Some hot discussion was on hand and the question box brought forth many matters of interest. R. J. Irwin of Philadelphia was elected a member of the Club. James Hamilton of Mt. Washington, Md., showed two vases of Darwin and Tournesol Tulips that attracted attention. The smoker that is to be held May 23 next should provide a royal good time for the members and their friends. The committee is doing its utmost to make it a big success.

Bowling

The ladies' bowling teams of the Washington and Baltimore Clubs made the following scores at the Garage Bowling Alleys on Tuesday night:

Washington 544-480
 Baltimore 405-466
 J. L. T.

POUGHKEEPSIE, N. Y.—The plant of Charles Mitchell, greenhouse contractor, was damaged to the extent of about \$1000 on April 18.

FOUNDED IN 1888

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the Trade in General.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter.

Published every Saturday by the A. T. De La Mare Ptg. and Pub. Co., Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. De La Mare, president and managing editor; Jas. H. Griffith, secretary; David Touzeau, treasurer. The address of the offices is the address of this paper. Short address: P. O. Box 1697, New York. Telephone 3765-6 Beekman.

PRINCIPAL OFFICES

Chicago: Margaret T. Flint, room 614, No. 60 Wabash Avenue; tel. Randolph 2000. Office hours: 9.30 to 12.

Boston: Robert Cameron, Cambridge, Mass.

Philadelphia: Appointments can be made or letters addressed to Jos. H. Sperry, our representative, care of Keystone Hotel, Market st., near 16th, for Mondays and Tuesdays.

Yearly Subscriptions.—United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.50. Payable in advance. Remit by Draft on New York, Post Office or Express Money Orders; if paid in cash please register letter.

The address label indicates the date when subscription expires and is our only receipt therefor.

Registered Cable Address: Florax, Newyork.

Telegrams.—Telegrams received in this office up to 3 p.m. Wednesday, containing changes in advertising, will receive attention for the issue of the Saturday following; likewise, telegrams having informative matter intended for our news columns will be received up to Thursday 9 a.m. News telegrams should be forwarded after 6 p.m. Wednesday and marked "Night Press Message, Collect." These will be forwarded by the Telegraph companies at their newspaper rate, providing the material so forwarded contains news for the paper.

The Florists' Exchange is a trade paper, and its ads. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

A Call for a Gladiolus Convention

Sometime ago I sent a personal appeal to the most prominent Gladiolus enthusiasts in this country, for the purpose of ascertaining if a Gladiolus Society was really wanted. Replies received indicate clearly that a Gladiolus Society is not only wanted, but is absolutely necessary. I enclose with this letter extracts from replies received, which show the feeling of the American growers.

For the purpose of forming such a Society, I now call for the first formal meeting, to take place at Horticultural Hall, Boston, Mass., May 27, at 3 p.m. All those interested in the culture of the Gladioli are hereby invited to be present at this meeting, and to help in the formation of what, no doubt, will become one of the most influential societies in America.

Your readers are kindly requested to suggest a suitable name for this Society, and such suggestions should be addressed to MAURICE FULD, Sec. pro tem. Boston, Mass., April 23, 1910.

Mr. Fuld encloses copies of letters from the following growers and specialists, nearly all of whom express themselves unqualifiedly in favor of and considerably interested in the proposed organization:

Umpleby, John H., Lake View, N. Y.
Lewis, E. B., South Easton, Mass.
Brown, E. Stanley, East Moriches, N. Y.
Crawford, M., Cuyahoga Falls, O.
Kunderd, A. E., Ft. Wayne, Ind.
Stevens, F. H., Saginaw, Mich.
Miller, E. S., Wading River, N. Y.
Barnes, E. T., Spencer, Ind.
Larroe, J., Cohocton, N. Y.
Cowie, Arthur, Berlin, N. Y.
Pryal, W. A., Oakland, Cal.
Austin, Mrs. A. H., Mayland, O.
Hendrickson, I. S., Mgr. J. L. Childs, Floral Park, N. Y.
Massey, W. F., Salisbury, Md.
Leatherman, D. W. & Son, Anderson, Ind.
King, Louisa, Alma, Mich.
Macomber, E. R., Woodford, Me.

The prevailing ideas among the writers find expression in the following statements: If a sufficient number of people enter into the organization this should be the means whereby many things could be straightened out that need rectification. * * * Wonderful progress has been made in the popularizing of this flower during the past ten years, and especially during the last five years, and it is certainly gaining prestige and becoming more popular as the new and artistic varieties are being cultivated and placed on the market. * * * The time has come when something must be done by the trade to avoid the naming of so many inferior varieties as well as giving different names to the same variety as is being done at the present time. * * * For the best interests of all growers let us have a Gladioli society just as soon as possible."

English Horticultural Notes

The International Exhibition

It has been decided to hold an international horticultural exhibition in London in the months of May and June, 1912. There has been no such international meeting in London since 1866, when an exhibition resulted in great financial success, though the first few days' results gave rise to great anxiety on this score. That exhibition was mainly supported by British nurserymen, and there were comparatively few foreign firms figuring in the enterprise. Another "International" was proposed for the year 1879, but owing to a big show falling due at Amsterdam, and the recurrence of the Great Quinquennial Exhibition, the London show never materialized. The one now projected is likely to cost between £12,000 and £15,000, and will be a great affair. We hope to see America well represented. No more particulars can be given up to the present.

The Florists' Exchange in England

Readers and supporters of the EXCHANGE may like to know that their favorite trade organ turns up everywhere in the horticultural circles over here. I see Mr. Engelmann quoting my remarks on his new Carnation Carol in one of his advertisements, and all the "live" firms get a copy regularly. This is good for them, for the paper, and for the paper's advertisers. Certainly the proprietary of the EXCHANGE deserves the assistance of both American and English florists and nurserymen for the consistent encouragement it gives to international affairs. Its "international exhibitions" in the form of news and pictures come oftener than the one I have just made note of.

American Florists Criticised

I shall use no stronger phrase or headline than this; but shall leave my readers to say what they like, after me. I have before me a splendidly-written essay (which I also heard read by the author some months ago) on the subject of "Renaissance Gardens." It is by Thos. H. Mawson, garden designer, who is quite the leading exponent of his particular phase of the craft in England, who also laid out the gardens around the palace of the Peace Congress at the Hague, Holland, and whose work is also well known in the United States. Mr. Mawson, in the course of his discussion of the merits of the Renaissance gardens, and of matters of taste generally, quotes from a letter from America. He says: "I read a letter the other day which shows to what a pitch vulgarity descends when men follow their own novelties undisciplined, and what silly lengths it leads them to; and it serves to show that the rule of order and discipline always come out at the top. After all, our extravaganzas and novelties produce in the end the longing desire for Renaissance order and sanity."

These are his own comments; but the following is the part that pours contempt upon the florists. Mr. Mawson quotes it thus: "Here in America is the home of the grotesque as well as of the picturesque. Aristocracy and democracy jostle each other, and aristocracy gets the worst of it. We had a boiler explosion here lately, and among the emblems sent to the victims' funeral was a floral clock set for the hour of the explosion; a theatrical treasurer's club sent to a funeral a floral pass, 'Admit one.' Gates ajar, open windows with plaster doves thereon, and tawdry wire frames showing through pillars of red and yellow flowers, all tend to vulgarize funerals and to inspire the words, 'No flowers.' When the city council is inaugurated, then are the florists busy. Gigantic keys, Indian clubs, desks, chairs—all are in hand; the natural flowers distorted to suit perverted tastes. We need a Renaissance in art to strike the florists here, and strike them hard."

It is not for me to say whether these criticisms, or strictures rather, are necessary—I have my own opinion; but at any rate, there they are.

A New Book

Though new books on various sections of gardening are appearing almost every week, the one I wish to notice is that famous work, "A History of Gardening in England." This is the third edition, and the price is very reasonable indeed—12s. (under \$3). The authoress has had the best of opportunities for getting at ancient English manuscripts, and has done her work with great pains. The later chapters on nineteenth century gardening and on the gardening development of the last twenty years, are valuable and interesting to every one.

A Great Lily Nursery

When Mr. W. H. Page of Tangley Nurseries, Hampton, near London (who is another reader of the EXCHANGE) told me that he was a specialist in *Lilium longiflorum*, I felt a bit surprised, but a short chat with him soon proved that there is much to master in the details of what constitutes the best possible type of Lily bulb. He and his four brothers have a huge acreage of glass at Hampton and grow mainly *Liliums*, *Roses*, *Carnations* and *Spring bulbs* (*Daffodils*). They buy all the new American novelties in *Carnations*, and have the best in stock. They have given the bench system of *Carnation* culture a fair trial, but, in common with our best growers for *Coveat Garden*, they are going back

to pots. In England, our Winter light is too dull, and our conditions so moist as to require a different system to that which suits America. Mr. Page and his brothers buy great quantities of *Lilium longiflorum* (Harrisii) from Japan each season, and from their 25 years' experience they now know just what to buy and where it can be procured. Indeed, they keep their Japanese agents employed farming their special strain of bulbs. The result of this great care is that their flowers are, perhaps, the finest that go to London, and even some of the nurserymen are supplied at second hand from the Messrs. Page Bros. The bulbs are grown on slowly and as cool as the conditions allow, three bulbs in an 8-in. pot. They are never crowded in growth, and are kept absolutely free from fly. The paths and houses, I noticed, were kept well damped even in March, and a nice buoyant atmosphere prevailed. A little liquid manure is given toward the end, when the buds are swelling. The largest consignment at any one time, sent by Mr. W. H. Page himself, from his own nursery (each brother's business is distinct, though side by side), was 1050 buoches, 12 stems in a bunch, being a total of 12,600 *Lilium* stems at one cutting! I should like to know how that compares with some of your best records either in New York or Chicago. This cut was for Christmas, last year. At the time of my visit, 30,000 pots were under way for the Easter season. Mr. Page grows his own *Narcissi* bulbs for forcing, but the prices have ruled very low for forced *Daffodils* in recent years, owing to the large importations of flowers from France, the Channel Islands, and Scilly (off Cornwall). Nevertheless, the number of *N. ornatus*, the fine form of Pheasant's-eye, which he forced in the season of 1908, was 660,000; but the number varies. In 1909 it was down to 220,000, with a quarter of a million *Golden Spurs*.

Mr. Page has a new *Geranium* named *His Majesty*, and if Mr. Richard Vincent of White Marsh has his eyes open, he will at once look after this.

J. HARRISON DICK.

Books Received

THE GOLDFISH AND ITS SYSTEMATIC CULTURE. By Hugo Mulert Octavo, cloth, 150 pages.

This is a new and revised issue of a well-known work, the author having been a national figure in this particular line for the past forty years. The book contains a colored frontispiece, a portrait of the author, twelve plates on water color paper showing outline drawings of goldfish ready for painting in colors, and many half-tone illustrations from nature; also diagrams of aquariums, enemies of the goldfish and other designs necessary to illustrate the text.

The author claims as his own the originality of keeping and breeding of goldfish described in this work, which has been translated into four languages, and is today used all over the civilized world as the acknowledged authority on the subject of which it treats. Repeated revisions of this book have made it, we venture to say, as complete a work as can possibly be written, and therefore, the subject matters covers practically everything which can be made known in regard to the care, handling and propagating of these pets of the household and of the ponds.

Part 1 contains five chapters on the "Goldfish and its Types," including their History; Part 2 is devoted to "The Aquarium, its Construction and Care"; Part 3 deals with "Ponds and their Construction," and includes full details in regard to the Propagating Bed and the Rearing, Storage and Winter Ponds; Part 4 has to do with "The Propagation and Care of the Goldfish," giving this information to the most minute details; Part 5 treats on the "Enemies and Diseases of the Goldfish," Requisites, Tools, etc. This is followed by an appendix which is additional to all previous editions, and describes the proper way of handling food to fish, with a chapter on plants that "need watching," culminating with sundry directions pertaining to information not given in the body of the book.

Mailed, postpaid, to any address on receipt of \$2.00. Orders filled by The Florists' Exchange.

GARDEN GUIDE: A Practical Handbook for all Garden Lovers. By Walter P. Wright. Publishers, Headley Bros., Bishopsgate st. Without, London, E. C. 12 mo., cloth, 160 pages, illustrated with diagrams and a few leading halftones.

This is a remarkably interesting book by a well-known horticulturist, and whilst its cultural directions are intended for the climate of Great Britain, there is so much additional information in its contents as to make the book well worthy of recommendation by florists and seedsmen on this side to their amateur customers. The author states that in the present work he has set himself the task of showing in the clearest language that can be chosen, and with the plainest illustrations which can be prepared, how to start gardeniog economically and how to conduct it with efficiency. "I have stated the cost of everything, from a hoe to a greenhouse. And I have used tables freely so that the amateur can get at what he wants by the shortest of

cats. And I have devoted paragraphs to the principal plants in alphabetical order."

The title is inclusive, and a summary of the contents would but prove that fact.

The book is interesting, primarily because the amateur will find the desired information with very little trouble, the work being "boiled down" materially so as to make this possible. Persons acquainted with the process of condensing information will understand fully the difficulty of Mr. Wright's work in this direction and appreciate the results he has accomplished.

Particularly valuable chapters are those on How to Plan Gardens, Border Flowers with lists and descriptions of the plants best suited for the purpose. A chapter on Annuals and Biennials is exceedingly condensed, but informatively valuable; the chapter covering the Lawn or Grass Plot is well treated and deals with making same from turves as well as from seed. Plants to be Grown under Glass, Insects and Diseases and Fruit and Vegetable Culture are each given their deserved attention.

Naturally, a book of this same character, written expressly for climatic conditions on this side, and as well, giving the prices of labor and implements, would be more valuable than the one we are speaking of, but as this latter is not available in the same condensed form and low cost, we heartily endorse Mr. Wright's book. (Copies can be had from this office, price \$1.00, postpaid.)

OUR READERS' VIEWS

Editor The Florists' Exchange:

We notice an article in your edition of April 23, from W. F. Massey, condemning the idea of treating trees with capsules, and branding the idea as "nonsense." As we are the only ones and the first ones to put forth this idea we feel that this is a blow at our business and we are surprised that you would publish it without some inquiry or reference to some one who knew.

We are not interested in what Mr. Massey may think of our system of fertilization, but we do want to put ourselves right with the readers of The Florists' Exchange, and we wish to say, for your own information, that we have evolved a new idea in the matter of treating plants and trees. If we were all like Mr. Massey the world would never have made a step forward, and our invention, like all others, has its unbelievers and its enemies, but when these statements come from narrow and foolish persons we do not believe it is the desire of The Florists' Exchange to publish anything to the detriment of any legitimate business.

Our system is the result of five years of study and experiment along a new line or new idea in the matter of plant food. We combine the elements of plant food with an anti-toxin in a base which holds them together until all the plant food is taken up. We do not claim to kill the scale; what we do claim is set forth in our catalog in the following words: "Experiments have shown that trees with the San José scale and yellows have been materially benefited, and by the additional use of an insecticide spraying compound at the earliest and strongest flow of sap, in March and April, the disease can be controlled."

If Mr. Massey was really interested, instead of prejudiced, we could very soon convince him that the world is making steps forward in the fertilizer business as well as in other lines. We enclose herewith a catalog in the closing pages of which you will find some recommendations from practical men.

You are at liberty to publish this letter and we hope you will publish enough of it to set us right before your readers, as we believe the article above referred to will damage our business. We will be glad to furnish you any further information or evidence that we are able to accomplish all we claim.

THE PLANT AND LAND FOOD CO.,

J. H. MILLER, Sec. & Treas.

Baltimore, Md., April 26, 1910.

[Prof. Massey, in his statement (page 741) to which our correspondent takes objection, was, no doubt, misled to some extent through the original account of this new plant food, printed on page 711, which read: "The food is also said to contain an anti-toxin which will remove the scale and fungus growth on plants and trees," etc. Mr. Miller's explanation herewith materially elucidates that erroneous qualification. Readers of The Florists' Exchange are all intensely interested in whatever fertilizer preparations are found to be superior

in their results, and we have no doubt that this particular one will be tried out when it is generally made known.

The Florists' Exchange stands for fair play and a free expression of opinion at all times; its readers look to it for the truth—and generally get it. We note among the recommendations for this new plant food a warm endorsement for it from a well-known florist and gardener, C. L. Seybold, Sept. of Carroll Park, Baltimore, whose opinion is entitled to respect.—Ed.]

Fire at the A. H. Hews Factory

On Saturday night, April 23, at 10 p.m., a fire occurred at the A. H. Hews Company's flower pot factory, North Cambridge, Mass., which if it had not been handled quickly, would have proved a very serious one. A carload of hay which was standing on the railway near the factory was set on fire by some one; in a few minutes there was an immense blaze and the flames soon ignited the storage house which was close by. The Cambridge firemen responded quickly and the damage done to the building and the goods it contains was only slight.

They have been very busy at the pottery this year and, now that the Spring season is closing on large deliveries, especially good business is reported, far exceeding previous seasons.

We are pleased to see that E. L. Pierce, of this company, has improved very much in health and that his Southern trip has given him renewed strength, and to see him back at business again.

R. C.

Anemone Japonica Alice
From Bindekunst.

Anemone Japonica Alice

This novelty is a remarkable improvement over the well-known variety Koenigin Charlotte (Queen Charlotte). The color of the petals is a shimmering lilac, while the center is a fresh carmine pink, surrounded by the stamens in a thick golden yellow circle. This generally pleasing effect is heightened by the silvery band bordering the petals. The flowers rise well above the leaves and appear in great profusion. Altogether Anemone Alice seems eminently suited to the purposes of the florist for border as well as for decorative work. It was originated by the well-known firm of Wilhelm Pfützer of Stuttgart, Germany.—Text and illustration from Bindekunst.

Resolutions on the Death of Edward Hatch Adopted by the Gardeners and Florists' Club of Boston

WHEREAS, The Supreme Ruler of this universe has seen fit in His infinite wisdom to call to his eternal rest our well beloved friend and brother, Edward Hatch; and

WHEREAS, Edward Hatch was a man worthy of our highest esteem because of his nobility of character, his blameless life, his great heart, his ever-ready sympathy and charity to the poor and needy, therefore

BE IT RESOLVED, That we, The Gardeners and Florists' Club of Boston, while bowing reverently to God's will, do so with hearts full of sorrow at the loss we have sustained in the death of a friend so dear, one who stood ever ready to help with wise advice and unselfish aid the members of this organization which he loved so well and served so faithfully as treasurer for many years.

Edward Hatch spoke few criticisms of those with whom he disagreed; he said no evil things of others; he was remarkably free from resentfulness; his noblest virtue was his willingness to forgive and his ability to forget; and no opportunity was ever lost by him to give a kindly word of praise for anyone he liked.

His genial presence we shall all miss, but his memory will be ever with us, and his name will always shine as a bright star in the list of our departed members. Our Club will not forget his spontaneous generosity as displayed on very many occasions. No man ever won and retained so thoroughly the affection of our members as did Edward Hatch. He was the idol of those who knew him best.

RESOLVED, That these resolutions be inscribed in the records of the Gardeners and Florists' Club of Boston and that a copy thereof be sent to his bereaved family.

Caution to Subscribers

Recent advices reach us that a fraud is again on the road, this time operating in south-eastern Pennsylvania, endeavoring to collect subscriptions for the trade press. We beg to advise Florists' Exchange subscribers, repeating what we have said over and over again, that any representative approaching them from this paper will always be able to show full credentials, and that no money should be paid on any account to unknown men presenting themselves as agents of The Florists' Exchange unless they produce such credentials.

Obituary

John Brantford Alcott

John Brantford Alcott, widely known as a grass expert, died at his home in South Manchester, Conn., April 23, of dropsy. He was born in Manchester in 1830. He traveled extensively in this country and abroad and had made a special study of Grasses, having in his garden, it is said, species of Grass from almost every quarter of the globe. He laid out the Grass gardens of the Smithsonian Institute, Washington.

James Bolling

James Bolling, florist, of 884 Montgomery st., Jersey City, N. J., died at his home on Saturday, April 23, of infirmities incident to old age, after an illness of one week. The deceased was born in Kent, England, 85 years ago, and early in life learned the florists' business. He had resided in Jersey City, where he conducted his business, for 40 years, and was highly respected by all who knew him. His wife died about two years ago, since which time his health gradually failed. He is survived by a son, Chas. J. Bolling and two daughters, Emma M., a school teacher, and Mary E. Bolling.

George W. Williams

George Washington Williams, treasurer of the W. E. Barrett Co., seed and agricultural implement dealers, Providence, R. I., died at his home, 28 Sycamore st., in that city on April 24, after a three weeks' illness due to heart trouble.

Mr. Williams was 74 years of age and had lived all his life in the city of Providence or its vicinity. He was a descendant of the founder of the city, Roger Williams. After a public school education supplemented with collegiate and business courses at prominent institutions he, when 18 years of age, entered the seed and agricultural implement house of Burdick & Barrett which had been established in 1848, and five years afterward he bought Mr. Burdick's interest and the firm name became W. E. Barrett & Co. After Mr. Barrett's death in 1891 the concern was incorporated as the W. E. Barrett Co., with Mr. Williams as treasurer and his son, George F. Williams, secretary.

The deceased was prominently connected with business and social affairs in his city, and at the time of his death was president of the Rhode Island Poultry Association, treasurer of the Prudence Land Company, vice-president of the Warwick Club and the Rhode Island Business Men's Association, member of the Providence Board of Trade, Commercial Club, West Side Club, Squantum Club, Rhode Island Yacht Club, Order of Founders and Patriots of America, and of the following Masonic bodies: What Cheer Lodge, Calvary Commandery, Palestine Temple of the Mystic Shrine, and of the Scottish Rite bodies to the 32d degree.

He was twice married, his first wife dying in 1876 and the second in 1895. He is survived by five sons, George F., Leon J., Edward B., Clinton N., and Ralph E. Williams, and one brother, Francisco C. Williams of Pawtucket.

The funeral was held on Tuesday afternoon, April 26, and was largely attended by friends and business associates. The floral tributes were beautiful and numerous.

Greenhouse Construction and Heating

Article III—Continued

Side Hill Houses

Our Fig. 15 shows the "Ridge and Furrow" type of house adapted to what is known as "Side Hill Houses." The illustration shows these houses constructed on a hill having a southern exposure with a slope of about 25°, the eaves and gutter line being about 7 ft. above grade, which is the minimum elevation that should be given.

about 8 ft., but the number of these columns could be reduced without adding to the weight of the roof bars by a proper system of combined trusses and columns. In this way it would, no doubt, be possible to dispense with at least two of the columns, but this matter will be treated later when considering the matter of construction.

The principal difficulties met with, apart from the matter of additional work of caring for the plant, is in connection with

Ventilators are generally placed on the south side of the ridge only, unless in the case where the houses are made of considerable width, when ventilators are placed on both sides of the ridge.

The gutters between the houses should be made of small dimensions and relieved of water at frequent intervals. The eaves and the gutters of these houses should be constructed higher than the usual form of "Ridge and Furrow houses," so as to secure as much cubical contents in proportion to glass as possible, as this very much aids the matter of heating, and as well increases the distance of the roof ventilators above the plants.

In many cases the crops in these houses are grown on the ground but,

benching and heating. Where the crop grown demands a raised bench the system of benching as shown will give good results.

The matter of heating would probably be the most difficult to deal with owing to the fact that, the natural tendency of the heat being upward, it would need considerable care in the distribution of heating surface to maintain anything like an equal temperature of atmosphere between the lowest and the highest bench.

Another difficulty in the matter of heating would arise from the fact that there would be such a small proportion of cubical contents to the glass surface. This, of course, can be remedied somewhat by keeping the roof from 10 ft. to 12 ft. above the grade.

Where it is desired to erect separate houses on a side hill location if the grade of the hill is not too steep it is possible to erect very good growing houses on the lines shown in Fig. 17.

This shows two houses erected on a grade of about

when beds are necessary, they are generally built so that the tops of same are level, but stepped so as to conform to the grade. This gives practically the same result as the $\frac{3}{4}$ span house. The plan and general arrangement for a range of this character would be similar to Fig. 5, shown in previous article.

Fig. 16 shows another form of "Side Hill Houses" which is a little unusual but is particularly adapted to a steep grade of about 7 in. to the foot. As before mentioned, it is rather an unfortunate condition to have to contend with such steep grades, but where the only land available is of this class, with a southern exposure, excellent results can be obtained from a growing standpoint with a house of this character.

The house shown in the illustration measures about 34½ ft. from the south side to the center of ridge on a level line. The roof surface is, therefore, equivalent to a little more than one-half of a house 69 ft. wide, built on the level ground. The vertical supports of the roof are shown so that the span of the roof bars would be

3 in. to the foot and set far enough apart so that the shadow from the ridge of the south house, with the sun at an altitude of about 25°, will strike on the sill of the north house; both the south and the north walls are of the same height, the result being that the house is almost a cross between what is known as the "¾ Span House" and the "Shadeless Ridge." In such a location it is possible to build separate houses with much less waste of space between them than in the case of the houses built on the level, as they can be placed much closer together without the south house shading the north house. With specially high side walls such a house could be used to good advantage for growing American Beauty Roses.

In the foregoing we have considered almost every form of greenhouse with very little reference as to the size, but as this latter phase is a most important matter, and as an intelligent decision should be reached in this connection before construction is started, we will next consider the question of the size of houses.

(To be continued)

GREENHOUSE CONSTRUCTION and HEATING INQUIRY DEPARTMENT

I have a place where I could erect two greenhouses, 30' by 200'. Could you give me any idea of the cost of such houses, which are to be suitable for Lettuce, Cucumbers, Tomatoes, etc?—W. T. R., Long Island.

You could purchase all of the wood and iron material for two 30 ft. by 200 ft. iron frame houses for about \$2000 to \$2500. You would require about 360 boxes of

glass, which, of course, is a very uncertain commodity as to price at the present time, but it could possibly be purchased at \$4.25 a box, which would be \$1530. The heating apparatus would cost approximately \$2000 to \$2500. This foots up \$5530 to \$6530, to which would have to be added the cost of erection.

If you could do the work of erection yourself you could save a good deal. However, if you contracted for the erection, painting and glazing of these two houses, it would cost you in the neighborhood of \$1400 to \$1800, and the work could be turned out so as to give you your houses ready for planting in sixty to ninety days, depending on how soon you placed your order. The longer you delay at this time the longer it will take to get the work, as manufacturers are filling up fast.

You will notice that the above does not include benches, the cost of which would vary according to the character of them; but if you should require benches they would possibly cost from \$450 to \$650 for pecky Cypress or tile benches.

Of course all of these figures are only approximate.

as the conditions under which the work would have to be constructed and the quality of the material used would cause considerable variation in the cost.

JOHN A. PAYNE.

Sixty Years of Retrospect With Notes by the Way

By Stephen Taplin, Nurseryman and Florist

Besides the blooming plants required to keep the conservatory and plant houses gay at all seasons, it took no end of space to keep up a supply for the rooms in the house, while the family was at home. There were all kinds of dishes, vases, stands, boxes, etc., in china, glass, marble, silver and other material, for which plants must be grown in certain sized pots, from 3 in. up to any size. Many plants which we used for that purpose were only good for two or three days, then they would have to be changed for fresh ones. In winter and early spring bulb stock was very useful, small Eriens and Euparis, Mignonette, Heliotrope and Violets were always in demand, as well as Gloxinias, Gesnerias, and Achimenes, both for rooms and plant houses; and so many other things that in some cases I have forgotten what they are if by chance I hear a name. On the terraces in front of the windows there was large marble vases, boxes and stands. These would be filled in the Fall with specially grown green and variegated shrubs, which would be replaced as Spring advanced with small fruit and flowering shrubs brought forward under glass, and which were often ruined before the week was out by frost. The next filling would be Rhododendrons, Kalmia and hardy Azaleas, all of which had been brought forward in intermediate houses. These would finish up the season till the family left for London.

At the end of the London season the family would go to Dunroven Castle, Scotland, for a few weeks. Fruit, flowers and vegetables were sent to London every day while they were there.

I have not gone into the fruit forcing department, which was on an equally extensive scale with the plant department. I was not engaged to any part of the forcing. The only opportunity I had of seeing much of that was on Sunday. Then, as my work had to be finished by 10 a.m., I usually finished up the day with some of the fruit men, as they would be kept busy till 4 or 5 o'clock. In a general way, the young men were nice sociable fellows. Drunkenness was unknown among them. If a new one came who considered himself of some importance he would find in a short time that some one else knew as much as he did, and the conceit was soon taken out of him.

About the time my second year was up the gardener came to me and told me he would put the whole of the plants in my charge, as the man who was then in charge of the soft wood plants was not a success, having no idea of using men to advantage, and his work was always behind. I thanked him for his confidence but declined to take the responsibility, as I knew the material I should get as assistants. He did not like my refusal and told me he had put me forward faster than any man on the place; but I wanted a change and outside work.

At the end of the month I left Trentham, with a letter to Veitch of Chelsea, London, hoping to be employed in the Orchid department. I wanted to get into the outdoor specimen grounds in one of their branches just outside of London, but I found on going to Chelsea there was no chance of that till later in the season.

The next day I went to see some friends at the place I left before going to Trentham. They were holding a local show the following day, a cottagers' show, and about all the gardeners for ten miles around would make an exhibit to add to the attraction. The show consisted of plants, cut flowers, fruit of all kinds, both from under glass and open ground, vegetables, and all kinds of floral designs. The exhibits of the cottagers, amateurs and professionals were in separate classes. There was as much excitement among the cottagers over the first prize for a collection of their products as there would be among racing men over the winner of the Derby. A country show was the place to see the big Gooseberries and other monstrosities which are often read about and not credited. I do not know of anything promoting as much interest, fun and amusement as could be found at a local show, when it was conducted as it was at that time. In some cases it was almost dangerous to judge the cottagers' collections, as they all thought they were a few points ahead of the others. One old gardener on that committee said he knew I could fight through it all right, so I took charge of the class covering those collections. As three judges were appointed for each class we came out all right; we had neither fight nor hard words. We not only got through our class in good time but helped out with two other classes that were behind, which enabled all the judging to be finished by noon when the gates were opened to the public. Judges were not supposed to disband till 2 p.m., in case of any dispute that could be explained away, so we were conducted to a temporary office to turn in our reports and sample liquid refreshments till 3 p.m., when dinner was prepared for us and our responsibility was over.

Among the gardeners on one of the committees was a

stranger to me. He was in need of a foreman who could take charge of houses, assist in planting, laying out of grounds, etc. I was recommended to him as the man he wanted, and the next day I visited and looked over the place, and was engaged at once, he accepting a testimonial to my moral character, etc., which proved quite satisfactory. The rooms I was to live in were not quite ready and there was no suitable place for me to stop at near enough, so I put in about ten days visiting different gardens of note, such places as I could take in without paying out much in traveling expenses, as funds were very low and I had no income at that time. I walked one trip of about 40 miles with three light lunches on the road, and felt ready for a good supper at the end of the journey, about 8 p.m. I stayed there till noon the next day and saw all of interest at that place. Then I started on a 16-mile trip, ten miles by rail, and finishing the distance walking, reaching the end of my journey about 7 p.m., again ready for supper, which was all ready. That was Saturday, so I put in a good long day on Sunday sightseeing and left at 5 a.m. Monday. I then started on a 60-mile trip, a 10-mile walk and 50 miles by rail. That was in South Wales. I stayed at my destination two days and saw a lot of mountain side planting of forest trees. The second morning I left there at 4 a.m., walked 5 miles, then went by rail to Chester, to Shrewsbury and to Albrighton, then had five miles to walk. I reported for duty at 6 a.m. the next day.

That ended my vacation, the first and last I ever took. I saw lots of interesting things, had lots of amusement and some fun, but no curious adventures worthy of record. I saw many well-managed places, but not one where in some one or more important matter there had not been a dead failure, generally for want of experi-

manager of the gas plant the time and arrangements for cleaning out retorts, replacing purifying materials, etc., and all particulars as to the working of the plant, particularly of the night shift, as I occasionally detected an odor of gas in the house at night, although I kept a slight ventilation at all times. After watching a few nights I found the gas came in between midnight and 3 a.m. It then took me three nights to find out how the gas got in and the cause of it at that particular time, with plenty of ventilation on. The third day I had everything taken out and the house closed up. Then the gardener and several others came to investigate and found gas enough to choke them. The next morning the Earl and all the heads of departments came to investigate. I was then prepared to explain everything in detail, which caused some hard feelings, but my statement was so convincing that everything I suggested to them was ordered to be carried out and there was no further trouble with gas. That was the end of trouble No. 1, and everything went on as smoothly as is usual at a private place, with plenty of work and plenty of experience in the planting and care of fruit of all kinds, both indoors and out.

(To be continued)

New Plants Seen in Boston

On Saturday, April 23, there was exhibited at Horticultural Hall, Boston, by R. & J. Farquhar & Co. a new species of Clematis, from China. The seed from which the plant was raised was collected by E. H. Wilson, the plant collector for the Harvard Arnold Arboretum. If this plant proves thoroughly hardy it will be a great acquisition. Mr. Farquhar says that he

The Influence of Halley's Comet on Plant Growth As It Nears the Earth.—As Portrayed by Moeller's Deutsch Gaertner-Zeitung

ence in what might be called trifling points.

The place where I was then starting in as general foreman covered about eight acres inside the walls, all there was left of the old place. The fruit and plant houses were all inside the walls, and the flower garden and pleasure grounds some distance from the walled garden. All the fruit trees on walls and borders were worn out and had to be replaced with new trees. New Grape and Peach houses had to be planted, in fact it took about two years to replant everything. They had one house of Pines started and two houses of Grapes planted. The other houses were furnished or planted as fast as they were ready. Among other improvements on the estate was a new gas plant, just outside of the walled garden, for furnishing light for the mansion, garden and farm. When I saw it I spoke of it as being dangerous so near the plant houses. I was assured that all sewers and drains were so perfect that there was no danger of damage to anything. There was one house just finished and filled with assorted greenhouse plants. Three days later I found the leaves dropping from the hard-wooded plants, the blame for which was laid to my treatment, neglect in watering, shading, etc. It was not a bright prospect for me at the commencement, but as I had so recently been through the gas mill I knew it was gas all right, although to convince others I was right meant trouble. In the first place, I found out from the

grew plants of this Clematis out of doors and left them out all of last Winter, and they retained their foliage and look all right at the present time.

It is a climbing plant, with dark green, leathery, trifoliate leaves. When the flowers are in bud they are of a pink color and when they open they are pure white, 3½ in. across. They are in axillary clusters of about four flowers in a cluster. The pure white flowers are exceedingly fragrant and would remind one of the fragrance of Stephanotis flowers. Even if the plant does not prove hardy it will make a good pot plant for florists' use, as if the plants only bore half a dozen flowers they would be enough to perfume a whole room.

This species of Clematis is closely related to the one Veitch of London is sending out under the name Clematis Enandii, which was collected by Mr. Wilson. The Veitch plant has flowers 2 in. across, and in their description there is no word about the flowers being fragrant. Awarded first-class certificate of merit.

Another of Mr. Wilson's new plants was exhibited by Walter Hunnewell of Wellesley. This was a new Rhododendron (Azalea) Indicum, closely related to the variety Kämpferi, and much resembling it in the color of its flowers. The seed of this plant was collected at an elevation of 5000 ft. and it is thought, the new-comer should prove hardy here. The committee awarded it honorable mention.

Carnation Canary Bird

See description, page 368, Feb. 26, 1910.

Among the Growers

Queen City Floral Co., Manchester, N. H.

The Queen City Floral Co., Manchester, N. H., the greenhouse plant of which was formerly the property of A. G. Hood but is now owned by the S. H. Mead Co., is a progressive concern, and the establishment is the largest in Manchester and vicinity. The greenhouses embrace 40,000 sq. ft. of glass, and the equipment is modern in every way. The location is easily accessible, being on the Lake line of the electric road. A comfortably appointed waiting room, from the bay window of which the approach of cars may be observed in ample time to catch them, is a feature of the establishment.

A 340 ft. house is devoted entirely to the cultivation of Carnations, and contains about 14,000 plants, covering some twenty varieties, among them Rose Pink Enchantress, Winsor, White Perfection and Harry Fenn. Among the newer varieties is Canary Bird, the handsome yellow introduced this year by Henry Schrade of Saratoga Springs, N. Y.

Other houses are devoted to Roses, the stock including most of the standard varieties, and all looking well.

Other houses contain Sweet Peas, Stocks and Snapdragon, from which an excellent cut is being made.

Bedding plants are something of a specialty and a large stock has been brought along for this season's trade. Varieties suitable for window boxes are particularly prominent, and little would seem to be wanting in this direction.

Decorative plants such as Ferns, Ficus, etc., are also grown in quantity.

H. D. Darlington, Flushing, L. I., N. Y.

On a visit to the establishment of H. D. Darlington that gentleman was found among his Ericas and Acacias, his Boronias, and Epacris. Of the first two he grows some fifteen or more varieties of each.

His standard Acacias and Genistas were in excellent shape and will make fine specimens for holiday sales. System and good culture were noticeable throughout the establishment. A good-sized block of Otaheite Oranges, the plants now sweet with blooms, was observable.

Mr. Darlington grows large numbers of Geraniums also. Castellaine is grown instead of Nutt, having larger florets, a looser stem, and longer stem. Mrs. Lawrence, a salmon, is being tried out alongside of Beaute Poitevine for comparison. Other standard varieties, such as Buchner and Ricard are grown.

Louis Dupuy, Whitestone, L. I., N. Y.

If a visitor at Darlington's finds that he has tumbled into a sea of well-grown Ericas and Acacias at every stage of growth, when he gets to Louis Dupuy's greenhouses at Whitestone he finds it is only to fall into another ocean of Acacias and Ericas, and many other rare and interesting plants besides. Here is to be seen the Hydrangea Souvenir de Claine, a substitute for Otaksa, and Mr. Dupuy's two new introductions in Hydrangeas: Lorraine, a beautiful pink with immense florets; and Avalanche, a beautiful white, with much larger florets than Thomas Hogg; also an odd Japanese variety, lilaciana.

Among the Acacias, some forty varieties of which Mr. Dupuy grows, was podylasifolia, the national plant of New Zealand.

There are also to be seen here Crassula coccinea, not new, but an attractive pot plant; Gardenia radicans, the dwarf type of Gardenia; and a new Jasminum introduced by E. H. Wilson, the well-known collector.

A visit to up-to-date establishments such as Dupuy's and Darlington's, not only entertains and instructs the visitor, but he comes away more deeply impressed than ever with the fact that plants such as he has seen can be grown by no haphazard methods, and that the growers are putting brains right into the work.

H. Dreyer, Woodside, L. I., N. Y.

A visit to this establishment discloses a house of Palms in excellent condition. Another house contains a stock of well budded Hydrangeas, which promise to be ready for Memorial Day; a bench of Lilies which will be in bloom for the school graduations in June; and another of Aucuba variegata, with nice clean foliage all ready for window box use. Especially attractive is a house of Dracaena Massangeana. In one house may be seen a new unnamed sport of the Boston Fern, a dwarf variety, resembling Scottii, some large specimens being very pleasing. The very large number of fronds on each plant presents a fine effect. Kessler Bros., of 50 West 28th st., New York, who purchased the entire stock from Emil Saviole, the originator, have disposed of one-half interest in the same to Dreyer, who is growing the Fern for them, and will later give it a name.

The Dreyer estate has sold its holding of eight and one-quarter acres, on a portion of which the greenhouses stand, to the Queens County Realty Co., for \$120,000. The establishment will not be moved at present.

Queen City Floral Co., Manchester, N. H.

ent, as the Realty Co. has granted a lease on it for five years, dating from August next.

Mathew J. Leach & Sons, Providence, R. I.

When a young man, Mathew J. Leach learned the trade of a stone cutter and some years later took to farming. It was while engaged in this business, thirty-three years ago, that he took up the culture of Carnations as an experiment and a side-issue. He built a greenhouse 50x10, and sold the product to his friend and adviser, the late Robert Johnston of Providence. For some years Mr. Leach's product of Carnations blooms was very limited owing to small area of glass and lack of experience, consequently his cut was very limited, so much so that he did not go to market but once in two weeks, and then he carried his cut in a shoebox.

But through a natural liking for the business, and much hard work joined to practical experience, Mr. Leach has become one of the leading growers and retail florists of Eastern Massachusetts and Rhode Island.

I visited this enterprising establishment a few days ago and it proved very interesting to hear Mr. Leach relate how he began; the incident I remember very well. The establishment embraces over seventy-five acres. A square of three hundred feet is occupied by the greenhouses, lighting, heating and watering system, cold frames, hotbeds, cold storage and shipping, also office buildings.

The location is on the northeast border of Rhode Island, in the State of Massachusetts and town of Seekonk, on the banks of the beautiful Ten-Mile River, and only three miles from the most enterprising city of its size in New England, the city of Pawtucket, R. I., with a population of 50,000 people, and with the cities of Providence and Central Fall near by. The range consists of twelve greenhouses of various dimensions from 225x50 to 65x10.

The Violet houses are two in number; Princess of Wales is grown exclusively. The original house Mr. Leach started with has been extended to a length of 125 ft. and is used for a propagating house. Five houses are occupied principally by Carnations, and four are taken up with a line of house and decorative plants and bedding stock. One of these houses contains a bed of 500 Callas of which Mr. Leach is very proud, as he started this bed with one bulb given to him by an old friend, the Hon. George F. Wilson, some years ago.

Mr. Leach thinks that outside of his new unnamed seedling white Carnation, White Enchantress is the best white, with White Perfection next best. Mr. Leach's seedling is the finest white Carnation I ever saw and reminds one very much of a white Anemone Japonica; it is very fragrant, has a long calyx and stem and large petals and is a good keeper. It will be shown next season at the various exhibitions in commercial circles. The firm has several other unnamed seedlings and some decided novelties among them; one, a maroon in color, ought to prove a valuable variety.

The Queen does well here and is the most productive of the white varieties but smaller in size. Mrs. Thos. W. Lawson and Boston Market do remarkably well here. Victory is grown for red and is satisfactory. As it splits, Harry Fenn is to be discarded for their own unnamed maroon seedling. For pink is grown Pink Enchantress, Rose Pink Enchantress and Winsor; the latter does the best. The firm has discarded Queen Louise and Fair Maid for their new seedlings. All Carnations are grown on solid benches. The young stock looks very fine and consists of 50,000 plants.

Specializing is not the firm's aim, as they conduct a first-class wholesale and retail flower store at 15 Broad st., Pawtucket, under the management of Mr. Leach's oldest son, Herbert. They do an immense business here and all over the Blackstone Valley, as well as in southeastern Massachusetts. Consequently they grow a general line of all kinds of cut flowers (except Roses) that there is the most demand for around this section. Also a line of house plants for their trade, immense numbers of Pansies and all other bedding plants.

Mr. Leach, Sr., is a natural mechanic and has designed his houses, the setting of heating apparatus, the piping, ventilating system, mason work, etc. The plant is heated by steam and with the one pipe system, no returns, and gives very satisfactory results.

The water supply is abundant as the place is on the border of Ten-Mile River. The water is supplied by an elevated water tower of 20,000 gallon capacity, fifty feet high. They have recently installed a gasoline engine of twenty horsepower to assist in the pumping, as well as to run a dynamo which lights the entire plant and also the beautiful new home Mr. Leach has just completed. There is all kinds of good loam on the farm from a light sandy to a dark red so much sought by Rose growers. Mr. Leach's second son, Edward, fills the position of foreman, while his youngest son, Raymond, both members of the firm, is a bright young man with great mechanical abilities. He is just out of school, has patented a new gasoline engine, and is now studying wireless telegraphy; he is master mechanic here.

Mr. Leach, Sr., is 66 years of age and has served his town by holding every office in it except that of medical examiner. He enjoys himself at his business, also when he is away from it.

His business ability, popularity and capacity for work accounts for his prosperity. He is a member of the Society of American Florists and has taken part in all its conventions for a number of years; he is also an active member of the R. I. Florists and Gardeners' Club.

G. A. JOHNSTON.

Chinese Aster Sada Yakko

This novelty, which has been introduced by Damman & Co., Naples, Italy, is noteworthy for some very distinct characteristics. It belongs to the race of Chrysanthemum-flowered Chinese Asters. It grows to a height of about 27 ins. and bears 30 to 40 flowers, arranged in a fine pyramid, on erect stems. The flowers are of medium size, with somewhat tubular petals, which curve in slightly toward the center; the color is a lovely pinkish white, resembling in its freshness that of the Almond. Unlike many other flowers, the delicate color of the Sada Yakko does not fade in the sun; but perhaps the strongest recommendation of this variety is the durability of the single flowers and the duration of the period of blossoming, which is fully one month longer than that of other Chinese Asters. It is a fine flower for bouquets, on account of its long stems, and is especially fine for borders, massed in groups, or as showy single plants. The requirements for its free growth are two or three transplantings, a rich soil, air and sunlight.—*Revue Horticole*.

New Dahlia "Blaustrumpf" (Blue Stocking)

Two New German Dahlias

Among the novelties introduced by the Dahlia specialist, W. Knopf of Rosdorf-Genthin, Germany, are two that should become popular. A yellow variety, Poesie, is considered as one of the most perfect of its kind. The color at the base of the petals deepens into canary yellow which runs toward the middle into a delicate lilac pink, and then shades off again into a greenish chamois yellow at the tips. This unique lovely combination of colors makes Poesie especially suited for decorative purposes and where effects of light are sought for. The flowers are perfect in shape and of medium size. It is one of the earliest sorts to bloom, and most profuse. It grows to a height of somewhat over three feet and the flowers rise high above it on long, wiry stems.

Blaustrumpf (Blue Stocking), which will be introduced this coming May, is a dark violet blue, more pronounced in color than found in any other sort. The plant grows to a height of a little over three feet, and is a profuse bloomer, the flowers rising on stout stems freely above the leaves. Blaustrumpf, which is equally serviceable as a cut flower or for decorative purposes, may be regarded as one of the best novelties in Dahlias as to color and the uses to which it may be put.—Moeller's.

New Dahlia "Poesie"

The American Carnation Society

Registration

Registrations of new Carnations by Hy. Eleholz, Waynesboro, Pa., have been made, as follows:

Princess Charming. Helen Roseler X Enchantress; salmon pink, 3 to 4 inches; very strong, vigorous grower; very free producer of first class flowers; keeping and shipping qualities excellent.

Christmæ Cheer. Alvina X Victory; fiery scarlet, 2 to 3 inches; habit dwarf, though stems reach 2½ ft. after Christmas; extremely floriferous; will produce 100 or more blooms per plant in a season; especially fine for pot culture. Through an error this name is printed "Winter Cheer" in the judges' report in the annual report. A. F. J. BAUR, Secy.

Indianapolis, April 21.

Stray Notes from Abroad

BY T. A. WESTON

Engelmann's Carnation, Carola

Was looking fine at the R. H. S., and for size it will take a lot to beat. Five inches at present is the limit, but Mr. Engelmann's dream is of an eight-inch bloom. It will not be found in Carola, yet there is no knowing what Engelmann has up his sleeve. Mr. Page hints of a six-inch white, so United States growers must keep moving. Speaking of Carola, there is some doubt as to whether it will be a bread and butter sort. Its originator gives a shrug and remarks that it depends whether Carnations keep up to present prices. A very good dark crimson variety that finds its way into Covent Garden is Union Jack; it makes a fine companion to Britannia.

Phyllis, a New Baby Rambler Rose

There appears to be a steady influx of Baby Ramblers and a variety that will hit Baby Dorothy badly is Phyllis. As shown by H. B. May & Sons it is easily the best bright pink. That firm thinks a great deal of Phyllis.

New Auriculas

I don't know whether any of your millionaires go in for Auriculas, but if any of them were to cast their eyes upon James Douglas' beauties I fancy some of them would shout for a supply. Douglas had a choice lot on show recently, one of them (new) called Phyllis Douglas, gaining an award of merit. The individual flowers were about 1½ in. and in color a beautiful prune with a white eye. The show Auricula is not everyone's plant, but when done well it has an extraordinary attraction, particularly the green-edged sorts and the scarlets.

An International Exhibition in 1912

The proposed International Horticultural Exhibition is to become an accomplished fact. On April 5, a meeting was held at Westminster, Sir Trevor Lawrence in the chair, and it was decided to hold a show in May and June, 1912. A large and influential committee has been appointed, so it's now up to Americans to make preparations for bringing over all their greatest and best in Roses and Carnations. There will be no flies on this coming great show, for everyone who is anyone is going to work with a bang.

Failures in the "Puff" Family

Judging by things that have gone before I doubt whether California growers will have much to fear from the Frisco ladies. Over here we have had the Violet puff, the Potato puff, and the French garden puff. Each was going to put piles of money into the hands of people who liked to take the thing up, and many women calculated on making fortunes only to find that newspaper puffs are not always reliable.

New Rose Juliet

Paul & Sons of Waltham Cross have been showing a new Rose under the name of Juliet. It is one of those peculiar varieties which vary considerably in color. The flowers are full and large, freely produced and the foliage is good. The color on the inner side of the petals varies between deep shining cerise and bright pink, the reverse being deep buff yellow, which shows up strongly. As a garden Rose this variety ought to come out well, but as shown it seems inclined to come double centered.

New Ribes (Currant) Hybrids

As the result of twenty-three years of patient labor and experiment C. A. Stache, nurseryman in Klein-Tschansch near Breslau, Germany, has succeeded in growing an extraordinary new race of Ribes hybrids. He tells the story of his efforts in a recent number of Moeller's Deutsche Gaertner-Zeitung. After a few years of unsuccessful trials in planting various sorts of Ribes for the purpose of obtaining seedlings, that should produce seed, he began to cross-fertilize some Ribes seedlings, which he grafted in their second year on stout Ribes stems. Some of these yielded a very satisfactory

crop as to quantity, although the individual berries were rather small; but the second generation was more satisfactory. During the last fifteen years he has tried and discarded many thousands of seedlings, until, at length, he is in a position to say that he has succeeded in growing Ribes for seed, and also a number of varieties with tasty fruit.

He has selected three varieties out of the thousands of seedlings comprising his assortment for which he has requested the certificate of merit of the Society of German Florists; these are Nos. 870, 1107 and 102; the first two have obtained the certificate applied for. No. 870 yields a very full crop, and the berries are especially large in size. They are coal black and resemble the Black Currant in taste though without the latter's (to many people) unpleasant by-flavor. The heavy clusters ripen evenly toward the middle of August. No. 1107 is very much like No. 870, but the fruit is brownish red, and somewhat more tart in taste. Both of these sorts are excellent for preparing fruit juices, on account of their deep color, and these juices may also be used for coloring other juices, wine, cordials, marmalade, etc. Fruit subjected to fermentation has produced an excellent wine.

Mr. Stache has divided his Ribes into three classes: Class I includes all the black and brown fruit, about 300 varieties. The fruit is very large, abundant, juicy, and in taste somewhat like the Black Currant; it ripens in August. Class II, includes the red and copper-colored fruit, about 200 varieties. The fruit is more aromatic,

A 2-year branch

1-year branches

New Currant Hybrids

pleasant, and somewhat sour in taste; it ripens later than Class I, toward the end of August. Class III includes the yellow fruit, about 250 varieties: The fruit is very abundant, though somewhat small; it ripens early or late, and is sweet or sour in taste, according to the variety. Some are very much like the Gooseberry in shape and taste. An important point in favor of this section, as a table fruit, is that they ripen after the ordinary Currants and Gooseberries are gone.

Moreover they are a valuable addition to nursery stock, says Mr. Stache, for even four-year seedlings put forth five or six slender shoots, that often grow nearly 7 ft. high, and make much less work than layers or cuttings, although the development is rather slow in the beginning, taking about four years. The stem is all that a stem should be, smooth, stout, and always ready for grafting; they may be used for this purpose even in the second year, and later they are valuable as seed bearers. The plant is furthermore a very ornamental one, with its mass of flowers, and later with its brilliant clusters of fruit showing amid the fresh green of the leaves.

Mr. Stache has named his new race Heerenbeeren (Gentlemen's Berries) intimating that men especially will like this new fruit raw, as soon as it is more widely known—but it is not quite clear why women and especially children should not likewise reach for those inviting clusters when they see them.

Three Cute Little Baltimore Florists

We present the picture of three little florists who toil in the soil of their father's greenhouses, August Eberhardt, N. Baltimore st. The three are Annie I. Marie, August Ernest and William Thomas. Mr. Eberhardt is a regular city market florist who has four stalls on the go and handles great quantities of cut flowers and bulbous stock; he reports a successful Easter business.

Three Cute Little Baltimore Florists

A Municipal Window Box Competition

The city of Berlin, Germany, will be gay with window boxes this Summer. The Society for the Improvement of Transient Travel has suggested the idea of a competition, and the preliminary work is being undertaken by the Society of Florists of Greater Berlin, with the financial aid of other business associations; 10,000 copies of a pamphlet will be distributed, urging the citizens to enter into the competition. They are advised how to make their displays as diversified as possible, and to suppress the obtrusive, though popular reds and pinks. While boxes planted with Pelargoniums Meteor and the pink polatum will not be excluded from the competition, they will be relegated to the second place. A number of other suitable plants are given in the pamphlet. Prizes for the best displays will be distributed in the latter half of August.—Der Handelsqaertner.

Retail florists are invited to send us items of trade interest for publication on this page; clear photographs of good designs will also be appreciated. These latter should always be packed carefully between boards.

Mothers' Day, Sunday, May 8

As noted in our issue of April 23, the observance of Mothers' Day, in from all we can learn, becoming more general each year, and enterprising florists are recommended to place notices in their stores calling the attention of the public to the observance of the day and the reason therefor. As already noted, Mothers' Day is intended to commemorate the memory of the best mother that ever lived (one's own), and public tribute is paid through the wearing of a white Carnation.

Poor little Cupid and Psyche have been put in cold storage. It appears that the pair, graced with memories of a romance almost as pathetic as their own, were placed by a mother over her daughter's grave in Greenwood Cemetery. The trustees of that hurying ground, in solemn conclave assembled, decided that the lovers of old Hellas were undesirable citizens in the austere precincts of death, and they were forthwith banished to the ice-box of a florist shop without the gates. Poor little Cupid and Psyche! One cannot help but wonder if any of the grave and reverend trustees knew the symbol that they banished: Love awakening the Immortal Soul. Possibly, nay probably, Psyche was scantily clad, but then Truth is a very naked lady. Would not her gracious loveliness in the guise of immortality help us far better to find something beautiful in death than a thousand princely robed angels weeping over funeral urns?—N. Y. Sun.

Some day, not far off either, all Retail florists will appreciate the advantage of this Department. But why wait? Break the ice now, and write us freely. Good photos wanted.

A Memorial Day Window

Memorial Day is almost upon us again with its attendant memories, and as it is distinctly a day of mourning for our Nation's dead, something appropriate, and at the same time not gruesome, is in order for the florist's window.

I would suggest the setting as shown in the sketch for a large window 9 ft. high by 14 ft. wide; or it could be divided into two separate windows of smaller dimensions, if desired.

First procure four good-sized American flags and drape them in the following manner: For the center take two flags and tie the unions together. Nail them exactly in the center and rear of the window and bring the two ends up to the ceiling, as far apart from each other as possible, which will produce graceful folds. Hang the remaining two, one in each corner of the window as shown in the sketch. Fasten an upright strip of wood 6 ft. high, 4 in. wide and 2 in. thick solidly to the floor of the window, exactly in the center and rear.

Take four thinner strips, 2 in. wide and 1 in. thick, and fasten them, at equal distances apart, from the ceiling down to the upright and either side of window, forming two triangles with one-half of base resting on the upright and the other half on either side of the casing. Cover these with green crepe paper or cheese-cloth and fasten Cycas leaves, either by wiring or small staples, over the front side, covering every part of same. Old or damaged stock Cycas would do for this.

Now select some well-shaped leaves, 18 in. to 2 ft. long, and fasten them in a branching form as shown in the drawing, using larger leaves for the center. Southern Smilax could be used on the left arch only, instead of the Cycas leaves, if it could be procured in good condition at this time of the year. Hang a large coruocopia vase on top of the upright and fill it with large white or pale pink Peonies.

Bank a few good-sized Kentia Palms from the rear well out to the front, making a sort of dividing line for the two scenes, which we will take up presently. Place a border of Scottii Ferns around them to hide the pots or tubs.

Arranging the "Military" Section

In the left section, cover the floor with green moss, and sprinkle, lightly in some parts and heavily in others, with sand. Take three sticks about 3 or 3½ ft. long—moss bale sticks would do—and tie them together at the top with a stout cord, forming a tripod. Suspend a hanging pot from the tripod and insert in it a nice Whitmaui Fern. Stick three or four Orchid tubes in the Fern, placing a white Peony in each. Moss a round, flat basket 6 in. in diameter, wet it thoroughly and stick it full of Asparagus plumosus. Secure three or four charred pieces of wood and lay them on the basket, allowing the ends to protrude. Sprinkle the floor well with sand under the tripod and place the basket exactly under the pot. Insert in the basket stalks of red and, where possible, a few stalks of yellow Gladioli, allowing them to come up around the pot to resemble flames. Tie a narrow

piece of ribbon around the top of the tripod to cover the cord and you have a good representation of a camp fire.

Place a wax figure, dressed in the uniform of a soldier of 1861-5 period, in the left corner of the window, the figure holding a musket in position as shown in the drawing. The figure and musket can be hired for a very nominal amount.

Now fill in the background with Palms and Scottii Ferns. Place stalks of various colored Gladioli through the Ferns, and set a tall vase of Snowballs in the center of the background. Hang a row of coruocopia glasses on the left front side and fill same with various colored Peonies.

Make a shield in the following manner: Cut the head and wings of an eagle, with a shield as the body, out of heavy cardboard or thin lumber. Moss this and make the head and wings out of yellow Immortelles. On one-half of the shield make the stars and stripes out of red, white and blue Immortelles—the stars may be made out of white pasteboard and glue on. On the other side of the shield the Confederate stars and bars may be made in the same manner. Hang the shield in the center of the left section or quarter of the entire window, about 3 ft. down from the ceiling.

Catch a piece of 2½ in. wide red, white and blue ribbon at the bottom of the shield, leaving streamers long enough to reach to the side and center upright, forming a bow at each end. Now paint or paste the numbers 1861-5 at equal distances from the center.

Arranging the "Peace" Section

Hang a piece of purple ribbon of the same width, and caught up in the center in the claws of a white dove suspended from the ceiling over the other half of the window, with the two numbers 1910 at equal distances apart.

Cover the floor of the right half of the window with dark green cloth. Make a wreath of Galax or Magnolia leaves, about 5 ft. in diameter, with Orchid tubes inserted to hold cut flowers. Cover well around the Orchid tubes with Asparagus plumosus, which will keep fairly well for a week. A few large Cycas leaves could also be used with effect. Place the wreath on an easel, the wreath just touching the floor. Stretch a piece of broad purple ribbon across the wreath, with a bow and streamer at each end, with the inscription "In Memoriam" in large gold letters. Place two vases of white Peonies in the foreground, with Smilax falling from them. Bank in the background with Palms and Scottii Ferns, same as in the other half, but instead of using assorted colored Gladioli, use white, or a very pale pink. Hang a row of coruocopia glasses filled with white Peonies in the right foreground. Numerous other details can be used in this side, such as low vases of Spring flowers, being careful, however, to use mourning colors only.

You now have a window arrangement, one side typifying a scene during the war, with various colored flowers placed through the background; the other side typifying the "peaceful present," with the white dove emblematical of peace fluttering overhead.

JOS. MEIKLEJOHN.

J. MEIKLEJOHN

A Memorial Day Window

Florists in good standing throughout the country can avail themselves of the advertisers' offers in this Department and accept, without hesitation, orders from their local customers, transmit same to an advertiser in these columns, and thus avail themselves of the opportunities for extension of trade which are open to all. Let your customers know you fill orders by telegraph to any part of the country.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail firms advertising under this heading are all considered by the publishers of *The Florists' Exchange* as being responsible, and will accept and fill orders for Flowers, Plants and Floral Designs for Steamer Orders, departing Trains, or any given point within their reach, forwarded them by mail, telegraph or telephone, in the respective districts to which their trade extends, the usual commission being allowed. While no guarantee is expressed or implied by this paper as to the satisfactory fulfillment of orders sent to parties whose names appear in this Directory, we will state that only concerns of known good standing will be admitted in this Department. The use of Arnold's Telegraph Code No. 16, a copy of which is placed in the hands of every advertiser, will greatly facilitate this interchange of business.

DAYTON, OHIO
Florist, 16 West Third Street

Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Boston Retail Notes

There were noticed this week in Doyle's Boylston st. window some very beautiful designs of white china for cut flower arrangements, in the way of Vases, small baskets, small garden designs, etc., which lent themselves charmingly to certain flowers. Mr. Doyle imports these direct from Germany and says he has a large sale for them. He has also a fine stock of English "gathering" baskets for which he has a great demand from all over the country.

A very pretty new flower made its appearance this week at Zinn's Park st. store. It is *Gypsophylla elegans*, and it is a charming little plant with a myriad of star-shaped flowers. It is not like Baby's Breath, being a low growing plant with larger flowers. Other good things in this window were *Gladiolus Blushing Bride* and good plants of *Caleolaria rugosa*.

Conley on Park st. has in his window nicely grown pots of Strawberry plants, well fruited, and disposes of them in baskets six plants in each basket. He has a good demand for them. Also noticed in his display were good sprays of *Cattleya Mossiae* and nice little plants of the pretty old *Geranium Happy Thought*. Small pots of Thrift—*Armeria maritima*—which were nicely flowered made a nice edging for the window. *Gladiolus Blushing Bride* was in good evidence by handsome bunches.

Edward MacMulkin has a pick display in his window this week. He uses pink-colored baskets of which one was filled with a pretty pink double-flowered *Prunus*. Others were filled with pleasing shades of pink Sweet Peas. Some of the baskets had white *Marguerites*. There was a good display of Orchids, principally *Cattleyas*, from the MacMulkin greenhouses.

Carbone's window, as usual, was tastefully arranged, principally with *Gladiolus Blushing Bride*, *Erica ventricosa*, *Caleolaria Stewartii* and small pots of Heaths and small *Pelargoniums*.

Penn has a magnificent display of American Beauty Roses and Daffodils.

Wax Brothers has an attractive window with *Gladioli*, *Roses*, *Orchids* and other Spring material. Newman has always a neatly arranged window, with lots of variety, and has always a good supply of the leading things in the market.

Preserving Plants in Their Natural State and Color

The following method, in the "Pharmaceutical Journal," is recommended as a means of preserving flowers and plants in their natural state:—One litre of fine white sand is sifted, washed, and dried; then the following solution is made: 3 gms. of stearin, 3 gms. of hard paraffin, and 3 gms. of salicylic acid in 100 gms. of absolute alcohol, dissolving by aid of heat. With this solution the sand, previously heated, is treated little by little, until all the grains are moistened, when the whole is exposed to the air to dry. The plants and flowers to be preserved are placed in a suitable box on a layer of the prepared sand, and more of the sand is sprinkled over them so as not to disturb the natural position, until they are completely covered. The box is now placed in a warm place (30° to 40° C.) for two days, after which time the sand is carefully drawn off, the best means of doing this being to provide the box with an opening in the bottom, from which a cork or other suitable stopper may be withdrawn.

The Park Floral Co.

A Short-Lived Enterprise

According to the San Francisco Post the directors and officers of the fashionable California Flower and Plant Society, the formation of which was recently referred to in the columns of the EXCHANGE, have scattered to the four winds, leaving Mrs. Thomas H. Stevenson, president, in full possession.

The society was incorporated a few weeks ago. The incorporators, with the exception of Mrs. Stevenson, were of the opinion that the mission of the Society was to grow Orchids, American Garden Roses and other rare flowers to be sold merely at cost, and to revive the old-fashioned flowers of our grandmothers. They considered the Society a sort of floral philanthropy, a something that would do some good to the poor of the world, as well as to those lovers of flowers who are not so poor and who love to crowd their homes with flowers.

The claim is made that Mrs. Stevenson did not care to waste her time—that the Society meant business to her, especially as her husband is in the floral store business. The directors had ways of their own by which the flowers could be disposed of, but the claim is made Mrs. Stevenson wished them disposed of through her husband's store.

Therefore, the directors and their money and social prestige dropped out of the Society, leaving Mrs. Stevenson in possession. The directors were Messdames California Newton, J. K. Firth, William C. Ralston and Lucie May Hays. Mrs. Hays and Mrs. Ralston are on their way to Europe.

That there was a quarrel among the women is strenuously denied by every one concerned. They simply agreed to disagree, and the resignations followed.

Earliest and easiest worked. Admits air to the soil. Jackson's Round Drain Tile meets every requirement. We also make Sewer Pipe, Red and Fire Brick, Chimney Tops, Eucalyptic Slide Walk Tile, etc. Write for what you want and prices. JOHN H. JACKSON, 60 Third Ave., Albany, N.Y.

A rapid grower; grows in one season 60 ft. and over with thousands of pure white, waxy, fragrant flowers as big as a saucer. We ship 25,000 every season to every state in the Union, Canada and Mexico. 2½-in. pots, \$5.00 per 100; 3-in., staked up, \$8.00 per 100; 4-in., staked up, \$12.00 per 100.

Watch our "ads" for **ARACARIA Excelsa**, **Compacta** and **Glaucia**. First shipment, about 6000, will arrive from Belgium about May 10.

All plants must travel at purchasers' risk. Please, please.

GODFREY ASCHMANN

Wholesale Grower and Importer of Pot Plants

1012 West Ontario St., PHILADELPHIA, PA.

The former directors still believe in the feasibility of their ideal plan. After the Summer season, when all of the women have returned to town, they plan to go right ahead combining their high ideals and the flower-raising and selling business.

Water Influences Growth

Supt. McLaren of San Francisco system of public parks was inspecting the work of restoring Union Square to its former beauty, now that the little St. Francis has been removed.

"I'm for heaven's little un out; it's a bum little bush," remarked a gardener with a brogue.

"Which one?" said McLaren. "You don't mean this beautiful little Scotch Heather? All it needs is more water and it will grow as tall as you are."

"You're not very tall yourself, Mr. McLaren."

"Not extraordinarily so."

"I say, Mr. McLaren," reflected the gardener thoughtfully, "did you ever try water yourself?"—S. F. Chronicle.

Growers Building

NEVIS, N. Y.—M. E. Teator is erecting another Violet house.

POUGHKEEPSIE, N. Y.—William Bock is erecting a Violet house, 27 by 200 ft.

EVANSTON, Ill.—Fischer Bros. are erecting a new greenhouse at 1400 Wilder.

CARTHAGE, Mo.—Stephen Hyde is erecting two additional greenhouses.

This New Book Free

It contains several interior views of recently equipped Flower Shops that are of vital interest to every progressive Retail Florist. It also shows reproductions of letters from successful Florists who have used

McCray Refrigerators

for many years. The distinctive thing about these Refrigerators is that the ice capacity is scientifically determined so that just the right temperature is maintained. The McCray System saves money because it saves ice and saves flowers, and *besides this* brings in new trade on account of its attractive appearance.

Write while you think of it for this new book—Ask for catalog No. 72.

Dayton (O.) Florists' Club

With tables laden with the prettiest flowers of the season the second annual banquet of the Dayton Florists' Club was held at the Phillips House on the evening of April 15. H. H. Ritter, the president, sat at the head of the table and everyone en-

joyed an excellent menu. Quite a number of informal addresses were delivered, all tending to cement the ties that even now bind in friendship the members of the Dayton Florists' Club. The following were present at the banquet: Mr. and Mrs. John Broehmer, Mr. and Mrs. George Bartholomew, Mr. and Mrs. J. F. Young, Mr. and Mrs. Horace Frank, Mr. and Mrs. F. Mittman, Mr. and Mrs. P. Hasche, Mr. and Mrs. A. E. Schmidt, Miss Bertha Hendricks, Miss Ruby Bartholomew, Miss Catherine Young, A. Bartholomew, Fred Noon, Joseph Furst, C. M. Schaefer and the president, H. H. Ritter.

Connecticut Horticultural Society

Rose Night was observed by our Society, April 22, at the Hartford headquarters, with the president, John F. Huss, in the chair.

It was decided to make the next meeting night, May 13, Fertilizer Night, for a general discussion concerning the important question of soil fertilization, and especially to listen to an address by Prof. John J. Ruegg, president of the Lava Co. of America, of Passaic, N. J., who expects to be with us on that evening.

The absence of any Roses on our exhibition table was more than compensated

for by the delivery of an able and eloquent address by Howard A. Pinney, one of John Coombs' valuable assistants, on the subject of "The Rose." Paying a high tribute to the skill of American Rose growers, Mr. Pinney briefly described the various leading classes of Roses, and gave useful hints on their culture. The soil cannot be too good or too rich for Roses, he said. The liberal use of water produces marvellous effects. Rose gardens have their place, but it is not in front door yards. They should be planted in groups or masses, for the best effect. Budded plants are the most satisfactory; though own-root plants will be insisted upon by some, whose wishes should be respected.

Fauly pruning, he believed to be a great evil in Rose growing; and the seller often has to take the blame. If pruned back to two or three buds at planting time, and each year thereafter to the same extent, less disappointment would ensue. Rugosa Roses, of Japanese origin, are, in his opinion, the Rose for the millions, and are really shrubs, and of extra hardy constitutions.

Climbing Roses rank next in value, quickly transforming unattractive views into delightful pictures. Crimson Rambler, Dorothy Perkins, Lady Gay and Paragon, were especially praised as possessing the highest merit; and Hiawatha, one of the most remarkable yet introduced, will undoubtedly become the greatest favorite of them all; he denominated it "a grand new Rose of the highest quality."

Hybrid perennials are valued more than any other. Jacqueminot, Marshall P. Wilder, Mrs. John Laing (almost perpetual), Frau Karl Druschki (best hardy white), Paul Neyron (admirable pink), Ulrich Brunner (very valuable for cutting), Earl of Dufferin, and American Beauty, are among the most desirable of this class of Roses.

The dwarf Polyantha Roses have marked a new era in Rose culture, being quite hardy and free blooming, and ideal as bedding plants.

In closing his address, Mr. Pinney said that "the Rose is the flower for the masses, and its culture in a general way will be for the good of all mankind."

In a discussion that followed, President Huss told of his trial of a blue Rose, which has not yet bloomed; and he advocated Fall planting for Roses.

GEORGE W. SMITH, Secretary.

The Hamilton-McAlpine Wedding Decorations

At the wedding of Miss Adelaide McAlpine, daughter of W. W. McAlpine, 11 East 90th st., to Thomas Edward Hamilton, son of Col. Hamilton of Baltimore, Md., April 21, in the Madison ave. Presbyterian Church, 73d st., New York, the decorations were furnished by M. Bowe, 1224 Broadway.

The color scheme was pink and white, carried out with Spring flowers. The entire front of the auditorium of the church was banked with boughs of Dog-

No. 2 Duane St., N. Y.

wood, Apple, Almond, and Lilac blooms, with pink Hydrangeas, and Daisies interspersed. The altars were overhung with boughs of Apple and Almond blooms arranged on standards. At the entrance to every alternate pew was placed a bunch of Lilies. The decorations were admirably adapted to a Spring wedding and were skillfully grouped and arranged. The bride's bouquet was of Gardenias and Lily of the Valley showered with white baby ribbon. The bridesmaids carried bouquets of Sunrise Roses showered with Lily of the Valley, while the maids of honor held bouquets, one of shell pink and the other lavender Sweet Peas.

Purchasers of stock from advts. in these columns will confer a favor by making this statement in their order: Saw your advt. in the EXCHANGE.

Another Shipment of Bay Trees At AUCTION

Both Standards and Pyramids

TUESDAY NEXT, MAY 3rd
At 10.30 a. m. sharp

The Standards are from 24 to 72 inches in diameter of crown—The Pyramids from 7 to 9 feet in height, all in the most perfect condition

Also, a shipment of Phoenix Canariensis, plants from 2½ to 7 feet in height, and in most perfect condition

Also, BEDDING PLANTS, ROSES, EVERGREENS, etc., etc.

PETER REINBERG, 35 Randolph Street CHICAGO

Please mention the Exchange when writing.

Newport, R. I.

By the death of Alexander O'Driscoll Taylor, which took place at his residence in Newport, on Sunday, April 10, the Newport Horticultural Society lost one of its staunchest friends; one who, although not a member of the Society, was ever at its service, and in his official capacity as the president of the Natural History Society was able to bring about the co-operation of that body in whatever this Society undertook, particularly in regards to whatever was done to save the city's beautiful trees. In fact, just one week before his death, through his efforts Prof. E. A. Steene of the Kingston Agricultural College was secured to give a lecture on some of the tree insect pests which have been doing so much damage

of late. As State Commissioner of Birds for Newport County he did good work. Mr. Taylor was a native of Cork, Ireland, born of Scotch parents, and was in his 79th year. The greater part of his life was spent in this country, having been engaged in the real estate and insurance business here since 1887. He was both a scholar and a gentleman. His funeral took place from the Changing Memorial Church on Thursday, April 14, and was attended by many members of the craft, and the Horticultural Society showed its respect by sending a wreath.

How to secure efficient help seems to be the leading question, not only with the florists and gardeners but with the nurserymen as well. And the employees seeing their chance have called a meeting for Sunday, when it is proposed to form a union and rumor has it that a demand is to be made for an increase of wages, so that they may be enabled to pay for the increase in the cost of living.

Mrs. Brandt, wife of florist Arendt Brandt, is seriously ill at her home on Van Zandt ave. ALEX. MACLE.

Milwaukee

After enjoying Spring weather since March 1 all outdoor growths being advanced about a month over last season, a blizzard as bad as any we have had during the Winter overtook us and did immense damage to all outside stock. The heaviest loss will fall on the small fruit growers, as this crop, including Apples, Peaches, Plums and Pears, will be almost a total loss. About two feet of snow was registered in some localities, and the thermometer went down, varying from 23° to 26°. The early Peonies were all frozen, also all foliage on trees and shrubs was nipped badly, and if these do recover they will look badly all Summer.

Some growers had Carnations set out, and as these were completely covered with snow, it will be hard to say what damage was done to them until it clears away; perhaps the snow may have protected them enough to save them.

The cut flower market took a sharp turn and, as crops are off with most growers, stock shortened up and Carnations were quite scarce, the price doubling up the past few days. Roses are about equal to demand, with some advance in price. Lilacs and Tulips were coming in, but the cold weather ruined them. The loss to the florist will probably be made up again by increased sales of bedding stock, and it is expected the demand will be heavy and prices will rule firm and some items advance.

The Florists' Club will give a May party next month.

The Outdoor Art Association has selected several florists to act as judges in the contest for beautifying back yards, in which there are many entries this year. C. C. P.

Lexington, Ky.

Business for the past month has been satisfactory; orders for funeral work were heavy. Good Roses retail for \$1.50 per doz.; Carnations at 75c. per doz. Both stocks are plentiful. Some few Violets are still being cut, and retail for 75c. to \$1.00 per doz. Bulbous stock is still to be had, but the supply is about exhausted. Sweet Peas are good, but there is not much call for them, except for funeral work. They sell for 75c. and \$1 per 100.

We all hope there will be a good demand for Mothers' Day this year.

A. L. YOUNG & CO., 54 West 28th St., NEW YORK

WHOLESALE FLORISTS

Consignments of Choice Cut Flowers Solicited. Prompt Payments. Give us a Trial
Please mention the Exchange when writing.

NEW YORK, April 27.—Owing to a dark Sunday, the cut of flowers arriving Monday was curtailed somewhat, and on Monday and Tuesday sales were moderately good. On Wednesday a large cut of flowers came on the market, not only the staple goods but especially all Spring flowers, such as Lillacs, double flowering Cherry, and others in great variety. Sales are only moderately brisk and it is difficult to maintain prices of last week. American Beauty Roses, specials, realize 25c. each, but, except in the case of the very best, most sales are around the 20c. mark. Top grade Killarney are selling for 8c. each, and My Maryland and Richmond for 10c. each, but this is mostly in smaller sales, while in larger sales 6c. and 8c. respectively are the prevailing figures. With Bride and Bridesmaid 5c. each is about high water mark for the best.

Carnations, best grades, realize 2c. each in some cases, but most sales are at 2c. each for good stock.

Gardenias are abundant and prices low. The best grade hardly realize \$2 per dozen, and from that down to ridiculously low prices. Orchids are abundant and for best grade Cattleyas 50c. each is the top notch price.

Lilies are coming in more plentifully, and the price is low; a few of the best grade bring 6c. each, and Callas 8c. each.

Sweet Peas are again more abundant and 75c. per dozen bunches is the best price. The miscellaneous Spring stock is moving fairly well but at low prices, and tends to shorten sales of staple stock and lower prices. The indications to-day are for a falling rather than a rising market.

PHILADELPHIA, April 25.—Saturday night the market was well cleaned up. On Monday the market was slow; owing to a rainy Sunday the cut of flowers was somewhat short. This helped matters and prevented a downfall in prices. Spring flowers of many kinds now are meeting with a ready sale and tend to keep down the prices of staple flowers such as Roses and Carnations. Outdoor Lilac, purple and white, of good quality, is in abundance and sells well. Gladiolus America and some other varieties are now in the market. The demand for Sweet Peas is strong, the supply rather short, and prices firm. The supply of Lily of the Valley is short and the price has advanced.

There is only a fair supply of American Beauty Roses, but specials are selling for \$3 per dozen. Best grade Killarney and My Maryland realize 10c. each, and a few fancy Bride and Bridesmaid are moving at the same price, but most sales of the last two, and also of Kaiserin are at a lower figure even for top grade. Some fancy Richmond and Mrs. Jardine have changed hands at 15c., but most sales for best grade are around the 10c. mark.

The top price on Lilies and Callas is 10c. each, though the supply is not very abundant. Lily of the Valley, top grade, has reached the \$5 per 100 mark, but most transactions are on a \$2 to \$4 basis.

In Orchids the supply is sufficient, and the best grade Cattleyas are selling at 50c. Some extra choice Gardenias are realizing \$3 per dozen in a few cases, but most sales are from \$2 down.

About 3c. each is the best price for fancy Carnations, though a few sales are made at 4c. for very choice stock.

The best grade Sweet Peas sell easily at \$1 per 100. Miscellaneous Spring stock is moving well at fair prices.

On the whole the present condition of the market shows little change from last week, but, if any, it is not for the worse.

CHICAGO, April 26.—There has been the last writing been an outlook for change in market conditions. Perhaps never before have the growers and wholesalers experienced the situation of today. With every outdoor flower destroyed by frost fear of the usual glut of outdoor stock is banished. Of course, this means a harvest for the growers of indoor stock. It is hoped that in regard to Peonies

things may not be so serious as was at first anticipated, and that some of the local stock may have withstood the tempest. Of course, with the dark, stormy weather of the past five days stock indoors has also shortened decidedly, and prices in all lines have stiffened. Fortunately, there is not a very great demand for flowers at the present time, with the exception of stock for funeral work.

American Beauty Roses in the best grades are holding their own at \$3 to \$4 per dozen, other grades according to quality. Killarney is commanding \$3 per 100, and exceptionally fine flowers \$10. Best Bride and Bridesmaid are moving well at from \$6 to \$8 per 100. Richmond is on the same plane as Killarney. All other Tea Roses are commanding a fair price and are in good demand.

Carnations have shortened up very much and prices have advanced on all sorts. It is almost impossible to purchase any kind of stock under \$2 per 100, and all good grades bring \$3 easily.

Lilies have also shortened in supply, more so than desired. Harrisii brings \$12 per 100; Callas is high as \$15 per 100 for the best. Lily of the Valley is not over abundant and is very much in demand at from \$3 to \$4 per 100.

There are still a few Tulips to be had, such as are left of indoor stock, a few Jonquils also. Stocks are not seen in such profusion as for some weeks past. Daisies are in good crop and sell at \$1 per 100. An exceptional quality of Iris is obtainable, commanding from \$4 to \$6 per 100. Sweet Peas have taken another stride with the departure of the many different flowers; extra fancy blooms are selling at \$2 per 100, inferior grades from 75c. to \$1.25.

With the cold weather a few Violets have come in; while of good color the quality is not very dependable as the flowers fall very quickly and no price is quoted. Pansies, Snapdragons, Forget-me-Nots, Mignonette and Candytuft have attracted attention in the past few days. Cattleyas are unusually scarce and are bringing from \$6 to \$9 per dozen. Gardenias are plentiful.

Green stock, with the exception of Ferns is everything one could desire, and moves nicely.

ST. LOUIS, April 25.—The cold weather, with snow and rain and winds, was anything but good for the cut flower and plant business among the local florists, and about the only business done was work for funerals. Outside of Thursday, when the opening of the Baseball season made things lively for us, very little of anything else was going on among the florists all over the city. Consignments last week were quite heavy and stock in all grades very plentiful, with signs displayed among the downtown florists reading "Roses and Carnations, 25c. per doz."

The quality of the stock coming in is very good, but the commission men say that quantity compelled them to sell at cheap prices in order to dispose of the consignments.

The best in Roses did not bring over \$6 per 100; long American Beauty went at \$3 and some at \$2.50 per doz. Carnations hardly brought over \$2 per 100, and in large lots \$1 to \$1.50.

Lilies are cheap; Harrisii do not bring over \$6 to \$8 per 100; Callas, the same. All the light shades sell well, as funeral work was heavy and other work in which colored flowers could be used was slow. The weather this Monday, April 25, promises warmer for this week.

INDIANAPOLIS, April 25.—The past week has been featured by some of the most unseasonable weather. Freezes and heavy frosts have destroyed a quantity of outdoor stock which was of much commercial value. Early Peonies, the growers say, look as if they were scalded, as do Snowballs and various other garden flowers.

Unusual quantities of funeral work have been distributed among the several retail-

ers and no kind of flower is left to waste. Counter trade, too, is moving briskly on, and requests the choicest blossoms obtainable each day.

Prices, generally speaking, have had an upward tendency, as there is so little being produced at present.

Carnations are readily accepted at \$3 to \$3.50 per 100 for the choicer grades, and \$2 to \$2.50 for medium; 75c. per doz. is the prevailing retail figure. A number of calls are received for Harrisii Lilies and Callas at \$10 to \$12.50. A few L. auratum are also on hand at the same price. Lily of the Valley are clearing out better than at any other time this Spring at \$4 per 100 wholesale; \$1 per doz. retail.

The best Killarney and Richmond Roses are being shipped in at \$7 to \$8 per 100. Fine Am. Beauty are also received at \$5 to \$25 per 100. Fancy home grown Bride and Bridesmaid Roses bring \$8 per 100; shorts, \$2 to \$3. A few of the Summer Roses are offered at reduced rates.

Violets will soon be gone as the Eastern supply arrives in an indifferent condition. Sweet Peas sell better at 60c. to 75c. per 100 wholesale; double that at retail.

Waiting on retail trade in the plant line just now is anything but a pleasure as there is so little to offer which will prove satisfactory. I. B.

BOSTON, April 26.—The market of this week has been quite as satisfactory as it was last, but on the whole business is not too bad when other things are taken into consideration. The weather has been exceptionally good, cool with showers. There is an abundance of outdoor flowers, such as Tulips and Narcissus and some of the material in the market is of this kind and cuts into the regular flower trade.

Spanish Irises are becoming more plentiful and are producing good prices. Gladiolus Blushing Bride is coming to the market this week in goodly quantities and so is Gladiolus America, both of which are picked up quickly at good prices. Yellow Daisies are quite plentiful and seem to be quite favorites.

Roses are plentiful and prices have dropped somewhat. Those grown in cold houses are prominent now, such as Kaiserin, American Beauty, Carnot, and Richmond, and they are in better demand than those grown in higher temperatures.

Carnations are not more plentiful than they were two weeks ago and some of them are not as good in color. The qual-

ity of the flowers is good, owing mostly to the cool weather.

Sweet Peas are not as good as they have been, but are quite plentiful. The principal Orchid in quantity in the market is Cattleya Mossiae, which brings good prices.

Bulbous stock is very plentiful and down in price. Lilium candidum is still plentiful and of good quality. Antirrhinums in various shades are abundant and considerably lower in price; those in distinct colors, pinks and yellows, are the favorites.

Pansies, Primroses and Mignonette are in abundance and sell fairly well. Geraniums in pots are in good demand now at the stores. R. C.

A Regular Hummer

Two boys, friends of Darwin, thought they would play a joke on him. They caught a butterfly, a grasshopper, a beetle and centipede, and out of these they made a strange insect. They took the centipede's body, the butterfly's wings, the grasshopper's legs and the beetle's body, and they glued them together carefully. Then with their new bug in a box they knocked at Darwin's door. "We caught this bug in a field," they said; "can you tell us what kind it is, sir?" Darwin looked at the bug and then at the boys; he smiled slightly. "Did it hum when you caught it?" he asked. "Yes," they answered, nudging one another. "Then," said Darwin, "it is a hum-bug."—Scottish American.

Experiments with African Cactus at the botanical greenhouse of the University of Pennsylvania have demonstrated that that plant will grow in the deserts of Arizona and southern California and will yield enough rubber to make its cultivation pay, says a local paper.

READING, PA.—The P. & R. R. R. florists will soon start distributing 200,000 plants of various kinds, all of which have been raised in the company's hot houses at Wayne Junction, near Philadelphia. About 200 stations are supplied each year.

Providence, R. I.

Eugene McCarron has a large landscape contract on hand, laying out and planting shrubbery on the Nichols estate. He is keeping a large force of men constantly in his employ looking after planting and beautifying lawns in the best residential section of Providence.

Swan Peterson is kept busy with funeral work.

Joshua Vose is getting ready to supply the Dahlia trade as soon as weather will permit planting.

Wm. Hay has leased a store, corner of Clements and Washington sts., for the sale of cut flowers grown on his place at Oaklawn. He has just received a carload of greenhouse material for the construction of a new Rose house, 300 by 60 ft., which is to be of iron framework.

Anna F. Peckham, Carpenter st., reports business as having been very good thus far this Spring.

Wm. Hoffman of Pawtucket says the past week was the best he has ever had in the florist business. The total number of floral designs made last week was 125. For one funeral he made 27 floral pieces. He has a large stock of Geraniums and other bedding plants which will be ready for Decoration Day. At present he has a

large force of men engaged in landscape work.

The Florists' Club of Providence held its monthly meeting on Monday evening, April 18. No business of great importance was transacted, but at the close of the meeting Robert Johnston surprised the members by inviting them up to his house for dinner. There were about a dozen members present, who partook of the generous layout the host had provided. After dinner the guests departed for their homes, all proclaiming that Mr. Johnston was the highest trump in the pack.

Mr. Greenlaw, representing W. F. McCarthy & Co., of Boston was in Providence on Monday last calling on the trade.

Geo. Johnson & Son report, through Mr. Sharkey, manager of Elmwood Nurseries, that their business has been very good thus far this season. They recently planted a large lot of Maples on Comstock ave. They have 65 men in their employ and are using five teams.

F. Macrea & Sons will be in a position soon to have Lilies for twelve months in the year. They are completing a cold storage system, for keeping Lillium giganteum for use at all seasons. They say business is very good. They are cutting plenty of Carnations, etc., but expect to be off crop for Memorial Day.

The Market

J. Kopelman & Co., report business very good. Wholesale prices range as follows: Carnations, from \$1 to \$2 per 100. Roses, My Maryland, Bridesmaid, Killarney, and Brides, \$1 to \$8 per 100. Marguerites, \$1 to \$2 per 100. Sweet Peas, 50c. to \$1 per 100. Callas, 75c. to \$1 per doz. Lily of the Valley, 3c. to 4c. Asparagus, 25c. to 50c. per bunch. Cut Pansies, 50c. per 100. Daffodils, \$1 to \$3 per 100.

Noonan Bros. are very busy supplying Pansies to Providence Public Market. W. S. Pino, Shepard Co., and several other leading florists of Providence. They have a fine assortment and exceptionally large blooms.

Wm. Hay is bringing in some very nice Roses grown at his new plant at Oaklawn.

Johnston Bros., Dorrance st., recently received an importation of Palms and Bay trees, which came through in fine condition. H. C. N.

Hall & Lyon, department store proprietors here, gave away 3000 cut Roses last Saturday, as souvenirs of the fifteenth anniversary of their opening.

George Kelly reports business as extra good in landscape work, of which

he does a great deal in connection with his greenhouse trade.

George W. Williams, the treasurer of W. E. Barrett Co., died at his home on Sunday. Mr. Williams was very well and favorably known by all the veteran florists, gardeners and farmers of Rhode Island, as the Barrett store was the only agricultural and seed store in Providence County 40 years ago, when it was run by Burdick & Barrett.

Owing to a decided change in temperature, cool and cloudy weather, first-class stock is not plentiful, but there is no scarcity of anything in this market. There was a good steady business all the past week owing to several weddings, social functions, and a good demand for funeral cut flowers and designs.

G. A. J.

No wood will be more difficult to replace when the approaching shortage in the supply of hard woods overtakes us than the Hickory, one of the foresters in the employ of the Government recently said. The truth of this statement is not realized by anyone more than the practical men of the various trades whose future prosperity is measured by the available supply.—Nut Notes.

CUT FLOWERS AT WHOLESALE

New York

Wm. Elliott & Sons held, last Tuesday, the most satisfactory sale of nursery stock and bedding plants so far this season. The principal feature of the sale was, naturally, bedding plants, and the prices brought for Geraniums, Pansies, and similar stock were excellent. The attendance was very large. Besides bedding plants, roses and a good line of ornamental stock were disposed of. These auction sales will continue every Tuesday and Friday for the balance of the season.

The Fruit Auction Co. last Tuesday held another special sale of Bay trees, Shrubs, conifers, Roses and bedding plants were also offered. The prices obtained were good all through, as the stock in all lines was of most excellent quality. The Bay trees, particularly, were very shapely and well grown and included both standard and pyramids for which the demand was especially brisk.

Kessler Bros., 50 West 28th st., are offering plants of the new unnamed dwarf sport of the Boston Fern, which recently received a certificate of merit from the New York Florists' Club.

Walter F. Sheridan, 59 West 28th st., and Traendly & Schenck, 44 West 28th st., are moving out of their present quarters, and expect to be established on Monday, May 2, in their new quarters at 131-133 West 28th st., between Sixth and Seventh aves. George Saltford, 43 West 28th st., will leave his present quarters July 15, and occupy others at 129 West 28th st.

The Star Florists Co., 65 West 14th st., is moving into temporary quarters at 199 Sixth ave. A new building will be erected at 65 West 14th st., and the company will occupy quarters at that number about Sept. 1 next.

At Harry Lewy's, 784 Sixth ave., there was noticeable recently an attractive and artistic window display consisting of a moss-covered tree stump trimmed with Cattleya Mossiae, Lily of the Valley and Farleyense Ferns, with boughs of the double flowering Cherry for a background. Originality in ideas was shown in the arrangement.

W. Harff is trying the potted plant business at 180 Sixth ave.

B. S. Slinn, Jr., Coogan Building, West 26th st. is receiving some very fine Sweet Peas.

A. Bowe, 1294 Broadway, has been very busy of late with funeral work, wedding decorations, and decorations for social functions.

A meeting of the stockholders of the N. Y. Cut Flower Exchange was held at the Coogan Building, 26th st. on Saturday morning, April 23. President John Donaldson was in the chair. He stated that the purpose of the meeting was to appoint a committee to confer with other committees and with New York authorities in regard to the proposed Plant and Flower market under Queensboro Bridge. He further remarked that the Exchange should be kept intact, that the Exchange had a four years' lease on its present quarters, and that the space under the bridge would probably not be ready for perhaps twelve months. Mr. Burns moved that a committee be appointed with power, and to report two weeks from date. The motion was unanimously passed. P. Beurlin moved that a committee of five be appointed and the motion prevailed. The chair appointed Messrs. Einsmann, Leach, Dorval, Burns and Beckman. The petition to the Hon. Wm. A. Prendergast, Controller of the city of New York, requesting that the space under Queensboro Bridge be set aside as a permanent flower and plant market received sixteen additional signatures. About forty stockholders were present.

The petition to the Controller of the city of New York referred to in the above item has already been handed in. The joint committees are expected to meet next week and to report at the next meeting of the New York Florists' Club.

There is a rumor that a large block of property on West 28th st., where several of the wholesale florists have quarters, may soon be sold, and that on a sixty days' notice the florists may have to move out.

It is remarked everywhere among the large retailers that the sailings for Europe among their customers is earlier than ever before, and the season for business is becoming shorter each year.

The greenhouse property at 140th st. and Riverside Drive, New York City, was sold at auction on Tuesday, April 26,

by the Fruit Auction Co. for \$495. The name of the purchaser was not disclosed.

Charles Weber of Lynbrook may now be seen coming into town in a big touring car. He says those who saw Carnation Brooklyn at his place last Winter should see it now in its grand beauty.

E. C. Reineman, wife and daughter, of Pittsburgh, were in the city Friday en route for Europe, and sailed on Saturday, taking the S. S. Lapland to Antwerp. They will travel through Belgium, Holland, Germany and France. Mr. Reineman expects to see the Haarlem show toward its close and will also visit the Brussels exhibition. Several weeks will be spent in Marienbad, Germany, a delightful resort. Mr. Reineman expects to return early in August in time for the Rochester meeting of the S. A. F.

The Chicago Examiner says: "The Chicago police were asked April 24 to search for William Schanley of Brooklyn, a wealthy florist and landscape gardener, who disappeared from his home April 13, and who is believed to have written a letter to his wife a few days later, in which he said he had been kidnapped and drugged by two men who were taking him West. The letter received by Mrs. Schanley was written on one of her husband's bill heads. He is thirty-five years old, weighs 150 pounds, has dark brown hair, gray eyes, and is about five feet six inches tall."

Hanges & Papagelis, florists at 253 West 116th st., have filed a petition in bankruptcy, with liabilities \$4825 and assets \$30 in accounts. Among the creditors are James Lales, \$1326; Anthony Dimens, \$1500, and Geo. Maganos of Boston \$820.

Flatbush News

Peter Wagner, Midwood ave., has an interesting sport of Nephrolepis Scottii, which he has named Wagneri.

At Charles Zeller & Sons, Rutland rd., among many other well-grown seasonal plants is especially noticeable a house of remarkably well grown Geraniums, chiefly Doyle, Nutt, Barney and Poltevine, and a considerable block of Mme. Languth, with variegated foliage and double scarlet blooms, was remarkably attractive.

D. Y. Mellis, Holy Cross cemetery and Snyder ave., is exceedingly busy with cemetery work. Pansy setting is the order of the day.

C. E. Koch, C. Wacker, Peter Kemper and Louis Schmutz all have a seasonal line of plants and are pushing their preparations for market.

Charles Woerner, who went into business for himself last August, at 220 Clarkson st., says that his Callas grown in pots were a paying proposition, but next season he will try them in solid beds.

A. Demensy, Clarkson st., has already a part of his young Carnation stock planted out. Varieties of Enchantress Victory and Mrs. M. A. Patten are grown here, and in fact seem to be favorite varieties among the Carnationists of this section. Victory seems to be more popular than Beacon, though a smaller proportion of good plants are obtained from the same number of rooted cuttings.

Philadelphia

At Robert Craig Co.'s 4900 Market st., may be seen 60,000 plants of Begonia Lorraine which have already been twice shifted, and 50,000 Cyclamens in 2 1/2" to 4" pots. This company is now sending out great numbers of potted Roses, especially Frau Karl Druschki, Killarney, Gruss an Teplitz, Richmond, and Magna Charta. A very promising new Begonia is being tried out. It is a sport from B. Lorraine Lonsdale and is said to hold its blooms better than any other Begonia. Mr. Craig believes that Nephrolepis elegantissima compacta and Scholzei are two of the very best recent Fern introductions. The Crotons seen at Craig's are elegantly colored and are meeting with a steady sale.

The advance in the price of glass from \$2 to \$3.80 per box causes much unfavorable comment, and disappointment also, among the growers who had intended to add to their ranges this season, and many already have given up their plans to do so.

The S. S. Pennock-Meehan Co. is receiving some very nice Orchids; and some Snapdragons in very beautiful pink shades of color grown by John Savage, of Gwynedd Valley, Pa.

Mr. Sherry of the Johnson Seed Co. is confined at home through illness, much to the regret of his many friends.

It is hoped that Anton Wintzer, of the Conard & Jones Co., will speak on Carnations as well as Roses at the May meeting of the Florists' Club. It is expected that during the next few months Messrs. Manda, Lynch, Meehan, and Pericat will speak at the meetings of the Club.

W. E. McKissick & Bros. are receiving American Beauty Roses and Lily of the Valley from Carl Jurgens of Newport.

Lord & Burnham Co. are erecting a range of four greenhouses, each 28x200 ft., for Howard Thompson of Kennett Square, Pa. These will be used for the growing of Carnations and Mushrooms. Mr. Thompson is already a large grower of the latter.

Edward Reid is now receiving some fine Sweet Peas and American Beauty Roses.

H. Bayersdorfer & Co. are just now doing a large business in Memorial Day designs.

Pennock Bros., 1514 Chestnut st., have a very pleasing window display, consisting of Hino-de-Giri Azaleas, Exochorda grandiflora and Trollius.

M. Rice & Co., 1220 Race st., have added another story to their building, giving them more floor space. Their work room just now is very busy on wedding outfits, such as kneeling stools and wedding gates.

Boston

J. S. Stone of Shrewsbury, Mass., is cutting some excellent white Stocks and Snapdragons, which are disposed of at 1 Park st.

Peirce Bros. of Waltham are just beginning to cut their great crop of Gladioli. This week they shipped the first lot of the variety America.

The Fisher Estate at Montvale, Mass., is cutting some good Asparagus Sprengeri and Adiantum cucupatum and gets very remunerative prices for both of these commodities, which have been scarce all Winter. They are both profitable crops to grow.

Greenwood, the florist of East Boston, has been sick for the past week.

H. A. Stevens of Dedham is cutting at the present time some good Sweet Peas, good quality Carnations and Snapdragons. He is preparing now to build a new greenhouse for which most of the material is on the ground. It will measure about 100 ft. in length by 25 ft. wide.

Several of the salesmen at the Park st. market have been on the sick list this week.

George Noyes has not been regularly at work for the past week. He has trouble with his eyes and throat.

William Aylward has been away from his business in the market for several days; grippie is among his ailments.

Charles Teekle, assistant to Thomas Peglar in the market, is on the sick list this week. He is the brightest and smartest of the young boys in the market and his happy, smiling face is missed.

William Bartlett, the messenger at 1 Park st. market, is sick and has to go to a sanitarium.

All single Violets are done for this season and the only double ones that are coming to market are from H. J. Calder of Norwood, and Edward Bingham of Dedham.

The first six men of the individual winners each received an umbrella donated by the Foley Mfg. Co. Bensiingers' also donated \$55 to the Florists' Bowling League. A special notice has been sent out to the effect that all florists desiring to bowl on a team to represent Chicago at the coming convention should be at Bensiinger's alleys on Friday evening, April 29, when the team will be formed.

Minneapolis

S. M. Robinson of Excelsior, Minn., has just turned over thirty-five acres of his land at Vine Hill, for the growing of nursery stock and perennials. In the past month there have been set out several thousand young shade trees, and several large shipments of fruit trees and shrubs are still awaited. Several houses are to be erected during the Summer months. Mr. Robinson has one of the best locations for supplying the lake district, and expects to do a large nursery and plant business.

Indianapolis

A. Petit is endeavoring to dispose of his real estate and growing establishment which has more than tripled in value in the last eight years.

Mr. Perkins of Newark, N. Y., was a recent visitor.

Woodruff Place is being planted in an extensive manner with shrubbery by a Detroit firm.

Bertermann Bros. Co. have an excellent reproduction of an Atlantic liner in their window; printed cards, inviting the public to remember their journeying friends, are an adjunct.

Tomlinson Hall Market is preparing for the bedding season by showing its patrons a fine selection of Summer stock. Business is good.

Sam Seligman, represented Wertheimer Bros. of New York in this locality this week.

A. Weigand & Sons have their green-houses filled with bedding material.

Bauer & Smith are cutting fancy Gladioli.

Dorner's "Hoosier Lad" Carnation was on display in one of the local shops recently and received much attention.

I. B.

Cincinnati

This market has seen a decided change in the past six days. Carnations are now greatly in demand; the cheapest selling at \$2 per 100, fancy stock at \$3. Roses are moving along fairly well and at better prices; very little stock is now going to waste. A hard freeze passed over this part of the country on April 22 and 23, the thermometer dropping to 28°. Gardeners and others who have examined the fruit say that it is all frozen, especially the cherries, Peaches and Strawberries. Early garden vegetables, with the exception of Peas, are frozen to the ground.

J. T. Conger and wife, were surprised by their many friends on the 22d; it being Mrs. Conger's birthday about thirty of their friends gave them a surprise party.

Our visitors during the past week were Bahlman & Co.'s representative and Mr. Armand G. Rossig of Rossig Bros., New York.

The retailers are not rushed with business, but all have more or less funeral work.

Geo. E. Tromey has opened a new place near the corner of 6th and Walnut sts.; it is in charge of Robert Ergot, who was at one time manager of the Cincinnati Floral Co., which concern has been out of business for a good many years.

E. G. GILLET.

"THE EVERGREEN BRAND FLOWER FERTILIZER"

is pure plant food, immediately available. It permanently enriches the soil. It prevents the onslaughts of plant disease, or insects and pests. Can be used at any time during the growing season, dry or in solution.

St. Louis

Visitors who called recently were T. J. Farney, representing M. Rice & Co., Charles Ford of H. Hermann Co., New York and H. Hill of L. Baumann Co., Chicago. They all report good trade.

The trade all over the city had a great run on green Carnations on Thursday, April 21, and it is claimed that nearly 25,000 were disposed of in honor of the new manager of the American League Baseball Club, who is a St. Louis boy. There were also plenty of large floral pieces presented on this occasion; the largest was a floral bap, ten feet high, made by Ostertag Bros., who say the cost was \$300. This made things rather busy for us that one day.

Ed. Kalish of Kalish Bros. reports that they are furnishing the trade with fine Orchid blooms and that they are going in heavy on Orchids next Fall so as to supply the trade in their wants of this flower.

Adolph Welz, a gardener out on the Gravions Road, had quite a loss by fire his residence having been on fire the past week; damage \$500. The fire started at midnight and drove the family, thirteen in all, into the cold night. They were helped by neighbors.

Wm. McNeal of Jacksonville, Tenn., was in town buying supplies. Mr. McNeal has regular shipments from here three times a week; he reports an excellent business.

The florists who have stands at Union Market had to close them up a few days last week owing to cold weather. Trade with them was good up to that time.

Bentzen Floral Co. on North Grand ave. put in a busy week with funeral work. Being near the baseball park, they sold in the neighborhood of 5000 green Carnations on Thursday, April 21.

Mrs. M. M. Ayers on Grand ave., makes a grand window display of cut flowers and blooming plants. Mrs. Ayers reports a big demand in this line since Easter.

Ostertag Bros. furnished the wild Smilax and plants for the decorations at the Coliseum for the Metropolitan Opera season this week.

Charlie Wors says that he will have a big force out next week picking Ferns for the local trade; other Ferns are running low and high prices prevail.

Jules Burdett, who is now running the old Michel place at Magnolia and Tower Grove aves., says he has plenty of landscape work on hand and trade in the plant line is also good.

ST. PATRICK.

F. E. — Alive and Up-to-Date

The Mastin Automatic White-Wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs. Ask your dealer about our Extension Hose, Extension Rods, and the Mastin White-wash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

The Week's Work

BY
FRITZ BAHR

A New Salvia

Bavaria, The White Variety Said to
Resemble Zurich in Habit.

If you are a retail grower you can't help but be interested when anyone calls your attention to a new Salvia, and especially when it is a white one. No other bedding plant has gained so much in popularity as the Salvia and some very fine sorts have come out in the last few years. The most valuable perhaps, as a bedder, is Zurich; this is indeed a splendid one for the purpose, of dwarf habit, a free and continuous bloomer, in every way ideal for bedding purposes. Now comes along Bavaria, a white one. We have a nice batch on hand. The plants are in 3 1/4" pots every one in bloom, not pure white but rather a cream color. The

THE BEST WAY

to collect an account is to place it with the

National Florists' Board of Trade

56 Pine St., NEW YORK

WHY? Because many debtors will pay the Board fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

Please mention the Exchange when writing.

plants are stocky and look most promising. How good they are, however, as bedders, remains to be seen this Summer. If only half as good as Zurich it would still be a grand thing to have a white variety—just what many of us are looking for. A good white Salvia would be as valuable as a Canna with the foliage of King Humbert and a Florence Vaughan flower. What a bed that would make! There isn't any reason why we should not look forward to both of these, and as Bavaria is really a white Salvia we should have every reason to believe that, even should it not prove satisfactory in every respect as a bedder, it will be the forerunner of a white one which will fill the bill in every way. It certainly will pay for many of us to watch the results of a trial this Summer.

A New Chrysanthemum

Yellow Ivory Should Prove A Valuable
Addition to the Commercial Sorts

I don't know of anything that could be introduced in the Chrysanthemum line which would possibly prove of more value to the greatest number of growers than a good yellow Ivory. It seems to me to be just what we are looking for. By that I mean the average retail grower, the one who grows and sells his flowers. With him the list of varieties of 'Mums starts with Ivory, whether he wants single stems, pot plants or plants to produce a dozen flowers. The Ivory, the white and the pink, adapt themselves to any of these purposes, and to get a variety of color to add to these two sounds good. We have invested a few dollars in the new arrival, a nice lot of stocky plants. We are told that it is a sport from the white Ivory, a good clear yellow. We are going to give it the best place in the Mum house, and good care. While on the subject of 'Mums, it might be well to call attention to the fact that the time for propagating the single stem midseason sorts is here. No time should be lost in getting the cuttings into the sand. Attend to shading the propagating house or bench, the cuttings will not stand for any sun. Keep the house as cool as possible and spray lightly during the day, never allowing the cuttings to wilt. In ten to twelve days, soft wooded cuttings treated thus in the sand are on the safe side; the first week is the hardest on them.

The Storm

Suggestions to the Growers of the
Middle West

This is Saturday, 8 a.m. We are having a heavy snowstorm in the Chicago section and the thermometer registers 22°. This means that every bit of growth made this Spring on most of the shrubs, as well as Peonies and other perennials are frozen black. Every blossom on the fruit stock is killed—an awful loss. We cannot fully realize just what has happened until the sun comes out and warms up things. We had a lot of Tulips and Narcissus covered with lath shade frames to hold them back. They all got it, several thousands of them. They were all ready to cut. I brought some in and put stems and flowers in cold water, but they were gone. This storm will make many shrubs and perennial borders look sick, and the florist in such localities will be called upon to furnish bedding stock to fill out for this Summer. My advice is, to the man who conducts a retail place and grows his own stock, to prepare for the demand which is bound to come. Everything suitable for borders and beds will be called for, especially in expensive stocks, which can be planted in masses; for instance, Cannas and Salvias in the annual line. Sow out an extra supply of Cosmos, Zinnias, tall Marigolds and Asters, there is bound to be a demand for them. Dahlias and Gladioli will have an unusual call this

A RECORD TO BE PROUD OF

The Florists' Hall Association has paid
1,450 losses amounting to a total of
\$14,000.00.

For full particulars address

JOHN G. ESLER, Saddle River, N. J.

Please mention the Exchange when writing.

Spring, so get a good stock on hand, you will find a market. Don't overlook the climbers; if isn't too late to sow out Cobaeas and Humulus, they will grow quickly into salable plants at this time of the year. I find that the Clematis paniculata and Jackmanni are black, and so with the Akebias and Roses. While this will not kill the plants it will mean bare stems until a new growth appears, and your customers will want an annual climber for this Summer. While the extra sale of greenhouse stock will not by any means make up the great loss many of us have sustained, it will help a great deal, and not a moment should be lost in getting ready for it with a heavy supply—it will all be sold at good prices.

The Hydrangeas

Plants Intended for Decoration Day

I don't think I am going to be far off when I predict a shortage of cut flowers for Decoration Day. By that I do not mean that any of them will be sold at a premium, but with the abnormal weather we have had up to a few days ago it was almost certain that hardly any of the outdoor stock would have lasted until the end of May; but to make a sure job out of it the severe frost we have just experienced throughout the middle West has finished, practically, everything. This means that we must get up an extra large supply of suitable blooming stock in pots for that day, and among them the Hydrangeas lead. If the flower heads are beginning to spread now you are just in time, but not a bit too early, and if you wish to get well colored, large flower heads on the plants keep them in small pots, in such as will require watering twice a day if necessary. Plants in such pots will never show yellow, sickly foliage; but such as are in large pots, where the soil will dry out slowly, are apt to get that dreaded coloring of the leaves. Hydrangeas love plenty of fresh water, but the roots don't want to stand in it for any length of time, therefore some over pot. Plunge the pots in some kind of material to keep the soil around the roots cool. Fresh liquid cow manure, light doses, twice a week, for these plants will bring the large flower heads more than anything else. You cannot expect it from a starved plant. Don't experiment with any fertilizer you know nothing about, stick to the cow manure if on hand; there isn't any other manure I know of to which the Hydrangeas respond more freely.

The Marguerites

Plants Intended for this Spring's Sales

The Daisies, as we call these Chrysanthemums, are by any means the most desirable plants for vase work or veranda boxes, and quite a few of our customers will object to them. About the only time they really look well in the plant arrangement of a box is at the time they're put out, for they soon stop blooming; and if given good care, as far as watering is concerned, and placed in good soil they will soon outgrow everything else in a vase or box. But with all these drawbacks we use several thousands of them each Spring, for there are customers who consider a vase, no matter how well filled otherwise, incomplete without the Marguerites. The man who is anxious to have the plants he sells give the best results will try to have the Marguerites just far enough advanced so as to flower for some time after the boxes they are planted in are set up for his customers. Plants which are full open when put out will be without a flower in a week, while such as have only two or three flowers open will be shown for quite a while. In order to have plants on hand from the middle of May up to practically the end of the bedding season, we carry a stock of different sizes and try, by keeping the plants pinched back, to have them come along as wanted. The first lot is now about ready to open, and in 4" and 4 1/2" pots. The second lot was pinched back about ten days ago and received a shift from 4" to 4 1/2" pots. Another batch is being shifted and pinched back now, and still others are to follow which are now in 2 1/2". Should you have plants of different sizes not pinched and shifted they will all, if left alone, bloom at the same time, and in that way they will spoil on your hands. The extremely warm weather of the Spring may have caused most of your stock to be in full bloom by this time. If so, cut the plants back, and give a shift, if only to one half size larger pots, and the plants will be in fine shape again in about four weeks. If small plants are

on hand, ready to bloom, do the same thing with them; it is too early yet to have them bloom if wanted for plant arrangements for window boxes.

Vases and Window Boxes

It Is Time to Get After Orders to Fill Them

We have been pushing this branch of the business of late years, not alone for the reason that there has been an increased demand in the line, but because it is profitable. There is no question in my mind but what the day of formal bedding is rapidly drawing to a close. Irregular shrub and perennial borders are used instead, even by the small property owner. An open lawn, bordered by shrubbery, is taking the place of the lawn cut up by formal beds of different designs, as well as trees and shrubs. This hasn't in any way affected the sale of bedding stock, just as much is used. There is room along the edge of the shrub border for the Geraniums and the Cannas, as well as the Salvias, and the doing away with the formal beds has increased the demand for the window and veranda boxes, the rustic vases and hanging baskets. More than ever of these receptacles are used, and now is the time to get ready for the work of filling them. We are sending out cards calling attention to the filling of vases and boxes. Some of the people must be reminded of the season in order to get them started. We have done it for years and find it pays. Even the regular customers, those who have this work done in the same way every year, we remind, for quite often boxes or vases are in need of repair or paint, as the case may be, work which takes time to attend to. Don't put it off; you will be so busy in a couple of weeks from now that anything that can possibly be attended to now will be a blessing all around. Get the orders in, book them, and mark every box properly. Don't overlook this, as negligence in this respect might create all kinds of trouble. Only those of us who went through the experience of delivering a certain veranda box, among others, at the wrong place, and had to trace such box after several weeks, can fully realize what it means. Have a proper place to store the boxes, and after May 5 take the first opportunity to fill them. We have for several years past made up a few boxes out of 7/8 8-inch pine boards, 4 ft. long, part of them painted with two coats of white and some with dark green paint. We found these most convenient, even if not in every case of the right size.

Hanging Baskets

You Will Need a Good Supply This Spring

There isn't any good reason for delaying the ordering of a good supply of 12" and 14" wire hanging baskets, you are bound to use a good many. With all the trouble there is in properly taking care of a basket on a veranda

or porch, there is still a great, I might say greater demand for them. Here and there we have a customer who brings a few earthen affairs, or baskets made of rustic wooden work, but there are only a few compared with those making use of wire baskets. When I think of some of the baskets, the way they look when neglected on a porch, after being out of our hands for several weeks, I wonder that so many are sold; but it seems that a customer looking at a well filled basket at the greenhouse forgets all about the dried up affairs she had at the end of the season the year before. So get ready, have a good supply of the frames on hand; what are not used for porch decorations can be filled with Asparagus Sprenger for next Winter's use. Also get a good lot of sheet moss; we used to gather it around town, in the woods, but find it far cheaper and of better quality to let the wholesale house supply it. About the baskets: Don't get the fancy kind with the three pointed hangers; they might look a little better, but get tangled up and cause trouble; get the plain kind—baskets and hangers. Another seasonable thing to do is to fill a few baskets with different arrangements. Have them for samples; they help to influence orders. A customer might call with no idea of purchasing any baskets, but seeing them on display she will be tempted to buy some and leave an order.

Late Propagations

Keep on Filling the Cutting Bench

If you have the room to spare, it is as well to keep on propagating bedding stock. There will be call for this class of stock up into July. Salvia cuttings struck now will quickly grow into fine plants, and this holds good with Petunias, Ageratum, Heliotropes, Begonias, double Sweet Alyssum, Marguerites, Verbenas and Lobelias, and such plants as Achyranthus, Perillas and Coleus will in three weeks from the time the cutting is taken make a salable plant. If the stock is on hand to furnish the cuttings it is as well to take advantage of it, and keep on propagating. Such young stock might take the place of the first lot of Cannas or Geraniums which leave the benches. Quite frequently, a Heliotrope or Salvia is benefited by

having the top pinched out when giving the plant a shift. I wouldn't want to sacrifice the plant in order to get a cutting, but if it can safely be cut back far enough to furnish a cutting, why not do so. The retail grower must always figure on late orders, and while it requires time and valuable space to take care of these late propagations if properly done and the rooted cuttings are not neglected afterwards the little plants will be sold to good advantage if not used at home. Let the trade know what you have, there is some one who wants them.

Curved Eave Combination at Derby, N. Y.

California Notes

Fig Growing in California

The statement of the Editor of The Florists' Exchange that his Fig bushes were killed by the first severe frosts of last Autumn, has set me to thinking. In the Bakersfield section of the San Joaquin Valley, this State, there is never a Winter that the thermometer does not register 10° below freezing, and once I knew it to go 17° below, yet the Fig trees are never injured. There are specimens there of the black Mexican type, with bodies three feet in diam. at the base, fifty feet in height, with as much spread of top. The question is, can it be that the very dry atmosphere of that section during the latter part of the year so thoroughly hardens the wood that it can stand the low temperature named without injury?

There is one fact that must always be borne in mind, in connection with Fig culture, and that is, luscious fruit can only be produced where the climate is sunny and very dry. Figs grown about Los Angeles, and along the coast where fogs prevail every morning during the Summer, are poor in quality compared with those grown in the interior valleys where neither fog nor dew appears at that season of the year.

The sun rises as a great ball of fire and daylight appears at once. The humidity of the atmosphere is so low that it does not suspend the rays of light and, by noon, they come to the earth with a directness and intensity unknown to an inhabitant of the Atlantic Coast country. The ground becomes so warm that insect life seeks refuge beneath its surface. If a bill of ants be dug up and thrown on ground which has been exposed to the sunlight, they sizzle and die in less time than it takes to write these lines. Barefooted children cannot walk on it without pain, and the birds, when disturbed, never alight, except in the shadow of a post, a shrub or a weed.

There it is that Figs, if left undisturbed in the ground, cure perfectly instead of decaying, and there it is that Muscat Grapes are converted into Raisins and Prunes (the article of commerce) without artificial heat. Alfalfa, if given water, luxuriates and grows one inch in height every twenty-four hours. Apricots attain a degree of perfection in quality and appearance never met with along the Coast. The asthmatic breathes with ease, and they whose lungs are affected with tuberculosis in its incipient stage of development are healed.

Wanted—The Ideal Park Supt.

Our Park Commission has declared the place of superintendent of parks vacant, and will have made a selection of a new man to fill the place by this time. Considerable speculation among the seedsmen, and the horticultural fraternity generally is, who will they select? Two of the Commission are skillful gardeners themselves, although both

lawyers of great ability. I quote the language of one of them, which is a literary gem, in giving his ideas of the necessary qualifications of a man to fill the place:

"I would select an enthusiast possessing also good commonsense; a dreamer, but not a somnambulist; a poet, but not a hymnster; a painter, but not a dauber; an artist, without a profession; a modest man and not an egotist; a man of restless energy, and of enthusiastic and patriotic devotion to his work and to our city, which he is to serve; a man to whom to overcome obstacles is a pleasure; a dreamer who has the ability and the industry to produce his dream in the real; a painter who fuses his finest inspirations in pictures not made by brush; a poet whose soul is attuned to nature; a worker who finds the compensation of his labor, not in the salary, but in the great results to be produced in the pleasure and happiness that he can give to others."

The character here pictured is the highest type of manhood. Will they find him? I hope so. If they do, it will be one of the pleasures of life to shake his hand and to look into his soul through its windows, his eyes.

Golden Gate Park

I am delighted with the beautiful illustrations and the well-written article of our Golden Gate Park which appears in your last issue. It is unlike any other park in the United States and, to my mind, is a greater achievement in human endeavor than that of the rebuilding of San Francisco, which is the marvel of the age. Few men would have had the courage to begin the stupendous undertaking, fewer still the ability to carry it to a successful conclusion. The winds are forever blowing in that section of the State, with a greater or less degree of velocity, generally "greater." The soil, as stated, was sand to begin with. To bind it down long enough in one place to establish a plant required an unusual amount of ingenuity and perseverance. To begin planting in a soil which is permanent is one thing, but to do so where it will be in one place to-day and in another tomorrow is quite a different proposition.

That park will be a living monument to John McLaren and his tireless energy and devotion to duty, while time shall endure. The writer of the article ("M") named a few of the subjects growing therein. Had he named them all, and given a ten line description of the different genera, and a five line description of each species and variety of plants found there, the entire number of The Florists' Exchange of March 19, 1910, would have been filled from cover to cover.

So far as I know, no attempt has yet been made to catalog and classify exotics as they grow on this Coast. To do so would require time and be an expensive work, yet it should be done. A good descriptive writer could make such a work more interesting to the student of plant life than the Arabian Nights is to children. If illustrated it would be a valuable work of reference for future generations. If climatic conditions, both as to temperature and relative humidity throughout the year, were given, and the characteristics of the different varieties of plants as they appear under such conditions, it would be a valuable contribution to scientific knowledge. The same would be true if such work were done

Payne "T" Bar Iron Frame Greenhouses

With combination truss and column supports for 60 feet wide house.

An Ideal Construction

Can also be furnished without columns with all truss supports if desired.

This is an absolutely iron frame house.

Iron Sills, Iron Eaves, Iron Ridge

Less wood than any other construction.

in connection with our own park system (of Los Angeles) for it must be borne in mind that the two localities differ widely in soil and climate, many plants growing to perfection in one which are failures in the other.

Wm. Falconer's Notes from Cuba

In your issue of March 12 were very interesting and highly instructive to me. There is a charm, a fascination in Falconer's writings that to me is superior to that of any other horticultural writer of the present day. It would be a good thing for the present generation, as well as for all who are to follow, while time shall endure, if he were subsidized and started out over the world to tell us of plant life as it is found on the face of the earth. This, however, is not what I started out to say about those notes. Mr. Falconer's reference to A. Melia—Umbrella tree—which is forever in bloom; that is interesting. We have the two types here, Azedarach and umbraculiformis, but both are deciduous, both have their period of rest, neither one of which attains to that degree of perfection which characterizes them in the warm interior valleys of this State.

There it is that A. umbraculiformis is the shade tree *par excellence*; red spider, the scourge of all other trees in those sections, except the Fig, never molest the dark green foliage, which is so dense that never a ray of sunlight penetrates it, nor do scale pests trouble it, though they suck the life out of it here (Los Angeles) and cause the leaves to fall prematurely.

His reference to the behavior of Eucalyptus in Cuba is illuminating on the subject of "relative humidity." Experience and experiments, my own observations, and those of others, lovers of plant life, confirm me in the knowledge that it is practically impossible to successfully grow some desert plants in countries with humid atmospheres, or vice versa.

If Mr. Oliver has a variety of Malvaceae arboreus with larger and more showy flowers than the one we grow here we must have it, for of all the drought-resistant, showy flowering, perpetual blooming plants grown here, it stands at the head of the list. Royal Poinciana has been tried times without number here, and never a specimen brought to a flowering age, yet each year a crop of new and inexperienced enthusiasts appears and the experiment is repeated.

Mr. F.'s reference to a "brown rusty Rubber," as *F. ferruginea*, leads me to wonder if it is the same which we grow here as *F. macrophylla*; it, and *F. australis*, are the two which, if given room for development, astonish everyone by their size. *F. elastica* is too tender to make fine specimens in this part of the State.

P. D. BARNHART.

Washington, D.C.

The annual banquet of the Florists' Club of Washington takes place at Chas. Rauscher's, Conn. ave. and L st., N. W., on the evening of May 2, and it is understood the committee in charge is arranging a fine program for entertaining the guests; the price is \$1.50 per plate.

Heavy rains have fallen during the last week, and once more the earth is fully replenished with water. A cold wave is following the warm weather and greatly retarding the bedding out of plants as the stock made rapid growth

The Burnham GRATES

Grates are ridged on top—double trussed underneath, so that they smash the clinkers and not the grate. They dump to the front, which makes ash removal easy.

and is soft, no opportunity having been offered until now to harden the wood.

A Garden on Shipboard

Not so long ago there arrived at a Pacific port a ship from Belfast, Ireland, after a voyage that was in one respect remarkable. It appears that this vessel's ballast consisted of about 2000 tons of Irish soil. This, when leveled off, made a pretty good-sized garden patch, and the members of the crew, with commendable thrift, took it into their heads to improve it.

They planted a good stock of garden truck—Cabbages, Leeks, Turnips, Radishes, Peas, Beans, Lettuce and other things. These came up in due course, and flourished admirably, especially while the ship was in the tropics, and the men had fresh "garden sass" to their hearts' content.

As they rounded Cape Horn they replanted the garden, and by the time they reached the equator everything was again green and the table well supplied.

The two drawbacks were the weeds, which grew apace, and the inroads of the ship's drove of pigs, which were kept in the "farnyard attachment," and which, on several occasions, when the ship was rolling heavily, broke out of bounds and of course did their best to obtain their share of the garden truck.

The last pig was killed and served with green vegetables just before the vessel entered the port on the Pacific. On the arrival of the ship the sod was taken to its destination, ready to be used again for terrestrial gardening.—*Harpers Weekly*.

European Notes

We are at last planting our Beets on our stronger and heavier land that has not been workable until the present time and even now is so rough and lumpy that it is doubtful if the plants can ever properly develop.

Only warm, gentle rains can help us and these are not forthcoming as we desire. Storms, tempests, even hail and snow we have had during the past seven days, but these only beat down and harden the soil that we have taken such great pains to lighten. Of field Beets (Mangels) we have plants in abundance in all the districts in Europe where these are cultivated, but the "hunger root" loves a strong soil and much of this is still far too humid to be cultivated; this is especially the case in France.

For the same reason the planting of Carrots has also been delayed and is not even yet complete. As was to be expected, many of the plants have perished during the inundation, so that in any case the acreage to be planted must be considerably reduced. This remark applies with equal force to the districts west, central and south, and all varieties are equally compromised. As a very moderate quantity remains on hand, higher prices are bound to rule again next season.

As regards Cabbage, it is pleasing to note that nearly all the plants that have survived have started to run. For this the mild Winter is no doubt responsible. This condition is especially true of Savoy, which are extremely promising at present. Broccoliis and Brussels Sprouts are of little interest on your side, but are of extreme importance for

Last February one of our clients reported a cut of 30,000 salable blooms, from 5000 Horseshoe Brand "Formosa" bulbs size 6 to 8 inch. The reason he cut so many was simply because he bought the best the market afforded. "Formosas" are good for late Winter flowering and are very profitable in the smaller sizes. We do not recommend large sized Formosas at all. There is no brand superior to the Horseshoe Brand in Lily Bulbs and when you want to be practically sure of good bulbs, buy them.

EUROPEAN SEEDS.

American Notes

Retail Trade Very Active

From every section of the country, in the past week, have come the most satisfactory reports regarding the so-called, retail counter trade. During the last few years this branch of the seedsmen's business has increased by jumps and bounds, and especially so with the seed-houses of the larger cities; this condition, of course, is attributable to the wonderful development of suburban homes that the innumerable land companies all over the United States are so strenuously encouraging. Every "commuter" now has his garden. This trade, which will continue well into June, should receive the most attentive care; it is cash trade and at lucrative prices.

Those seedsmen who cater especially to the wholesale trade are still very busy with the "filling in" orders that always assume large proportions about the first of May, as the rush of the retail counter trade demands that seed stocks be kept intact for some weeks yet. The comparatively cool weather of the last few weeks has held back nursery stock quite a little, and the seedsmen are yet making shipments in this department. Vegetable and bedding plants have never enjoyed larger sales, and there is still ahead several weeks of good business in these. From now on there will be ample opportunity to devote to each customer time and attention sufficient to ascertain all his needs and fill his order in the very best manner; no stone should be left unturned to make every possible sale while the season still lasts.

Nasturtiums

Just as Sweet Peas enjoy their largest month of sales through April, so will Nasturtiums during May, if proper attention is devoted to them. Nasturtiums require that the weather be warm and settled before they are planted; and it is this fact that renders them such excellent subjects for May and June sales in the line of flower seeds. The tall or climbing Nasturtiums will be found the largest sellers; the dwarf-growing varieties, however, are in very much more demand than they used to be, even a few years ago; but when a customer simply asks for Nasturtiums, always give him the tall sorts, as many garden makers are not familiar with the dwarf varieties. Try to sell not less than ounce packages, if you can so prevail upon your customer, as Nasturtiums need fairly thick planting, and the short row that even an ounce will sow is as little as will give a satisfactory result. As with other flower seeds, a good mixture of colors will be found on the whole most satisfactory to the average buyer; and such mixtures of both tall and dwarf Nasturtiums can be sold at retail, at a good profit, for ten cents per ounce. In regard to the named varieties and special colors of Nasturtiums, it will be found that these can be obtained readily, as needed, from your wholesale seedsmen; and that if an ample supply of both the tall and dwarf mixtures are carried in stock practically all customers will be satisfied. Push Nasturtiums very prominently, well into June.

The Plant Auction Sales

The plant auction sales which, as usual, are being held this season in the larger cities, have, so far, been more than average satisfactory. Perhaps the reason for these sales drawing larger attendance, and the stocks sold bringing more lucrative prices than ever before, may be attributed to the fact, which is being generally recognized, that the better the quality is in the stocks offered, the more satisfactory are the results obtained; for, as a general rule this year, the offerings at these auctions of nursery stock, bedding plants, decorative plants and bulbs have been of much better quality than in past seasons. Years ago, when these auction sales were first inaugurated, the seed trade were very much opposed to them on the ground that their retail business would be interfered with, but just the opposite has proved to be the case, it turning out that the more offered in this line the greater the demand experienced by the seedsmen for nursery stock, plants and bulbs, until it has come about that we all now recognize the importance of these auctions for clearing

are for THE TRADE ONLY

away surplus stocks, which they certainly do without the least interference with the regular retail trade. V.

New York Seed Trade

Retail counter business continues active, and while the extreme rush is past our seedsmen all look for continued good trade in this direction until Memorial Day. During the past week vegetable and bedding plants have been in perhaps the best demand of the entire season thus far. Seed stocks are all pretty well cleaned up, no surpluses of any moment being reported.

The trade will regret the death of Wm. MacFarland, who recently has been with R. & J. Farquhar & Co. of Boston. The deceased was many years with Peter Henderson & Co. and also with J. M. Thorburn & Co. Mr. MacFarland was a cousin of George Burnett of Burnett Bros.

The Stumpp & Walter Co. have been shipping large quantities of nursery stock the past week.

Isaac S. Hendrickson, manager of John Lewis Childs' wholesale department at Floral Park, was in town a few days since and reports that the wholesale bulb business with them the past season has been very satisfactory.

William Elliott & Sons report that their trade in rustic work productions is exceptionally good, they having disposed of twice the quantity they did last year up to this time.

The Aphine Manufacturing Co. is putting up Aphine in pints and half-pints. This is being done in response to the many inquiries from the owners of small gardens.

Watson C. Woodruff of S. D. Woodruff & Sons, will, with his family, make an extended trip to Europe in June, partly for business and partly for pleasure.

Boddington's new departure in seedsmen's advertising, as commenced last week and continued again this week in the EXCHANGE, under the caption "Boddington's Store News," is attracting much favorable comment.

J. M. Thorburn & Co., in the past week received from Australia new crop Kentia Palm seeds.

Philadelphia Seed Trade

The rush season is over. The mail order trade especially has fallen off, but there is still a brisk counter trade, and seedsmen are comfortably busy.

There is beginning to be a strong call for Lima Beans. Some stocks are becoming scarce, especially Red Valentine Beans in the seed line, Tuberoses in the bulb line, and Cycas stems, particularly in the small sizes; in fact, one seedsmen states that Cycas stems will be practically out of the market within two weeks, and that southern Tuberoses are damaged through becoming too dry, and the supply from that source will be curtailed.

At Henry A. Dreer's there is a very full window display this week of the smaller tools, etc., for use in garden, orchard and on lawns. Among them are noted pruning shears of all sizes and shapes, and about twenty-five different kinds of hose nozzles and lawn sprinklers. Taken altogether it is a very interesting display.

The Johnson Seed Co. report very heavy sales of Cycas stems, and seed field Corn. Mr. Sherry of the company was off duty nearly all last week on account of illness, but he is now in the store again.

Mr. Stokes of the Stokes Seed Store is taking a few days rest and recreation at his cottage in the Pocono Mountains. Mr. Stokes is a veteran disciple of Isaac Walton, and an enthusiastic one too, and he expects to bring back with him from his trip as many fine brook trout as the law allows from the waters of Swift River and the lake.

The Moore Seed Co. reports a heavy sale of all garden requisites this week.

The Henry F. Michell Co. is having a very heavy sale of the roots and bulbs which they are now advertising.

Seedsmen are now finishing the placing of all orders for Dutch and French

bulbs. The bulb growers' agents who are now in this country will nearly all have sailed to Europe by the middle of May.

MONTREAL, CAN.—N. S. Dunlop, director of the floral department of the Canadian Pacific R. R. has distributed 80,000 packets of seeds for use at the various stations of the system.

Jubilee Flower Show, Haarlem

This show was visited, between March 23 and April 17, by 82,418 people. The financial results have been so good that not only the costs of the show are already nearly paid, but a surplus may be expected. This result is a very pleasant one as the show had practically no subsidy from the State, or any public corporation, but was started by a guarantee fund.

The Queen Mother of the Netherlands paid a visit to the show on April 15, the first day of the second temporary show; this show, by far, has beaten the first special show.

Queen Wilhelmina and Prince Henry of the Netherlands have announced their official visit on May 26, and consequently the fourth temporary show will be held from May 26 to 29 instead of May 20 to 22.

The third temporary show, May 4 to 12, will have the character of a special Orchid show and is to be held under the auspices of the Netherlands club of Orchid amateurs.

Alfalfa as a Vegetable

Prof. A. B. Hinkins of Nebraska City, one of the best known horticulturists in Nebraska, makes the announcement that Alfalfa makes far better greens, when properly prepared with a slice or two of bacon, than Dandelions or anything of that nature. He has an acre field which he uses for no other purpose and cuts the tops off of the plants when they are young and tender.

The Garden of Congress

This is the green and happy season of the year, when the thoughts of com-

muters and other farmers lightly turn to early Peas, Squash and Turnips, not to say Cabbages and the Asparagus bed. And thrice happy be who knows and is known of a Congressman, that giver of all good things, including free seeds wherewith to plant. There lies upon our desk, through the courtesy of a friend desirous of arousing our envy, the batch of Governmental Beans, Peas, etc., which constitutes the handout in these regions. A friend of an honorable Congressman, he will plant, while we can but humbly record the contents of the cornucopia thus poured into his lap.

Of course, the seeds arrived in a neat package carefully franked by the donor. Thus if our friend had any doubts as to whom he should vote for at the next Congressional election, his hesitation is removed. And after the postman of a bankrupt Post Office Department had toiled up with this pleasant bundle, and the official seal was broken, there tumbled out a host of little packets all thus labeled:

U. S. Department of Agriculture.
Congressional Seed Distribution.

Please report the result of your trial to this Department.

A pleasantly humorous touch, this request for reports. Of course, the beautiful theory of the handout was and is that scientific researches are instigated, wherefrom the nation benefits. The words quoted above perpetuate this cheerful fiction. And as for the seeds, here is the list of labels before us:

Vegetables.—Pole Beans—Kentucky Wonder. Lettuce—Salamander. Turnips—White Flat, Strap-Leaved. Radish—Scarlet Turnip, White Tipped.

Flowers.—Morning Glory. Poppy. Double. California Poppy. Sweet Peas. Nasturtium (Climbing). Mignonette. Snapdragon. Candytuft.

There are general planting directions on the packets, too, with a few kind words about the several species. Thus the Morning Glory is declared to be "useful for covering unsightly fences and trellises." And the white, flat, strap-leaved Turnip is presented as "a very early, medium-sized, flat, disk-shaped root, pure white in color, sweet and tender." The whole proceeding is thus seen to be an excellent and complete charity, calculated to win the ballot of the hardest opponent.

Had we but space it would be a pleasure to trace these flora to their source. Of course, as our friend, the donee, sees his pleasant garden sash erupt through the brown soil and lift its head to the airs of Spring, he will see but one face in all the varied array—the face of the thoughtful friend, the Congressional donor by whose bounty his garden grows. But to the impartial eye, each flower and vegetable will image some great man at Washington, whose peculiar self is pictured in the plant, fragrant or edible, beautiful or useful, as the case may be. * * * * *

Indeed, what pleasanter subject is there for the taxpayer to contemplate in these warm Spring days than his Congressional garden!—N. Y. Sun.

The Best Methods of Protecting Trees
from the Ravages of Insects

This was the subject of a lecture at the Natural History Museum, Newport, R. I., on Saturday evening, March 19, by A. E. Stone, president of the Rhode Island Agricultural College. Before the lecturer was introduced letters were read from Messrs. James Robertson and H. F. Eldridge, expressing regret at their inability to be present. The following synopsis of the lecture is taken from the Newport News:

Mr. Stone prefaced his lecture by saying that Newport is one of the best forested places in the country and more attention is paid here to tree protection than in most places.

He then proceeded to describe and illustrate by pictures thrown on a screen the various insect pests which infest trees and shrubs. Many varieties of horcers do much damage. There is one kind which attacks the Birches, another the forest trees and shade trees, still another makes the Willows and Poplars its prey. Most of these are difficult to deal with, as their work is done on the interior parts of the trees and is out of reach.

Scales of various sorts form another class of tree enemies. These are external in their work and may be controlled to a greater or less extent by spraying with proper solutions. The San Jose scale, the cotton cushion scale and the oyster shell bark louse were all spoken of.

6 to 8 inches, \$1.25 per 100, \$12.00 per 1000.

GLADIOLI

America. This beautiful new Gladiolus is likely to produce as great a sensation as the now famous Princess. The flowers, which are of immense size, are of the most beautiful flesh-pink color, and, as a florist who saw it said, it is "fine enough for a bride's bouquet." 60c. per doz., \$2.25 per 100, \$20.00 per 1000.

1900. Nothing finer for florists' use. Rich shade of red with very prominent white spots on three lower petals. \$2.00 per 100, \$15.00 per 1000.
Groff's Hybrids (originator's strain). \$1.25 per 100, \$10.00 per 1000.
Shakespeare, White and rose. \$4.75 per 100, \$45.00 per 1000.
May. Pure white, flaked rosy crimson, the best former selected bulbs. \$1.75 per 100, \$16.00 per 1000.
Brenchevillensis (true). Flery scarlet; first size bulbs. \$1.25 per 100, \$9.00 per 1000.
Boddington's White and Light. Extra-selected bulbs, 1½ inches and up. \$1.50 per 100, \$14.00 per 1000.
American Hybrids. A mixture of the choicest varieties of Gladiolus. \$1.00 per 100, \$9.00 per 1000.
Pink and Rose Shades. \$1.50 per 100, \$14.00 per 1000.
Lemine's Hybrids. \$1.50 per 100, \$12.00 per 1000.
Finest All Colors Mixed. 75c. per 100, \$7.00 per 1000.

DAHLIAS

After considerable consideration and observation, and "talks" with the trade, we have decided to offer the following Dahlias to florists this season. Our retail Catalog, which will be mailed free, contains a larger collection, but few are superior to the following and all are good size, divided clumps that have been field-grown and are strong and healthy.

Price of all the below-named varieties of Dahlias, large divided clumps or roots, except where noted, 10 cts. each, \$1.00 per doz., \$3.00 per 100, \$75.00 per 1000.

Jack Rose (Decorative type). The variety Jack Rose is rightly named and is a florist's Dahlia. "From the ground up." The color is similar to the Jacquemint-Rose, and is a unique color in the Dahlia, which lights up beautifully at night. The habit of the plant is stocky, very free-flowering. Producing its blooms in great profusion, upon erect, long, stiff stems, making it invaluable for cutting. You cannot afford to be without it, if you sell cut-flowers. 35c. each, \$3.50 per doz., \$25.00 per 100.

DECORATIVE DAHLIAS
Sylvia. Best described as a Giant Nymphaea, being stronger, larger and deeper colored. Flowers 4 to 6 inches in diameter, of fine form and full to the center, which is white, shaded to soft pink on the outer petals. One of the best cut-flower varieties. 10c. each, \$1.00 per doz., \$7.50 per 100.
Catherine Duer. Crimson-scarlet.
Clifford W. Branton. Best yellow. 10c. each, \$1.00 per doz., \$7.50 per 100.
Frank L. Bassett. Bright purple, shading to blue.
Lyndhurst. Bright scarlet.
Maid of Kent. Cherry-red, tipped white.
Nymphaea. Color clear, light shrimp-pink.
Orange King. Rich glowing orange; early and profuse.
William Agnew. Rich, dazzling red; immense size.

CACTUS DAHLIAS
Berlichingen. Deep crimson-carmine shading to bright carmine at the tips.
Bravo. Rich Jacquemint-red; one of the best for cutting.
Constance of Londale. Amber and salmon.
Earl of Pembroke. Bright plum. 16c. each, \$1.60 per doz., \$12.00 per 100.
Helene. Center creamy.

Kriemhilde. One of the finest pink Cactus Dahlias. 10c. each, \$1.00 per doz., \$7.50 per 100.
Lillette. A fine purple.
Ortwin. Beautiful salmon-flesh.
Standard Benzer. Brightest scarlet; profuse bloomer. 15c. each, \$1.50 per doz., \$12.00 per 100.

SHOW AND FANCY DAHLIAS
A. D. Lilven. Beautiful soft pink; early and profuse bloomer. 10c. each, \$1.00 per doz., \$7.50 per 100.
Arabella. Pale primrose, tipped and shaded old rose and lavender.
Grand Duke Alexis. Very large white, tinted pale lavender.
Glowing Coal. Brilliant red.
Greece's White. One of the best whites for cutting.
Harlequin. Brilliant crimson, striped and tipped white.
John Thorpe. Very large; soft rich pink.
Meaheddy Beauty. Fancy buff, with crimson spots, free long stems, large bloom. 8c. each, 80c. per doz., \$6.00 per 100.
Frank Smith. Rich, dark purple maroon, tipped pinkish white. A superb flower. 26c. each, \$2.50 per doz.
Red Bussar. Pure cardinal, red flower, very free bloomer, splendid for cutting.
White Swan. Snow-white, with long stems.

SINGLE DAHLIAS
The 20th Century. Intense rosy crimson, with white tips and white disc around yellow center. 10c. each, \$1.00 per doz., \$7.50 per 100.

DAHLIAS TO COLOR
We can also furnish, without names, in mixture, all colors separate, or all colors mixed, as follows:
Mixed Pinks, Mixed Whites, Mixed Reds. Mixed Yellows. 75c. per doz., \$5.50 per 100, \$50.00 per 1000.
Mixed, all colors. 60c. per doz., \$4.50 per 100, \$40.00 per 1000.

HARDY CLIMBERS, Etc.

AMPELOPSIS Strong Dutch-Grown
Quinquifolia (American Ivy, or Virginia Creeper). Good for covering walls, verandas, or trunks of trees; affords shade quickly. 26c. each, \$1.75 for 10, \$16.00 per 100.

ACTINIDIA ARGUTA
A desirable Japanese climber of strong, vigorous growth, with dark green, shining foliage and white flowers with purple centers, which are followed by clusters of edible fruit. An excellent plant for covering arbors, trellises, etc., where a rapid and dense growth is desired. Strong plants, 26c. each, \$2.50 per doz.

CLEMATIS
Henry. Pure white; extra large.
Alba. White.
Jackmann. Purple.
Sieboldi. Lavender.
Ville de Lyon. Brilliant carmine-red; as good as Mme. Edouard Andre, but contrary to this one, is very free-growing.
Extra-strong plants, 30c. each, \$2.75 for 10, \$26.00 per 100.
Clematis paniculata. Strong, 2-year-old plants, \$2.00 per doz., \$15.00 per 100.

BIGNONIA (Trumpet Vine)
Radicans. Dark red, orange throat; free-blooming and very hardy. 20c. each, \$2.00 per doz.

ARISTOLOCHIA SIPHO
Dutchman's Pipe. Strong, field-grown, 3 to 4 feet. 25c. each, \$2.25 for 10, \$30.00 per 100.

HONEYSUCKLE
Very extra-strong. Holland field-grown plants. 6 to 8 feet long, many branches.
Hulliana. Yellow. \$3.25 for 10, \$30.00 per 100.

HYDRANGEA PANICULATA
GRANDIFLORA
Two-year-old, 3 to 4 branches, bushy. \$1.50 per doz., \$10.00 per 100.

INCARVILLEA
INCARVILLEA Delavayi (Hardy Gloxinia). The foliage resembles that of the acauthus, while the blossoms appear like clusters of pink Gloxinias. Strong roots. 10c. each, 75c. per doz., \$5.00 per 100.

CINNAMON VINE
Large-size bulbs. 50c. per doz., \$3.00 per 100, \$25.00 per 1000.

CALLAS, SPOTTED LEAF
(Richardia albomaculata)
Very free Summer-blooming variety. \$3.00 per 100, \$25.00 per 1000.

HYACINTHUS CANDICANS
HYACINTHUS Candicans (Cape Hyacinth). Large bulbs, \$1.50 per 100, \$12.00 per 1000.
MADEIRA VINES
Large bulbs, \$1.25 per 100, \$10.00 per 1000.

MONTBRETIA
Crocosmaeflora. Orange-scarlet. 75c. per 100, \$5.00 per 1000.
Etoile de Fen. Rich scarlet, yellow center. 75c. per 100, \$6.00 per 1000.
Rayon d'Or. Deep yellow, very large. 75c. per 100, \$5.00 per 1000.
Pottel grandiflora. Bright yellow, finished with red. 75c. per 100, \$6.00 per 1000.
Soleil d'Or. Bright red. 75c. per 100, \$5.00 per 1000.

JAPANESE IRIS
(Iris Kaempferi)
Named varieties, our selection, \$1.25 per doz., \$10.00 per 100, \$75.00 per 1000. 25 at 100 rate, 250 at 1000 rate.

AMARYLLIS
Vittata Hybrida. These are grown especially for us and contain a remarkable range of colors from self pure white to darkest crimson, or flaked and striped. These are easily grown. Florists should certainly grow a few of this delightful plant that sells on sight. 40c. each, \$4.00 per doz., \$30.00 for 25, \$30.00 per 100.
Beladonna major. \$1.00 per doz., \$7.00 per 100.
Johnson (Bermuda Spice Lily). Crimson flowers, white stripes. \$1.75 per doz., \$14.00 per 100.

ARTHUR T. BODDINGTON

SEEDSMAN

342 West 14th Street, NEW YORK

In recent years the Spruce trees have suffered from a poison injecting insect which causes galls or excrescences to appear on the branches. Spraying before galls are formed, or cutting off the galls and burning them, are the remedies most effective.

The Elm tree beetle is a formidable enemy of the fine trees from which it is named. It winters over if it finds partial protection. It moves slowly, but requires continual and persistent fighting to keep it under. The Rose chafer thrives on all kinds of poisons. It seems to be particularly fond of lead arsenate, a solution which is generally effective with pests of similar character.

The fact that the tussock moth has a wingless female suggests that banding trees with sticky substances or wire net will do much toward preventing the in-

roads of this insect. This moth has a parasite which attacks it with great vigor. In removing cocoons do not take those without egg masses for these have been attacked by parasites and in destroying these cocoons the parasite also is destroyed.

The gypsy moth which has caused such great trouble in neighboring States, has been found in Woonsocket and Cumberland. Intelligent and persistent work on the part of the tree commission in this State has resulted in reducing the numbers of the moth to one-eighth of what it was when the work was begun. It has not been found south of Warren yet.

The brown-tail moth has a bad reputation for shedding minute hairs, which are barbed in such a way as to burrow into human flesh when they strike it, causing the so-called "brown-tail rash."

It is an omnivorous feeder on foliage. It has been heard from within five miles of this city, though not yet seen within the city limits.

Fungi of various sorts also do much damage to trees. They grow for a long time inside the trees before making their appearance on the exterior.

Carelessness on the part of human beings ruins many trees. Drivers often leave teams so near trees that the bark is worn off by the rubbing of axles and whiffletrees. The escape of illuminating gas from leaky mains has been responsible for the death or serious injury of many trees.

Surrounding a tree with a granolithic or other sidewalks, with no chance for the roots to spread except into a macadamized street, is poor policy. It is much

better to plant a tree in sod at the edge of the sidewalk.

The lecturer showed pictures of sprayers and fumigators of several kinds, and explained their uses.

The State has made a small appropriation for tree protection. It will help towns which will share the expenses. It is to be recommended that citizens and societies in Newport will bring the matter of tree protection to the attention of their representatives in the Legislature, that the appropriation now under discussion may be made ample for the purpose.

BALLSTON, N. Y.—The greenhouse of Fred Kemp was damaged by fire recently to the extent of \$300.

LEE JUNCTION, ILL.—J. L. Lutz reports a loss on his nursery stock last Winter of over \$500, by rabbits.

New Rose American Pillar

NO Climbing Rose is attracting the attention that
"American Pillar" does, and most deservedly so.
It is by far the best single-flowered climbing rose for
outside purposes; and on account of the great durability
of its flowers, it is the best single-flowered forcing rose.

July 12, 1909.

Gentlemen:
Let me tell you, too, that the
American Pillar is a better
Rose than you know, perhaps.
The plant I had from you,
which was planted this Spring
under unfavorable conditions,
is now giving us a succession
of most exquisite bloom.

Yours truly,
J. HORACE McFARLAND,
Pres. of American Civic As-
sociation, Harrisburg, Penna.

COMMENT FROM THE
LONDON GARDEN

"A most notable feature in
this glorious display (Temple
Flower Show in London) was
the New 'American Pillar'
Rose. The large and attractive
rich rose pink blooms are pro-
duced in immense clusters, the
white centers of the blooms
adding to their attractiveness.

AMERICAN ASSOCIATION OF NURSEYMEN

E. H. Stannard, Ottawa, Kan., President; N. P. Stark, Louisiana, Mo., Vice-President; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., treasurer. 25th Annual Convention at Denver, June 8, 9 and 10.

For travel information in re the forthcoming Convention at Denver, and Program, see wide measure pages.

From an article, entitled "Plant Breeding Methods Applies to Trees," read by Dr. A. Henry before the Linnean Society, April 7, 1910, many interesting facts are given regarding English Elms, the most important of which appears to be the fact established that there are only two kinds of Elms which give, when sown, uniform seedlings. These are the two pure species, *Ulmus montana* and *U. glabra*. Every other kind of Elm, when sown, produces mixed seedlings of different sizes, different arrangement of leaves, etc.

Euonymus Japonicus for Seashore

The growing demand for homes by the sea causes frequent inquiries for evergreens that will flourish there. In earlier years no thought was given to the winter home at the shore, but it is different now, hotels are open the year round and are well patronized; and cottagers, many of them, live by the sea continually. It is cooler there in Summer and warmer in Winter, the presence of water in the latter season tempering the cold greatly. All these things cause inquiries for trees and shrubs that will thrive near the coast, and there is a good list of such shrubs and trees suitable for the purpose, but at the present time we wish to refer to but the well-known broad-leaved evergreen, *Euonymus Japonicus*. It is an excellent one for the purpose, having been in use for many years. There is something in the vicinity of the ocean that is agreeable to this shrub. The moist air, for one thing, is assuredly so, and then the light, sandy soil usual in such situations is as good for it, apparently, as a rich loam. Along the Jersey coast, from Cape May to New York, it stands uninjured in proximity to the sea, its bright green leaves presenting a cheerful sight the whole season through. Its several varieties stand the salt air as well as it does; and any of them employed as a hedge gives great satisfaction.

The name "Ever-blooming Spiraea" is being applied to the *Spiraea Bumalda* and its variety *Anthony Waterer*, and, really, they deserve the name as much, or more, than many plants to which the name is attached. When let grow as they will there are flowers the whole season through, from June until frost; and when cared for in the way of cutting off dead flowers—a little pruning back after each succession of flowers—the display is good to the end of the season.

When strong young plants are set out in Spring and cut well back they flower profusely in late Summer and Autumn. In this respect these *Spiraeas* appear to occupy a position between the Spring-flowering and late Summer-flowering shrubs.

As is well understood, if a Spring-flowering shrub, such as the Japanese Snowball, for instance, is cut to the ground in Spring, there will be no flowers; but the *Hydrangea paniculata grandiflora* may be cut down and it flowers the better for it. The *Spiraeas* referred to appear to bloom treated either way, the cut down ones giving a late display of flowers.

The Name Wistaria In a letter from E. Y. Teas he asks which is the proper spelling of the vine *Wistaria* or *Wisteria*, the former being the way he has always spelled it. All botanists agree that "Wistaria" is right, the vine being named for Dr. Caspar Wistar, we are told; so our friend can continue in his way of spelling the name.

Mr. Teas further enquires whether the *Passiflora edulis*, mentioned in this department recently, is the same as the *P. incarnata*, the May-Pop of the South. The two are quite distinct. The *incarnata* is almost hardy in Philadelphia, dying to the ground in Autumn, but if its roots are protected from frost by a covering of forest leaves they will sprout in Spring. This *Passion Flower* is a beautiful and interesting vine, and when grown in a pot and set out in early Spring it thrives and flowers freely in late Summer. As everyone in the South knows, its large fruits are edible, and many persons make use of them in that way.

was to be dug out, cutting off all roots met with in the process. It is then easy to throw it over to the south side. The top is tied together—flat shape is best—and kept in place by a stout peg or two, then a good thickness of earth is banked over all. A 6-inch thickness is sufficient in mild climates, such as that of Philadelphia may be termed, as freezing under this will not injure the tops; still, no harm is done by adding to the depth of covering.

Treated in this way good crops of fruit may be had, and are had, by those who practice it. The little check the severing of a few roots causes when throwing the plants over for the Winter is really a benefit, keeping the bushes dwarf and promoting fruitfulness.

Halesia dip-tera Hardy Hiram T. Jones, Elizabeth, N. J., says: "I have both *Halesia dip-tera* and *tetraptera* on my lawn, trees about 50 years old and equally vigorous, and both very attractive, bloom about a week or ten days apart."

Sweet-Scented Mock Oranges Some thirty years ago, the *Philadelphus coronarius* was the chief species found in cultivation; all the old, large plants found in gardens today are of this kind. It is the true sweet-scented one, and though a dozen or more sorts are known at present there are no others known possessing its fragrance. It is the only one a customer should receive when he calls on a nurseryman for a sweet-scented Mock Orange. It has a variety in which there is a tendency to make semi-double flowers, also a golden-leaved form, all of which are sweet-scented.

The *Philadelphus grandiflorus*, *inodorus*, *Zeyheri* and *Columbianus*, are all handsome shrubs, some of them bearing beautiful large flowers, but with little or no fragrance.

A later introduction is *P. Lemoinei*, which has slender growth though attaining a good height. Its odor is very good, more attractive to many than that of the *coronarius*. Its peculiar fragrance is what many term "lemon-scented," and it can be well recommended to those wanting a sweet-scented Mock Orange other than the old *coronarius*.

Cerasus Caroliniana Last Spring the writer received from a friend in Kansas a small plant, about 6 in. high, of the southern evergreen, *Cerasus Caroliniana*, the Cherry Laurel as it is called. It was sent him to test its hardiness outdoors. It was planted on the south side of a dwelling, making a plant a foot high, with two or three branches, by Fall. When Winter came, a slanting board was set against it, resting on the wall of the dwelling, keeping the sun from the foliage, but allowing the free passage of air through the sides. The little plant came through the Winter without the loss of a leaf, and without the browning of foliage, just as good in fact as when the board was set to shade it. Being such a small plant and enduring unscathed the rigors of the Winter speaks well for its hardiness, and no doubt when of a good bushy growth it would need no shelter from the sun to preserve it, perhaps not even losing a leaf.

Further south this evergreen Cherry is used for hedging, making a splendid hedge, and doing well in most all soils and situations. It is, in fact, one of the handsomest broad-leaved evergreens of the South. The leaves are of a dark, glossy green, and it produces white, fragrant flowers, with seeds not unlike those of the *Laurus nobilis* of Europe. It is too much to hope for its general hardiness here, but there must be hundreds of places of a sheltered nature where it would thrive; and south of Philadelphia it should do well anywhere.

Double-Flowering Peaches Flowering Peaches are such lovely objects when in bloom in early Spring that it is a pity they are not oftener met with in as good form as they might be. The Peach is a tree that will be the better for a pruning every year, so as to have a shapely specimen with an abundance of young shoots. It is these young growths that give the flowers. Another thing that is required and rarely given is the extermination of the borer. Those who grow the tree for its fruit are well aware of the importance of this, but the double-flowered ones are set out in a lawn with no thought of keeping borers from the stems, as is shown by the many half-dead trees often met with. With fruiting Peach trees in orchards there are many ways of keeping out borers which are not practicable on a lawn, so that the old way of examining the trunks in July and September is the best one, getting out what borers may be in, if any, with the aid of a knife and a piece of wire.

To get the trees bushy, Summer pruning is the best. A slight shortening in of the new shoots is sufficient, as the side shoots push then, and every shoot, beside helping to thicken the tree and shape it, means an additional number of flowers.

The three best known flowering Peaches are the double red, pink and double white. These are indeed most beautiful. The three varieties are often planted together, forming a group of great beauty.

This is the time to set out seedling Peach stocks on which to bud the varieties desired when the stocks are ready, which would be in September or thereabouts.

Euonymus Japonicus, Var. *Aureo-marginatus*

The Fig in the North Many Philadelphians have Fig bushes in their gardens, which they protect in various ways, but very few have success with them. The only ones who do are those who throw the plants over on one side and mound soil over them, a plan which brings full success. The tying up of the tips with straw, gunny bags and the like is of no use whatever, unless the covering is thick enough to keep out all frost.

The throwing over of the plants to one side and covering the tops and all with earth is a plan followed years ago by a Dr. Needham of Washington, D. C., and he made a success in securing a crop. In the first place great care is to be exercised in the planting of the Fig to have all the roots on one side only, say on the south side. Then when the time to cover it up for Winter comes a hole is dug on the north side, as if the tree

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.
The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Dreer's Select Potted Roses

FOR OUTDOOR PLANTING

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

Cincinnati

The great May Festival, which is a recognized musical event all over the world, took place this week, commencing Tuesday evening, May 3. President Wm. H. Taft was an honored guest of his home city. This year's festival surpassed all previous events. The children's Chorus consists of over 700 school children and is said to be the best ever; seats for Friday evening, which this event takes place, are all sold; not even standing room is left in the great music hall. Some of the noted singers of the world are here and necessarily there will be some flowers sold for this occasion. The Walnut Hills Floral Bazaar have

several dinners to decorate for in honor of the President. Hardesty & Co., are also comparatively busy.

In connection with the festival, on May 2 the U. S. Post Office and Custom officers of the city of Cincinnati celebrated their 25th anniversary, since moving into their new building. The decorations of this building were principally of the stars and stripes. They also gave away flowers to the people on Monday afternoon. The building is decorated on the inside with wild Smilax and flags; this work was done by the John Shillito Co., a dry goods concern of this city.

Plants and everything pertaining to the establishment of B. P. Critchell were

sold at auction, May 2, to the highest bidder, and, like all auction sales, some things sold at ridiculously low prices, while others went at all and more than they were worth.

General business during the past week was very good, the wholesale houses cleaning up daily all the good stock.

Carnations are on the scarce side and not equal to the demand. American Beauty is in good supply and equal to demand, also Killarney and Richmond Roses; Lilies are a little on the scarce order; Callas are about done; Ten-Week's Stocks and Snapdragon are putting in an appearance.

The stores all report a fine business in funeral work; at this time of the year

this is the best business the florists have. With Mothers' Day, May 8, all white flowers will be disposed of, and I look for a great scarcity of white Carnations.

I am in receipt of a letter from a son of W. E. Hall of Clyde, Ohio, who says his father is better than he was a week ago, but that he has not regained consciousness nor taken nourishment for fourteen days. W. E. Hall is quite a Carnation grower, and has some seedling Carnations he is growing for his own use that certainly are fine. We hope Mr. Hall may have a speedy recovery, although pneumonia is a hard and obstinate disease to fight; with a good constitution, we have no doubt he will pull through. E. G. GILLET.

CARNATIONS

Strong, clean, well-rooted stock; large cuttings that will make plants quickly.

Large, strong, well rooted, absolutely no disease, taken from plants grown especially for stock and rooted in a cool house. These will make plants quickly and cannot fail to please you.

Washington, D.C.

A few of the advance weddings occurred during the week, assisting the retailers; and, additionally, there was a little greater demand for funeral work. The past few cool days have improved the qualities of Roses and Carnations which are in quantities equal to the demand.

There are a great many short Easter Lilies on the market, which are selling to the exclusion of Callas, for which latter there is usually a demand at this season.

All probabilities of frost having passed, a good fruit crop seems a certainty. Locust blossom was never in such profusion as at the present time, and, if the old adage be true, there will be an unusually large crop of Corn.

The first Pond Lilies of the season are coming in and, so far as can be learned, this is about two weeks in advance of the regular season.

Bedding plants are beginning to move quite lively and it is not an unusual sight to see wagon-loads of them being sold around the streets.

Jas. L. CABBEEY.

All local florists seem to have enjoyed a very good Easter week and, since then, there has been considerable funeral work and a large number of weddings, receptions and dinner parties. Washington florists devote considerable time to their windows and some exceedingly novel decorations are noted.

A number of the local growers have stalls in the markets; these markets open about 7 a.m. and close at 4 p.m. The stalls are held by the same family for years; they are adopted for display of stock and some good business is reported. The stalls in the markets and the windows of the retail stores at time of my visit were profusely decorated with Dogwood blossoms and wild Azaleas.

Albert F. Esch has 5500 sq. ft. of glass devoted to a mixed stock necessary for a local wholesale and retail business. Some good trade is reported here in made-up baskets and funeral work.

David I. Saunders of 2d and W. sts. N. W., makes a specialty of bedding plants. He has 10,000 sq. ft. of glass and has been in present location about 33 years. Some exceedingly fine stock is shown here.

M. J. McCabe of 439 Centre Market has 38,000 sq. ft. of glass, devoted to Roses, Carnations, and Lilies. Easter trade was excellent and resulted in a clean-up. Funeral business is very brisk.

E. Milton Thomas has two stalls in Centre Market where he has been for past 12 years. Trade has been good since Easter, which was best he ever had.

Robert Bowdler of 1723 Florida ave., N. E., has some 20,000 sq. ft. of glass for mixed stock and between this glass and two stalls in Centre Market, good trade is reported. The market stalls are in charge of Adolph Bowdler. Mr. Bowdler has been in the trade for over forty years, for thirty-five of which he has had stalls in Centre Market.

S. H. Lucas of Anacostia has 5000 sq. ft. of glass in which he makes a specialty of growing pot Roses and mixed stock; he has been in business for over twenty years.

A. Herold has been in Centre Market for fifteen years and reports an increasing trade in funeral work. His glass is located at 512 6th st. S. E.; here he grows a mixed stock. Easter trade was unusually fine.

J. R. Morgan reports a big business during Easter and found the supply unequal to the demand. He has 60,000 sq. ft. of glass devoted to mixed stock and does a nice trade in Asters and Dahlias during the season. He has a stall in the Centre Market.

The Union Station trade is taken care of by M. Conomikes, who has a neat circular glass counter near the main entrance, which is always well supplied with cut stock of all kinds. Some nice orders are taken here for funeral work.

The American Rose Co., 909 E. st. N. W., report Easter as best ever during the twenty years they have been in present location. The funeral work here is unusually large at this time and shows a good increase over past years. Miss Dexter is in charge of the store, having come here some ten years ago from New Bedford, Mass. The ice box is made entirely of glass and built across the store, allowing passage around one end and giving considerable space in the rear for the workroom, as well as allowing a full view of the store from the rear through its glass walls.

ORCHIDS

Cattleya Trianae

Owing to lack of room and large shipments arriving, we offer this popular Cattleya for immediate delivery, at \$40.00 per case until sold. The plants are A. i. in every way.

We also have received **Cattleya Gaskelliana**, **Oncidium varicosum** Rogersii, **Oncidium crispum**, **Miltonias**, **Laelias**, etc. All other Commercial Varieties to follow in quick succession.

A. R. Jones of the Philadelphia office of the S. S. Pennock-Meehan Co. has been in town for several days, taking charge of their Washington branch, owing to the illness of Wm. J. Moore, who is confined to his room in the George Washington Hospital. Mr. Pennock was also here for a few days pending arrival of Mr. Jones. The business transacted has run ahead of the previous year to quite a considerable extent.

The "Washington Florists" of 13th and F. sts. N. W., have about the largest show windows in town, and they make them up very attractively. Some 80,000 sq. ft. of glass is maintained in Alexandria, Va., and is devoted to mixed stock for the stores. Easter trade was fine and receptions and dinner parties are keeping all hands busy.

The Florists' Exchange, 727 13th st., is the latest commission house to open here. A. Schnell, formerly of the local branch of the S. S. Pennock-Meehan Co., was obtained as manager, and the company is made up of local growers and retailers. Since the opening on Nov. 15, 1909, business has been increasing each month. A line of supplies, cut stock and some potted plants is carried and being added to as business demands. Eastern trade was excellent, the greatest difficulty being in getting enough stock to supply the demand. Their shipping business is rapidly increasing.

J. R. Freeman has a nice roomy store on 13th st. near F. st. N. W., which is nicely arranged to handle his trade. The conservatory in the rear is an excellent place for display of stock. Good business is reported in funeral work and all hands are busy on weddings, dinners and receptions.

New Bedford, Mass.

Trade the past week was about the same as usual. Flowers are quite plentiful. Carnations retail at 50c. per dozen; good Roses at \$1.50 per dozen; Sweet Peas at \$1 per 100 blooms; Snapdragons at \$1 per dozen; Lilies at \$2 per dozen. Hardy Ferns are getting scarce just now and what are available are of very poor quality. Greens are in good demand. Funeral work has been fairly good.

The weather the past few weeks has been cold; the other week we had frost here, but, so far, nothing has been damaged. Garden work is in full swing.

S. J. Donaghy has seven men at work and reports he has all the work he can attend to.

Good window displays are the rule nowadays.

H. A. Jahn is cutting some excellent Sweet Peas, with long stems.

The street fakir is still with us, selling stock at wretchedly low prices.

Stocks seem to be coming along all right for Memorial Day.

J. H. Cleary is handling some nice Snapdragons.

The firm of C. H. & H. A. Lawton Co. has given a silver cup to be awarded in the Home Garden and Yard Improvement contest. The cup will probably be given to the contestant who makes the best showing in growing Sweet Peas. This concern, which has always been a large dealer in seeds, makes a specialty of Sweet Peas. The cup will be given in the name of Joseph W. Nicklas, a member of the firm. It is very gratifying to the committee to have such a substantial prize offered.

The book of WATER GARDENING
By Peter Bisset. Price, postpaid, \$2.50
A.T. DE LAMARE PTG. & PUB. CO. Ltd
2-3 Duane Street, New York

Hempstead. Mr. Havemeyer contended that the plants were part of a private nursery which he had established on the Green property, and he had a perfect right to any article he wished to remove to other places.

Newport, R. I.

The men employed on the estates of Summer residents as assistant gardeners, and some others, met on Sunday, May 1, and organized what is to be known as "The Gardeners' Men's Assistant Union." The object is to regulate wages and working hours. It was unanimously voted to ask the following scale of wages, beginning June 1: \$2.25 per day of nine hours, or \$55 a month, wet or dry.

There was a large attendance of those interested, and another meeting is to be held May 8. Employers have been notified and their action is awaited with interest.

ALEX. MACL.

Rochester, N. Y.

Trade continues brisk and stock, with the exception of Roses, generally scarce, owing to continued dark weather mostly every day for the past week or more. Carnations are particularly on the short side, especially white and Eucharist.

day evening at the Florists' rooms and decided that it would be held Nov. 1 to 5, 1910. Plans are under way to make this show greater and grander than ever. The committee in charge of the arrangements for this event is as follows: C. H. Vick, chairman; George B. Hart, E. J. Keller, A. H. Salter, J. M. Keller, E. P. Wilson. Details will be taken up more thoroughly at the meeting of the Association next Monday, May 9.

Pittsburgh, Pa.

Trade in general has been exceptionally light, but funeral work has been a strong factor of late owing to the deaths of many prominent citizens. Cut flowers have been very scarce the past ten days, owing to the cool and dark weather. Carnations were exceedingly short of the demand. Roses showed up better than Carnations and have been much used in their stead. Indications point to a scarcity on white Carnations for Mother's Day. E. C. Reineman, Mrs. E. C. Reineman and daughter have left for Europe; they plan an extensive trip, visiting most of the important cities, and taking in the flower shows in different centers. They expect to be gone about five months.

Arthur Lins, who was in the employ of G. & J. W. Ludwig for several years, has left the Smoky City for Los Angeles, the land of flowers and sunshine. Mr. Fred Burki of Gibsonia, Pa., is laid up with rheumatism for the past two weeks. Miss Margaret Hammersmith, one of E. C. Ludwig's salesladies was married Tuesday, April 26, to Henry Breining, a well-known North Side merchant. Visitors: L. Henle of Henle Wax Paper Co., New York; H. Ryovold of Guldemond & Son, Lisse, Holland; C. J. Ford of A. Herrmann, N. Y. City; Mr. Smith of Wm. J. Boas & Co., Philadelphia. D. W. L.

Plants Cannot be Removed from Leased Land—An Important Decision

After months of litigation L. H. Green, real estate operator at Mineola, N. Y., has obtained a verdict against Theodore A. Havemeyer for \$4500 for plants, shrubbery and bulbs which Mr. Green alleges were taken from a place he had purchased at Hempstead which had been leased by Mr. Havemeyer. Mr. Havemeyer's employees removed some of the imported plants and shrubbery to the country place of Oliver W. Bird, at

You Ought to Have More of the Palm Business of Your Town

And Heacock's Palms will help you to get it! There's a lively demand in every locality, as you know, for good Palms—both from persons who purchase outright, and from those who rent for weddings, receptions, social functions, etc. In either case, you can supply the demand with profit to yourself by furnishing Heacock's Palms—Kentias, Cocos, Arecas, etc.

We grow them by the thousands and our men are real Palm experts. Our stock is vastly superior to any imported stuff you could buy—our Plants are clean, healthy, vigorous, acclimated. The accompanying illustration shows how perfectly they mature under our care. We would like to fill a sample order from you—for a dozen or a carload—each specimen just as perfectly developed as this one.

Following are our current prices for this choice stock of Palms:

Areca Lutescens

6-inch pot, 3 plants in pot, 26 to 28 in. high.....	Each..	\$1.00
7-inch pot, 3 plants in pot, 30 to 32 in. high.....	Each..	2.00
8-inch pot, 3 plants in pot, 36 in. high.....	Each..	2.50
9-inch pot, 3 plants in pot, 42 in. high.....	Each..	3.00

Cocos Weddelliana

2½-inch pot, 8 to 10 in. high.....	Per 100..	\$10.00
------------------------------------	-----------	---------

Kentia Belmoreana

5-inch pot, 6 to 7 leaves, 18 in. high.....	Per doz.	\$50.00
5-inch pot, 6 to 7 leaves, 20 in. high.....	Each	70.00
6-inch pot, 6 to 7 leaves, 22 to 24 in. high.....	Each	Doz.
7-inch pot or tub, 6 to 7 leaves, 32 to 34 in. high.....	Each	\$12.00
9-inch tub, 6 to 7 leaves, 5 ft. high.....	Each	24.00
		\$7.50 and 8.50

Made-up Kentia Belmoreana

9-inch tub, 4 plants in tub, 42 to 48 in. high.....	Each..	\$4.00
12-in. tub, 4 plants in tub, 6 ft. high.....	Each..	15.00

Phoenix Roebelenii

5-inch pots nicely characterized.....	Each	\$1.00
6-inch pots nicely characterized.....	Each	1.50

We are making large shipments right along; to be sure of the best, therefore, you should get your order in AT ONCE. Phone, wire or write, and when in Philadelphia be sure to run out on the Reading and see our stock.

San Francisco

The Market

Business on the whole is fairly good, prices are holding up, and good returns have been the rule for the past week. Carnations are still abundant, and are being cleaned up in pretty good shape, although no fancy prices are being realized in this line, from \$2 to \$3.50 per 100 being the average returns for good blooms. Roses are still coming into the market in good quantity and the quality of the blooms is all that could be desired. Prices in this line also show a little improvement over last week. American Beauty is holding its own and sells

well at from \$2 to 3 per dozen. Sweet Peas are becoming a little more plentiful; prices, however, still hold good, although if the warm weather continues the market will be swamped with them and prices will drop. Spanish Iris are still as popular as ever and sell rapidly. Tulips and other bulbous stock are on the wane and another week should finish them. Large quantities of Easter Lilies are still being brought into the market and growers are lucky if they get \$1 a dozen for them. Among the cheaper grades of flowers, Pansies, Wallflowers, Lilacs, and fruit blossoms are in evidence and find a ready sale.

Each year has seen a growing demand for Orchids of all descriptions in San Francisco, and this year has been no exception to the rule. Although Cattleyas are coming into the market in large quantities at present they sell rapidly at 60c. per bloom, wholesale, and the supply is not equal to the demand, Phalaenopsis amabilis is also a fine seller and fetches 25c. per bloom wholesale. Large quantities of Cattleyas Mossiae and Mendellii are being shipped at present by the out-of-town growers who specialize in this line.

The supply of green goods is more than sufficient at present. Smilax is plentiful, as also is Asparagus plumosus and Sprengerii. Maidenhair Fern is becoming more plentiful and there is a good demand for it in downtown stores.

Various Notes

The monthly "field day" of the Pacific Coast Horticultural Society will be held on May 15. The E. Gill Co. of Berkeley will be the hosts on this occasion and a large delegation of members and friends are expected to turn out.

On April 26, the park commissioners, in council, before the finance committee of the board of supervisors, agreed to take under advisement the following estimates for the public squares and outlying parks in the city: \$11,000 for the improvement of Holly Park; \$1000 for the improvement of Garfield Square; \$10,000 for the improvement of Jackson Square; \$25,000 for the construction of a retaining wall and the improvement of Franklin Square; \$20,000 for the improvement of Mission Park; and \$5000 for the improvement of Buena Vista Square.

Phil Murray has accepted a position with the C. C. Morse Co., on Market st. Dr. Parker of Santa Cruz is sending some fine blooms of Cattleya Mossiae into town at present. He reports that work

CROTONS

Fine varieties, first-class plants, highly colored, 25c., 50c., 75c. and \$1.00 each.

DRAECAENA SANDERII, 3-in., 25c.

R. G. HANFORD, Norwalk, Conn.

Please mention the Exchange when writing.

on his new greenhouse is progressing rapidly.

Extensive plans are at present being made to provide the mission district with suitable parks and open spaces. John McLaren, Superintendent of Parks, has drawn extensive plans for this purpose and will devote a large apportionment of the funds set aside for the city parks for this section of the city.

C. Navlet of San Jose was a recent visitor in town.

The J. H. Sievers Co., on Powell st., were making a special feature of Orchids in their window displays in the past week. Orchids, they claim, never fail to attract the people.

Pelican & Rossi report trade as being fairly good with them. Spring weddings and funeral work keep them busy at present.

The Siekfreid collection of Orchids at Alameda will shortly be sold. A well known city firm has undertaken the disposal of them.

Aphine, the new insecticide, is beginning to make itself known on the coast, and the MacRorie-McLaren Co. of San Francisco, who are the Pacific Coast agents, are receiving numerous inquiries regarding its merits. The writer has personally given this insecticide a thorough trial and has nothing but praise for it. Aphine has certainly come to stay and ought to prove invaluable to our large growers on the Coast, who are looking for a safe and economical remedy for scale and other insect pests.

H. Plath, of Ocean View, has been spending a few days at Santa Cruz. He reports that business in that section is unusually brisk.

Robert McIntyre, late head gardener to Sir Charles Tennant, of The Glen, Peebleshire, Scotland, and for many years a prominent and valued contributor to the "Gardeners' Chronicle," was a welcome visitor in town last week. During his visit here Mr. McIntyre visited many of the leading establishments in this vicinity. He sailed for Honolulu, on the Manchurian, April 26.

Park gardeners over Oakland way are all smiles these days, the park commissioners having decided to raise the city gardeners wages ten per cent.

The MacRorie-McLaren Co. received a large consignment of Cattleyas labiata and Trianae this week.

The E. W. McLellen Co., of Burlingame, are bringing some fine Roses into the market at present. Gardenias are also a specialty with this firm.

Andrew McDonald, head gardener to J. B. Coryell of Menlo Park, will leave shortly for Europe. Mr. McDonald will be away for three months and intends to visit all of the leading Orchid growers in England.

F. Luddeman, of the Pacific Nurseries, intends to sell out his plant and is at present negotiating toward that end.

The Palace Hotel on Market st. has made a start to furnish its large hall with big Palms. The Palm Court in this hotel, in the old days before the great fire, was famous all over the world. Every effort will be made to have the new Palm court a worthy successor to the old.

The D. O. Mills estate at Millbrae, now owned by Mrs. Whitelaw Reid, wife of the American Ambassador to the Court of St. James, has been thoroughly overhauled this Spring. It is Mrs. Reid's intention to spend at least three months of the year at her Californian residence.

The estate of Eugene de Sabla was also visited by the writer last week. Extensive alterations and improvements have been carried out during the Winter by Wm. Hill, the energetic head gardener, and now one would scarcely know the place. The famous Japanese garden at El Cerito is well worth a visit.

The Garden City Pottery Co. reports an ever increasing demand for pots; this year's orders have eclipsed all previous records.

Callas are in full bloom at present and they look exceptionally pretty. The MacRorie-McLaren Co. are the largest dealers in Callas in this section and have an especially fine lot to dispose of this season.

Henry Gertzien of Redwood City is

May 7, 1910

busy getting ready for the 'Mums; he intends to go in for them heavier than ever this year.

Donato Bros. of Melrose have a fine selection of Japanese trees and shrubs in their nursery at present. Trade has been unusually brisk with this firm for some time past and work is being rushed along on their two new houses.

The weather for the past week has been all that one could desire; beautiful clear days with bright sunshine have been the rule and everyone, growers and florists alike, seems happy. The woods, hills, and meadows are gay with the colors of the wild Lupin and the Poppy, a delightful combination of blue and gold, and thousands of people leave the busy streets of San Francisco, daily for the cool and soothing quietness of the country.

WM. MCML. BROWN.

Baltimore

The Market

Business conditions this week are somewhat more improved compared with those of last. Retail trade last week was certainly dull, owing to the weather conditions that made all kinds of business feel the effect as well as the florists. The seed houses report a large falling off in orders that gave the clerks time to arrange their stores. The supply of cut flowers is still heavy and arrivals move slowly. The pot plant situation has been at a standstill but stock is being disposed of fairly well this week. The sudden change in the weather, with the bright sunshine, has put the soil in good condition for planting again. Many seeds that were put in the ground have rotted as well as the Potatoes and it is feared that considerable planting will be called for again. Carnation plants are in the fields and look bad.

Carnations are still heavy in supply and sell at all kinds of prices; the quality is poor. Roses seem to be plentiful enough to meet the demand; they are offered at fair prices and move well, all grades being disposed of. The demand for Sweet Peas keeps up and the supply is short. Lilac is about over but has been a heavy glut. This year has been a record-breaker for it; it is claimed that the supply was never known to be as heavy as this season. Snowballs are now coming freely and the market is loaded heavily.

Notes

Edward Van Reuth, Hamilton, Md., who has been suffering with blood poison and dropsy, is reported much better. His business has been looked after by his wife.

The demand for Pansy plants this year has been exceedingly heavy. Florists, seedsmen and department stores kept a heavy stock on hand and sold out.

Halliday Bros. had an excellent window display this week, of Ferns, Orchids and Snowballs.

Heavy calls for flowers this week for the retiring president of the Police Board were a feature in the trade.

John Eberhardt has his city store stocked heavily with pot plants.

James Glass is still showing a beautifully arranged stall of seasonable flowers.

G. N. Ekas, who has erected a showy stall under the eaves of the market, reports business dull and looks forward to the Fall season.

Charles Cook is erecting a range of houses on his new place, Old Frederick Road. It is reported that some of the houses blew down in a wind storm; no glass was in place.

E. A. Seidewitz, 323 N. Charles st., has issued a Saturday special card that has attracted attention, also a card showing how to keep cut flowers fresh. M. E. Wilton Pierce is his manager.

Otto Guerth is showing a line of cemetery vases and is displaying tastefully arranged windows.

Charges of mismanagement in the administration of the city parks are under investigation. J. L. T.

St. Louis

The St. Louis Florists' Club will hold a regular monthly meeting next Thursday afternoon, May 12, in their meeting rooms in the Odd Fellows' Building. The May meetings are, as a rule, poorly attended by the growers as they are busy with planting, so President Windler says he hopes the store men, who are not so busy, will come out and make a good meeting.

Henry M. Schisler of the Schisler-Corneli Seed Co. has the sympathy of the trade at large in the loss of his wife who

WE call special attention to our large stock of **FERNS**, in all the leading varieties. We particularly mention **NEPHROLEPIS SCHOLZELI** and **NEPHROLEPIS COMPACTA**, both of which are exceptionally fine varieties for growing on.

Neph. Scholzei

2 1/4-in. pots, strong plants, \$8.00 per 100; \$76.00 per 1000

died on Friday, April 29. The funeral took place Sunday, May 1, from her late residence on Halliday ave. Mr. Schisler is an active member of the American Seed Trade Ass'n, and the members thereof will be grieved to learn of his loss. A number of the local seed and floral trade attended the funeral and sent many beautiful designs.

Theo Miller at Euclid and Delmar bvd., is making extensive alterations to the front of his place which will make it one of the most attractive in the West End. Mr. Miller caters to a high class trade in his district and carries only the best of everything in the cut flower and plant line.

Edward Gerlach, bookkeeper and manager of the cut flower department for C. A. Kuehn for many years, will quit his position this month having associated himself with the new firm of Hagen & Co., dealers in roll paper.

Our old friend, Perrie Schneider from Springfield, informs us he has left the employ of A. C. Canfield and will again take his old position with the Oakland Floral Co., at Kirkwood. The trade at large will be glad to see Perrie back. Mr. Erker, who owns the place, is at present building four new houses 28x200 and, when completed, will have 23,000 feet of glass. This firm grows Carnations and Sweet Peas, which are handled by C. A. Kuehn; they are noted for growing all first-class stock.

C. Young & Sons Co. had a good run of wedding work last week; they furnished a swell affair at the Columbian Club which cost \$500. The general run of trade at the store fell off somewhat during the cold snap but is now as good as usual in all lines.

The Park Board of East St. Louis was reorganized last week, two new members being elected, Dr. Fairbrother and Dr. Parsons. The Board has done good work for the parks all the year.

ST. PATRICK.

Indianapolis

The State Florists' Association of Indiana held its monthly meeting at the Elk's Club rooms, May 4. Much important business was transacted and a buffet luncheon was furnished at the close.

Tomlinson Hall market is hooking numerous orders for the "City Beautiful" these days. Wholesale and retail trade is flourishing.

F. Hitz of Madison, Ind., was in the city hooking orders for cut flowers.

Charles Vollrath is recuperating from the grip.

Massachusetts ave. is to be specially lighted by the merchants. The three flower shops in this street should derive much benefit therefrom.

C. O. Wise of Chicago was a visitor. I. B.

PALMS! KENTIAS, in 2 1/2 inch pots, \$8.00 per 100, \$75.00 per 1000.

SPECIAL OFFER

We will give one copy Plant Culture and The Florist's Exchange two years, all for \$3.00.

Plant Culture

NEW, THOROUGHLY REVISED EDITION. JUST PUBLISHED

By Geo. W. Oliver, Propagator to the Bureau of Plant Industry, U. S. Department of Agriculture

Printed on enamelled paper and illustrated with one hundred plates and engravings. Strongly bound, 12 mo., cloth. By mail postpaid, \$1.50

A WORKING handbook of every day practice for the Florist and Gardener, and those who intend to grow plants and flowers, in the greenhouse or garden, as a means of obtaining a livelihood. Each and every article is written in concise, simple language, and embodies wholly and solely the experience of the writer.

The plants dealt with comprise those which are commercially handled by Florists, Gardeners and Nurserymen, and include Florists' Flowers, Stove and Greenhouse Plants, Hardy Herbaceous Plants, Annuals, Shrubs, Hardy and Tender Vines and a chapter of General Directions, covering Propagation, Seeds, Grafting, Hybridization, etc.

This reliable cultural work has been gotten up for use, not ornament; therefore the price has been fixed at a figure within the reach of all. It contains more real practical information for those for whom it is intended than is found in much more pretentious works.

Price \$3.00. Send for Sample Pages

A. T. De La Mare Ptg. and Pub. Co., Ltd., 2 to 8 Duane Street, NEW YORK

FOUNDED IN 1888

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the Trade in General.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter.

Published every Saturday by the A. T. De La Mare Ptg. and Pub. Co., Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. De La Mare, president and managing editor; Jas. H. Griffith, secretary; David Touzeau, treasurer. The address of the officers is the address of this paper. Short address: P. O. Box 1697, New York. Telephone 3765-6 Beekman

PRINCIPAL OFFICES

Chicago: Margaret T. Flint, room 614, No. 60 Wabash Avenue; tel. Randolph 2000. Office hours: 9.30 to 12. Boston: Robert Cameron, Cambridge, Mass.

Philadelphia: Appointments can be made or letters addressed to Jos. H. Sperry, our representative, care of Keystone Hotel, Market st., near 16th, for Mondays and Tuesdays.

Yearly Subscriptions.—United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.50. Payable in advance. Remit by Draft on New York, Post Office or Express Money Orders; if paid in cash please register letter.

The address label indicates the date when subscription expires and is our only receipt therefor.

Registered Cable Address: Florax, New York.

Telegram.—Telegrams received in this office up to 3 p.m. Wednesday, containing changes in advertising, will receive attention for the issue of the Saturday following; likewise, telegrams having informative matter intended for our news columns will be received up to Thursday 9 a.m. News telegrams should be forwarded after 5 p.m. Wednesday and marked "Night Press Message, Collect." These will be forwarded by the Telegraph companies at their newspaper rate, providing the material so forwarded contains news for the paper.

The Florists' Exchange is a trade paper, and its ads. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

The New Gladioli Society

Is to hold its first meeting on May 27, at Horticultural Hall, Boston. The energetic and hustling Maurice Fuld is working hard to make it a success. We cannot see why this Society should not have a great future. Gladioli are quite popular with florists, nurserymen and amateurs. There is a great future in this genus as a florist's cut flower and, when they are better known, they will be grown for market as largely as Tulips and Narcissi are today. R. C.

The Retail Store

Cost of Equipment and Maintenance

Our Detroit correspondent, Frank Danzer, has set forth, before the members of his local club, his ideas as to the cost of a first-class retail store and the expense of its upkeep; now, who among our readers, will give us their expression as to the number of dollars required to start and run the average well-kept retail store of a small city? These figures will be of greater interest to the majority of our readers.

Society of American Florists

Registration of Violet

Public notice is hereby given that Thomas DeVoy's Son of Poughkeepsie, N. Y., offers for registration the Violet described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's description: Sport of Marie Louise, 1907. Identical with parent plant, in foliage and habit of growth; flowers double and of a dainty light Wistaria shade.

Name: Marie Elise.

April 28, 1910.

H. B. DORNER, Secretary.

The S. A. F. Convention

Arrangements for the Convention are well under way. Supt. of Trade Exhibits, C. H. Vick, reports satisfactory progress. Those desiring space would do well to reserve same at once. Notice may be given that the entire space available for exhibition purposes in Convention Hall is 48,000 sq. ft. This hall was specially constructed for the purpose and it goes without saying that Rochester has the best equipped exhibition building in the country.

The plans for the exhibit will be carried out on an elaborate scale. Music will be a special feature afternoons and evenings; it will be furnished by the 54th Regt. Band. H. B. STRINGER, Secretary.

Wanted—The Commercial Definition of a Seedling

Possibly in view of the clause in the Tariff Act of 1909, which reads as follows:

Stocks, cuttings and seedlings of all fruit and ornamental trees, deciduous and evergreen shrubs and vines and all trees, shrubs, plants and vines commonly known as nursery or greenhouse stock, * * * 25 per centum ad valorem.

the question has been asked us, "What constitutes, commercially, a seedling?" In other words at what stage of its growth, or age, or whatever may be the deciding factor, does a seedling lose its identity as such?

The question may seem an easy one to answer, but we understand there is, for all that, quite some differences of opinion among experts.

Does it cease to be a seedling after its first transplanting, or is this determined by a fixed standard of height or of age? Does the same standard govern all seedlings, whether of evergreen or deciduous plants?

We would like to see this question ventilated by readers of The Florists' Exchange.

Help Wanted

From all parts of the country—from florists, nurserymen and seedsmen, alike—the cry of shortage of help, experienced help, has been heard, particularly since the busy season started.

Admittedly, there is a shortage of practical men which is yearly becoming of more and more serious import. Now, what is the remedy?

This is a condition which affects the pocketbooks of the trade, for without men and boys the work must lag, orders remain unfilled or filled too late, or unsatisfactorily; good men, at the same time, may be worked too hard, generating more trouble for the employer.

To find an effectual cure for this trouble is worth the effort, and the topic could be made a leading feature of debate by our local societies as well as the greater national organizations.

Here and there individual employers may be fortunate enough to have so built up their business as to be in a position where they are never bothered by a shortage of this kind; such men are to be commended because they have been wise in their generation, exercised foresight, and have kept on training new material which they could promote as their business expanded.

As we see the question it is largely one of employer and method. Too many employers think it a bore and a loss of time to teach beginners.

Yet it is the young blood which you, yourself, carefully educate in your particular line, interest and treat generously, which is going to be your mainstay as your requirements enlarge.

Mere laborers can be had at any time; skilled labor is painfully short in almost every trade; ours is not the only sufferer, by any means.

Those employers who will give boys a liberal training are the best off, and even they will have many a discouragement. This is so self-evident as not to require debate.

But, in the meantime, the question is, how to obtain an adequate supply of skilled labor for this and next year's requirements?

Who will cut the knot?

Roses, Past and Present

An address by Anton Wintzer, of the Conard & Jones Co., West Grove, Pa., delivered before the Florists' Club of Philadelphia, May 2, 1910.

Mr. Wintzer's address was entirely extemporaneous, no notes being used, and was, in part, as follows: "I regret that I could not prepare a paper, and I fear that I may not fittingly entertain you. You will pardon me if I relate some personal experiences going back perhaps forty-eight years, to the time when I was a boy of fifteen working for Parsons & Co., of which company Samuel Parsons, author of 'Parsons on the Rose' was senior member, and the leading spirit.

One day the foreman, Emile Beaumont, sent me to tell Mr. Parsons that the new Rose Eugene Appert was in bloom. This Rose was sold to retailers at one dollar per plant.

About this time Samuel Parsons, while in Europe, engaged and brought back with him a German rosarian. Several acres of land were trenched and prepared, and sown to grass; and then beds were marked out and planted with old-time Roses, Moss, Damask, Hybrid China, all imported stock. Among them were General Jacqueminot, Baron Prevost, Bourbon Queen, Agrippina, Malmaison, Sombreuil and Hermosa. Probably \$10,000, in all, were expended. The experiment was a financial failure and was abandoned. One hundred dollars would have covered the profits.

Rose breeders of Europe were not slow to take advantage of the market which America afforded for their productions. Victor Verdier of Paris brought out some twenty-five new varieties annually, of which many were good, and other Rose breeders were also at work.

Just at this time little attention was given to distinction of classes between Hybrid Perpetuals and Hy-

brid Teas. If one of the latter was bred out of one of the former, it was allowed to remain among the Hybrid Perpetuals. For instance; La France is a Hybrid Tea, but was classed among the Hybrid Perpetuals.

Henry Bennett of England now began systematic hybridizing, sending out his ten pedigreed Roses, among which were Duke of Connaught, and William Francis Bennett, for which Evans of Philadelphia paid \$5000, thereby creating great excitement among rosarians.

Hybrid Tea Roses are rather weak. We need Hybrid Tea Roses with the vigorous and hardy character of Magna Charta and Paul Neyron, and the free blooming quality of La France.

We had at that time only three climbing Roses: Prairie Queen, Baltimore Belle, and Seven Sisters. Crimson Rambler, in 1894, was introduced by Turner from the Kew Gardens in England.

Later, Dr. Van Fleet, Dawson, Walsh, and O'Farrell, began bringing out new types, using in their work Wichuraiana and Mrs. De Graw and others, and gave us Ruby Queen, May Queen, Perle Queen, Royal Cluster, Alba Ruhifolia, Dorothy Perkins, Minnehaha, Dr. Van Fleet, and American Pillar.

Only ten years ago Single Roses began to be used. Twenty years ago a Rose breeder wrote me asking what he should do with the good single Roses.

American Pillar is a hardy, vigorous, free blooming Rose, the blooms remaining a long time on the bush, but at first it was not much esteemed and had to go to England before it was appreciated in America. Then someone saw its good points and put it on the market.

Back in 1865, 40,000 to 50,000 Rose bushes were considered a very large number. This was before the mail trade began. Then Roses were root grafted. Parsons kept secret the name of the stock on which he root grafted, but later I became convinced that he used William's Evergreen. Later, Roses began to be grown on their own roots.

The years from 1866 to 1869, inclusive, showed many introductions of Hybrid Perpetuals, such as Lorraine, which is still well worth growing, Normandy, and a good many reds, such as Duke of Edinburgh, Gloire de Santenay, John Keyes, Victor Verdier, Prince Camille de Rohan, Alfred Colomb and Anna de Diesbach.

Harrison's Yellow, under good culture, is one of the best own root Roses. It is an early bloomer, somewhat fragrant, and suited to our climate. The Scotch Roses, too, such as Stanwell's Perfection and others are all hardy, bloom early, are not subject to disease, and are suitable for use in landscape gardening.

Rosa rugosa is from Japan, is suitable for hedges, for planting in poor soil, and for use very near the seashore.

Double varieties of R. rugosa have now been produced, among which are Sir Thomas Lipton and New Century, by crossing R. rugosa with Souper, Ferdinand Meyer by crossing R. rugosa with La France, and Rosa rugosa magnifica by crossing R. rugosa with Victor Hugo.

China and Bourbon Roses have received little attention for forty years. Apolline, Queen Scarlet, and Agrippina are all good.

There is an opportunity for some Rose breeder to take up this work and give us some hardy China Roses. Plant breeders run in grooves, where one breaks the ground others follow, and for this reason some classes of Roses have been neglected. Rose breeders should take up these neglected classes and give us a more vigorous race from them. Follow out zealously, carefully, and intelligently a certain line of plant work for years, and results will follow. We must, of course, have money, but work with a love for the work also. This is the way Dr. Van Fleet has worked for years, giving up a highly lucrative profession out of love for the work. He has worked on unselfishly, and patiently; he has obtained results, and he is worthy of the highest commendation. Thus, also, has worked John Cook of Baltimore, one of God's noblemen.

We must work on filled with a love of the work. What are we here for? Take up some good and useful work and be happy. Those who worked years ago began to spread a love for Roses, and that love is fast increasing. Americans will soon be the greatest Rose buyers in the world. Other flowers are beautiful, but the Rose is the 'Queen of Flowers.' She always has been and she always will be the queen.

As the love of flowers increases among the people with equal pace the love of peace will increase also and no class of people is contributing more toward the ushering in of universal peace than the florists. Flowers are grown in love and beget the love of peace. The great rosarian, Henry Ellswanger, said: 'He who would grow Roses must have Roses in his heart.'

At the conclusion of his address Mr. Wintzer was enthusiastically applauded, and a vote of thanks was extended to him.

Discussion

Joseph Heacock first expressed his appreciation of Mr. Wintzer's talk.

Mr. Thilow related the following incident in the life of John Cook: My Maryland, he said, went into the New York Market and was favorably received; some one, consequently, offered a large price for the stock, but on condition that he be allowed to change the name

of the Rose. "No," said John Cook, "the Rose has been called 'My Maryland' after my State, and 'My Maryland' it shall remain, whether I receive money for it or not." Mr. Thilow asked if Climbing La France was a distinct variety, to which question Mr. Wintzer answered "yes," but that it was apt to revert.

Robert Craig spoke of the days when in rich soil his father used to grow Devonensis and some other Tea Roses, four feet high. They grew too large then for potting up again. That was before the dreaded black spot attacked outdoor Tea Roses. New York, Long Island and Hoboken, too, used to grow Tea Roses very large. His father used to bud many Roses on Manetti stock, letting them run up tall after cutting back the Manetti stock above the bud. "My Maryland," said Mr. Craig, "is the best grower of all Roses out of doors, and the freest bloomer, as proved by a test among many others. It has a great future as an outdoor Rose. Though a Tea Rose, it is very hardy. Plants in pots plunged in coal ashes wintered out of doors. My Maryland is a great monument to John Cook." Mr. Craig spoke of the old days when 100 Marechal Neil Roses in thumb pots sold for \$25. In 1861, Philadelphia growers were shipping many Roses South, but the war stopped that.

Adolph Fahrenwald said that though he grew Roses only for cut flowers, still that, too, hegets a love for Rose plants. He thought too few Hybrid Teas were grown in the garden, and that Rose spot would be overcome. He spoke of some very vigorous and healthy Rose bushes which he saw in sunken beds in Elizabeth Park, Hartford, Conn.

George Watson asked Mr. Wintzer why he left out Dixon in naming the Rose breeders, to which Mr. Wintzer replied that if he went over to the other side it would take all right, and besides you could not bring Ireland's climate over here. Later on, Mr. Watson asked Mr. Wintzer to tell about the bad things as well as the good, especially about the new Blue Rose.

Mr. Wintzer replied that although the color of the Blue Rose was not a Cornflower blue, still it was not so bad after all; that it should have a trial and that trying a Rose was like courting a girl, one did not know her till he had courted her. So a Rose should have a trial for several years, and should not be condemned in one or two years.

John Westcott said he could remember when in Winter they had no Roses in bloom, excepting perhaps Hermosa and one other. Then, a Winter bouquet of Roses had a five-inch center of Roses surrounded by some other flowers and green, and sold for \$10. Forty years ago a man called and insisted on having a bouquet made entirely of Roses. This was in Midwinter. It was made and the price was \$20. Thomas Cartledge, his partner, thought he was making the price too high, but other orders followed at the same price. This was the first introduction of bouquets of Roses in Winter in Philadelphia.

Frederick Hahman said that he could remember how well the Tea Roses grew thirty years ago, and bloomed outside, and that a mistake was made in going away from them. The public now expected hardy Roses. Educate the public to buy Tea Roses, he said, though they last but a season, such as Schwartz, Safrano, the Co-chets and others. Tea Roses, he said, were not so subject to black spot.

Death of Ludwig Moeller

In the death of Ludwig Moeller, on April 12, 1910, German horticulture has lost one of its most forceful and original representatives. He was practically a self-made man. Of humble origin, and starting out in life with merely a common-school education, without the higher technical training, without any capital of his own, and without influential friends to prepare the way for him, he achieved a place among the leaders of his profession by sheer force of will and perseverance, coupled with great natural abilities; in the plenitude of his powers his influence was the predominant one in German floriculture and pomology.

Ludwig Moeller was born on Dec. 4, 1847, in Bleckernkrug, province of Mecklenburg, Germany. On leaving school he went as gardener's apprentice to the estate of Diestelow, in Mecklenburg, and then worked for seventeen years as assistant with different florists and on gentlemen's estates. Even as a young man he took a prominent part in the sessions of the various florists' associations to which he belonged. In 1879 he became director of the Federation of German Florists' Societies which, at that time, was publishing the "Deutsche Gaertner-Zeitung." This marked the turning point in his career; and he now took up the technical side of gardening, exchanging the trowel for the pen.

In October, 1885, he resigned his several offices in the Federation, and on Jan. 1, 1886, the first number of "Moeller's Deutsche Gaertner-Zeitung," appeared; this was his own enterprise and was published at Erfurt, where its offices still remain. To this publication he now devoted his entire time, developing it from small beginnings into one of the leading horticultural journals of the world. He gave great attention to the illustrations, and invited specialists from all over the globe to

become collaborators. He created with his periodical the type of the modern German horticultural journal.

A few words as to the branches of German horticulture in which his influence was especially felt. He was one of the chief promoters of the German cut flower industry, and an authority on trade conditions covering same. He was influential in paving the way for promising novelties, while keeping meritorious older plants to the fore, his aim being to diversify plant culture. He was equally interested in all that made for trade advancement, and the expressions of opinion which he elicited on all new questions pertaining to horticulture have been of immense help to the German gardeners. The fruit growers also are much indebted to him for encouragement and instruction and the correction of abuses through his fearless criticism.

The regulation of exhibitions was one of his chief concerns and the improvements now obtaining in their management, as against the conditions existing some fifteen years ago, are largely due to his sharp and unceasing criticisms. This question, more than any other, aroused his mettle and, born fighter that he was, he spared no man in his attacks where he saw some abuse to be corrected. He was equally bitter in his denunciation of worthless fungicides, etc., and the weapon of ridicule which he so often used served to awaken horticulturists to the danger lurking in many of these preparations.

As a writer he was notable for the clearness and conciseness of his diction. His style was that of a master, always sure of his point, and always the right word in the right place. He was the greatest journalist among the German horticulturists. Knowing the value of high-grade horticultural journalism, he claimed a greater respect for it than had been accorded so far, and the pres-

The Late Ludwig Moeller

ent high standing of the horticultural press in Germany is largely his work.

He took an active part in horticultural conventions and congresses. He was one of the founders of the German Dendrological Society and of the Association of German Nurserymen. He often took part in the discussions of the Prussian Ministry of Agriculture and in the German Department of the Interior. His experience, keen insight and sure judgment were acknowledged by all. He was a man of strongly pronounced personality, a fighter determined to have his views prevail, unceasingly renewing the attack and giving no quarter to his enemies. Independent in his views, straightforward in expressing them, pleasing in personal intercourse and simple in his tastes, he was also a good friend and an entertaining companion, a genuine man whose name goes down to posterity as one of the greatest horticulturists of the present time.

Ludwig Moeller was buried in Erfurt, April 15. Although he had expressed the wish not to have his death made known in the press, yet many came to pay their last respects, among them representatives of the florists of Erfurt, of the Society of German Pomologists and of the horticultural press. Numerous magnificent wreaths were sent by the various associations with which he had been connected, the city of Erfurt and the Municipal Council, of which latter he had been a member for the last fifteen years, and by other societies, friends and officials.—From *Moeller's Deutsche Gaertner-Zeitung*.

New York Pure Seed Bill

The Callan Pure Seed Bill passed the New York House of Assembly on Thursday morning, May 5.

Tariff on Hyacinth Bulbs Protested

Entries under paragraph 263 of the Tariff Act of 1909, which includes the item "Astilbe, Dielytra, Hyacinth and Lily of the Valley clumps, \$2.50 per 1000," were recently protested in Boston, on the ground that Hyacinths were not sold in commerce as "clumps," but were "bulbs" in every sense of the word, and, therefore, not being otherwise provided for should be classed as unenumerated, and entitled to entry at 50c. per 1000.

The matter was referred to the U. S. General Appraisers at New York, and there was a hearing before Board No. 3 on Wednesday, May 4, which occupied the whole day. J. B. Clark of H. A. Dreer's, Philadelphia; Geo. Stumpp, of the Stumpp & Walter Co.; Arthur M. Kirby, of Peter Henderson & Co.; J. J. Wilson, of J. M. Thorburn & Co.; H. A. Bunyard, of A. T. Boddington's, all of New York; and Mr. Eldering, of W. J. Eldering & Son, Overveen, Haarlem, Holland, were in attendance, under subpoenas, to give evidence. The seedsmen all seemed to be in favor of the \$2.50 rate, believing that was the intention of the tariff, and that the word "Hyacinth" should have been in the plural form followed by a comma, as in the case of the words "Astilbe, Dielytra," immediately preceding. In the argument as to the nature and definition of Hyacinths, the issue of *The Florists' Exchange* of Dec. 11, 1909, in which an illustrated article described the production and commercial distribution of Hyacinths, was put in evidence as Exhibit No. 6, and had great weight.

The decision of the court was deferred.

Samuel W. Twombly

Samuel W. Twombly died at his home, Winchester, Mass., April 27. He was born in Tamworth, N. H., in 1822.

George Baker

George Baker, who was engaged in the nursery business, and was also an enthusiastic horticulturist, died at his home, 329 Chestnut st., Toledo, O., on April 21, after a long illness. He was born in Norwalk, O., in 1832, and came to Toledo fifty years ago. He is survived by four daughters. Mr. Baker was prominent in the civic life of his city and at one time a well-known local railroad promoter.

William McFarlane

William McFarlane died last Saturday April 30, at the Mass. General Hospital, Boston. He had been unwell for some time and died of acute kidney trouble. He was a native of Scotland and was with Peter Henderson & Co. of New York for some time, and had been with R. & J. Farquhar & Co. of Boston for the past ten years. He was buried on Sunday, May 1, at Forest Hill Cemetery; a large number of seedsmen and other friends attended the funeral. He was a quiet, unassuming man, and was much respected by all of the seed trade in this city. R. C.

Anthony M. McLaren

Anthony Murray McLaren, proprietor of the Westwood Nurseries, on High st., Westwood, Mass., and for 40 years proprietor of a large florist business at Forest Hills sq., Boston, died suddenly of a shock of paralysis on Hyde Park ave., near Neponset ave., Roslindale, April 27, having been taken ill on his way home.

Mr. McLaren was born at Crieff, Perth County, Scotland, in October, 1830, the son of John and Ellen (Sharp) McLaren. His early education was received at Drummond Castle, after which he attended Odettyre, the great training school for landscape gardening. About 56 years ago he left his native land, going to St. John, N. B., where he remained five years. He then came to Boston, for a time working on various estates in the suburbs. For four years he was gardener at Forest Hills Cemetery.

For 40 years Mr. McLaren conducted a florist business at Forest Hills sq., where the railroad station is now located. Later he moved to Westwood, where he has since conducted his nurseries.

Mr. McLaren laid out many beautiful estates in different parts of the country. He was a member of the Mass. Horticultural Society and the winner of many prizes at its exhibitions.

Jan. 10, 1856, at St. John, N. B., Miss Mary Ann Campbell of that city married him. His wife survives him, also three sons and four daughters.

Greenhouse Construction and Heating

Article IV

Size of House

Having reached a decision as to the form of house best suited for the crop, and location, the next matter for consideration is the size of the house.

Many of the old ranges of greenhouses consisted of houses averaging from 18 ft. to 20 ft. wide. In years gone by this was considered the proper size of a house, but in the last few years greenhouse construction has developed more rapidly than for many years previously, and the question of the size of a house has been taken up and strongly contested by the advocates of the large and small houses, the arguments on both sides being so strong that many florists have found themselves in a dilemma in this matter.

In considering this question we must keep before us the first essential, as mentioned in the first article, viz. light; the question of heat must also, in this connection, come in for due consideration, and as these are the two main factors in growing plants everything in the construction of the house itself must be made subservient to them.

In speaking of the size of a house, very frequently the width is the only factor which is considered, but we must also bear in mind that the cubical contents of a house is an important factor; and with a given width and height of eaves the pitch of the roof enters into the question, as a house with a low pitch has not the same cubical contents as one with a high pitch; in

ness of the glass. It is safe to place this percentage of loss for second quality, double thick, clear glass at 14%, thus leaving a possible 86% which would pass through the glass when the sun's rays strike directly on it at 90°; but as the angle of the roof is reduced, so that the sun's rays strike at an oblique angle, a certain proportion of the rays are lost by reflection in addition to the loss by absorption, this loss increasing as the pitch of the roof is reduced.

To make this clearer, and to show the approximate percentage of loss for each pitch of roof within the range of greenhouse construction, we have constructed the diagram as shown in Fig. 18. This shows the various angles at which the sun's rays at a given altitude strike the glass of the roof of a greenhouse at various pitches.

Line A shows the sun's rays at about an angle of 25°, which is the altitude reached at noon time in the winter, when the sun is farthest to the south. Line B shows the sun's rays at an angle of 10°. Table C shows the degrees of the angle at which the sun's rays, when at 25°, strike the roof glass at the various pitches. Table D shows the approximate percentage of loss by reflection for each of the given angles. Table E shows the degrees of the angle at which the sun's rays, when at 10°, strike the roof glass at the various pitches. Table F shows the approximate percentage of loss by reflection for each of the given angles. Table G, at the right of the diagram, shows the pitch of roof glass in inches per foot. Table H shows the degrees of angle for each rise or pitch.

The pitch of a roof is determined with a view to getting the maximum light, not altogether for the clearance of snow, as many growers have supposed

other words, if the roof of the house has a pitch of 4 in. to the foot the cubical content is considerably less than if it was made with a pitch of 8 in. to the foot.

In years gone by the pitch of the roof did not receive very serious consideration by a grower, apart from the determination of the shortest bar that would span a house of a certain width, with a pitch that was sufficient to allow the roof to clear itself of snow, and these two conditions alone have been very largely, in the past, the deciding factors of the pitch of the roof, without any consideration as to the matter of light. The old theory was that a glass roof would let light through no matter at what pitch it was constructed, and that was deemed sufficient; but the attention of growers has lately been drawn to the fact that the pitch of the roof has considerable to do with the amount of light transmitted. Stated differently, the same bars and the same glass placed in a greenhouse at a very low pitch will not transmit as much light as the same bars and glass placed with a steep pitch.

This is due to the fact that the rays of light in striking glass directly, that is, at an angle of 90°, will pass entirely through it; with the exception of a small percentage of loss due to absorption, depending upon the quality or condition of the glass. This absorption varies from 10% to 18% according to the clearness and thick-

The diagram is used as follows: If it is desired to find out the approximate percentage of loss due to the reflection from roof glass when placed at an angle of about 30° 15', or 7 in. pitch, with the sun's ray at 25°, read down Table G until 7 in. is reached and follow to the left hand the dotted line until it terminates at the solid diagonal line which shows the slope of the glass roof at this angle. Follow this line to the point where the line of the sun's rays crosses same and from this point trace up, vertically, the dotted line which terminates at Tables C and D, when we find that the percentage of loss is 3% and the angle at which the sun's rays strike the glass at this point is 53° 15'. By continuing on this same roof glass line to where the sun's rays at 10° crosses same, and from that point tracing downward the dotted line to Tables E and F, we find the angle at which the sun's rays strike it to be 40° 15' and the approximate percentage of loss by reflection 5.7%.

It will be noticed that between the roof pitches at 8 in. to the foot down to 6½ in. to the foot there is only a difference in loss of about one-tenth of 1% for each pitch; but below the 6½ in. pitch the loss increases more rapidly. The same is true when the sun is at 10°.

From the foregoing it will be evident that the steeper the pitch of the roof the more light will be secured dur-

ing the short days of Winter. If the roof of the house was placed at an angle of 65°, the sun at an angle of 25° would strike it at right-angles, but this would be impracticable owing to the height of ridge which would be necessary, and which would prove detrimental to the adjoining house or cause a considerable waste in room to admit of the house being moved far enough away to avoid the shadow from same. What this distance should be will be considered later. The height of the ridge in proportion to the width of house, necessarily, is a deciding factor in connection with the pitch of the roof, but as will be seen from diagram 18 this pitch should not be less than 6½ in. or 27°.07', as below this point the loss of light due to reflection increases rapidly. The usual practice, therefore, has been to construct the roof of the greenhouse with a pitch of from 6½ in. to 7½ in. to the foot, and it has been found that the mean between these two, or 7 in. to the foot, which is 30° 15', is the most desirable for general purposes; the loss from reflection, with the sun at 25°, with this pitch is only 3%, and with the sun's rays at 10° the loss is 5.7%.

(To be continued)

The Nurserymen, Market Gardeners and General Hailstone Insurance Corporation, Ltd. (Eng.)

The fifteenth annual general meeting of this company was held in London, April 8. The accounts showed an increase in the year both as regards premium income and interest. The year had been peculiarly free from hailstorms, but two further claims had been settled since the accounts were closed. During the 15 years the premium income had increased from £681 1s. 9d. to £2,470 13s. 10d., which shows that the company is meeting a distinct need and becoming better known. A dividend of 7½ per cent., and bonus of 2½ per cent., making £1000 in all, was declared, and £1500 added to the reserve fund, making the reserve £16,500. The invested funds at the end of the year amounted to £26,887 6s. 7d. The company is not paying big dividends, but is building up the reserve fund against heavy claims which might come in at any time. The area insured now amounts to over 37,700,000 sq. ft. of glass.

From the foregoing it is shown that the insurance on sq. ft. of glass carried by the British corporation is slightly greater than that covered by the Florists' Hail Association of America. The statement of the first named company sheds no light on the amount of damages paid for the year, but we should judge it to be far less than that met by our own Association, as the elements there do not generate such terrific storms as with us; this view is further confirmed by the stated facts of a dividend payment and a treasury surplus of some \$130,000.

We are receiving your much valued paper regularly; it is one of the few papers we want to read.—H. ZIJP & CO., Lisse, Holland. April, 1910.

Seedling Magnolias

Editor The Florists' Exchange:

We note with interest Mr. Meehan's remarks in connection with Mr. Samuel Moon's Magnolia seedlings. Magnolia stellata seeds freely in the vicinity of New Haven, and the seedlings get to be large enough to bloom in four to five years with us. They vary somewhat in habit of growth, shape and color of flower. Some few years we planted seeds of Magnolia Lennei, which is considered the hybrid garden type. This lot of seedlings varied greatly in habit of growth, hardness and character of bloom, but none of them have seemed to be sufficiently marked to make it seem worth while to extend the present list of varieties, though some of them are very beautiful. THE ELM CITY NURSERY CO.

New Haven, Conn., April 18, 1910.

—It is interesting to know that Magnolia stellata seeds at New Haven. That it does not in Germantown, Phila., so far as the writer knows, must be from some local cause. At this writing bushes of it have small green pods on them, as they do every year; perhaps some of these may not drop off this season. Mr. Samuel Moon has not said whether it is common or not for his bushes to fruit every season. H. Lennei is a prodigious seed bearer with us, every flower, almost, being followed by a pod. Being but a hybrid, variations are looked for in its seedlings just as they are in those of Soulangeana.

JOS. MEEHAN.

SOIL STERILIZATION

A Reason for Its Practice

By JAMES HAMILTON,
Chestnut Hill Greenhouses, Mt. Washington, Md.

Having been troubled to an alarming extent by nematodes or eel worms in our soil, which caused nodules to form on the roots of our Rose plants, sacrificing the health of the plants and the production of blooms, we realized that a preventive must be found if Rose-growing was to be made a success. Two remedies were taken into consideration: The use of grafted stock; and the use of sterilized soil. The latter, being the least expensive, we decided to try first.

Simple Apparatus

The following plan, recommended by the Department of Agriculture, was adopted and, I may say, it proved both effective and inexpensive: A box 2 ft. deep, 6 ft. wide and 5 ft. long was built on leveled ground. Boards were laid, snugly and closely, for a bottom, for ease in shoveling out the soil and also to form a permanent base upon which to lay the tile used. The sides of the box were nailed to 3x4 posts, placed 5 ft. 4 in. apart and planted securely in the ground. Strips 3" wide were tightly nailed over all joints in sides and ends of the box, in order to have it as tight as possible. A 2" steam pipe, connected to a boiler, was laid and a nipple and elbow attached to one end of the box, to which a cross, or 4 way, was screwed so as to divide the steam flow into three parts, by the use of short 2" nipples, with elbows on each outer nipple pointing up the box. Into each elbow a nipple was placed, to correspond with the center nipple in the cross. Drain tiles were used to extend the flow the length of the box, the first tiles of each row overlapping the nipples, the remaining tiles butting against each other until the three runs were in position, all as shown in the sketch herewith.

The Process

Soil was then packed tightly around the tiles to keep them in position and strictly in line. The entire box was then filled with the soil, together with layers of well rotted cow manure and a liberal allowance of soft, white bone meal. The whole was then covered with canvas, bags or other covering, to prevent the steam from escaping.

Medium sized Potatoes were placed about four inches below the surface at different points, marked by stakes so as to be easily located, as a means of testing the thoroughness and uniformity of the steaming. When these potatoes were cooked the soil was sufficiently sterilized, the process taking from four to five hours, depending upon the tightness of the box, the regularity and amount of steam used and the dryness of the soil—the drier the better. The soil used in our case was freshly plowed sod filled with couch grass, a perfect mat of it, but since treatment not a live sprig of this grass has been seen. In removing the soil the tile is carefully laid aside as uncovered, and cleaned out ready for the next batch.

Results

After sufficient soil had been treated for three houses of Roses and three of Carnations, an additional box full was sterilized to be used for potting young Roses, Carnations, etc.; also a box of well rotted manure for mulching.

The results obtained could not be more satisfactory. For purposes of comparison we planted sections of benches with Roses in untreated soil. The results in untreated soil have been very marked in growth of plants, yield and quality of blooms, to say nothing of having to weed four times thus far, while there has been no weeding at all in the treated portion.

As a further test, we planted a part of a bench with strong grafted Bridesmaid Roses, and the difference has been greatly in favor of the own root stock in treated soil, both in size, quality and number of blooms, and growth of plants.

As to the use of the treated soil for young stock, such as Roses, Carnations, Asparagus, 'Mums, etc., it is a real pleasure to see the absolute absence of weeds, and the health and vigor of growth of the stock.

We have concluded that as a matter of saving labor it will pay handsomely to treat the soil for the elimination of weeds alone, even if of no value otherwise. We found, however, that small seeds did not appear to germinate so well in the sterilized soil.

In Carnations, beyond a weed here and there—brought in with the plants from the field—the results were equally satisfactory. There was, practically, no stem rot, and our crop has been very heavy and of the very best quality, in fact, the finest we have ever grown; probably the time of one man one half day only has been spent weeding, during the whole season, ten thousand plants.

Warning

A few "don'ts" are, however, imperatively to be born in mind, as to the danger attending the carrying of the steam pressure—from 60 to 70 lbs., necessary to obtain satisfactory results. Don't attempt sterilization with a cast iron boiler under any circumstances!

Don't attempt it with any boiler not safe to carry 100 lbs. pressure!

Don't neglect to see that your boiler is equipped with either an injector or inspirator, in case your water pressure is not sufficient to overcome the pressure of steam carried! In our case we have 125 lbs. water pressure, which easily overcomes the 70 lbs. steam pressure carried on the boiler.

Don't neglect to keep sufficient water in the boiler while carrying high steam! Should the water get out of sight draw fire and cool down before letting in more water.

Don't neglect to see that all returns from the heating coils in your greenhouses—when you use your regular heating boiler—are tightly closed with valves! Also have a valve in the flow or supply pipe at the boiler, and do not turn steam into the sterilizer until the gauge shows 60 to 70 lbs. pressure; and if steam gets down below 40 lbs., cut it off entirely until it again gets up to 60 or 70 lbs.

In furnishing us with this account, Mr. Hamilton says: "I hope it may be the means of conferring on others the blessing it has been to me. I do not know what inducements could be offered us to get us to give up using sterilized soil for Roses, Carnations, etc., except in the sowing of seeds, as these do not seem to do so well."

Among the Growers

Frederick H. Dressel, Weehawken Heights, N. J.

A visitor at this establishment soon notes the fact that Mr. Dressel confines his attention mostly to the growing of four kinds of plants, namely: *Ficus elastica*, especially branching specimens; *Dracena Massangeana*, and in smaller numbers *Dracena Godseffiana*; *Aspidistra variegata*; and Ferns. The *Aspidistras* are from Japan; the others are propagated on the place.

The *Dracena Massangeana* is seen here in all the different stages of its growth, in very large numbers, and in such perfect condition that it would be worth the visit to see it alone. There is a house filled with old stock plants, and there are a number of long propagating boxes where the plants are striking root, besides several houses filled with plants of various sizes growing on for market. The odd and delicate, but beautiful *Dracena Godseffiana* is equally well grown.

In Ferns, Scottii receives most attention. A large number of plants of the comparatively little grown *Polypodium auratum* may also be seen, and the stock is very attractive.

It is, however, to *Ficus elastica* that Mr. Dressel gives most attention, and seldom can it be seen grown to as great perfection, as here. His method of growing is exceedingly interesting and is, briefly, as follows: Cuttings, preferably a foot long, are taken in January, February and March. If it could be so arranged it would, he says, be better to take them all in March, since rapid propagation and the growth so necessary to success with *Ficus elastica* can be better obtained in the case of March cuttings. From these large cuttings many branching specimens are obtained. After they are well rooted they are potted off and hurried on as fast as possible. Plants brought on by this method can be seen here at this time of such size, and branching so freely, that it is almost incredible that they are so young. About May 1, or a little later, the plants are taken out of doors and shaded with slats, which can be removed toward sunset and left off until the sun gets high enough to strike them next morning. About June 1 they are knocked out of their pots, and set out in the open ground. At the end of August they are again potted and the slats put over them for about two weeks, when the plants are left outside until there is danger of frost.

Mr. Dressel has given much attention to the question of economically changing his old wooden greenhouse benches into reinforced concrete benches. After some years of

experiment, and some costly experience, he has very successfully worked out the problem of an economical, substantial concrete bench, ingeniously using the old wooden bench itself as staging in the work.

H. Schmidt, Weehawken, N. J.

At this establishment is grown at this season a general line of bedding stock, including a large stock of *Coleus* in the standard varieties. *Primula obconica*, however, of the improved gigantea variety, and the "Ronsdorfer Hybrid" strain, is Mr. Schmidt's specialty. The seeds were sown just after Easter, and are now up, the young plants very carefully shaded. As soon as they can be handled they are pricked out into flats and later into pots. Mr. Schmidt finishes about 40,000 pots of these plants, for which he finds a ready sale.

He is also growing a smaller number of *Primula Sinensis*. He has tried the new yellow variety, *Kewensis*, but finds that the color is not deep enough, and that the plants break too easily for commercial purposes.

Herman Bartsch & Son, Union Hill, N. J.

This entire establishment is now devoted to the growing of Roses, in 6-inch pots. Imported stock from Holland was used for this purpose for many years, but recently stock bought of Storrs & Harrison, and Jackson & Perkins, in this country, has been used and found much more satisfactory.

There are growing here now in fine condition, showing excellent culture, and well covered with buds, 10,000 *Magna Charta*, 2000 *Ulrich Brunner*, and 2000 *Crimson Ramblers*. The sight of these well grown Rose plants is well worth a journey, and leads to the conclusion that a good grower and an old range will show better results than a poor grower and a costly range of greenhouses.

Bulb Growing at Washington, D. C.

Although warned by the Government that bulbs would not grow very well at Washington, D. C., Mr. D'Alcorn

of Portsmouth, Va., established an experimental farm there. He reports Hyacinths and Tulips as doing remarkably well. Daffodils and Narcissi are also satisfactory; but Spanish Iris is a failure, owing, probably, to the severity of the Winter.

Peonies look in ideal shape and although not much is to be expected the first year in the way of bloom, Mr. D'Alcorn seems to have solved this problem, many plants showing six to eight fully developed buds, the laterals having been pinched out. The Peony section covers a grand collection resulting from 25 years of experience, containing among other varieties *Duchesse de Nemours* in great number, also *Lady Carrington*, *Mme. de Galhau*, *M. de Guerle*, *Marie Lemoine*, and *Solfaterre*.

Ten thousand Paper Whites were grown successfully through almost zero weather, under sunlight sash.

A great feature here is the Darwin Tulips, 119 varieties, at least different names, so it is intended to keep the odd nineteen and dump the rest into the mixed Darwins, as only the best of each color is salable in a market so critical as that of Washington. Mr. D'Alcorn says the soil and climate is ideal for Darwins and thinks, for the guidance of buyers, the following are the best: *Pride of Haarlem*, rose; *Farncombe Sanders*, scarlet; *Glow*, scarlet; *Gustave Dore*, lilac pink with white; *Clara Butt*, salmon pink; *Psyche*, pink; *Mattia*, rose pink; *Dorothy* and *Landelle*, late pinks; and *Violet Queen*, lavender. As there is neither a pure white nor yellow Darwin, good substitutes may be had in *Cottage* or *Gesneriana* species: *Mrs. Moon*, the best yellow Tulip, but expensive; *Lutea Gesneriana*, the next best yellow; *Parisian White*, a really fine late white with picotee edging.

Gesneriana spatulata major, of which there seems two distinct varieties with no difference beyond period of flowering, is a very good scarlet flowering sort with Darwins, but has neither the substance nor keeping qualities.

Mr. D'Alcorn expects to open up another farm at Philadelphia this year.

The Forthcoming Nurserymen's Convention

We learn through Secretary John Hall, of the American Association of Nurserymen, that arrangements have been made by the Entertainment Committee, of which Mr. F. A. Weber, Nursery, Mo., is chairman, by which members going to the Denver convention, June 8-10, can reach St. Louis at a given time so as to meet fellow members and travel on to Denver in each other's company. We incline to the belief that this should prove a very happy combination, affording opportunity for renewing acquaintances and enjoying a social time together en route, as well as giving opportunity for discussing matters of business, etc., and thus simplifying things ready for action immediately on arrival at the convention city.

Eastern members desiring to travel by way of St. Louis should arrange to reach that city as early as possible on the morning of the 6th of June, leaving St. Louis via Colorado Limited, over the Burlington Route, 2.15 p.m. It is particularly desired that not only Eastern, but Southeastern and Southern members observe the same schedule. Arrangements for through tickets and reservations can be made with the nearest agent. All roads will sell through tickets to Denver, but care must be taken to have tickets read over the Burlington, and arrange leaving time so as to make connection with the Burlington St. Louis train, No. 13.

All "Nurserymen Special Cars" will be consolidated at Oxford Junction, on the 6th of June, affording a daylight run together through western Nebraska and eastern Colorado.

The meeting place in St. Louis for incoming delegates will be at the Burlington offices, 728 Olive st., up to 12 noon: after that time near the Information Bureau, Union Station. A committee of St. Louis nurserymen will be glad to meet members and assist in any way possible. Reservations for the St. Louis sleepers can be sent to F. A. Weber, Nursery, Mo., or to J. G. Delapaine, city passenger agent, Burlington Route, 728 Olive st., St. Louis, Mo.

Mr. Weber also confirms the previously announced arrangements for the entertainment of members and their wives while in Denver, not the least interesting of which will be the proposed complimentary trip over the renowned "Moffat Route," said to be one of the finest scenic routes out of Denver. Funds for the entertainment features promise to be such "that the various stunts will be pulled off on schedule time."

The exhibits promise to be up to the average, if not in excess, and Mr. E. P. Bernardin, chairman of committee on exhibits, writes, "We are promised some fine Colorado-grown ripe Cherries, which all will enjoy."

Every member reading this notice, and who has not yet sent in his name to the secretary, should do so at once, in order to be sure of a place in the Badge Book. Address John Hall, 204 Granite Bldg., Rochester, N. Y.

The Denver Convention Program

Address of Welcome—Col. J. S. Irby, representing City of Denver.

Response—Capt. C. L. Watrous of Des Moines, Iowa.
President's Address—F. H. Stannard, Ottawa, Kans.

Cost of Operating a Retail Store

A paper by Frank Danzer, read before the Detroit Florists Club, May 2, 1910

The subject, "Cost of Operating a Retail Store," assigned to me, is of such vast importance and must be considered from so many standpoints that I fear I may not be able to do it full justice without becoming tiresome.

My original intention was to bring before you statistics tabulated and arranged in such form that you could see at a glance where expenses eat up the profits without our knowledge, but the few reports which I received from local or out-of-town florists showed such a difference in the methods of bookkeeping that it was not possible to arrange them in a necessarily comprehensive style. Some of these reports clearly show an apprehension that it was required to divulge, so-called, business secrets, something entirely uncalled for, because this was a most important business matter, where knowledge of the most minute facts was required to bring about a clear understanding, and where the individual name of a firm which furnished such information and assistance to bring about this understanding was not wanted at all. The capital investment of a retail store consists of:

I. **Store fixtures**, from the value of which at least 10 per cent must be deducted per year. In the case of a short term lease this deduction should be in such proportion that the fixture account is wiped out when the lease expires, because at a removal the fixtures are made obsolete.

II. **Livery outfit**, horse and vehicle or automobile, from which an annual depreciation of 20 per cent must be figured.

III. **Palms and other plants for decorative purposes**, the upkeep of which is accounted for in the merchandise account, because they always are to be kept at least 90 per cent standard and are as much a salable article on the day of closing a business as they are at the beginning.

IV. **Working capital**, money on hand when business is begun.

Next for consideration is the "Merchandise Account," which includes all merchandise purchased to do business with, or, better, the exchange of which into money brings about gain and loss, according to our—and I am sorry to say sometimes according to our competitor's—manner of management.

To create a clear understanding of the business year's results the merchandise account should be subdivided into sections as follows: Supplies, flowering plants; cut flowers; plants such as Palms, Ferns, etc., for sale.

Next is the most important account of all, because a careful scrutiny of it will enable us to detect those little items which in the course of a year are apt to eat enormous holes in our profits, the "expense account."

This account cannot be subdivided too much, and let nobody ever be deterred from a very thorough analysis of it by the word "red tape," because it is the only means for detecting the leaks in a business. The principal items of this account are:

1. Rent, to which must be added such proportion of cost of lease, if the same had to be bought, as will wipe out this item at its expiration. In cases where a store building has been erected for the sole purpose of conducting a retail flower store for a certain number of years, only the cost of such building must be charged to rent in its annual proportion.

2. Delivery, daily cost of maintenance of rigs or autos, wages for boys, carfares, extra wagon or auto hire during days of rush.

3. Mail for bills, correspondence, etc.

4. Telegrams and telephone messages.

5. Heat and light, which in some instances may by virtue of existing rent contract be included in rent item.

6. Flower boxes.

7. Wrapping material, string, paper.

8. Cost of renewal of decorative plants and interest on original investment.

9. Wages.

10. 6 per cent. interest on accounts outstanding.

11. Supplies.

12. Greenstuff.

This gives a fair idea of the subject before us for consideration, but before going any further we must divide the subject into three different parts, in view of the fact that the larger the amount of business annually done the more are the avenues of expenses to do the business. Let us, therefore, compute the expense account of: (1) doing an annual business of \$10,000; (2) doing an annual business of \$50,000; (3) doing an annual business of \$100,000.

The man who transacts \$10,000 worth of business per year deals with a class of customers who do not demand an extravagantly fitted up store; they do not require a fancy box for every purchase made; his location is not in an expensive district, and his fixtures are of a plain nature; and, best of all, his sales are very nearly all cash transactions.

Still, we know that on every dozen Carnations he sells, rent, heat, light, Fern leaves, etc., each have a share in it, making up his annual expense account which we might put approximately as:

Rent, \$1200; delivery boy, \$520; carfare, \$75; mail, \$52; Telegrams and phone, \$150; heat and light, \$300; Boxes, \$100; wrapping material, \$200; wages, 1 girl, \$312; supplies, \$200; Ferns and greens, \$300; cut flowers, etc., \$5000; a total of \$8412.

Assuming the business to be done on a 100 per cent basis he must expend \$5000 for his merchandise. Averaging his expenses by the year they amount to \$3412.00, or 68 per cent, leaving him a balance of \$1588, or 32 per cent, as his wages.

A business of \$50,000 per year belongs to a higher but, I fear, less profitable grade. The storekeeper must be in a more desirable location, his patrons demand more in the way of fixtures, their purchases must be done up in better form, a stock of decorative plants must be kept up, and many accounts must be carried. To sum up, his expenses we may justly approximate as:

Rent, \$3000; delivery rig and upkeep, \$900; two boys, \$156; carfares, \$120; extra for holidays, \$100; mail, \$120; advertising to satisfy lady patrons, \$700; telegrams and phones, \$250; heat and light, \$500; boxes, \$750; wrapping material, \$500; wages, 2 girls, \$936; wages extra for holidays, \$50; 6 per cent on \$5000 of

Table Decoration Composed of Oncidium Orchid s, Adiantum cuneatum and Farleyense Ferns and Lily of the Valley

Retail florists are invited to send us items of trade interest for publication on this page; clear photographs of good designs will also be appreciated. These latter should always be packed carefully between boards.

May 7, 1910

Florists in good standing throughout the country can avail themselves of the advertisers' offers in this Department and accept, without hesitation, orders from their local customers, transmit same to an advertiser in these columns, and thus avail themselves of the opportunities for extension of trade which are open to all. Let your customers know you fill orders by telegraph to any part of the country.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail firms advertising under this heading are all considered by the publishers of *The Florists' Exchange* as being responsible, and will accept and fill orders for Flowers, Plants and Floral Designs for Steamer Orders, departing Trains, or any given point within their reach, forwarded them by mail, telegraph or telephone, in the respective districts to which their trade extends, the usual commission being allowed. While no guarantee is expressed or implied by this paper as to the satisfactory fulfillment of orders sent to parties whose names appear in this Directory, we will state that only concerns of known good standing will be admitted in this Department. The use of Arnold's Telegraph Code No. 16, a copy of which is placed in the hands of every advertiser, will greatly facilitate this interchange of business.

Eyes
ALBANY, N. Y.
11 North Pearl Street
 Cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Hatcher
Leading Florist
AMSTERDAM, N. Y.
SCHENECTADY, N. Y.
 Estab. 1877

 Every facility for prompt deliveries in all parts of Connecticut. Cut Flower and Funeral work solicited.

W. S. Matthews
DAYTON, OHIO
Florist, 16 West Third Street
 Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

accounts outstanding, \$300; florist supplies, \$1000; Ferns and greens, \$1000; 6 per cent on \$1500, decorative plants, \$200; renewal of same, \$750; 6 per cent on \$2500, of store fixtures, \$150; 10 per cent depreciation thereon, \$250; annual cleaning, \$250; cut flowers and plants, \$25,000; making a total of \$36,872, which taken from the annual business of \$50,000 leaves a balance \$13,128 of which there is outstanding \$5000, making a clear balance of \$8128.

These items, computed very carefully, show a cost of doing business of about 33%, while the net gain, considering the amount of money outstanding, gives a clear balance of only 16%, assuming all this time that every flower and plant bought has been resold at double the purchasing price.

The third case, doing a business of \$100,000 per year, presents, again, a different picture in the expense account and the bill is still more complicated. The storekeeper's customers demand the very best of fixtures and display material, also prompt delivery of everything in clean and expensive boxes or baskets. The expenses in this case would approximate:

Rent, \$4000; two delivery rigs, \$1800; upkeep, \$500; two boys, \$156; car fares, \$200; extra for holidays, \$400; mail, \$350; advertising for lady patrons' sake only, \$1200; telegrams and phone, \$500; heat and light, \$1200; boxes, \$7000; wrapping material, \$1000; wages, three clerks, four girls, 1 bookkeeper, \$5500; extra for holidays, \$500; 6 per cent on \$10,000 accounts outstanding, \$600; florist supplies, \$3000; Ferns and greens, \$5000; 6 per cent on \$2500, decorative plants, \$150; renewal of same, \$1200; 6 per cent on \$30,000, store fixtures, \$1800; 8 per cent depreciation and cleaning, \$2400; cut flowers and plants, \$50,000; a total of \$79,356.

On the presumption of doubling up on everything this would mean a \$100,000 annual business. Deducting therefrom the expenses, \$79,356, leaves a balance of \$20,644, or about 20 per cent, which less an amount of \$10,000 outstanding, leaves a clear gain of \$10,644, or about 10 per cent.

As intimated at the beginning, it is practically impossible to procure the actual figures of a detailed expense account, and while the man doing the "bon ton" business derives considerable from the hire of decorative plants, and consequently will not pay out \$50,000, for cut flowers and plants to enable him to do \$100,000 worth of business per year, it is a fact that the item of \$7000 for boxes is too conservative by at least \$1200. This item is very characteristic as compared with the item of wrapping material in the case of No. 2 and shows clearly the extravagant demand made by our bon ton customers.

Another offset for a possibly unaccounted for income

from decorative plants is in the low estimate of mailing and advertising expenses. A well regulated business mails bills daily and monthly. In a business of that size this means at least 800 bills a month or \$178 a year for mailing. Added to this, regular correspondence, special deliveries and so on easily double that item.

In the matter of advertising, I have purposely only taken cognizance of that part which is unavoidable, and refers to those apparently unlimited calls of societies for program advertisements.

The legitimate advertising, such as annual announcements in the Fall of the year in the form of little booklets, or similar matter, will easily reach an annual expenditure of \$1000, so that the omission from income of plant hire is easily covered.

The item of \$30,000 for store fixtures may appear large, but really it is conservative, because a first-class store must be built right in every detail. The cut flowers must be displayed in cut glass and other expensive material, most of which is not bought and transformed into cash, but is simply a fixture which in a few years becomes fit for the scrap pile only.

I trust that these enumerations have brought out points we all have been thinking about, and while I realize the inexactness of the subject, I hope I have made it clear enough that a retailer has no possible chance of existence or prosperity unless he at least doubles his price on everything he purchases.

The Park Floral Co.

Florists' Club of Washington, D. C.

Annual Banquet.

The annual banquet of the Florists' Club of Washington was held on the evening of May 3, at Rauscher's, and as the evening was fine there was a large attendance. The banquet is usually held in April, but owing to the Easter rush the committee in charge of arrangements lacked time in which to perfect their plans.

The spacious hall was most tastefully and attractively decorated with vases of American Beauty Roses, while the tables were spread with Killarney Roses, sprays of Ferns, pink candelabra, and, at intervals, large vases of Killarney Roses with Maidenhair Ferns. The center of the room was occupied by a magnificent collection of Palms and Ferns, each plant a specimen. In the center of this group was a pyramid of American Beauty Roses, topped by a fine Kentea Palm. On the whole, this was one of the prettiest decorations set before the Club upon such an occasion. In the balcony, screened from view by large Palms, an orchestra played popular and patriotic music.

John Robertson, the newly elected president, welcomed the large attendance in his usual cordial manner and at the close of his remarks introduced Wm. F. Gude as toastmaster for the evening.

Mr. Gude, as usual, was equal to the occasion and addressed the banqueters in his most fluent manner welcoming them each and all and explaining that the banquet was to be strictly an informal affair, and he expected all to join in having a good time. He then introduced a lady vocalist who sang "Beautiful Garden of Roses" in an entrancing manner and was encored.

The dinner began at 8.35, and throughout the various courses the guests were entertained by special solos by the orchestra, the chief of which was a trombone solo "Holy City" which captivated all. Among those present were many from out of town who came especially for the occasion.

At the conclusion of the repast cigars tied with dainty pink ribbons were handed to each gentleman while each lady pinned on a Killarney Rose taken from the table. Miss Siebing, the soloist, was recalled by special request, and rendered a beautiful classical selection, and was again encored. After responding Sec. Oehmler presented her with a large bunch of American Beauty Roses. Toastmaster Gude then paid tribute to Hon. H. B. MacFarland, former commissioner of the District of Columbia, who entertained all with humorous remarks and allusions, and nursery rhymes adapted to the florist business. He spoke of the civic and public improvement spirit of Washington and urged participation by the florists in efforts to obtain proper quarters for large conventions. Next he paid personal tribute to the florists, saying no body of men contributed more largely to the welfare of the sick by contributions of flowers and money.

Upon concluding Mr. MacFarland was handed a silver cup to be presented by him to Wm. F. Gude in behalf of the Club. The presentation being made Mr. Gude expressed his surprise and pleasure at the gift and said he always tried each day to do something for his fellow man and the cup would be cherished as long as he lived.

C. H. Rudolph, one of the board of commissioners of the District of Columbia then delivered a short address, paying a tribute to Mr. Gude, on the lines of the inscription on the cup which was "In token of the appreciation of services rendered the Washington Florists' Club." Mr. Rudolph told amusing anecdotes which were loudly applauded.

O. A. C. Oehmler, secretary of the Club, was then called to his feet, and a half dozen silver knives and forks were presented him by the Club.

Hon. Harrison Dingman next took the floor. He congratulated the Club on its progress, and on being a factor in all important events. He called upon Fred H. Kramer and complimented him on the successful manner in which he had for two years filled the office of president of the Club, his love for the Club and local florists; concluding, he in behalf of the Club presented Mr. Kramer with a large silver loving cup bearing

a suitable inscription. Mr. Kramer in acknowledging the gift referred to the past, when he and the toastmaster had worked shoulder to shoulder together for a nominal consideration.

The toastmaster then paid a tribute to Col. Robt. N. Harper, former president of the Washington Chamber of Commerce. Col. Harper paid tribute to the men "who only allowed Roses to bloom when they brought the most money," and who were men who had done more for the success of the city than any other class of men. The Colonel then, in behalf of the Club, presented Geo. H. Cooke with a silver cup; amid great ap-

plause. Mr. Cooke responded in feeling but humorous manner.

Fred. B. Owen was next introduced as the man who had done much to beautify Washington's unsightly places, and absolutely without compensation. Mr. Owen responded with a few appropriate remarks making known his enthusiasm in the work.

Mr. Gude then paid tribute to the ladies present and introduced Mrs. Leissler as "one in the business." Mrs. Leissler pleasantly responded. The toast "The Ladies" was next received with applause.

Peter Blisset was loudly applauded when introduced as one who had "just returned from the Pacific Coast," and he made suitable response.

Mr. Woodhead, a local florist, was next called upon for a Scotch song. It will be remembered that upon many previous occasions Mr. Woodhead and his charming wife have favored the florists with their talent, always greatly appreciated.

Adolphus Gude and Frank Siebling also made short addresses and the evening closed with another vocal solo by Mr. Woodhead. JAS. L. CARBERY.

Tuxedo (N. Y.) Hort. Society

A regular monthly meeting of this Society was held in the Parish House, Tuesday, May 3, President Murray in the chair. There was a good attendance of members. The date of the Rose show was changed from June 24-25, to June 18, because indications point to Roses being about their best nearer the latter date than the former. The Executive Committee reported a schedule for the Chrysanthemum show in the Fall, but there was so much on hand in connection with the June show that consideration of the Chrysanthemum schedule had to be deferred.

Mr. Fred Bently was appointed manager of the June exhibition. Judges were appointed and the secretary requested to ascertain if the gentlemen named could act and if not there were others to be asked.

It looks now as if the June show would be a good one. The members are taking a lively interest in it and all are anxious that a good display should be made as much for the good of the Society as for individual members.

D. McINTOSH, Secretary.

Minneapolis Fall Flower Show

In preparing for the elaborate flower show of the Minnesota State Florists' Association, to be given in the Minneapolis Armory, Nov. 10 to 16 next, a twin city committee has been organized as follows: Wallace G. Nye, chairman; Theodore Wirth, superintendent of parks; L. S. Donaldson, J. S. Mitchell, O. C. Swanson and Hugh Will, all of Minneapolis; August S. Swanson, O. J. Olson and L. L. May of St. Paul.

The committee approved a premium list as submitted, and will circulate it among florists. These lists are now in the hands of the secretary, J. P. Jorgenson, 3501 Portland ave. The premium list shows a great variety of prizes for plants and flowers, made possible by a guaranty fund of \$15,000 already raised through contributions from the public affairs committee of the Commercial Club, the Lakewood Cemetery Association, Theodore Wirth, and seventeen florists in the twin cities.

Plant Diseases Caused by Bacteria

Investigations as to the number of disease-causing bacteria floating in the air have been recently made in Denmark, according to the Handelsgaertner. It is a well-known fact that the air, especially that of cities, contains a greater or less percentage of bacteria to which may be ascribed diseases, both of men and animals, as well as of plants, that often seem mysterious in their origin. It has also been found that these bacteria are more or less a contributory cause of the failure of seeded crops and the poor growth of cuttings of various particularly sensitive plants. The sowings of Orchids especially are subject to the noxious influences of bacteria, since the soil in which they are planted becomes very easily infected by fungi, which make the healthy growth of the young plants impossible. For these experiments special bowls, alike in size, were used, filled with a thin layer of gelatine and exposed to the air for a certain time, in different places.

Question Box

(114) Plants for Lettering Carpet Bed.—A. G. G. Mass.

—Since you have only Sweet Alyssum for back ground and Lobelia and Agapanthus for lettering, use the Alyssum (the dwarf variety), for background, and the Lobelia for the letters. Mark the bed for the letters and set the Lobelia, then fill in with the dwarf Alyssum.

(115) Winter Flowering Forget-me-not.—E. M. L. L.

—Myosotis robusta grandiflora and Royal Blue are much grown for cutting, and Victoria both for pot plants and cutting. Sow the seeds in June in shaded frames and transplant when large enough. Myosotis requires a low temperature.

(116) Leaf for Identification.—J. H. D. Mass.

—The leaf sent is that of the Medinilla magnifica. A photograph of a plant in bloom may be seen in The Florists' Exchange of May 22, 1909.

Readers will confer a favor upon us of more than passing value if, when ordering stock of our advertisers, they will mention seeing the advt. in the Exchange.

Thus a number of bacteria which cause plant diseases were discovered. Very curiously the number of bacteria found in rooms was much less than those found in the open air, and bowls exposed on large surfaces of water showed absolutely no bacteria. The number of the bacteria depends, of course, on the time of the year, but some were discovered even in the Winter.

ALBION, N. Y.—H. M. Whiting, who represents himself as a member of the Whiting Nursery Co. and claims the headquarters of his company are in Geneva, N. Y., was arrested here on Saturday, April 23, on a warrant charging violation of section 924 of the penal code, which makes it a misdemeanor for a person to represent himself as a company unless he has a partner or has had one, and upon the expiration of the partnership has filed a certificate with the county clerk to that effect and has published such a notice in one of the papers in the county where his office is located for at least four successive weeks.

Views from the Great Haarlem Show

An outside section showing Tulips, Hyacinths, Narcissus and other bulbous flowers. The location is at the edge of a forest-like plantation, which enhances the bright coloring of the flowers.

An inside view of one of the exhibition halls, showing red and blue Cinerarias, Lilacs, unusually fine Marguerites and other flowering plants. Begonias, in variety, are seen hanging from the roof supports.

HEATING QUERIES

Conducted by U. G. Scollay

Inquirers Read This

Subscribers asking questions for Heating Problems must be particular to give the following: Length, width, height at ridge, height at eaves, glass on sides, glass on ends, position of house as regards points of compass, grade of house, location of boiler pit, size of boiler pit, depth of boiler pit, size and location of chimney, temperature desired in each house, whether steam or hot water is used for heating, number of pipes and size in each house, dimension and position of benches, location of doors. The above information I must have before I can answer any definite questions regarding any heating plants already installed.

If the inquiry is for proposed new house or houses, send full measurements of the houses as described above, including glass, proposed location of boiler pit, proposed location of chimney, position of house as regards points of compass, number and position of benches, temperature required of purposes for which the houses are intended; whether steam or hot water heat desired.

Subscribers who may contemplate asking for information regarding heating apparatus are particularly requested to cut this out, so that when they write, the questions will be answered fully, and will save time and help the writer materially to arrive at the proper conclusions.

U. G. Scollay.

Please tell me through your valuable paper the best way to arrange pipe to heat my greenhouse and potting shed. The potting shed is 51' long by 9' wide, 6' high at north wall and 10' at south. The greenhouse is on the south of potting shed, running east and west, being 5'x15', 13' at ridge and 6' at eaves, under which is 23" of glass; the rest of the wall is ½" lumber, one-ply tar paper and siding, and on the inside of wall ½" lumber, tar paper and shiplap one-ply, with two inches air space between walls. The gables are built to the top with lumber outside, ½" lumber tar paper and siding, inside ½" lumber, tar paper and shiplap. The potting shed is one-ply siding with hardwood shingle roof, with five windows in it, about six square feet of glass in each. The weather is very cold here, sometimes going as low as 40° below zero and sometimes staying for a week at a stretch at 30° at night and 20° during the day. I have a lot of 1½" pipe on hand which I would like to use. I intend using hot water, and would prefer to have boiler at the southeast end of plot. I would like to keep the temperature at 55° and just keep frost out of shed.—W. A. L., Manitoba.

—Utilizing 1½" pipe, a quantity of which you have on hand, I would suggest the following: In the greenhouse 23 runs of 1½" pipe, divided as follows: Ten pipes under the south bench, eight under the middle bench, five under the north bench. I would divide the ten under the south bench into two coils of five pipes each. In the potting shed run a coil along the east and north walls to the door at the west end of five 1½" pipes. Start out from the boiler with a 3" main or its equivalent. Take the first bench in the ten pipes from this the day. I would like to use. I intend using hot water, and would prefer to have boiler at the southeast end of plot. I would like to keep the temperature at 55° and just keep frost out of shed.—W. A. L., Manitoba.

Detroit

Last week's combination of increased business with supply shortened by cloudy cold weather and a surplus of rain put local fakirs out of business. Prices in general ruled higher and firmer than during the two weeks previous. Inquiries for outdoor plants are very numerous but prevailing weather conditions prevented open air operations. Flowering plants, Boston Ferns and small Palms for retail trade are extremely scarce here, and it will be a couple of weeks before good Hydrangeas, etc., will be in again.

The local wholesalers are using every honest means imaginable to procure enough cut flowers to satisfy the demand of their regular customers. F. D.

SALT LAKE CITY, UTAH.—The Miller Floral Co. has purchased ten acres of land in Davis county from Nathan Clark of Farmington, and the construction of two greenhouses is under way. The company is capitalized at \$100,000 and will grow Carnations and Roses during the first year, rapidly branching out into other lines as the market demands indicate. The officers of the company are Robert Miller, president; W. E. Tarbell, vice-president; Louis L. Barlow, secretary and treasurer.

W. R. Smith *

(Superintendent U. S. Botanic Gardens,
 Washington, D. C.)

There's ae douce carle, a denty chiel,
 Ilk ane wha kens him loes him weel;
 His word is true, his heart is leal—
 They ca' him Smith;

An' a' wha for their fellows feel,
 May claim him kith.

O' a' kin-kind o' grass and trees,
 O' seeds, an' flooers, and honey bees
 He has great lear, an's at his ease
 Wi' unco names
 O' fremit plants, brocht over the sea,
 Far frae their hames.

Richt gleegly, too, wi' canty phrase,
 He cracks o' auld world Scottish ways,
 As to the scenes o' youthful days;
 His fancy turns;

Syne leazes on the magic lays
 O' Robert Burns.

As bleezin' peat lowes i' the win'
 As stithy rings wi' hammer tune,
 Smith fans a' lowe oor hearts within,
 An' dir's us hard
 On heart-chor'ds that mak' a' men kin
 To Scotia's bard.

An' Burn's editions, auld or fine,
 Kilmarnock buiks an' nineteen-nine,
 He has them a', an' ilka line
 That's said or writ

O' Scotia's poet, gif it shine
 Wi' sense or wit.

Lang may Smith tent his meikle store
 O' Burn's works an' Burnsian lore,
 Until his years rin yont fife score,
 When, won through livin'
 He'll gang to join the immortal core,
 Wi' Burns in heaven.

—B. Irving in The Scottish American.

*Mr. Smith is a grand old Scotsman,
 well known at the National Capital,
 where he has resided for half a century.
 He is a Burns enthusiast and has gathered
 together the most complete and
 most interesting collection of Burnsiana
 outside of Scotland. B. I.

CLUBS and SOCIETIES

Florists' Club of Philadelphia

A regular meeting of the Club was held at its quarters in Horticultural Hall, Philadelphia, on Monday evening, May 2. President Joseph Heacock occupying the chair. Thomas Dale, Lewis A. Cathery and Hilbourn Darlington were elected members. Mr. Thilow, for the committee on essays, announced that Alphonse Pericat would speak on Orchids at the next meeting.

Leo. Niessen, for the committee on exhibits, reported that his committee awarded commendation to exhibitors that evening, as follows: Vase of Duchesse of Wellington Roses, grown by Robert Scott & Son, Sharon Hill, Pa.; vase of Sunrise Roses, grown by H. W. Collins, Doylestown, Pa.; and a vase of Niphetos, and a vase of Perle des Jardins Roses, grown by Charles E. Meehan.

The showing of old as well as new Roses made was to fittingly illustrate Anton Wintzer's subsequent talk, and for

this same purpose Robert Pyle, of the Conard & Jones Co., showed, in three-inch pots, three plants of Hiawatha, three of Dorothy Perkins, and four of the new Rose, American Pillar, all in bloom. The color of the last named is carmine, with a large white eye; the bloom is single, two inches in diameter, and very attractive.

The Lightning Hose Coupler was shown by the Lightning Coupler Sales Co., 1114 Sansom st., Philadelphia, and received commendation.

Anton Wintzer, of the Conard & Jones Co., West Grove, Pa., was then introduced by President Joseph Heacock, and gave a talk on "Roses, Past and Present," an account of which will be found elsewhere in this issue.

Elberon (N. J.) Hort. Society

This Society held its regular meeting May 2, President Peter Murray in the chair. The Society will hold its annual Rose and Strawberry Show in June, the date to be fixed at the next meeting. The date for the Chrysanthemum Show this Fall was set for Nov. 9 and 10.

The following points were awarded for

competition: A. Bauer, 95 for Antirrhinum. Wm. Seymour, 85 Roses. D. Kelley, 75 Peas. Peter Murray was awarded a certificate of culture for a very fine vase of O. F. Bassett Carnations, Chas. De Wild received a certificate of culture for three bunches of Asparagus.

ALEX. FLEMING, Rec. Sec.

MANSFIELD, O.—H. D. Hunt, the East Fourth st. florist, received a new Maxwell machine for delivery purposes, and also for pleasure; this, with two wagons and a bicycle, making it easy for him when rushed to get work out on time.

Catalogs Received

WM. C. HART, East Walden, N. Y.—Handy Pocket Size Descriptive Catalog of his Sycamore Dahlia Gardens, Foreign and American Introductions, grown for the trade only. This catalog contains a very full listing of leading commercial kinds in the Cactus, Decorative, Fancy, Show and Pompon varieties. The descriptions of varieties as to plant and flower have quite evidently been compiled with considerable care.

YOKOHAMA NURSERY CO., Yokohama, Japan, and New York.—Descriptive Catalog of Bulbs, Plants and Seeds, for 1910. Lilies, naturally, are most prominent in the publication, and the section devoted to them is well illustrated, particularly noticeable being a plate showing, in natural colors, flowers of 37 types of Lilies. Miscellaneous bulbs and tubers, Tree Peonies, Herbaceous Peonies, Iris, Camellias, Azaleas, Orchids, and Japanese Roses are all prominently listed. Ornamental trees and shrubs, and ornamental fruits are well presented, a plate in natural colors representing well flowered branches of five flowering Cherries. Other products noticed are economic plants, hedge plants, Palms, Cycas, Bamboos, Grasses, Alpines, hardy perennials, dwarfed trees, climbers and creepers, Ferns and aquatic plants. In florists' supplies are shown Bamboo stakes, baskets, porcelain flower pots, plant receptacles, store lanterns, Cycas dried leaves, and ornamental bronzes. The publication throughout is well illustrated, and appears in handsome covers, the front page bearing Lilies, Peonies and Iris, and the rear page Iris, Peonies, Lilies and Azaleas, all done in natural colors.

ALL NURSERYMEN SEEDSMEN and FLORISTS

Wishing to do business with Europe should send for the

"Horticultural Advertiser"

This is The British Trade Paper being read weekly by all Horticultural traders. It is also taken by over 100 of the best Continental houses. Annual subscriptions cover cost of postage, 7c. cents. Money orders payable at Lowdham, Notts. As the H. A. is a purely trade medium applicants should, with the subscription, send a copy of their catalogue or other evidence that they belong to the nursery or seed trades. Address

Editors of the "H. A."
Chilwell Nurseries, - Lowdham, Notts.

European Agents for
THE AMERICAN CARNATION

SUBSCRIBERS PLEASE NOTE.—The Florists' Exchange is a trade paper, and its advts. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

We wish to impress upon our readers that all questions intended for this department must bear the name of the sender, not necessarily for publication but as a guarantee of good faith. We will endeavor to answer all questions submitted to us by subscribers, but we cannot recognize anonymous communications.

IDENTIFICATION OF PLANTS
When sending specimens for names correspondents should send some lower leaves of herbaceous plants as well as upper ones, and of all plants, flowers and seed vessels if possible. In addition to this, it stated whether it be shrub, tree, herbaceous, wild or cultivated, location where growing, it would often enable identification of specimens difficult to determine otherwise.

(110) Specimen for Identification.—T. L., N. Y.
—This is the American Olive, Olea Americana, not quite hardy at Philadelphia unless well sheltered. There are some beauties in Louisville, Kentucky, in the cemeteries and private gardens.

(111) Rambler Roses for Quick Blooming.—I have some Rambler Rose plants which I am about to pot to bring in for Memorial Day. Would you be kind enough to give some of the important directions in regard to temperature, watering, syringing, etc.?—W. F. E., Mass.

It is very late to be potting Rambler Roses, now to bring them in for Memorial Day. Pot them in good Rose soil and place out in a cold frame, or in a cool greenhouse, at first. A north side house or a cool place under a bench would be good. The object is to get the roots started before the tops get too far advanced, as they are likely to do at this time of the year. The partial shade is needed to keep the hot sun from drying up the wood. After the first two weeks or so, or as soon as they are well started they will need all the sun and air they can get. If the roots are fresh and lively and the wood is plump, fair results may be obtained at this late date, but if the plants are dry and shrivelled, soak them in water a few hours and then bury them in the loam pile, tops and all, a few days before potting them. Ramblers need little pruning as they flower from shoots produced on the old wood. However, they may be shortened back a little if very long, there will be less danger of them shrivelling in this case. Pot firmly, water carefully and keep them syringed several times daily. Damp down all around the plants to keep the surroundings as cool and moist as possible. Avoid getting the loam in the pots too wet with the frequent sprayings. When well started, give them regular Rose treatment; you cannot hurry them at first, but the last week or ten days, if they are well rooted, they will come along rapidly. It is impossible to get very showy plants in one month from dormant stock, but good Ramblers, ready to flower, ought to be salable at any time for the next two months. E. H.

(112) Cut Back A. Quinquifolia.—We have some Ampelopsis quinquefolia, 8 to 10 ft. long, which we want to transplant. If we take them up by the brick wall do you think they will cling to it; will they grow or would you advise to cut them back to the roots? They are field-grown and do not seem to have any life in them at present. We want them for immediate effect.—F. W., N. Y.

You will obtain far more satisfactory results by cutting the plants back to the roots than by letting them carry the long shoots. By the close of the growing season, if the plants grow at all, the new growth would cover as much as the old they now carry. Shoots tacked to a wall do not form rootlets to clasp the brick, but the new growth made would do it. J. M.

(113) Flower for Identification.—The specimen herewith is from an old bush five or six feet high, in bloom April 29.—C. W. A., N. Y.

—Unless this is Pyrus Parkmani we do not know what else to call it. The flowers seem identical, but the leaf hardly as smooth and shining as Parkmani. It is a beautiful flower. It may be a variety of Parkmani.
S.—Since writing the above your specimen has been compared with some flowers of the Pyrus malus Scheideckeri, and agrees with them—the leaves also—better than with P. Parkmani.

<i>Amer. Beauty</i> <i>Bride</i> <i>Killarney</i> <i>Carnations</i>	A REVIEW OF THE MARKET	<i>Violets</i> <i>Chrysoms</i> <i>Orchids</i> <i>Lilies</i>
--	-------------------------------	--

NEW YORK, May 4.—The cut flower market is in a depressed condition. Arrivals, except in the case of outdoor Lilacs, are not sufficient to cover the supply. In one or two cases where the supply has shortened somewhat, the demand has also declined, leaving the condition no better.

American Beauty Roses, specials, reach a top price of 20c. only. Killarney and My Maryland realize no better price than 6c. each, and Richmond 8c. each. Special Bride and Bridesmaid sell for 5c. each.

Best grade Carnations are selling at 3c., although a few fancy whites reach the 4c. mark.

The demand for Gardenias is very small and very few of the best grade realize \$2 per dozen. Orchids are only fairly abundant but are beyond the requirements and the best grade sells slowly at 50c. each. There is no demand for Easter Lilies, and 6c. is about the limit for best grades. The very best Callas realize \$1 per dozen. The top price for Lily of the Valley is \$3 per 100.

Sweet Peas are abundant and only the very best grade realizes \$1 per dozen bunches; most of sales are around the 50c. mark. A few Daffodils and Tulips are still coming in but about 1c. and 2c. each respectively is the price.

Outdoor Lilac is in the market in immense quantities, and armful bunches are carried away at 25c. each. Other miscellaneous stock is moving very slowly.

The outlook for the remainder of the week is not bright, and anything like a rise in prices cannot reasonably be expected.

BOSTON, May 3.—On Saturday last all flowers were cleaned up at an early hour and at good prices. There is beginning to be a scarcity in some lines. Bulbous material is not quite as plentiful as it was some weeks ago. The weather has been cool and seasonable but we have had a great lack of sunshine and plants and flowers are equalizing themselves outdoors; that is, the cool weather is holding them back considerably.

Roses are a little better as regards price, and they are not quite as plentiful, but there is still enough to fill all orders. American Beauty is of good quality and rather more plentiful. Kaiserin and Carnot are of very good quality and prices are holding well on these varieties.

Carnations stiffened up in price this week. Good white Carnations are in great demand and bring equally good prices. The crops of Carnations are getting less, therefore there is very little surplus now.

Sweet Peas are not quite as plentiful, but the quality is good and prices have improved somewhat. Spanish Iris is quite plentiful and of good quality. Gladioli Blushing Bride is coming in quantity, well grown, quite a favorite at the present time. Snapdragon is plentiful but the quality is not as good as it was some weeks ago. There are some very fine pink varieties coming in now. Lily of the Valley is plentiful and prices are fairly good. Tulips in some varieties are scarce, those from outdoors are much better than those grown indoors. Narcissus from outdoors is plentiful; Bicolor Victoria seems a favorite.

Lilies that are seen are mostly candidums, but there are still a few longiflorums around. Yellow and white Daisies are plentiful. Gardenias are selling fairly well. There is no scarcity in Orchids, especially Cattleyas Mossiae and Mendellii. Green material in the way of Asparagus and Adiantum is still scarce. R. C.

PHILADELPHIA, May 2.—Fortunately there is not at present anything more than a normal cut of flowers arriving, and, on the other hand, the demand is not brisk. These two conditions balance each other, and except in a few stocks prices remain about the same. Southern Peonies and Tamarix are about the only new flowers noted on the market.

Some American Beauty Roses, specials, are realizing \$3 per dozen, but about \$2 to \$2.50 is the price in most sales. Top grade Killarney and My Maryland are selling for 10c. each. Richmond is not so plentiful just now and some very select stock is bringing 15c. per flower. Mrs. Jardine of like grade is selling for the same figure. Special Bride and Bridesmaid in small transactions are selling for 10c. but most sales are around the 6c. mark for the best grades.

Carnations are not in over supply. In the colored varieties some very fancy flowers are selling for 4c. each, but more are changing hands at 3c. each. It is a little difficult to state anything definite as to white Carnations prices today, because on account of the anticipated demand at the week's end, for Mothers' Day, the market is in a somewhat uncertain condition. There is a sharp advance on whites in the fancy grades and 6c. to 8c. are the asking prices.

Gardenias are abundant, and only some specially fine flowers realize \$3 per dozen. Most sales are made at from \$2 per dozen down. Good Orchids are not over abundant. Some Cattleya Mossiae, dark colored flowers, realize 75c. each, but 60c. each is about the general top figure.

Prices on Lily of the Valley are very firm, and top grade brings \$4.00 per 100. Easter Lilies and Callas, best grades, sell at 10c. each, but about 6c. is the usual selling price.

Sweet Peas are more abundant and the prices are falling off; some very fine long stemmed choice varieties reach the \$1.00 per 100 mark, but good stock is selling at 75c. down.

The supply of miscellaneous stock is not quite as abundant as last week, but is sufficient to meet all demands, and the sales are not over brisk.

ST. LOUIS, May 2.—Business last week was only fairly good in the cut flower line, the demand being mostly for funerals, small weddings and dinner parties.

This week opened clear and warm and the trade is looking forward to a good business during the month of May. The commission men report trade with them, both local and shipping, has been rather slow of late and that last week they had plenty of cut stock in all lines at greatly reduced prices with much stock left over after the morning sales.

In Roses, Killarney still holds the record for abundance. There are many fancy Bride, Bridesmaid and Richmond which do not bring over \$6; firsts about \$4 and seconds \$2 to \$3 per 100. Many good Roses in 1000 lots fetch \$10. Long fancy American Beauty not over \$3 per dozen, and in lower grades, from \$1.50 to 50c. per doz.

Carnations have been very plentiful of late and many were sent to the dump pile for want of demand. Extra fancy select stock is selling at the present time at \$2 per 100, firsts at \$1.50, and commons or splits at \$1 per 100.

Peonies are now coming in at \$4 per 100 and are fine and fairly plentiful. Sweet Peas are arriving in abundance and sell well at from 25c. to 50c. per 100.

Lilies have been more than enough of late and bring \$3 to \$10 per 100. Harrisii are exceptionally fine at all the commission houses. ST. PATRICK.

CHICAGO, May 3.—The market is still governed by the unsettled weather and until a change comes there is little hope of conditions being otherwise. Fortunately, the demand, outside of funeral work, is not very urgent, as with the continued rain and cloudy weather stock is not coming in any too good in point of quality, or great quantity. Roses seem to be the one article that is plentiful in any way, although they are deteriorating in quality perceptibly.

Carnations, while there is enough for all needs, are not over abundant. Some exceptionally fine flowers are to be found at times, and again one sees the effect of the damp and dark days. They are commanding about quoted prices, good stock \$2 per 100, with fancy at \$3. Toward Sunday white Carnations will be boosted in price considerably as the demand will be very great both for local and shipping orders on account of Mothers' Day. Many of the wholesalers are quoting whites for this occasion at from 4c. to 6c. each but this price, of course, holds only for a day or two preceding Sunday.

Lilies and Callas hold at about the same price, \$12.50 to \$15.00 per 100 being obtainable for them. Lily of the Valley is not quite so much in evidence as there have been few weddings; the price stands at from \$3 to \$4 per 100. Some good quality Iris in several colors are to be seen and are being used extensively for corsage bouquets. Sweet Peas still command favor and \$2 remains the price for the fancy grades, and down to 75c. per 100.

Lilacs are very scarce, and are not likely to be in any greater abundance; prices, however, remain 35c. to 50c. per bunch. Mignonette is also scarce. Tulips are hardly seen, but Jonquils, indoor grown, are in quantity great enough for all requirements. Some good Snapdragons are available as also is much other miscellaneous stock.

Orchids are a little more plentiful than for two or three weeks past; the price remains about the same. Smith is not in any greater quantity than is consumed.

Peonies have made their appearance from southern Illinois, the reds being most abundant and bringing 4c. each. The light colors and white are selling at from 6c. to 8c. according to quality. There are not enough flowers coming to quote definite prices on; and as yet the demand is very light.

INDIANAPOLIS, IND., May 2.—A more varied supply of flowers, brought on by warmer weather, enabled the florists to execute their orders with dispatch and satisfaction. Funeral work continues to be the chief source of trade although counter customers have been contributing freely. Weddings promise to be a feature this month as a number of them are booked. The bedding season, so long held in check, will begin this week. The supply is plentiful, but many growers are earnest in the statement of requesting at least ten per cent. more in this line for this season.

Both large and small Gladioli are being received and sell unusually well, 10c. and 5c. respectively is the wholesale figure on them.

Sweet Peas are a staple article, frequently called for at 50c. to 75c. wholesale and again as much at retail. The various shades are beautiful and, in the writer's opinion, have greatly improved in the last few years.

Harrisii Lilies and Callas, exceptional in quality, make beautiful casket arrangements at \$3 to \$4 per doz. to the public.

The surplus of Bridesmaid, Bride and Killarney Roses is being shipped away; \$6 to \$7 per 100 is obtained for the best. Fancy Richmond and Kaiserin Aug. Victoria are shipped in at \$7 per 100. Am. Beauty are moving well at \$5 to \$35 per 100.

'Sleepy' Carnations were not a rarity during the warm spell and their growing treatment easily discernible. Prices had a downward tendency at \$2 to \$3 per 100.

Snapdragon, Candytuft, Feverfew, Forget-me-not, Pansies, Daisies, Mignonette, Heliotrope and Nasturtiums all helped to create attractive shop windows.

A few Hydrangeas; Calceolarias and Roses are about all that is offered in the plant line, except bedding stock. Trade in this department would be more remunerative were it possible to offer a choicer selection. I. B.

Growers Building

LEAVENWORTH, KANS.—The Sunnyside Floral Co. is building two houses, each 150 by 24 ft., for growing Roses.

GLOVERSVILLE, N. Y.—Thos. Barson is building an additional greenhouse 44 by 100 ft., of Lord & Burnham construction.

 CUT FLOWERS AT WHOLESALE

New York

Between 8 and 9 o'clock on Thursday night, April 28, the stables, at 202 W. 76th st., of David Clarke's Sons, 2139 Broadway, were found to be on fire. A policeman who discovered the fire rang in an alarm, but the stables are somewhat back from the street and the fire had made such progress before it was discovered that the firm's four horses were barred to death and the harness and other stable equipments entirely destroyed. The efficient work of the fire department confined the fire to the stable only, and the wagons and automobile were not injured. The loss was at least partly covered by insurance.

Frank H. Pierson of Tarrytown says that he has given up his intention of building another greenhouse this summer, on account of the high price of glass and the low prices of roses.

It is reported that many of the smaller violet growers in the Rhinebeck region will discontinue business; but on the other hand the larger growers will increase their ranges as soon as the price of glass permits.

Ford Bros., 48 West 28th st., have leased the entire building at 121 West 28th st. They will sublet the second and third stories, and occupy the ground floor and basement, commodious and convenient quarters. They expect to move to the new location on Friday of this week.

The Growers' Cut Flower Co. has moved into its new quarters at 41 West 28th st., where more floor space is available and a better equipment for the business possible.

A. L. Young, instead of occupying two stores as heretofore, will conduct his entire business at 54 West 28th st.

George Cotsonas & Co. will move June 1, as also will Kessler Bros., wholesale plantmen, who occupy the floor above.

Sam Mainzer has given up his branch stand at the N. Y. Cut Flower Exchange.

C. C. Trepel, who has charge of the flower department of Looser & Co., Brooklyn, has a new automobile touring car.

Alexander McConnell reports a good business in ornamental evergreens from his nursery.

Burns at 840 Sixth ave. reports that he is having an unusually heavy window box business.

At Kuhn's, 896 Sixth ave., some plants of the rather rare *Vriisia splendens* are to be seen. From the center of the fleshy green leaves with transverse bands of brown, rises a stiff scape surmounted by a spike of brilliant scarlet bracts within which are yellow flowers.

M. Schling, Central Park Flower Co., 980 Sixth ave., is showing some very large and fine specimens of *Scottii Ferns*.

Sunday, May 1, was the Greek "Anastasis" Sunday, or Easter Sunday. There are two eastern Orthodox Greek churches in New York, one on 73d st., between Lexington and Third ave., and the other on 30th st., between Eighth and Ninth ave. The floral decorations were profuse and very beautiful, several hundred dollars' worth of flowers being used at each church.

Thomas Young, Jr., in addition to the six houses of Gardenias which he is now growing, will plant Gardenias in four new houses, each 200 ft. long, Richmond and Killarney Roses in one new 500 ft. house, and Orchids in another of the same length, all now under erection.

Mrs. George Peters, mother of William Peters, who is connected with the New York Cut Flower Co., died at Hempstead, L. I., on Monday, and was buried on Wednesday of this week.

George T. Schuneman of Baldwin's, L. I., sails on Tuesday, May 10, on the S. S. Kaiser Wilhelm II, for Bremen. He expects to be absent six to eight weeks, and will visit Berlin, Brussels, Naples, Paris, London and other European cities. He is quite familiar with all the cities named, having worked in each while learning his trade.

Harry Weston of Hempstead has his usual stock of *Dianthus indivisa* for the window box and garden vase trade. The quality this year is especially fine.

J. B. Nugent, Jr., has his head somewhat bowed through a carbuncle on his neck. He expects, however, to carve the beef at the Club meeting next Monday evening with his usual vigor.

Kessler Bros., 50 West 28th st., correct an item which appeared in this column last week, to the effect that they were offering plants of their new Fern. While they have one or two plants on exhibition in their store it will necessarily be some time yet before the stock will be offered for sale.

Traendly & Schenck have moved into their new quarters, 131-133 West 28th st. and opened for business there last Monday morning. Walter F. Sheridan opened at the same time in his new quarters at the same address. Both stores are admirably adapted for the wholesale business. They are each about 100 ft. by 53 ft. with basements as large. Judging from the size of these stores it would require less than six such establishments to fill the proposed market quarters at Queensboro Bridge. This may set the advocates of a combined flower and plant market at Queensboro bridge thinking.

When the scaffolding and rubbish resulting from the tunnel boring are cleared away from the crossing at West 28th st. and Sixth ave. it will no doubt be discovered that the establishment of J. K. Allen is the first wholesale florist's store in the "new" block.

The May meeting of the New York Florists' Club will be held on Monday evening next, May 9, at the Club rooms in the Grand Opera House Building, 23d st. and Eighth ave., at 7.30 p.m. A feature of the evening will be an address by Prof. John Craig of Cornell University, on "Some Phases of Experimental Work in Relation to Horticulture." Chairman Nugent of the entertainment committee will cater as usual.

St. Paul, Minn.

While the recent cold wave was disastrous to all vegetation in this section, the florists did not suffer great losses. Carnations and other field stock were not planted out and the damage to Peonies was slight. The killing of all outside flowers that were in bud ought to be a stimulus to trade in general.

To nurserymen and landscape planters the cold was beneficial in retarding stock and prolonging the planting season. The worst feature of this extraordinary Spring is the intense, prolonged drought. A quarter-inch of moisture has not fallen in two months, and all vegetation suffers.

The opening of the new Hotel St. Paul and the necessary festivities connected with it, called for quite a lavish use of flowers. For the opening night 6000 American Beauty Roses and several hundred Palms, Ferns and Bay trees were used. Social functions of the smart set since have created quite a demand for flowers.

The preliminary premium list for the Fall flower show to be held in Minneapolis under the auspices of the State Florist Association has been issued and offers some very attractive prizes in the different classes. As these premiums are backed up by a \$15,000 guarantee fund, subscribed in Minneapolis, it offers unusual inducements to prospective exhibitors.

The Minnesota State Fair Association also offers some attractive premiums for exhibitors this year, so that ambitious growers and decorators have good opportunities to earn some "pin money" and free advertising from these sources.

The State Fair Association is asking for bids on about 25,000 bedding plants for decorating the grounds this season.

Holm & Olson, Inc., are erecting eight new houses; they are also increasing their nursery plantings and have engaged the services of Mr. Smith, a competent landscape artist from the East.

O. J. Olson has the sympathy of the trade in the death of his mother, she having been accidentally drowned in Phalen Creek.

Reports from Otto Will, a prominent member of the trade in Minneapolis, who went to California a year ago to recuperate his health, are very encouraging, and we hope to see him in the Twin Cities in the near future.

Philadelphia

The following florists have visited Philadelphia recently: Arthur Kleinhans, Easton, Pa.; John Sykes, Allentown, Pa.; William Kern, Reading, Pa.; Thomas R. Fries, Lancaster, Pa.; Fred G. Burger, Baltimore, Md.; John Lealman, Vineland, N. J.; and William H. Calanese, Norristown, Pa.

The S. S. Pennock-Meehan Co. is now receiving, in addition to the usual staple goods, Tamarix, Viburnums, and some early Festiva Maxima and other Peonies from the South. William J. Moore, manager of the Washington branch of the company, is still confined to the hospital with a serious foot trouble, and Alfred Jones of the Philadelphia branch is in Washington taking Mr. Moore's place.

Charles E. Meehan is beginning, at Churchville, Pa., to plant out own root Killarney Roses in his new 300' by 50' greenhouse as fast as the Sweet Peas are removed which he has been growing this winter, the house not being finished till late in Autumn. He is using solid beds and steam heat.

Myers & Santman of Wyndmoor will use their large new greenhouse for growing American Beauty Roses.

This is circus week in Philadelphia and it is the general consensus of opinion that there is consequently a smaller demand for flowers.

The American Rose Society is endeavoring, through letters sent to interested parties, to ascertain "How many dollars' worth of roses" were sold in this country last year.

The Robert Craig Co. has just filled two entire houses with Areca lutescens in 7" pots. These Palms are in the pink of condition and will be grown on for Autumn trade. Large numbers of Nephrolepis Sottii, Scholzei and todesoides are noted here in the larger sizes. The last named variety Mr. Craig considers among the best.

Charles P. Poryzees, corner of 15th and Chestnut sts., sailed for Europe on Tuesday, where he will remain for four months.

H. H. Battles is cutting some nice Tamarix at his Thornhedge Nursery, Newtown Square.

Martin D. Matthews was in town this week marketing Gardenias from the range of Thomas Young, Jr., at Bound Brook, N. J.

Charles E. Meehan of Pennock-Meehan Co. took a business trip this week to Washington, D. C., and Richmond, Va.

Adolf Muller, Norristown, Pa., has sold his forty-acre nursery, together with the greenhouses and all buildings thereon to Alexander Cumming, Hartford, Conn., who will conduct a general nursery and tree surgery business. His friends welcome him back to the Keystone State, and wish him all success.

Boston

Arthur F. Coolidge of Cambridge is one of the largest growers of bedding plants in this section and he is located very near to Cambridge and Mount Auburn cemeteries, where a good deal of his product is used. He is shipping now to 2 Park st. some well grown Geraniums which are picked up quickly. He also has a team with bedding plants daily, at this season, standing outside of Faneuil Hall Market, where he disposes of large quantities. Other plants of which he has a large stock are Heliotrope, Coleus and Fuchsias. In Winter he grows Violets, and in the Fall Chrysanthemums are his chief crop.

John W. Foote of Reading, Mass., has had good success with his Carnations this season. He is cutting very fine flowers of the following kinds: Beacon, Fair Maid and Lawson; most of them are disposed of at 2 Park st.

William Ward of Woburn is to increase his glass this Summer. He is going to build a greenhouse 150 ft. x 30 ft.; the glass is ordered.

William H. Elliott of Brighton is shipping from his Madbury (N. H.) establishment the following Roses which are of fine quality: Rhea Reid, Bon Silene, Safrano, Beacon Hill and Mrs. Aaron Ward. At the Brighton greenhouses they are cutting some very fine strings of Asparagus plumosus, and Sprenger is also good. The Summer Roses at Brighton are looking well under the skilful hands of George Harbison and they promise a bountiful crop. The Summer varieties are: Kaiserin, Maryland, Killarney, Rhea Reid and American Beauty.

William Sim of Cliftondale has got settled comfortably in his new residence and Allan Sim, his brother and manager,

as a pink rose for warm weather has rather more color and substance than some

stems, in lots of 200 or more, our selection,
\$3.00 per 100.

Catalogue on request.

Walke & Son of Salem. They certainly have a fine variety of this showy flower, and it has such a pleasing shade of color.

Donald Carmichael has a neat and prosperous place at Wellesley, where he grows mostly Carnations. He is cutting some very good Enchantress, Beacon and Fair Maid.

The finest and best grown Carnations that are coming to market are from John Barr of South Natick, Mass. The following kinds are worthy of special mention for their superior cultivation: Winsor, Lawson, Harry Fenn and Queen.

D. Haragon of East Foxboro is cutting some very good Spanish Irises, handled at 2 Park st by J. M. Cohen.

The stock which J. W. Simpson of Woburn is shipping to 2 Park st. consists of Marguerites, Carnations and Stocks, all of good quality.

Adiantum and Smilax are the principal stocks which F. A. Cox of Dorchester is cutting and disposing of, and which are all right as to quality. He has also a house of Hydrangeas of nicely grown plants for Decoration Day.

Mrs. E. M. Gill of Medford is shipping some well grown *Calceolarias*, in pots, of the shrubby variety. They are neat, well flowered and well grown plants.

Thomas Roland of Nabant is sending in *Calceolarias* which are quickly picked up by customers at retail stores.

George H. Bean of West Medford, Mass., goes in heavily for bedding plants of which he grows about 40,000. Of Geraniums he handles about 14,000, the principal varieties being S. A. Nutt, Alphonse Ricard, Beauté Poitevine and, for white, Mme. Buchner. He raises also a goodly stock of Fuchsias, Heliotrope and

During the past week, with the final exclusion of bulbous stock and the last end of the Violet trade, the wholesale and retail dealers find themselves busy supplying the stores and windows with some of the hardier varieties of flowers, English Daisies, Sweet Peas and Pansies are at present the best sellers. Owing to the unusual number of small outside dealers handling Pansies, the larger dealers have been injured considerably. Carnations are still selling well. Retailers report that in addition to the large demand for cut flowers they have had an extra amount of work in the funeral line.

Mackie's greenhouses are filled with bedding plants, which will be just right for Decoration Day. A number of Chrysanthemums will be planted on the removal of the bedding plant. Mr. Mackie finds that with the increase of his business he is obliged to buy from others and is now contemplating plans for a new greenhouse.

Mr. A. W. Hixon of Gates Lane has been extremely busy during the past week, for in addition to his funeral work and regular retail trade, he has been busy decorating the Hermitage Country Club for its opening. He, too, has his houses mostly filled with bedding plants and Carnations, both of which are looking very well. Mr. Hixon's Tomato and Cabbage plants, which he raises for himself and for market trade, are of a very good quality and he is expecting a successful season.

Herman J. Snyder, located near Hope Cemetery, is extremely busy caring for his plants for Decoration Day. Mr. Snyder's location is a desirable one, and he is planning a very successful season. Besides his usual number of bedding plants he has a larger quantity of Asters on the shelves at sides of the houses.

Fred E. Keyes, on Highland st., who caters mostly to retail trade, reports that his business has been unusually brisk of late. His stock of Violets was readily disposed of and he could have sold more. Mr. Keyes has had a misfortune with his Carnations this year, cut worms injuring his planting to such an extent that they were replaced by Violets and bedding plants. After the disposal of his Geraniums he is planning to follow them with Chrysanthemums.

Mr. Frank Sokol, on College st., who has been doing considerable wholesale trade for some time, is very busy caring for his 20,000 Geraniums and other bedding plants. In spite of the fact that he has only a few men to assist him he has kept his stock in good condition. He is now supplying many of the up-town dealers with plants.

H. F. Littlefield is doing an extensive business. Mr. Littlefield's two stores, during the past few days have been ar-

tistically decorated with different designs of May baskets, which have attracted a good deal of attention. He reports that Daisies, Sweet Peas and Carnations are selling well at present. He has an exceedingly good quality of Carnations this year and he is having difficulty in meeting the large demand.

Lindstrom & Nyberg, on Main st., who were established last June, have only about 5000 ft. of glass, so are obliged to purchase many of their flowers. They find that American Beauty Roses do not sell very well, while Daisies and Sweet Peas find a good market. They have a large number of Asters and Pansies.

F. B. Madans, of 372 Main st., reports that his business is very good at present. Funeral work is his specialty.

The Horticultural Society is now holding weekly exhibitions at Horticultural Hall, on Thursday afternoons. It is expected that each succeeding exhibition will be of higher order from now on.

A. S. K.

Buffalo, N. Y.

The condition of trade is fair. Carnations are still scarce; Roses are coming in plentifully.

At this writing I have not been able to ascertain what decision the committee on the Fall flower show has come to; they hold a meeting this week.

L. H. Neubeck has bought the Bryner property at Williamsville, N. Y., which will give him a range of houses to draw from for his Main st. store and greenhouses.

Charles Guenther, the noted Rose grower of Hamburg, N. Y., read a paper on "Summer Rose Culture" at the meeting of the Florists' Club.

W. J. Palmer & Son now have two of the finest automobiles in the delivery service in the city; the cars have been giving very good satisfaction for scattered deliveries and one car will do as much work as four horses.

G.

MANSFIELD, O.—Albert Berno has been appointed florist at the Ohio Reformatory, in the place of Joseph Brumenschenkel, who resigned.

Strokum Stops Caterpillars Anyone Can Put It On

SIMPLY band it around your trees. No need to cut bark down smooth before applying, as Strokum fills up the bark chinks, and the caterpillars or tussock moths can't crawl under it, and won't crawl over it.

The second crop will soon be going up the trunks, now is the time to put on Strokum. It lasts an entire season, but does not stick to the bark all winter as do the unsightly smeared-on tar preparations.

Does not dry up as does fly paper. Is not carried off by the birds as is cotton.

Strokum is a purely vegetable product that we guarantee to be perfectly harmless.

Send \$3.00 at once for a sample package of 15 pounds, which is enough to band fifteen trees three feet around. Delivered free anywhere East of the Mississippi; 50c. extra West of it.

Send for our illustrated booklet.

Notes From California

San Emigdeo Ranch

Location, the extreme south end of the San Joaquin Valley; elevation 1300 ft.; April 17; time of day 7:30 a.m.; temperature 66°; relative humidity 56°; velocity of wind, perhaps, four miles per hour. Such is the location, and such the atmospheric conditions which surround me this Sunday morning while I sit in my shirt sleeves in the shade of a Weeping Mulberry tree in full leaf.

I shall attempt a word picture of the place that readers of the EXCHANGE may have a faint idea, at least, of "country life in California." Rivulets flow through the grounds, which are 20 acres in extent, and, after refreshing the flowers along their tiny banks, the water is conserved in ponds at a lower level, at which hundreds of cattle slake their thirst, after browsing over a range of wild pasture land of 10,000 acres.

The cottage is of one story, as are most houses in this State. The one side and roof is covered with Beauty of Glazenwood, La Marque, Reve d'Or, Henrietta and Cloth of Gold Roses, all of which are in full bloom. A hedge of Marechal Neil bounds one end of the informal flower garden. A pyramid, 10 ft. high, and half as wide, of the brilliant semi-double Gloire de Rosamond the other. The bed is 100 ft. long, 25 ft. wide. In it is growing a miscellaneous lot of plants; among them is a bed of Silene pendula, the first I have ever seen—and what a beautiful subject it is! Why this variety of Catchfly is not more generally cultivated, in this State at least, is one of the strange things of our gardening. Dwarf specimens, not over six inches high, and as compact as Lobelia Erinus, would make admirable border plants. Meehan's Malloes are to be given a test this season on these grounds.

Fig trees, of the black Mexico variety, 3 ft. diameter at the base, 50 ft. high, with a spread of top of more than 70 ft., are loaded with fruit which set on the wood of last season's growth. This will be ripe in about four weeks and will be followed by two other crops on the new wood which will be made this Summer. A remarkable thing about Figs is that in the southern part of the State this character of fruiting is not so pronounced as it is found here. Indeed, it may be truthfully said that the trees do not bear enough fruit on the old wood to attract attention. The foliage on these Fig trees is now about half developed. Spanish Broom, Spartium junceum, with its myriads of golden-colored flowers fill the air with its delightful perfume. Orange trees in full bloom add their share of fragrance and the clean foliage, free from scale pests and the consequent black smut where these pests abound, add beauty to the picture.

It may not be generally known, yet it is a fact, that there are sections of this State with climatic conditions which are not congenial to the life of scale pests—and I may say bed bugs too—moreover, the brilliant sunlight, the high Summer temperature and low relative humidity, combined with the iron and potash in the soil produces a fruit of superior excellence, both as to quality and appearance.

Another remarkable feature of this section is that the atmosphere is so dry that the pollen of Corn and Beans is rendered sterile, impotent, during the Summer, and the consequence is these two crops are a failure; while Peas, which luxuriate in a lower temperature, are a success during the first months of the year.

On this place bird life is protected. Quail, which are the same size as the eastern Bob White, but much more beautiful in plumage, with a magnificent plume of black gracefully curved forward on the top of the head, run wild through the shrubbery and are fed every morning with grain. Doves and other birds share the breakfast of the quail,

THE BEST WAY to collect an account is to place it with the National Florists' Board of Trade 56 Pine St., NEW YORK

WHY? Because many debtors will pay the Board fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

Please mention the Exchange when writing.

while the vain, though beautiful peacock struts about like many of his vain fellows—men and women—with apparent delight at being gazed at by all other creatures who may pass by. These feathered creatures do not flee from one's presence through fear of their lives being taken by barbarous men with deadly shot guns.

A border plant used here with pleasing effect is Oxalis corniculata var. atropurpurea. The dark bronze-colored foliage and yellow flowers are very attractive. Here is an illustration of where a plant may be a weed in one locality, and highly desirable in another. When it once becomes established in a Blue Grass lawn on this Coast, the only way to exterminate it is to dig up the turf, cultivate the soil for a season and re-seed the plot.

Oleanders grow to be immense in size, and are unsurpassed in beauty when in bloom by any other shrub growing on the grounds. The intense heat of Summer, the brilliant sunlight, the dry atmosphere all combined do not affect either foliage or flowers.

An experiment in fertilizing Roses reveals the fact that dried blood heightens the color of such as have red or yellow in their make up; while sulphate of potash may increase the size of the flower, yet not enough to warrant its use.

That you may know of the quality and appearance of Navel Oranges as they are grown here, I send you a few specimens, the last of the crop, which have been left for ornament alone. They are as they came off the tree without washing, brushing, or any effort to heighten the color or add luster to their appearance. All southern California Oranges are put through washing machines of ingenious construction, and dried before packing. Not so with the products of the grove on this place, which amounted to 6000 boxes this season. [Unfortunately the Oranges did not reach this office. —Ep.]

Olive trees as they grow here are so clean in appearance that one might readily believe a statement that they had been scrubbed with soap and water; and the crop covers the ground, going to waste for the want of help to gather and send it to the factory to be made into pickles or oil. Incidentally, it may truthfully be said that more fruit goes to waste in this State every year than is sent to market. The one thought that impresses me, as I travel over the State, is that there is enough of good land, land which is free from alkali and has subterranean streams of water, in sufficient quantity to support half the population of the United States, if it were tilled with as much assiduity as is bestowed on the lands of the Atlantic Coast States. P. D. BARNHART.

Cultural Directions

Are leaflets written by practical men especially for the use of amateur customers. If you have a counter trade, either in plants, seeds, flowers or bulbs, you should have a supply of these leaflets on hand to present to your customers when they seek cultural information about their purchases. (The leaflets embrace over forty subjects.) We can supply them at \$2.50 per 1000, or 600 for \$1.50, and can make a reduction of those prices on large quantities.

At a small extra cost we can put your imprint on each leaflet. Try a thousand and see what a help they are in selling goods.

The Week's Work

BY
FRITZ BAHR

Lorraine Begonias

Time to Stock Up With Small Plants For Next Winter

I haven't been writing of this most valuable plant, Gloire de Lorraine Begonia, of late, in regard to the care and handling of the cuttings; not because we don't raise our own stock or know how, but because I do not think it pays the smaller grower to bother with it. There are exceptions, of course. Some growers who handle but 200 to 300 plants, for their own use entirely, propagate their own stock, and have the very best results, but the average retail grower does not; he has so many, many things to attend to that nine chances out of ten he will neglect the little Begonias during the Spring rush, and the result is a lot of stunted stock later on. A far better way for him is to attend to his bedding stock. If he can produce a fairly good Geranium, for which he gets 12c., he is money ahead. If he buys his stock of Begonias at about that price, out of 2" pots, to be delivered to him the first week in June, by that time he has room, and with proper care, he will, by starting out with healthy vigorous stock, get nice 6" pot plants by December. Leave the propagating to the specialist—the man who grows a house full of the small plants. You can't do it any cheaper, and most likely not as well.

Geraniums

Important Work for the Present

If you should happen to have a man not very busy, direct him to the Geranium benches—it really requires two men, with good eyes and quick movements of the hands, in order to reset the plants, and stock in 4's. They can't remain, pot on pot, if bushy, stocky plants are wanted. While it may do for a time, three to four weeks would result in spindly stems and yellow foliage, and there is no money in stock of that kind. You would be better off by throwing every weak or unshapely plant out, even if it would take one-third of the bench, and giving the remaining two-thirds the proper room to develop into good salable stock. Surely, the number of plants in the bench counts; but have every one a good one, the space is far too valuable to have it filled up with stock which is liable to be set aside every time a dozen or a hundred plants are picked out and removed to fill an order. A plant which is not healthy, or in good condition, should make room for one that is, so if there is a chance at all to give the large Geraniums more room by resetting them, why get at it; and while doing it give the good plants the best show. If you desire to save the little fellows, move them to one end of the bench, but don't mix them with the large ones.

Decoration Day

A Noticeable Demand for Well-Grown Stock

We are not at all located near cemeteries, and yet there are but few of us who do not prepare extensively for Decoration Day; and while many people will buy their plants and flowers wanted for the decorating of graves at, or near the cemetery, there are quite a few who are willing to carry what they buy all the way from their homes, to wonder how cheap plants may be bought, nor how many peddlers may line up outside of the cemetery gates. Particularly is this the case with the customer who buys a better class of stock than that usually offered—and we notice from year to year that the demand for such stock is steadily increasing. This is encouraging, and we should certainly do all we possibly can to help along such a sentiment. To grow a Geranium worth 25c. doesn't really cost much more than one we have to sell at 10c., outside of the extra room the larger plant requires. The length of time it necessitates to grow, and amount of attention it demands, is practically the same as that for the cheaper plant. We can't possibly have a better

aim in view than that of growing less but better stock, and as we gradually do so we shall at the same time create a demand for exactly the same class of stock, and that is the kind that pays, the only kind—if we want to make a few more dollars than it just takes to run the business and keep our credit good with the coal man.

The Hotbeds

Now is the Time to Make Use of Them
We find ourselves crowded for room in the greenhouses far earlier than in other years. While bedding-out hardly ever begins before the end of May, throughout the middle West, the Geraniums, Salvias and Cannas, which, by the way, might be called the three principal bedders, have all had their last shift, that is, the main batch; all of them are ready to go out and occupy three-fourths of the bench room of the houses which contain the Spring stock. As other stock in the next three weeks will need more room, quite a few plants would suffer were it not for the relief afforded by the hotbeds. If you have the sash on hand make use of them, if at all possible. To prepare a hotbed at this time of the year will only require about eight inches of well packed manure, with sufficient soil on top to allow the pots to stand on it; or, what is better, to plunge them in up to the rim. This prevents the drying out, which is always a dangerous thing and liable to cause the plants to suffer. If short on deep frames, such as will accommodate Cannas and other tall growing plants, the average florist always has enough low growing stock, such as Alternantheras, Coleus, Salleri, Geraniums and others, and these are as well, if not better off in the frames than indoors. Don't forget that the most important thing about hotbed culture is the care the stock gets as to watering and ventilation. I might say everything depends on these two, so have one man in charge.

Field Culture of the Carnations

Light and Heavy Soils

The nature of the soil in the field has, of course, more than anything else to do with what results one can expect. When one has a stiff clay soil it would be folly to expect to grow field plants for sale, for it is hard in such soil to get a fair sized plant by the end of July, and especially is this the case in a dry season. On the other hand, a light, sandy soil will produce in a short time large, bushy plants; and for field culture of Carnations such soil, if it to be had, is to be preferred, for you get with less work, and in a shorter time, fit plants for housing, such as can be lifted with a nice lot of roots. Again, light soil of a sandy nature can be worked, in Spring, a few hours after a rain; while to handle heavy soil when in a wet state would be wrong. Yet we can't always choose, and if a heavy soil has to be made use of for the Carnations I would say to the beginner, do not touch it until it is dry enough to handle it; have it in a state so that it can be pulverized without trouble, whether you plow or spade work it over deeply—the deeper the better—for only deep cultivated soil will hold moisture in a dry season, and it won't do a bit of harm in a wet one. A shallow working over may be all right for light soil, but it will never do for soil of a heavy nature. Turn it over deeply and thoroughly pulverize it so as to be able to get the soil to settle around the ball of a little plant firmly; and if the soil isn't dry enough to work just when you are, wait a few days and you will gain by it in the end.

The Carnations

Nothing Gained By Too Early Planting in the Field

While here and there we find a grower who had his Carnations in the field before the storm of a week ago, most of us are getting ready for planting out during the coming week. Hardly ever is there anything gained by planting out too early. The experience some of the

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

Please mention the Exchange when writing.

growers had this year has shown that in cases where the frost did not cut the plants down to the ground it has badly damaged the stock and thereby stunted the growth. A field-grown Carnation in Fall can stand severe freezing without much harm, but not so with the young plants in Spring, such as had no chance to get hardened off. It is certain that the 22° to 26° Fahr., followed by three days of cold rain, must have had bad effects on the stock, and it is bound to take such stock longer to get a new growth started than the plants brought to the field two weeks later. The great trouble with many growers is their anxiety to get the plants out of the little pots they have been in for four months. Now, the man who grows 50,000 to 100,000 plants may possibly have an excuse for not giving his stock a shift at the proper time, but not so with the small grower who houses from 3000 to 5000 plants. With him, if he is at all in doubt as to finding time and room for shifting his stock when in need of it, a far better way is to propagate late and thereby have healthy, live, vigorous stock in 2" or 2½" pots ready for the field the first week in May. I would even prefer, with many varieties, a plant which has been potted up three weeks ago out of the sand, to one out in the field which went through last week's storm.

Planting Out Carnations

Just a Few Reminders.

The man who has been planting Carnations out for years doesn't need to be reminded of what to do and what to avoid; but not so with the beginner, he is liable to overlook certain things. To commence with, have the field ready. If gotten into shape the day before the planting is to be done the better. If the little plants are in pots in a cold frame, where they were put two weeks ago to harden off, give them a thorough watering the night before they are wanted for planting out. If they are well rooted they can be taken out of the pots, set carefully in flats, and brought to the field, in that way considerable time is saved. But a better way is, especially if the plants are not well rooted and you only have a few thousand, to leave them in the pots and remove them when ready to plant them out. For what is there gained by growing a Carnation in a pot and at the last minute, so to speak, through rough handling tear off every root of the stock? Isn't it far better to go to a little extra trouble and get the plant into the field without disturbing the roots? It is all right to be economical, or try to save labor, but don't sacrifice the plants on account of it. The idea in planting out is to get the stock to the field and into the soil as quickly as possible. To let the filled flats lay around in the sun to dry out is wrong, so before you go ahead get everything ready and then let the work go with a vim. Keep the best man, or men, in the field, there is no trick in planting out a Carnation, quick action counts for more than anything else. Eight inches of room is all the plants need for growing into shapely plants; what more you allow is for the cultivator to go through, and the hoe. Plant just a trifle deeper than the plants were in the pots; the soil surrounding them is bound to settle a little, no matter if light or heavy soil is made use of. Press firmly around the plants. One good watering is all that is required, but do it properly and, if possible, do it so as not to wet the surface between the rows. Let a man follow up with the hoe, to apply a light covering of dry soil over the watered surface around the plants. Whenever it is impossible to give a watering after planting, particular care should be used to give the stock a thorough soaking before it goes out, and a light hoeing after planting.

SUBSCRIBERS PLEASE NOTE.—The Florists' Exchange is a trade paper, and its advts. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

Prices Advertised in these Columns are for THE TRADE ONLY

A COMMERCIAL CURVED EAVE RANGE

Of course, the Curved Eave when it is built our way, is practical for the commercial house.

Here is one built over eight years ago, and Mr. Menands, the owner, swears by it.

Glass breakage at the eave? Not any more than in any of our other constructions, which is practically none.

Strong? Certainly it is strong, why shouldn't it be, as the frame work is all steel and the bars are each one backed by a metal reinforcement from the first purlin down to the sill.

It makes a fine looking house and there are no two ways about it—it's lighter.

Send for particulars.

Louisville, Ky.

Business with local florists has been dull for several weeks as the result of bad weather. They were not alone in this, however, as the unfavorable conditions extended all over the country. The chief obstacle presented by the weather was to planting, and as the larger part of the business done at this season is usually in connection with outdoor work, the volume of trade was considerably cut down. The weather has improved in the past two or three days, however, and it is believed that the situation will be back to normal in a short time.

Fred Haupt reports that all lines of cut flowers have been selling pretty well. Mine. Wastelle's children's ball, held at

Macanley's theatre, was a big success and heavy sales of flowers were made in connection with it.

Bad weather has prevented Nanz & Neuner from making as many shipments as usual into the middle and southern States, but they hope conditions will be better shortly. Local trade has been quiet with them.

H. G. Walker, of E. Walker & Co., believes in newspaper advertising, and has been practising it for thirty years. Last week he exploited Burpee's Beans, and this week the climbing Rose Dorothy Perkins, and the Clematis.

Mrs. E. G. Reimers had the decorations for the Gilmore-Miller Wedding, at which Palms, cut flowers and Ferns were used in profusion. The cascade for the bride was made of Lily of the Valley,

while the maids of honor carried Killarney Roses and Sweet Peas.

Mrs. Reimers has been receiving some fine Bougainvillea, the stock this year being choice. Plants for bedding are in demand, and Mrs. Reimers said that the old-fashioned flowers are coming into vogue again.

The Louisville Automobile Club is contemplating having a floral parade. The date for the parade has not been set, but the Louisville Herald has offered several handsome prizes for the best decorations, and it seems certain that the event will be arranged. The Club had a similar affair several years ago, and it was successful, but for some reason or other it has not been repeated since.

The Women's Outdoor Art League had two "clean-up days" last week, and secured great interest and co-operation on the part of the public and the city officials. Alleys and vacant lots were cleaned up, and shrubs and plants will be placed on the latter.

William Walker distributed flowers at the meeting of the Sunshine Club at Macauley's Theatre last Sunday. The object of the Club, which was recently formed, is to entertain children and give them a place to go on Sunday afternoons. Its work has been successful.

The Louisville florists are giving a great deal of assistance to the Flower Mission, which recently issued a public card extending its thanks to Nanz & Neuner, August R. Baumer, E. G. Reimers, Jacob Schulz, Henry Fuchs, F. Walker & Co., William Walker and C. B. Thompson.

August R. Baumer handled an order for a spray of white Carnations sent by the boys of the Louisville Male High School to the funeral of Mark Twain, who had favored the school in connection with the presentation of his play, "The Prince and the Pauper," by the local boys. The design was favorably commented upon, and was referred to in the Associated Press reports of the funeral.

Jacob Schulz has done some effective street car advertising of late. "Planting time is here," has been the burden of his appeal, and as his cards are illustrated, showing the various effects that can be secured, the exploitation has been profitable.

Woods, Stubbs & Co. have gotten out handsome enameled cases for their seeds, and these have attracted attention and helped to make sales.

The Kentucky Nursery Co. has just received large importations of evergreens, conifers, Japan Maples, Magnolias, etc., from Holland and France. The shipments arrived in good shape. The company has received word that though the fruit was killed in central and western Kentucky counties, in this immediate section it escaped injury.

Lexington, Ky.

Miss Pauline Sarah Worland, the popular saleslady and bookkeeper, who was with J. A. Keller at the downtown store on Main st., was married recently to J. Bernard Wallace, also of this city.

Anderson & White, the lady florists on Georgetown st., are busy with bedding plants of which they make a specialty. They have some very good stock this Spring.

S. S. Kelley, Clifton Heights, is also a busy man with bedding plants and Mr. Kelley also grows Carnations and he has been cutting some excellent flowers of late.

Honaker, the Florist, on N. Jackson st., is cutting some excellent Roses and Carnations. He grows the best Roses in the State. Bedding plants have been discarded to make room for more cut flowers of which he will make a specialty hereafter.

Louis D. Singer of Thorn Hill, Frankfort, Ky., was a recent visitor here buying stock for Spring sales at his place in that city. August Le Clere, who looks after the greenhouses and grounds at the Eastern (Ky.) Asylum for the Insane, on 4th st. East, is busy with landscape work.

R. H. Tacke, Supt. of Parks, has been busy with landscape work.

A recent visit to the J. A. Keller greenhouses, on West 6th st., found everything looking well. This firm grows a general line of stock for the wholesale and retail trade. J. F. Keller, the manager at the greenhouses, says he will grow about 20,000 Carnations this year. Several thousand Chrysanthemums will also be grown here. More space will also be given to Violets, Antirrhinums and Sweet Peas.

Providence, R. I.

P. J. Sullivan of Springfield, Mass., was a recent visitor to Providence where he was formerly interested in the florist business. He reports his business as steadily increasing.

Mr. Lawrence Hay is one of the busy landscape artists of East Providence, where he has charge of the Agawan Hunt Club grounds. Of late he has had his hands full with the planting of a large amount of shrubbery, and sodding new grounds. He recently purchased a horse and cutter for the use of the Club. Mr. Hay is bringing in some fine Hybrid Roses in pots.

D. E. Newell of Attleboro, Mass., reports everything moving in that city as well as can be expected. There is some funeral work and plenty else to do at this season. He is looking forward to getting everything in fine condition for Memorial Day.

W. S. Woodruff of Orange, Conn., was in town on Thursday in the interest of the seed trade. He reports that business has been very good notwithstanding the high prices which have prevailed in the Pea market this season. Beans seem to be plentiful and all will have enough Peas to carry them through. Onion seed seems to be plentiful, as white are offered to the trade at \$2 a bushel.

C. H. Hunt, Oxford St., reports business very good and everything coming along in the line of bedding plants in excellent shape. He has a fine lot of Geraniums, Coleus, and other bedding plants for Memorial Day.

The Holland bulb men are apparently looking well after the bulb trade this season. A week never passes without three or four putting in an appearance, with the assurance of giving the best quality of bulbs at the lowest prices. Each one tries to induce the florists and seedsmen to cast their lots with them, one trial order is all they ask. These numerous bulb representatives sell just as cheaply to the florists' trade as to seedsmen; quantity hardly cuts any figure in price.

Wm. Hay is cutting some very fine Roses at his new Oaklawn plant.

J. H. Cushing, Quindnick, R. I., was in town Friday, purchasing supplies.

S. Geller of the Geller Florists' Supply Co., Inc., New York, was in town on Friday.

A. J. Olsen, East Providence, is cutting a fine lot of Carnations.

G. Hampton, representing Jos. G. Neidinger, Philadelphia, was in town Monday looking after trade in the supply line.

Geo. Johnson & Son, Elmwood ave., had the decorations at the Park Avenue High School on Monday, where the new mayor of the city of Prinston, Edward M. Sullivan, and the Councilmen of the newly created city were inaugurated. The room was nicely decorated with Palms, Ferns, etc., and much credit is due to Mr. Sharkey, who had charge of the decorations.

Wm. Hoffman of Pawtucket, R. I., has recently let a contract to Lord & Burnham Co., Irvington, N. Y., for the construction of two new greenhouses, one 38x128 ft. the other 28x100 ft. This addition to Mr. Hoffman's plant will add much to its usefulness, as the old houses will be torn down and replaced by these new structures.

WHICH EAVE ARE YOU BUYING?

L. & B. Galvanized, Ice-Clearing Eave Plate with Sash Bar Clamps, makes this strong, but extremely light eave

It seems hardly possible that after all the talking about lighter, stronger houses, that some growers are even this very day buying eaves that are heavier but not as strong as our Galvanized, Ice-Clearing one; eaves that are a little cheaper to buy but cost dollars and dollars more each year, because of the resulting shade and repairs.

Perhaps you may be one of those who do not know that we will sell separately, the plate with sash bar clamps attached. Send orders for as many feet as you like, and we will ship promptly.

BE ECONOMICAL IF YOU WANT TO SUCCEED!!!

IT is a hard matter to define economy; there is no one explanation that can be given as to what it is. Experience alone can teach economy and impress its rules on the mind of the pupil. One thing, however, is certain—you can never succeed in business unless you are economical. Economy doesn't mean always the saving of money, or the sacrificing of this or that to make ends meet—it means more often the judicious spending of capital and careful planning of work. To look ahead and see the future, to provide for the time that is to come, to do things that will last—this is economy. Of what benefit is a saving today that is lost tomorrow on account of short sightedness? Is it economy to build greenhouses today that are cheap and spend all your profits repairing them?

It is not what you pay, but what you get for what you pay—that is economy.

European Notes

Although the month of April is dying

as the mail is closing, overcoats and

mufflers are still the order of the day.

Cold northwesterly winds prevail from

Biarritz to the Isle of Skye, and showers

They say Erie Commuters to and from New York are perhaps the best natured men in the world—especially those who have commuted a year or more. One can become accustomed to almost anything in the course of time, and unless an improvement is forced upon him he will never know better.

There are some Lily Bulb growers of a similar nature—satisfied with the old kind; willing to throw one-half away, never dreaming that it is possible to buy a brand of bulbs which will average more, not even considering the saving in expense of handling and cost of forcing.

Those who have “never changed” would do well to try a case of Horseshoe Brand Giganteum this Fall—eliminate the dry-rot from your system. Those who are “satisfied” are the stepping-stones for some wide-awake fellow to walk on.

Send for the Horseshoe Brand catalog.

fields are quite white, but the drying winds will enable us to resume operations in less than an hour. We sadly need some good warm rains with warm nights to give our sowings of the early forcing Radishes a chance to grow right away and so preserve their special qualities. The larger and later varieties have come up well and are now nearly ready for transplanting, but we are too busy at present completing our plantings of Carrots, Beets and Mangels to be able to give the Radishes the attention they need. After all, Radish is a risky crop about which it is difficult to entuse either merchants or growers, but we shall do our best with it, and for it, and the best can do no more.

The reports of destruction to the southern fruit and cotton crops cabled during the present week from your aide evoke a very sincere sympathy from companions in misfortune. It is a case of "Parce majeure" against which it is vain to contend.

The great shortage in the acreages of Beet, Carrot, Cabbage, etc., will probably lead to a large surplus of dwarf Beans next season, while an increased acreage of Lettuce will most probably be planted. The last named article will be welcome, as stocks of many varieties have run very low, but as regards the Beans, it is not possible for those who have already made their growing arrangement at the old prices to contemplate a probable slump in values with any degree of pleasure.

The editor of one of the newest of the "weeklies" devoted to horticulture announces that he "will be glad to answer questions upon any subject dealt with in his journal." The following is a specimen of his replies. "MANGEL. (H. B.) Mangel or Mangel-Wurzel is simply a German variety of Potato. Mangels ripen irregularly and keep badly. The color is red or mixed red and yellow, generally very large, some of them weighing over 2 lbs. each. Not good for table use, but suitable for feeding cattle." The blind leaders of the blind don't get a look in by the side of this luminous guide.

A run through the district devastated by the floods in the valley where the L'Authion and the Loire connect discloses the fact, that in some of the farm houses the water was fully two metres (about 6 1/2 ft.) deep. There appears to have been some very destructive property in the water, for all the vegetation that was submerged is perishing, as well Thuja trees as Cabbages.

The farmers are hoping that this property may eventually prove to be a valuable fertilizer, and that next year this, and the enforced fallow, may result in splendid crops. The experience of the market gardeners near Naples, whose gardens were buried under the ashes of Vesuvius, certainly supports the idea.

Business in general is almost down to the stock taking level, but a brisk demand for Mangel is a welcome feature, and quite a nice lot of Turnip seed orders from your side are coming to hand.

In the heavy seed market, Tares are in great demand and several large parcels of Clover have changed hands during the past few days. Grass seeds are too high to encourage speculative purchases, but an average demand is assured. Rutabagas are a bit of a drug just now (only the coarser varieties), but orders for these may be forthcoming at any time during the next two months.

EUROPEAN SEEDS.

American Notes

Good Business Continues

The past week has seen a steady continuance of the very satisfactory retail trade that our seedsmen have enjoyed since the month came in. Reports from some sections, however, are to the effect that the continued comparatively cool weather has in quite noticeable measure restricted orders, especially for everything in the line of tender vegetable and bedding plants; but both flower and vegetable seeds proper would seem to be having much larger May sales than for many years. As regards evening work with the seedsmen, it is practically at an end for this year, and to the infinite relief of employer and employee alike; surely, it is conservative to say that there has never been a Spring seed selling season which has demanded more extra hours of labor than the one now approaching its end. Regarding the wholesale seed business, those seedsmen who cater particularly to this line of trade are still quite busy with the so-called "filling in orders;" for just so long as the retail counter business continues will their customers find many daily needs in bulk seeds. With good weather there will be many weeks yet of active trade for the seedsmen, as every succeeding year has seen more and more home garden planting done in the month of June.

Beets for Feeding Stock

During the next few weeks, until

well into June, there will be an active demand for seed of the, so-called, Cattle Beets for stock feeding. Mangel-Wurzels or Cattle Beets are being more extensively planted yearly, because of the wonderful results gained through feeding them to stock of all kinds, as shown by the reports of our various experiment stations. There are any varieties but, as with other vegetable seeds, it will be found necessary to carry in stock only seed of two or three leading sorts. The Improved Mammoth Long Red is perhaps the most called for variety, and the best of the red-fleshed sorts. Should customers simply ask for the largest and most profitable Mangel-Wurzel, this variety will always give satisfaction. There are also yellow-fleshed varieties, the best of which is the favorite Golden Tankard. If seeds of these two described sorts are carried in stock very few planters will be found who will not take one or the other. Wholesale seedsmen can always supply the rest of the list as orders require. To make a seed business most profitable it is advisable to avoid carrying little called for varieties in every line of seeds.

Memorial Day Plants

Those seedsmen who have carried a full line of plants all through the season should not on any account neglect to make ample provision for their Memorial Day sales in this direction. Perhaps, one of the best sellers will be found to be small baskets of Pansy plants in full bloom, that can be retailed for say 25c. per basket. Last year a well-known seedsman conceived the idea of offering assorted baskets of plants in full bloom, as far as possible, to sell for \$1 a basket. Each basket contained a liberal number of good plants, including Geraniums, Cannas, Coleus, Salvia, Pansies, etc. Proper advertising sold these baskets in very large numbers; in fact, his store seemed to be the headquarters in that city for Memorial Day needs in this line. It is, of course, necessary to plan ahead for such a special sale, but Memorial Day certainly gives the seedsman a splendid opportunity to dispose of very large quantities of flowering and decorative plants. The above is suggested as one of the possibilities where the local conditions are right.

New York Seed Trade

The seedsmen have had another week of good trade in all retail lines; so comparatively cool continues the weather that considerable nursery stock is still being sold and shipped. Vegetable and bedding plants are being disposed of in enormous quantities. An active trade is looked for until well into June.

W. E. Marshall & Co. are very much pleased with the goodly volume of nursery stock orders they have received this season, which, in large measure, they attribute to the special catalog devoted to this line they issued this year for the first time.

Marshall H. Duryea, vice-president of Henry Nungesser & Co., is serving on the Grand Jury of the United States Courts. Mr. Duryea has been drawn to serve during this month and June.

Rickards Brothers report that to the present time they have hooked many more orders for Dutch bulbs for Autumn delivery than a year ago. They feel sure that the demand for all kinds of bulb stock will be very large the coming season.

At Boddington's, trade is still very active. A feature of the week has been a large shipment of Rhododendron maximum to Canada. This house has much increased its output in the nursery stock line this season.

The Aphine Manufacturing Co. of Madison, N. J., has very largely increased its sales of Aphine, through the seedsmen, since putting upon the market the smaller sized cans for retail counter sales.

Ralph M. Ward & Co. have this week received large shipments from Japan of Bamboo canes.

White Roman Hyacinths and Paper White Narcissus will be even higher than last year, especially the former.

Philadelphia Seed Trade

The rush season of the seed business is over. In fact, the demand for seeds is not as heavy as it usually is at this season of the year. That is because the sales in March and April were abnormally large. The bulbs and roots are still moving briskly, but the largest sales now are in the vegetable plant line, and in garden tools.

HEADQUARTERS FOR CYCAS STEMS

A MONEY MAKER FOR THE FLORIST

STRONG, HEALTHY TRUNKS. 25 lbs. for \$2.25; 100 lbs., \$8.00; 300 lbs., \$22.00.

"VAPORITE"

Vaporite is a gray non-poisonous powder which, when it comes into contact with soil, gives off a vapor. This vapor kills all underground insects such as Wireworms, etc. Vaporite is for soil application—not for the leaves of the plant. Vaporite should be uniformly distributed on the surface or in the soil among the insects, so that the gas evolved may destroy them. 1 to 1½ lbs. is enough for a cubic yard of soil (about 1 cart load). 50c. per 5 lbs., 25 lbs., \$1.50; \$2.75 per 50 lbs.; per 100 lbs., \$5.00.

In one window of Michell's Seed Store, 515 Market st., is a display of lawn mowers, hand cultivators, and seed sowers; in the other plant tubs, window boxes, insecticides and the implements for applying such bug killers. Perhaps the most notable object in either window is a "mummified" rat, fastened on a piece of cardboard. Rats and mice, it is shown, come to this condition by eating "Rat Corn," a rat and mouse exterminator which mummifies them after they have eaten it. It is not a poison, and the mummified rat has no odor. Rats and mice destroy millions of dollars' worth of stock annually, and are especially destructive in seed stores. This new exterminator has been tested in Michell's own store and found very effective, and should prove a great boon to many. Is it because Michell's Giant exhibition strain of Pansy seed is such a superior strain, or because Evans of Frankford is such a good grower, or both, that make the Pansy plants at Michell's so stocky and the blooms so immense this late in the season?

At Michell's 1015 Market st. store there is noticeable in the window an ingenious mechanical invention, worked by electricity; on a lawn of green felt, a tidy little lass is pushing a lawn mower around and around in a vigorous and tireless way. Doubtless, many a lad as he passes stops and with a sigh wishes he had such a sister. Some exceptionally good monthly Roses in large sizes are noted here.

At the Stokes Seed Store are noted some very large potted Egg Plants. Mr. Stokes is still at his cottage in the Pocono Mountains, resting and fishing, and will not return till Wednesday.

The Johnson Seed Co. is showing the first Sweet Potato plants of the season, and Pepper plants also.

At Henry A. Dreer's the new "Dropmore" variety of Aechusa is noted. This is a hardy herbaceous plant which begins to produce large spikes of Phlox-shaped, blue flowers, when about two feet high, and reaches a height of five feet, blooming all Summer. Mr. Thilow of this house is in Trenton, N. J., for a few days.

Sugar Lettuce

This new variety is somewhat like a Romaine Lettuce. The leaves are crisp, dark green above and paler on the under side. They are bunched in a very compact, thick, small head and, as the variety is dwarf in growth, it may be cut as soon as it has reached 3½ in. or 4 in. across. Its habit is good, and it does not wilt easily. The flavor is very pleasant. Altogether, it is one of the best new varieties for Summer culture or for warm regions. Messrs. Cayenx & Le Clere, the seedsmen, Paris, France, are introducing it this year.—*Revue Horti-cole.*

The New York Pure Seed Bill

As announced on page 823 of our issue of May 7, the Callan Pure Seed Bill passed the New York House of Assembly on Thursday, May 5, and is now before the Senate. We publish the provisions of the bill as just passed in its further amended form, and would draw the attention of seedsmen of New York State to one or two important changes which should be protested against.

In the bill published on page 650, issue of April 9, and as it was worded on the order of its second reading in the Assembly, the provision was made that "no person shall sell, offer, expose," etc. In the bill just passed this phraseology has been changed to "no wholesale or retail dealer shall sell, offer, expose," etc. In the first instance the onus was placed on the farmer as well as on the dealer; in the bill as now passed the farmer or grower is released of all responsibility. This evident intention of safeguarding the seed grower is further shown in the new clause which will be found printed in italics, which again distinctly and explicitly further releases that class from all responsibility.

This is practically the only opposition seedsmen have, as closely as we can ascertain, against the present bill, and as it is not likely that a committee of seedsmen will oppose the bill in the Senate, it remains that every seedsmen interested should write to his State senators requesting that the phraseology be restored to its original intent in these two particular cases.

These objections will be found on line 15 of page 2 and lines 12 to 15 of page 3 of the Bill as it has just passed the Assembly.

The Callan Pure Seed Bill

Article 15

INSPECTION AND SALE OF SEEDS.

Section 340. Inspection and sale of seeds.
Section 341. Samples. Publication of results of examination.
Section 342. Provisions concerning actions.

Sec. 340. Inspection and sale of seeds.

—Within the meaning of this article "agricultural seeds" are defined as the seeds of alfalfa, barley, Canadian blue grass, Kentucky blue grass, brome (awnless) grass, buckwheat, alsike clover, crimson clover, red clover, white clover, field corn, Kafir corn, meadow fescue, flax, millet, oats, orchard grass, rape, red top, rye, sorghum, timothy and wheat which are to be used for sowing or seeding purposes. No wholesale or retail dealer (previously "no person") shall sell, offer, expose or have in his possession for sale for the purposes of seeding, any cereals or seeds of grasses or clovers, of the class known as agricultural seeds in quantities exceeding ten pounds, unless every receptacle, package, sack or bag containing such seeds, or a label securely attached thereto or enclosed therein, is marked in a plain indelible manner as herein provided. Said marks shall be on the receptacle, package, sack or bag itself if there is more than ten per centum of injurious foreign seed. Marks shall include the following:

- a. The full name and address of the seller.
- b. The name of the kind or kinds of seeds, except in case of mixtures prepared for special purposes, when so labeled.

Pansy Plants

Large plants in bloom, \$1.25 per 100, \$10.00 per 1000; smaller plants that will bloom soon, at \$2.00 per 1000.

c. The name of any foreign injurious seeds present to the extent of three per centum or over by count, and both the name and percentum of the following adulterants if present: Yellow trefoil in red clover; yellow trefoil, burr, clover, sweet clover or dodder, in alfalfa; Canadian blue grass in Kentucky blue grass; meadow fescue or rye grass in orchard grass; Yellow trefoil in alsike clover.

d. With the claimed per centum of purity of the sample by count which shall be not more than three above the per centum determined by official examination.

The provisions of this act shall not apply to any person selling agricultural seeds or cereals to seed merchants, or shipping to a general market to be cleaned or graded before being offered or exposed for sale for seedling purposes. [This paragraph is new in its entirety.]

Sec. 341. Samples, publication of results of examinations.—Samples of seed shall be taken in duplicate, both samples shall be sealed promptly and one shall be tendered and, if accepted, shall be delivered at the time of taking to the person apparently in charge and a receipt taken therefor, unless refused. The commissioner of agriculture is hereby authorized to publish from time to time the results of seed examination, together with the names and addresses of dealers from whom the samples examined were taken.

Sec. 342. Provisions concerning actions.—No action shall be maintained for a violation of any of the provisions of this article if the seed was not sold or exposed for sale; nor shall any such action or any action for the breach of a legal duty or obligation in the sale of agricultural seeds be maintained by the buyer against the seller unless such action is commenced within a reasonable time after the sale and before the sowing or other use of the seeds, nor unless the claim or claims of such buyer are based upon properly drawn samples of such seed from the bulk thereof.

Sec. 3. This act shall take effect July first, nineteen hundred and ten.

The Lincoln Pea

A short time since I was referring to a new dwarf culinary Pea called "The Lincoln" believing that it would prove a worthy item for your growers to handle. Seemingly, I was behindband, for one or two of your firms have already got wind of Lincoln, and one party, who tested a bushel or two last year, was so pleased with it that he has written for quotations for the 1910 crop. The raisers inform me that it is their intention to offer Lincoln to American buyers on a large scale this coming autumn, and I advise up-to-date people to remember this fact.

I might also add that the raisers of this variety are still busy breeding Peas, and they have favored me with a number of samples, the parentage of which suggest great things. T. A. W.

Coming Exhibitions

Boston, Mass., May 26-30, 1910.—Great Exhibition of Orchids and other plants by the Massachusetts Horticultural Society. Secretary, William P. Rich.

GLADIOLI

America. This beautiful new Gladiolus is likely to produce as great a sensation as the now famous Princess. The flowers, which are of immense size, are of the most beautiful flesh-pink color, and, as a florist who saw it said, it is "fine enough for a bride's bouquet." 60c. per doz., \$3.25 per 100, \$30.00 per 1000.

1900. Nothing finer for florists' use. Rich shade of red with very prominent white spots on three lower petals. \$2.00 per 100, \$15.00 per 1000.
Croon's Hybrids (originator's strain). \$1.25 per 100, \$10.00 per 1000.
Shakespeare, White and rose. \$4.75 per 100, \$45.00 per 1000.
Muy. Pure white, flaked rosy crimson, the best for selected bulbs. \$1.75 per 100, \$16.00 per 1000.
Brenchleyensis (true). Flery scarlet; first size bulbs. \$1.25 per 100, \$9.00 per 1000.
Boddington's White and Light. Extra-selected bulbs. 1 1/2 inches and up. \$1.25 per 100, \$10.00 per 1000.
Americana Hybrids. A mixture of the choicest varieties of Gladiolus. \$1.00 per 100, \$9.00 per 1000.
Pink and Rose Shades. \$1.50 per 100, \$14.00 per 1000.
Lemoine's Hybrids. \$1.50 per 100, \$12.00 per 1000.
Finest All Colors Mixed. 75c. per 100, \$7.00 per 1000.

DAHLIAS

After considerable consideration and observation, and "talks" with the trade, we have decided to offer the following Dahlias to florists this season. Our retail Catalog, which will be mailed free, contains a larger collection, but few are superior to the following and all are good size, divided clumps that have been field-grown and are strong and healthy.

Price of all the below-named varieties of Dahlias, large divided clumps or roots, except where noted, 10 cts. each, \$1.00 per doz., \$3.00 per 100, \$75.00 per 1000.

Jack Rose (Decorative type). The variety Jack Rose is rightly named and is a florist's Dahlia "from the ground up." The color is similar to the Jacqueminot Rose, and is a unique color in the Dahlia, which lights up beautifully at night. The habit of the plant is stocky, very free-flowering. Fronds of its blooms in great profusion upon erect, long, stiff stems, making it invaluable for cutting. You cannot afford to be without it. If you sell cut-flowers. 35c. each, \$3.50 per doz., \$25.00 per 100.

DECORATIVE DAHLIAS

Sylvia. Best described as a Giant Nymphaea, being stronger, larger and deeper colored. Flowers 4 to 6 inches in diameter, of fine form and full to the center, which is white, shaded to soft pink on the outer petals. One of the best cut-flower varieties. 10c. each, \$1.00 per doz., \$7.50 per 100.

Catherine Duer. Crimson-scarlet.

Clifford W. Braton. Best yellow. 10c. each, \$1.00 per doz., \$7.50 per 100.

Frank L. Bassett. Bright purple, shading to blue.

Lyndhurst. Bright scarlet.

Maid of Kent. Cherry-red, tipped white.

Nymphaea. Color clear, light shrimp-pink.

Orange King. Rich glowing orange; early and profuse.

William Agnew. Rich, dazzling red; immense size.

CACTUS DAHLIAS

Berlehlingsen. Deep crimson-carmine shading to bright carmine at the tips.

Bravo. Rich Jacqueminot-red; one of the best for cutting.

Countess of Lonsdale. Amber and salmon.

10c. each, \$1.00 per doz., \$7.50 per 100.

Earl of Pembroke. Bright plum. 15c. each, \$1.50 per doz., \$12.00 per 100.

Helene. Center creamy.

Kriemhilde. One of the finest pink Cactus Dahlias. 10c. each, \$1.00 per doz., \$7.50 per 100.

Lillette. A fine purple.

Ortwin. Beautiful salmon-flesh.

Standard Bearer. Brightest scarlet; profuse bloomer. 15c. each, \$1.50 per doz., \$12.00 per 100.

SHOW AND FANCY DAHLIAS

A. D. Livoni. Beautiful soft pink; early and profuse bloomer. 10c. each, \$1.00 per doz., \$7.50 per 100.

Arabella. Pale primrose, tipped and shaded old rose and lavender.

Grand Duke Alexis. Very large white, tinted pale lavender.

Glowing Coal. Brilliant red.

Green's White. One of the best whites for cutting.

Harlequin. Brilliant crimson, striped and tipped white.

John Thorpe. Very large; soft rich pink.

Menheddy Beauty. Fancy buff, with crimson spots, free long stems, large bloom.

8c. each, 30c. per doz., \$6.00 per 100.

Frank Smith. Rich, dark purple maroon, tipped pinkish white. A superb flower.

25c. each, \$2.50 per doz.

Red Haze. Pure carmine red flower, very free bloomer, splendid for cutting.

White Swan. Snow-white, with long stems.

SINGLE DAHLIAS

The 20th Century. Intense rosy crimson, with white tips and white disc around yellow center. 10c. each, \$1.00 per doz., \$7.50 per 100.

DAHLIAS TO COLOR

We can also furnish, without names, in mixture, all colors separate, or all colors mixed, as follows:

Mixed Plaks, Mixed Whites, Mixed Reds, Mixed Yellows. 75c. per doz., \$6.50 per 100, \$50.00 per 1000.

Mixed, all colors. 60c. per doz., \$4.50 per 100, \$40.00 per 1000.

HARDY CLIMBERS, Etc.

AMPELOPSIS Strong Dutch-Grown

Quinquifolia (American Ivy, or Virginia Creeper). Good for covering walls, verandas, or trunks of trees; affords shade quickly. 25c. each, \$1.75 for 10, \$15.00 per 100.

ACTINIDIA ARGUTA

A desirable Japanese climber of strong, vigorous growth, with dark green, shining foliage and white flowers with purple centers, which are followed by clusters of edible fruit. An excellent plant for covering arbors, trellises, etc., where a rapid and dense growth is desired. Strong plants, 25c. each, \$2.50 per doz.

CLEMATIS

Henryl. Pure white; extra large.

Alba. White.

Jackmannl. Purple.

Sieboldl. Lavender.

Ville de Lyon. Brilliant carmine-red; as good as Mme. Edouard Andre, but contrary to this one, is very free-growing.

Extra-strong plants, 30c. each, \$2.75 for 10, \$25.00 per 100.

Clematis paniculata. Strong, 2-year-old plants, \$2.00 per doz., \$15.00 per 100.

BIGNONIA (Trumpet Vine)

Radicans. Dark red, orange throat; free-blooming and very hardy. 20c. each, \$2.00 per doz.

ARISTOLOCHIA SIPHO

Dutchman's Pipe. Strong, field-grown, 3 to 4 feet. 35c. each, \$3.25 for 10, \$30.00 per 100.

HONEYSUCKLE

Very extra-strong. Holland field-grown plants. 6 to 8 feet long, many branches.

Halliana. Yellow. \$3.25 for 10, \$30.00 per 100.

HYDRANGEA PANICULATA

GRANDIFLORA

Two-year-old, 3 to 4 branches, bushy. \$1.50 per doz., \$10.00 per 100.

INCARVILLEA

INCARVILLEA Delavayi (Hardy Gloxinia)

The foliage resembles that of the aca-

thus, while the blossoms appear like clusters of pink Gloxinias. Strong roots. 10c. each, 75c. per doz., \$5.00 per 100.

CINNAMON VINE

Large-size bulbs. 60c. per doz., \$3.00 per 100, \$25.00 per 1000.

CALLAS, SPOTTED LEAF

(Richardia albomaculata)

Very free Summer-blooming variety. \$3.00 per 100, \$25.00 per 1000.

HYACINTHUS CANDICANS

HYACINTHUS Candicans (Cups Hyacinth)

Large bulbs, \$1.50 per 100, \$12.00 per 1000.

MADEIRA VINES

Large bulbs, \$1.25 per 100, \$10.00 per 1000.

MONTBRETIA

Crocasmædora. Orange-scarlet. 75c. per 100, \$6.00 per 1000.

Etoile de Fen. Rich scarlet, yellow center. 75c. per 100, \$6.00 per 1000.

Rayon d'Or. Deep yellow, very large. 75c. per 100, \$6.00 per 1000.

Pottel grandiflora. Bright yellow, flushed with red. 75c. per 100, \$6.00 per 1000.

Soleil Couchant. Bright red. 75c. per 100, \$6.00 per 1000.

JAPANESE IRIS

(Iris Kaempferi)

Named varieties, our selection, \$1.25 per doz., \$10.00 per 100, \$75.00 per 1000. 25 at 100 rate, 250 at 1000 rate.

AMARYLLIS

Vittata Hybride. These are grown especially for us and contain a remarkable range of colors from self pure white to darkest crimson, or flaked and striped. These are easily grown. Florists should certainly grow a few of this delightful plant that sells on sight. 40c. each, \$4.00 per doz., \$30.00 per 100.

Belladonna major. \$1.00 per doz., \$7.00 per 100.

Johnsonl (Bermuda Spice Lily). Crimson flowers, white stripes. \$1.75 per doz., \$14.00 per 100.

California Plant Notes

STREPTANTHUS, Jewel-flower, is a species of plants which belongs to the Mustard family, Cruciferae, and is one of the attractive Spring-flowering annuals on this Coast. Its beauty is in the bud stage of development. The sepals are a brilliant purple or black color, and when about ready to open are pendant on pedicels half an inch long. The petals are pointed, curiously twisted, variegated yellow or white with maroon markings, yet not large enough to be conspicuous. The hair splitting discriminations of botanists is something wonderful to contemplate. In the extreme south end of the San Joaquin Valley, is found a variety of this plant with well developed, two-lobed stigmas on the terete seed pods, the only differ-

ence between it and varieties found elsewhere, and because of that fact some one chose to name it Stanfordia Californica.

CASTILLEJA, a member of the Figwort family, Scrophulariaceae. Of this wonderfully brilliant flowering plant three varieties abound in different sections of the State. The plant is a woody herb, 12 to 18 in. high, furnished with persistent, sessile, silvery gray, linear foliage. The flowers are a combination of vermilion-colored bracts, calyces and sepals, while the corolla is yellow though not large. The spikes are three to six inches long, two inches diameter. When landscape gardeners on this Coast have learned to appreciate what has been so abundantly provided for them by a beneficent Creator, plants unsurpassed in beauty by those of any other section of the globe, and that, too, adapted to our

peculiar climate, and use them in beautifying artificial landscapes, which are given them for that purpose, then shall we see beautiful estates, distinctively Californian, which may be maintained in perfect condition, and at comparatively little expense.

MECONOPSIS HETEROPHYLLA, a member of the Poppy family, is never seen in cultivation. Its brilliant salmon-colored flowers, with maroon-colored centers are borne on long stems, and when planted in a mass the effect is gorgeous when they are in bloom. They flower before our California Poppies, Eschscholtzia, and seem to come true to the type which the Eschscholtzia does not.

LUPINUS CHAMISSONIS of various shades of blue, violet, pink and white, and L. arboreus, the yellow, fragrant ape-

cies, are two shrubs which grow to a height of four to ten feet, than which there is nothing more beautiful among shrubs—yet they are never seen in cultivation. We ransack the world for plants and spend time and energy on exotics of doubtful adaptability, and persist in our efforts to compel them to adjust themselves to new conditions and environments, and the result is in very, very many cases, failure; whereas, if we would use native plants and cultivate them with as much assiduity as we do exotics, hundreds of acres of our now desert lands would be the wonder of the world, because of their wealth of flowers. P. D. BARNHART.

AMERICAN ASSOCIATION OF NURSERYMEN
 F. H. Stannard, Ottawa, Kan., President; N. P. Stark, Louisiana, Mo., Vice-President; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., Treasurer.
 35th Annual Convention at Denver, June 8, 9 and 10.

Double-Flowered Ghent Azaleas Though there are numbers of persons who say they prefer single to double flowers, there is no disputing the fact that double ones are more showy and more lasting. For this reason there is a call always for double-flowering shrubs and trees, and at this season, with the many Azaleas in bloom, there is much admiration expressed for the different varieties seen in collections. Ordinary single Azaleas last but a short time in flower, especially when in the full sunshine all day, and it is under such conditions the double ones surpass them. They have endurance in like circumstances, besides having the lasting qualities of all double flowers.

A friend who is interested in double flowers asked recently if such a thing as a double-flowered Rhododendron was known. The writer does not know if there is such; he has never seen one, but is prepared to welcome one when it comes.

A Pruned Purple Beech In the writer's opinion a closely pruned tree is not always handsome, in fact rarely is, a free growth being much more desirable. There are cases, however, where they are quite in place, as well as necessary, as in the example of the pruned Purple Beech of the illustration. This tree stands near a dwelling, and there is not over much room to spare; were it to grow at will, as Beech trees do, it could not be permitted there at all, but in its pruned appearance it is well situated with its surroundings. This tree has reached its present perfect shape after many prunings.

To have such a tree very bushy and perfect it should have two prunings a year; one in June when its growth is still active, another one in September when growth has ceased for the season. The tree photographed shows its condition in late July, after having had one pruning in June. The next one it receives, or should receive, will be to cut back the shoots made since the pruning, so as to leave a uniform, even surface for the interval between September and next June.

When it is not wished to have a clean, even surface through the Winter the tree could be left as it is until next Spring, and then be closely pruned. It is more attractive with the young growth on it, as it is, most everyone would say.

This Beech is the one known as Rivers' Purple, a variety with very dark foliage, and which is propagated by grafting and in other ways, but not from seeds. Seedlings do not produce the deep purple foliage of the Rivers' Purple, and so are often termed Copper Beeches.

Rhododendron Beds The greater number of Rhododendrons planted here, aside from the wild ones, are imported plants. These plants coming to us with balls of black or peaty soil to their roots give the impression that similar soil is necessary to their well doing here, which is not the case. The black soil on those from Holland is largely natural, while the peaty nature of that on English-grown plants is very often due to beds for the plants having been made of this soil from material brought from a distance. All importers are pleased to have them with balls of this soil attached, because it is of a nature that holds together better than any other kind would, and the ball with a plant ensures the life of such plant.

But it is not a fact that similar soil is necessary again. Evidences are all about us of Rhododendrons thriving in our ordinary loamy soil, and there is no reason why they should not. A stiff soil, by which is

meant a clayey one, will not do, because of its proving too hard for the thread-like roots of the plants to penetrate. But ordinary loamy soil offers no such hindrance, roots find their way through it easily and the plants like it; and they like as well plenty of moisture—witness wild ones growing along the sides of creeks with their roots close to the water, but the water must be running freely all the time, for stagnant water will kill them. A half-shaded place is to the liking of these plants as well, the plants appreciating it, and their flowers remaining in perfection a long time.

It is really a question whether catalog makers do not make a mistake in urging such care in the formation of Rhododendron beds as some do, in view of the flourishing condition of many collections of them seen planted in ordinary soil. Some notes appeared in the EXCHANGE, recently, regarding the drying out in Summer of newly set plants of Rhododendrons with the imported balls of soil. It was well urged that these solid balls were so comparatively hard that water did not penetrate them easily, running off instead into the looser soil which connected with the ball. In this way, after a rain, when it might be supposed the plant had been supplied with water, it may have received none at all, all the roots being in the ball. This might be remedied by breaking the ball a little when planting it, and by making the filled in soil surrounding it as firm as possible. Besides this, a free use of water to the roots, for the first Summer at least, would be a good thing.

Pruning Peach and Plum Trees When nurserymen prune young fruit trees they have to consider where their prospective customers reside. The westerners prefer trees branched very low, such trees withstanding the cold winds of Winter better than high-branched ones. On the other hand eastern-

the tree. The Peach needs care in this way, the same as is given to many ornamental trees and shrubs to keep them bushy, then fruit is obtained all over the tree. The Peach need not be grown to as tall a stem as the Apple. It is not a tree such as the Apple is, and it will bear fruit in its lower branches almost as well as on its upper ones. Summer pruning, while growth is active, is the best for the Peach, as the object is mainly to thicken its growth, as when shoots are nipped off at that time the shoots spring out lower down; in this way the tree is full of young wood which will flower and fruit.

Grafting Chestnuts Nurserymen know what a fuss the average customer makes if the trees sent him are not straight. Not all customers are of this class, for many recognize that some trees with uneven trunks give to a place a natural look pleasing to many. Still, the average customer wants them straight, and such trees sell better than others.

Grafted trees and budded ones too can often be started to make an upright growth by care in placing the bud or graft. Noticing some grafted Chestnuts, recently, which were quite crooked from where grafted, an error was quite apparent. The union had been made a little to one side of the stock, and the cion had been cut so that the one bud it contained was on the outside of it, so that when it commenced to grow it went off at an angle, which would not have been the case had the bud been on the inside of it. Because of this way of setting the cion it is rare to see good, straight young trees of these Chestnuts, and it seems to be something those who propagate them should look into. The old cleft grafting, the universal method at one time, generally gave a straight growth. If a graft starts off at an improper angle it should be cut back at once to an eye that would push out in the direction desired.

In the case of weeping trees, a little care, at the start, of the grafts, or of the buds, would often prevent the one-sided growth so often seen. A pinching off of a young shoot to force a growth in another direction from the one it was taking would often start a tree in the direction of good even outline instead of the one-sided specimens far too commonly seen; and that the time spent in doing this would pay many times over there is no manner of doubt.

The Polymorphum Maple in Autumn When lauding the many lovely leaved Japanese Maple little is rarely said of the parent of them all, the Acer polymorphum, the stock on which other varieties are grafted, and which is itself often grown as a lawn bush because of its small, neat foliage. In this respect, as a lawn specimen, it is an admired, large growing shrub all through the season. There is one particular merit it possesses which is seldom referred to—its handsomely colored foliage in late Autumn. It is then of a deep red color, forming as pretty a shrub as any other of the season, and for this alone it should be planted.

Acer ginnala is often planted for its Fall color, and it deserves to be; but the Acer polymorphum has handsomer foliage through the Summer than it, its cut-leaved character being more distinct; still, there is room for both of these small shrubs, for their style of growth is different, the Polymorphum Maple making a round-headed shrub, the Ginnala a more upright one. With those living in the coldest States the Ginnala has further claims because of its very hardy character; it is said to be able to thrive in the cold of Minnesota.

The New Hydrangeas The two new sterile-flowered Hydrangeas which propagators are advertising now—Hydrangea arborescens grandiflora alba, and H. cinerea sterilis, Teas' Snowball Hydrangea—are recognized by all who have seen them to be excellent additions to our lists of Summer blooming shrubs. These are both in what is termed the Snowball type, that is, practically all the flowers have changed from the perfect to the sterile form, carrying with it flowers twice as large as before with correspondingly large heads of flowers. and it is these large white heads of flowers that bedeck the bushes so well in Summer. As these two kinds are quite distinct botanically, and have different foliage, both should be had, as well, too, as the now well-known one, H. paniculata grandiflora, which makes three of these hardy sorts.

The writer has both of the newer ones referred to, and his record of their flowering places H. grandiflora alba a week ahead of Teas' Snowball in opening, but the former has perhaps rather a warmer position than the other, so that there is not much difference in this respect. It seemed, too, that the heads of flowers of grandiflora alba were rather heavier than those of the other, weighting the branches over to some degree, the Teas' Snowball standing more erect. They will be watched again for differences this year, the third season of their flowering.

A good way to plant these Hydrangeas would be in a triangle, the paniculata grandiflora at the back, the others one at each forward point. The first named grows the tallest of the three, and its flower heads are more paniculate than the others.

Pruned Purple Beech

ers would rather have the trees not branched lower than 4 to 5 ft. This allows room to approach close to the tree when necessary and, besides, it is claimed that branches near the ground rarely bear much fruit; it is only after 5 ft. or more up is reached that the branches take on flowers. As to the after pruning of such trees, neither wants more than a judicious use of the knife to give shape and to prevent overcrowding. There is much misconception as to the necessity for such trees receiving annual prunings. A short inspection each year to see that the shape is being maintained, a cutting out of a shoot here, a shortening of one there, is enough with an Apple tree. With the Peach more care is required, for left to itself it is bound to make a tree twiggy at the top, with all below it bare of twigs. Therefore advise a purchaser to prune back the ends of the growing shoots every year, that the side ones may push forth, to produce young wood from the bottom to the top of

SUBSCRIBERS PLEASE NOTE.—The Florists' Exchange is a trade paper, and its advts. quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

Baltimore

Monday morning, May 2, proved a busy day for the local florists. Justice Daniel J. Loden was responsible for the rush. When that gentleman stepped into his little court room to begin his sixth consecutive term as police magistrate of the western district a delightful odor of flowers permeating the room came from an array of beautiful floral gifts. There were a great many tastefully made-up pieces, all nicely arranged. Two of the designs towered high above the rest.

A handsome piece worth mentioning was a harp standing six feet high, composed of hundreds of pink Roses and Carnations and Sweet Peas, with strings of red, white and blue chenille, and backed by a banner of blue silk, representing the American flag; the base was made of Harrisii Lilies, with white Roses and Carnations. Otto Guerth, 735 W. Baltimore st., was the designer and maker of this beautiful piece. Another notable piece was made by J. J. Cummings, and was a large horseshoe, five feet high, made of pure white Roses, Lilies, Carnations and Asparagus.

John McCormick, Old Frederick rd., is erecting a new Chrysanthemum house. He is also giving his large plant a thorough overhauling. He is one of the largest Lily growers in the State.

The next meeting of the Gardeners and Florists' Club will be a "smoker." The members and their friends are urged to be on hand as the occasion will be one of enjoyment. The regular meeting was held last Monday night, but the writer being on the sick list, was unable to give the members any news of the meeting.

Mr. and Mrs. John Cook have returned home in the best of health. Mr. Cook has had an abundance of callers and he enjoys to talk to his old friends of his trip through Florida and Cuba. He expects to make another trip later on. He has completely sold out his My Maryland Rose stock and many orders had to be turned down.

The Flower Garden last week was busy, and showed a nice line of decorative plants. G. F. Lurssen is the able manager.

The Land and Plant Food Co. has disposed of over 75,000 capsules and hundreds of tons of their compost. A large corps of workmen are at work on the large estates treating trees, shrubbery and plants.

The Market

Trade in the past week was fair, and many cut flowers were disposed of. Funeral orders still come in fairly well, and banquets and weddings have been numerous. Mothers' Day, May 8, was well observed and white Carnations became scarce. Other colors were plentiful and sold as low as 25c. a doz. Roses, inside grown, are a little lighter in supply, while outside garden Roses are coming in slowly. Peonies are now on the market, moving slowly at \$1 per doz. Sweet Peas are nearly done for. Bulbous stock is still offered in odds and ends. Pansy plants are selling slowly. Pot plants are still plentiful and move well.

J. F. T.

Branching Ficus elastica

Grown by Fritz Dressel, Weehawken, N. J., see page 825

Dreer's Select Potted Roses

FOR OUTDOOR PLANTING

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

Cockroaches in Plant Houses

These destructive insects belong to the Orthoptera, which also includes the grasshoppers, locusts, crickets, and leaf and stick insects. The common cockroach (*Blatta orientalis*) is familiar to most gardeners. Two other species, namely, *B. australis* and *B. americana*, are also fairly common in plant structures. * * * They feed during the night, and, without exception, are extremely destructive to plants, feeding principally upon the soft tissues of both leaves and flowers. Flowers having a strong perfume, such as Orchids, Eucharis, Crinum, and Hedyclium, are often badly attacked by these pests, while other flowers near by are left unharmed.

The eggs of the cockroach are not laid

separately, but are enclosed in a hard, brown case, usually about a quarter of an inch long. Each case contains about 16 eggs, and is at first carried about by the female, attached to the abdomen by a gummy matter. Later, they are left in dark nooks and crannies, where they remain until the young are hatched. In the adult cockroach the body is flattened; the antennae are long and thread-like.

One of the best means of eradicating these pests from plant houses is to carefully stop up, with cement or mortar, any holes in the walls. Particular attention should be paid to cavities near the hot-water pipes, and especially the holes in the brickwork where the hot-water pipes are carried through, as it is in such warm, dry places that they hide during the daytime. In small houses this method

of dealing with them is far more effective than the use of traps or poisons. In large houses, which afford numerous hiding places, other means of destroying them must be adopted. One of the best means of trapping cockroaches I discovered, quite by accident, in the Palm House, at Kew, some 10 years ago. A bottle of sweet oil, which was used for oiling tools, was accidentally broken one evening, and next morning a portion of the bottle containing a small quantity of the oil was found to be full of cockroaches. After this, a large number of jam jars, each containing a small quantity of oil, were placed about the house, and as many as 76 cockroaches have been found in a single jar. The oil requires to be changed every third day, as it quickly becomes rancid in a warm house,

and unattractive to the pests. The jar should always be placed against a wall or plant, so as to afford a foothold to reach the mouth of the jar. Other cheap and effective baits which may be used in place of, or alternated with, the oil, are treacle and water, and treacle and beer. These also require to be replenished when they become sour.

Among poisons, phosphorus paste, Chase's beetle poison, and Beetle-cure have all been tried frequently, but I have found flowers and foliage attacked when surrounded with these baits. The revolving metal traps are, in my opinion, almost valueless. If a hedgehog is present in a house during the night-time where these pests abound, it will destroy many of them.—C. P. RAFFILL in *The Gardeners' Chronicle*.

CARNATIONS

Strong, clean, well-rooted stock; large Cuttings that will make plants quickly.

Albany, N. Y.

Mothers' Day, May 8, was well observed here, the weather being fine. There was a large sale of white Carnations. Everybody sold out, the demand being a long way ahead of that of 1909.

The florists donated to the Albany Mothers' Club, a society created for the help of sick children, about five hundred Carnations for the purpose of sale, to help the sick and needy.

Preparations for the second annual flower show of the Albany Florists' Club are well under way. At the regular monthly meeting on Thursday, May 5, President F. Goldring appointed a committee of three to take up the details for the show, which is to be held in the Fall; Fred A. Danker, who was chairman last year, was again appointed to fill the same position. It was also decided by a full vote to place a wreath on the Soldiers' monument at the Albany Rural Cemetery on Decoration Day, as a donation from the Club.

John Travison, who has been designer for F. A. Danker for the past two years, has branched out for himself under the firm name of J. A. Travison & Co., on South Pearl st. in our city. He has a well stocked store and everything up-to-date in every way.

Visitors: Mr. Zirkman of M. Rice & Co., Steve Green of Bayersdorfer & Co., and C. A. Ford, all of Philadelphia; J. Karius of H. A. Dreer's Philadelphia.

W. C. K.

Cincinnati

The May Festival was not a howling success, so far as the cut flower business was concerned. A few bunches of American Beauty Roses were presented to the "stars," and Orchids were used by a few, but the market was exceedingly slow, the first time for a long while that we have not been able to sell all the American Beauty Roses that came in.

The demand for Carnations for Mothers' Day, toward the end of the week cleaned up arrivals; white sorts were in greatest demand. The coming week the Federation of Women's Clubs hold their convention in the city, and there should be quite a little decoration for this occasion.

Peonies have not as yet made their appearance in this market, but we are looking for them at any time, as the freeze did not do as much damage as was at first supposed. Of Killarney, My Maryland, and American Beauty Roses the supply is quite equal to the demand, and some good Bride and Bridesmaid are to be had. Smilax is still on the scarce side.

I regret that we have lost one of the good Carnation growers of this part of the country in the person of W. E. Hall of Clyde, O., who was buried on May 6. The supposition was that he was recovering his health, but pneumonia is a hard master to overcome in general. I am sure that, with me, many will extend their sympathies. E. G. GILLET.

New Orleans

The annual dinner tendered to the Horticultural Society and other guests by A. Alot at Rose Villa was this year attended by a great number of gardeners, and, as usual, was a great success. It could not be otherwise with such a genial host and hostess with their son and two daughters, who are only happy when they are making others happy. The Society presented Mr. and Mrs. Alot with a nice tea service, and Mr. Alot with a travelling bag, so that he will have something to remind him of his New Orleans conferees as he travels to Belgium to visit his former home, and the International Horticultural Exposition to be held at Brussels this Summer.

Frank Faessel, who has conducted a successful florist business on Magazine and First sts. for the last twenty years, has removed his greenhouses and stock to Ocean Springs, Miss. Beside doing a local business Mr. Faessel will grow flowers and other stock for shipping. Being so long a retailer himself his knowledge of the requirements of the retail trade will be of great use to him in this branch of the trade, Ocean Springs is a watering place, pleasantly situated on the shores of the Bay of Mississippi, an inlet of the Gulf of Mexico.

Mr. and Mrs. Henry Rehm left for Europe the past week, to be followed shortly by Mr. and Mrs. Matthew Cook and Miss Mabel Cook and later by Henry Reinecke and A. Alot. Quite an unusual number of New Orleans florists are going to Europe this season. CRESCENT CITY.

Death of a Noted Rosarian—Friedrich Harms

The great German rosarian, Friedrich Harms, died suddenly on April 15, 1910. He was born March 3, 1831, in the village of Muchow, Mecklenburg, and from his earliest childhood showed a great love for flowers.

After his apprenticeship he accepted a position in Lübeck, where he developed great skill in Rose grafting. In 1852, Hlnr. Boeckman of Hamburg invited him to take charge of their rosary, and this position was decisive for his subsequent career, as here he gave his attention almost entirely to Rose culture. In 1862 he acquired a garden of his own at Hamburg and devoted himself particularly to the growing of Roses. It was about this time that there was a marked development in Rose culture, and many novelties then appeared which are still unsurpassed today; these, however, were mainly of French origin.

Although Harms' rosaries were at first small, they contained the finest Roses then on the market, and the varieties he sent to the various exhibitions were noteworthy at a time when Germany occupied a secondary place in that culture. The high position it now occu-

pies in this specialty is largely due to the example of Harms. He furthermore led the way in the originating of new varieties. He was one of the first to take in hand the training of young gardeners as Rose specialists; some of the best rosarians of today owe their skill to Harms.

It is not too much to say that Harms was the greatest rosarian Germany has produced. He was not only an authority on the Rose, but he has stimulated its cultivation in Germany as no other grower, by his teachings and example, by the dissemination of the best varieties and his originations, through his exhibits, by lecturing and writing, and by the training he gave his apprentices and assistants. While his own work as a grower was not extraordinary, he was the first in the field—a pioneer. —Moeller's.

Taking Chrysanthemum Buds

Will you kindly tell me the best time to "take" the buds on the following varieties of Chrysanthemum: W. H. Chadwick, Early Snow, Pacific Supreme, W. H. Duckham, Mand Dean, Col. Appleton, Golden Glow, and Cullingfordi.—F. W., Conn.

The following dates would be the most satisfactory for taking the buds of the varieties in question: Pacific Supreme, Sept. 1; Chadwick, Sept. 20 to 25; Mand Dean, Sept. 10; Golden Glow, July 15; Early Snow, July 25 to Aug. 1; Duckham, Sept. 10 to 15; Appleton, Sept. 10; Cullingfordi, Sept. 1 to 5.

It is understood that these dates are for early planted stock, and would be subject to some slight variations according to the condition of the plants. W.

Florists' Hail Association

Secretary John G. Esler of Saddle River, N. J., informs us that the South and the Southwest had a hail innings last week. On May 1 a destructive hailstorm at Wichita, Kan., wiped out 75 per cent. of the glass in that town. Dallas, Tex., and Oklahoma City, Okla., were a good second. Slight losses were also reported from Manhattan, Emporia, Strong City and Lawrence, Kan. In the East, Durham, N. C., had a lively sprinkling of congealed rain. The Florists' Hail Association was hit in all of the above localities.

Among the Growers

Gottfried Marti, Arlington, N. J.

Mr. Marti has concluded to abandon wooden benches, and the Wilson-Hoyt Co., of New York will soon install concrete benches in their place.

Mr. Marti is now growing Callas on benches, but in his opinion more flowers can be obtained from stock in good-sized pots than can be obtained by growing them either in solid beds or on benches. An interchange of opinion upon this point among Calla growers would be interesting. One house is devoted to growing Carnations, and the variety Rose Pink Enchantress has given very satisfactory results this year. Beacon and Victory are grown for reds.

Oscar Verilhac, Arlington, N. J.

For fifteen years one of the specialties grown here has been Otaheite Orange trees. Between one and two thousand are seen here now, just setting their fruit.

Mr. Verilhac succeeds in growing trees which produce by the holidays two dozen or more fruits. A grower recently offered to buy his entire stock, but was refused.

The different varieties of Enchantress Carnations are grown here, and also Victory. It would be very difficult at this season of the year to find Carnation plants elsewhere in such excellent condition. The stock Mr. Verilhac says, has been grown rather cool which he believes to be the proper treatment.

Thousands of bedding plants are grown here for the Arlington Cemetery, among them four thousand *Santolina incana* for bordering. This is a low growing, fragrant little plant, which bears trimming well, with a foliage of the same color as that of the *Cineraria maritima*. The plant is not commonly seen, but seems admirably adapted for edging or carpet bedding.

A specimen was observed here of that rare old plant *Euphorbia splendens*, with its terribly thorny stalks, but beautiful showy, scarlet bracts, which Mr. Verilhac says remain on the plant between two and three months. *Coleus*, *Echeveria* and *Alternanthera* are grown here in large numbers.

E. Jacobi, Irvington, N. J.

The new greenhouse of E. Jacobi, Arlington, N. J., is 135 ft. long by 35 ft. Its side walls are concrete and it has a heavy concrete floor also. There is a deep, thoroughly constructed concrete Mushroom cellar extending under the entire house. In the house is grown a mixed stock, consisting of *Asparagus*, *Smilax*, some very fine *Gladioli America*, and at each iron post at edge of bench some immense plants of *Swainsona galeifolia albiflora* full of bloom. The *Swainsona* is grown under Sweet Peas, and is found very profitable.

A long wing, leading off from the main house, is devoted to the growing of Carnations and Stocks, both of which show good culture and are giving a good cut of flowers.

In the Mushroom cellar are rows of beds with three tiers to each row, one about two feet above the other. Horse manure is turned eight times in the open air during a period of three weeks. It is then put in the beds in the cellar, 7 in. to 8 in. deep, and tamped down moderately. When the temperature falls below 80° the spawn is placed on the manure. In about two weeks, when the spawn starts, about 1 in. to 1½ in. of soil is

put on over the spawn. A crop is ready for cutting, usually, in from four to six weeks; though, if spawn is old, a much longer period may elapse before the crop is ready.

William Holteman has charge of the Mushroom cellar. He uses three kinds of spawn, American Pure Culture, which gives a white Mushroom of medium weight; English spawn, which gives either a white or brown Mushroom of light weight; and Jackson spawn, which gives a heavy Mushroom of yellowish cast. Mr. Holteman prefers the American Pure Culture spawn. Some excellent Mushrooms are now being harvested, gathered twice each day. The temperature of the cellar is kept between 55° and 63°. Summer is the most profitable season, as the prices are then higher because there are fewer Mushrooms in the market, since they cannot at that season be raised under the greenhouse benches, as a temperature of over 70° is destructive to them.

Charles Bird, Arlington, N. J.

The forcing of shrubs into bloom throughout the Winter and Spring is the chief business here, and the range of greenhouses is used for that purpose, and for propagating nursery stock. The shrubs for forcing are grown in Mr. Bird's own nursery about his greenhouses. Among the shrubs forced are flowering Quince, Almond, *Prunus triloba*, *Spiraea prunifolia*, Forsythia, and most of all the different varieties of Apple trees. The Japan Quince begins flowering before Christmas, the rest from January on.

Fifty or more varieties of seedling Apples are grown in the nursery. These are natural hybrids obtained by setting near each other *Malus floribunda* and the late flowering Crab Apples. The latest to flower outside is the beautiful Betchel's Double Flowering Crab, now in bloom. A succession of blooms from early to late is obtained from outside stock.

Such Apple trees as are used for forcing are potted up when small, and shifted on to larger pots until the 8 in. size is reached, in which some specimens 7 ft. tall are growing. These are always kept outside, plunged in the nursery rows, until about the fourth year, when they are taken into the forcing house. Some semi-double seedlings have been obtained, whose blooms are more lasting than the single.

Mr. Bird called attention to fourteen columnar-shaped, Juniper-leaved evergreens, *Abies Juniperoides*, obtained from a single seedling bought from Ribsam & Son of Trenton, N. J., "the only trees of the kind in the world." He is expecting to present one to N. Y. Botanical Garden.

Etherizing the potted shrubs instead of giving them a season of rest, or a freezing, as a preparation to forcing, will probably be tried this Fall. A frame of several hundred *Pæonia officinalis rubra*, over which sash are placed about two weeks before the natural blooming period arrives are now coming into bloom.

Two houses of forced Cauliflowers, just now maturing their beautifully white heads, looked about as toothsome as anything ever seen in the vegetable line.

The interesting fact has been noted by Mr. Bird that such Cauliflowers as are accidentally "kinked" in setting, and their stems partly broken in two, are always the first to mature a head, though the head is usually smaller. As Mr. Bird puts it "when a plant is going to die, it hastens to produce fruit so as to perpetuate itself."

William Tricker, Arlington, N. J.

Mr. Tricker has recently purchased the two and one-half acres which he had been leasing and upon which his old greenhouse range is standing.

Dorothy Perkins Rose—Glohe Form

Grown by Wm. C. Bowditch, Boston, Mass.

A new greenhouse, 100 by 25 ft. is now being completed for him by the Weathered Co. One-half of the middle of this house is occupied by a solid bed with concrete sides, and the other half by a concrete tank 87 ft. by 6 ft. The tank is divided in the center crosswise, one-half of it is 8 in. and the other half 12 in.

This tank will be used for growing stock plants of *Nymphaeas*, *Nelumbiums*, and other Water Lilies. Mr. Tricker is the well-known author of "Water Gardening." His stock plants of *Nymphaeas*, *Nelumbiums*, etc., are now grown in half-barrel tubs. The tender plants have tubers, and are grown in pots set in the tubs of water and kept in the greenhouse till June when they are taken out of doors and kept there till the approach of cold weather. In the tender varieties among the *Nymphaeas* grown here are ten day bloomers and fifteen night bloomers, and eleven varieties of *Nelumbiums*.

The hardy varieties have roots instead of tubers and are grown directly in the muddy soil at the bottom of the tubs of water, which are kept outside the entire year; but in the cold season the tubs are settled in the ground up to the top, boards are laid across, and enough earth is banked over them so that the mud at bottom of tubs will not freeze in the Winter. Thirty-three of the hardy varieties are grown at this establishment.

Just at present Mr. Tricker is giving much of his time to landscape work. He has the contract for that work at the new Lincoln School on Kearney ave., and also is doing contract work for the Shade Tree Commission.

It is Mr. Tricker's intention to devote his land to the growing of hardy herbaceous perennials, not only all the new varieties but especially those which "grandma used to grow," and he already has a large stock.

Some large plots of *Arabis alpina flore plena* are literally snow white with bloom. An interesting feature of the flowers of this hardy plant is that a second bloom grows out of the center of the first bloom. A plot of *Alyssum saxatile compacta flore plena*, with flowers of golden yellow, is equally floriferous and attractive.

There was observed here a *Ligustrum aurea* of a much deeper yellow than the usual type; and a *Vinca*, a sport from *Vinca minor*, with a yellow variegation, both of which plants are being propagated for later distribution.

A *Daphne Genkwa*, with beautiful purple flowers, from Japan, was noted, and some beds of *Phlox divaricata Canadensis*, very floriferous, with lavender colored blooms having a delicate Lilac perfume.

Wm. C. Bowditch, Grove Hall, Boston, Mass.

The establishment of Wm. C. Bowditch is at 647 Warren and 17 to 27 George sts., Grove Hall, a suburb of Boston, about four miles from the State House. This is in the center of a residential district and adjoins the Elm Hill section of Boston. Here is done a general retail and wholesale business in potted plants for Easter and the holidays. The Dorothy Perkins Roses, of which several illustrations are shown herewith, as grown by Mr. Bowditch are potted in the Fall of the year and gradually brought into bloom for Easter. A ready sale has hitherto been found for these plants, both at wholesale and at retail. Those which may not be in bloom in time for Easter are easily disposed of later in the season, while cut sprays of the same come in appropriately for use in funeral work, both in flat sprays and for designs.

House of Dorothy Perkins Rose

Grown by Wm. C. Bowditch, Boston, Mass.

Rochester, N. Y.

Trade in the past week was, generally, good, and the demand fairly equal to the supply, Roses being more plentiful than any other stock. The demand for Sweet Peas has been excellent, but during a week of very damp weather they arrived in a worthless condition probably due to too much moisture; however, with the bright, cool weather that we are having the quantity and quality will no doubt improve and no further trouble of this kind should happen.

Mothers' Day in Rochester, from the standpoint of the retailer, was a dismal failure, the advanced price of Carnations putting a damper on the sentiment of the people; it is said that sales were not at all satisfactory. White Carnations were quoted at 4, 5 and 6 cents and the bulk of them went off at these figures, but some were left over for Monday's sales, though not very many.

The sympathies of the trade are extended to Mr. George F. Crosman of Crosman Bros., in the death of his daughter, who had been ailing for some time. The loss to Mr. Crosman is an

SUBSCRIBERS PLEASE NOTE.—The Florists' Exchange is a trade paper, and its advice, quote wholesale prices. For that reason it should be treated with care. Copies should not be left lying where they will be seen by outsiders, nor should they on any account be used as wrapping or packing material. Further, the fact that a purchaser not in the trade may seek to obtain goods at trade prices by no means compels you to sell him at wholesale.

irreparable one, and he feels it very keenly.

The regular monthly meeting of the Rochester Florists' Association was held Monday evening, May 9, about thirty-five members being present. It was unanimously decided to hold the second annual flower carnival Nov. 1 to 5, and no pains or expense is to be spared to make this year's carnival a greater event even than it was last year. The report of the bowling and sports committee showed that satisfactory progress was being made.

The new Rose, Orleans, being introduced by our genial friend John Charlton, was seen today, and it is a very beautiful thing, a pink with a light center, promising to be everything that is being claimed for it. Mr. Charlton also showed another, Chateau des Closbourgeois, a very dark red, and the Chin Chin China, a Chinese Rose of which more will be heard from later.

H. B. STRINGER.

OAK BLUFFS, MASS.—McGrath Bros. are making extensive alterations to their greenhouses at Waban Park.

Florida, N. Y.

The immense plant of John C. Hatcher, located in the town of Florida, just east of the city, was sold May 10, to John B. Faulkner, for some time a trusted employee of Mr. Hatcher.

Since the erection of the hot houses at Hoffmans, N. Y., and later the opening of a large distributing store in Schenectady, Mr. Hatcher has been slowly assembling his stock at Hoffmans. To conduct both plants has proved impractical as a double force of men was required in some of the work. The transaction includes the entire Florida plant with residence, excepting the upper range of hot houses in which Mr. Hatcher has been raising the finer grades of Roses. This range will be removed to Hoffmans and, when erected, together with the sixteen houses purchased from the Starin estate last Summer, there will be a vast acreage of glass buildings at Hoffmans where it is also the intention of Mr. Hatcher to construct a handsome residence on the sightly hill.

Mr. Faulkner is a thoroughly experienced florist, and his association with

APHINE

is proving a most effective, while at the same time absolutely harmless, Insecticide for use on young stock.

It destroys the insects, and invigorates the plants.

HAVE YOU TRIED IT?

THE AMERICAN CARNATION

Price \$3.00. Send for Sample Pages

A. T. De La Mare Ptg. and Pub. Co., Ltd.,

2 to 8 Duane Street, NEW YORK

Pomona, Cal.

Friends of C. E. Howland, president of the California Rose Co., will regret to hear of an accident befalling him which has confined him to his bed. He was breaking in a colt to drive, and the animal kicked him in the jaw, shattering his mouth considerably. The shock rendered Mr. Howland unconscious and he fell from the cart injuring his hip badly. However, he writes a friend in a hopeful tone and hoped to be about a little in ten days or so.

New Bedford, Mass.

There has been a good call for flowers the past week. There seemed to be a marked demand for white Carnations, which are awfully scarce just now; the supply last Saturday was not equal to the demand for Mothers' Day, Sunday, May 8. As a general rule most of the customers wanted white flowers on this occasion. Carnations, at the last report, were selling at 50c. and 60c. per dozen. Roses of very good quality sell at \$1.50 per doz., Sweet Peas at \$1 per 100 blooms; Lilies at \$2 per doz.; Snapdragons at \$1 per doz.

Funeral work is good. There is a scarcity of good pot Ferns in this city. Lots of calls come in for good Ferns, in 5-in., 6-in. and 7-in. pots.

Peter Murray has just finished a big job down the bay, at Cuttyhunk, for a Mr. Wood of Lawrence, Mass. He has big gangs of men on gardening work. Seeds for the children's garden contest in this city are all given out. Great interest is being taken in this contest, and some of the showings already are very creditable to the children.

S. S. Peckham has about 10,000 Geraniums, which will be all right for Memorial Day. R. H. Woodhouse has about 15,000 of them, besides an immense lot of other bedding plants. Pansies and Daisies are still selling well.

The past week has been very cloudy, a condition which has shortened the supply of flowers somewhat. Indications just now are that Lilac will be about all gone by Memorial Day if we should happen to have very warm weather.

Some of the growers are getting ready to plant their young Carnations in the field.

Hardy Ferns are scarce here just now. This year has been somewhat difficult in timing Ten-week Stocks just right.

HORTICO.

Washington, D.C.

Under the auspices of the People's Garden Association, of which David G. Fairchild is president, a new movement was started on May 6, which not only bids fair to become popular but universal. This organization, recently formed, as noted in the columns of the EXCHANGE in extending its work on the above date, with spades and trowels, started out to beautify the byways and hedges, so to speak, about the National Capital.

Every one having an auto was invited to participate. Seeds of all kinds that would succeed in beautifying the various roads were planted.

Thus far the Loughboro, Tunlaw, Conduit, Broad Branch, Woodley lane, Belt, Pierce Mill, and Grant roads have been planted, also Mass ave. extended. The work is to continue until each and every road has received its allotment of seeds and, by Fall, it is expected that the entire District of Columbia will have been greatly beautified.

Sunday, May 8, was celebrated as "Mothers' Day," everyone wearing a white Carnation. Notwithstanding much preparation, before noon the supply of white Carnations was exhausted, and many were compelled to use other flowers. Next to the Carnation the White Daisy received preference.

John H. Davis of the Chain Bridge road, D. C., has a clump of Adiantum cuneatum which is most remarkable in having stood outside all the past Winter where the temperature, Mr. Davis thinks, fell as low as 12°. The only cover of any kind was a slight tuft of dry Grass. For years Mr. Davis has grown Maiden-hair Fern in a cool house which, no doubt caused the plant mentioned to become somewhat acclimated; at present it is making good growth.

John Robertson is again preparing to move from his store at 1510 H. st. N. W., owing to his having been notified of changes to be made in the building. Mr. Robertson is at present undecided as to whether or not he will reopen prior to next Fall.

JAS. L. CARBERRY.

Bedding Stock a Specialty

GERANIUMS, out of 4-in. pots, in bud and bloom. S. A. Nutt, Poltevine, Castellane, La Favorite, Buchner, Doyle and Gloire de France, at \$5.00 per 100, or \$50.00 per 1000.

The Florists' Exchange No. 2 Duane St. New York

St. Louis

Mr. and Mrs. Loveridge of Peoria, Ill., were in the city a few days last week. Mr. Loveridge consigns to this market.

B. J. Wedderburn of Rockford, Ill., was a visitor last week passing through on his way to Memphis, Tenn.

The Retail Florists' Association, through its secretary, F. C. Weber, Jr., is sending out letters to the retailers, asking co-operation on behalf of the Association, also asking for suggestions as to the best plan for the Association to work on to prevent a certain wholesaler from selling at retail. These suggestions are to be heard at its next meeting.

The committee on the Florists' Bulletin was called for a meeting at Smith's last week by its chairman, Mr. C. De-wever, but only a few responded, and it was decided to postpone this matter until such a time as the growers are not so busy.

Dr. A. S. Halsted, who is the head of the St. Clair Floral Co., Belleville, Ill., spent a day in the city last week and says the company has one of the largest weddings of the year to furnish this week; also that his son Astor is the proud father of a big boy.

The Ladies Florists' Home Circle met on Monday afternoon, with a fair attendance; Mrs. Fred H. Meinhardt was the entertainer. The next meeting takes place on Monday afternoon, June 13.

The retail trade all over the city reports that Mothers' Day on Sunday, May 8, was not a great success; the weather was cold and rainy all day long and those who laid in a big supply and had no funeral work on hand, got badly left.

The wire shops of C. A. Kuehn and Smith & Co. have been very busy of late with wirework of all kinds, especially so with hanging baskets for both local and shipping trade.

Charlie Connor, who has had charge of his brother John's cut flower department for the last six weeks, is busy with funeral work; their Webster plant could not furnish enough cut stock for their work.

The Bentzen Floral Co. on Grand ave. had two 10 ft. broken columns to make Sunday, May 8, with large anchors at their base. Funeral work has been heavy with them of late.

The Engelmann Botanical Club held their regular monthly meeting, in the Botanical Laboratory of the Central High School on Grand ave., at 8 p.m. The feature of the meeting was a paper by Dr. George T. Moore, professor of plant physiology of the Henry Shaw School, on "Life in the Soil." The meetings are open to the public, and especially those in the trade are invited to attend. ST. PATRICK.

Indianapolis

Flower show matters were the principal topics at this month's meeting of the State Florists' Association. The flower show proposition was thoroughly discussed, and given over to a committee for consideration. Among those present at the meeting were Fred Lemon, Chas. Knopf, G. Gause, Earl Mann of Richmond, Ind.; J. S. Stewart and J. A. E. Haugh of Anderson, Ind.; W. W. Coles of Kokomo, Ind. The meeting was held at the Elk's Club rooms, and was attended by some thirty members who enjoyed a most pleasant evening. I. B.

Hail Damages

A hailstorm which florists in Wichita, Kansas, experienced May 1, resulted in much damage to the greenhouses there. Practically every greenhouse in the city suffered. G. R. Bixby suffered a loss of about \$1200 on his house and \$750 on the plants contained in the same. A. T. Buckridge sustained a \$500 loss, besides serious damage to his stock. W. H. Culp & Sons suffered about \$2000 loss, equally divided between glass and stock. D. S. Hersey lost about 90% of his glass. At the Kuechenmeister establishment, the glass loss will amount to \$3000, with a plant loss of about \$2000. The damage to C. P. Mueller's establishment will approximate a figure between \$2000 and \$5000.

At Lancaster, Pa., the greenhouses of Wm. A. Heren, at 6th and Chestnut sts., were damaged considerably by hail recently.

WICHITA, KANS.—D. B. Cain & Co. are now the proprietors of the greenhouse at 1621 Fairview ave., formerly belonging to A. T. Buckenridge.

WE call special attention to our large stock of **FERNS**, in all the leading varieties. We particularly mention **NEPHROLEPIS SCHOLZELI** and **NEPHROLEPIS COMPACTA**, both of which are exceptionally fine varieties for growing on.

Neph. Scholzei

3 1/4-in. pots, strong plants...\$8.00 per 100; \$76.00 per 1000

THE AMERICAN CARNATION

Price, \$3.50

A. T. De la Mare Plg. and Pub. Co. Ltd., N. Y.

Prices Advertised in these Columns are for THE TRADE ONLY

FOUNDED IN 1888

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the Trade in General.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter.

Published every Saturday by the A. T. De La Mare Ptg. and Pub. Co., Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. De La Mare, president and managing editor; Jas. H. Griffith, secretary; David Touzeau, treasurer. The address of the offices is the address of this paper. Short address: P. O. Box 1697, New York. Telephone 3765-6 Beekman

PRINCIPAL OFFICES

Chicago: Margaret T. Flint, room 614, No. 60 Wabash Avenue; tel. Randolph 2000. Office hours: 9:30 to 12. Boston: Robert Cameron, Cambridge, Mass.

Philadelphia: Appointments can be made or letters addressed to Jos. H. Speery, our representative care of Keystone Hotel, Market st., near 16th, for Mondays and Tuesdays.

Yearly Subscriptions.—United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.60. Payable in advance. Remit by Draft on New York, Post Office or Express Money Orders; if paid in cash please register letter.

The address label indicates the date when subscription expires and is our only receipt therefor.

Registered Cable Address: Florex, Newyork.

American Peony Society

The 1910 meeting of the American Peony Society will be held at Horticultural Hall, 300 Mass. ave., Boston, Mass., in connection with the regular Peony show of the Massachusetts Horticultural Society, Thursday and Friday, June 9 and 10. A. H. FEWKES, Secretary.

This date is subject to change if weather conditions require.

New Rose Grand Duke of Baden

Rose Grossherzog von Baden (Grand Duke of Badeu). Tea hybrid Mme. Caroline Testout × Meta.—Desiring to obtain an improved Testout, somewhat more elongated in form, with a richer color and more pronounced perfume, P. Lambert of Trier, Germany, selected the fine Rose Meta for the parent plant with which to fertilize Testout, and the seedling which sprang from this combination, Grand Duke of Baden, comes close to the result he strove for. While neither the bud nor the flower, nor even the shoots, are as large as those of Testout, the bud of Grand Duke is more pointed, the flower, when fully open, is more double, and the color is brighter; the delicate carmine pink derived from Testout is enlivened by the reddish yellow tints derived from Meta, a combination of hues that is altogether charming in effect. The perfume is strong and sweet. The flowers develop slowly but evenly, and will keep for a long time when cut, 6 to 10 days without fading. The habit of the plant is compact, bushy and even; it is hardy and healthy, is easily forced, and a very free bloomer. At the Fall Rose show in Mannheim, it received first prize as the best novelty.—*Rosenzeitung*.

S. A. F. 1910 Convention Notes

C. H. Vick, superintendent of the trade exhibition, reports very satisfactory progress in the arrangements being made for the coming convention of the S. A. F. Orders for space are coming in rapidly and keen interest is being evidenced by all the concerns through the country. We are assured of having the hall filled to the utmost capacity. Work on the souvenir album is also going on and a production of the first rank is assured. The illustrations in the album will be entirely new and there is no doubt that when completed it will reflect great credit on Rochester, and those in charge of its publication.

Prospective exhibitors are again reminded that space is going fast and the sooner they reserve their requirements the better it will be for all concerned. No fears need be entertained of overcrowding or being put away in one corner, as Convention Hall is specially adapted for this purpose and is equal to all requirements.

The bowling contest will be held in the Grand Central Alleys. These are acknowledged to be the best in the city. Mr. Odenbach, the proprietor, has offered a silver cup for the successful team.

The shooting matches will take place at the Riverside Gun Club, South Park. This park is one of great natural beauty and we are indeed fortunate in being able to secure these grounds for the shooting contests.

H. B. STRINGER, Secretary Rochester Association.

Readers' Views

Experiences with New Dahlias of European Origin

Editor The Florists' Exchange:

I am anxious to reply to an article of yours appearing in your last issue, believing I can interest a great many of the florists who are trying out new things, particularly Dahlias. From time to time I find horticultural papers, either in Europe or this country, announcing, with large headlines, wonderful novelties of Dahlias originating in Europe. An experience which has cost my employer a fairly good sum of money enables me to give some good advice to those who, like myself, grow extremely enthusiastic with descriptions of novelties, and only find, after going to the expense of procuring them and growing them, that all their hopes are dashed to pieces. This particularly holds good as regards Dahlias of German origin; not that I would claim or wish to infer that the descriptions of these novelties are exaggerated by the introducers, because the actual photos show that they justify the descriptions, but the vast difference in climate certainly has a wonderful effect upon these novelties in America.

No one would be more willing to give credit to German productions than I am, but my trials have never satisfied my expectations in that line. Among several hundreds of German Dahlias I can pick out not more than one dozen which have stood the test, and which should be in every collection of Dahlias. Foremost in this list I place the Cactus Dahlia Aurora, which in my mind is one of the peers of the Cactus Dahlias. Thea follows Kriemhilde, which has made wonderful success in certain parts of the country. In the East we have no use for it, because it flowers so late and sparingly.

Next follows the variety Lawine, a Cactus of a pure white color, which today is unequaled among white Cactus Dahlias for free-flowering habit and good stems. Another Cactus of German origin is Dasmärchen, a flower of beautiful formation, and of a delicate pink color. Flieder is another good German creation, being the most distinctly colored Cactus Dahlia I know of; a soft delicate lilac.

The freest yellow Cactus Dahlia to my knowledge is Goldkind, also of German origin. The Dahlia Wunderkind does well only in certain locations.

Credit must be given to the German growers for the introduction of the dwarf Cactus Dahlia, which has a great future before it, as it can be used with telling effect in landscape gardens and is a sheet of color during the whole season and needs no staking.

Among the Decorative Dahlias there is one Dahlia which for the florists cannot be equalled. This variety is the white blooming sort called Kaiserin Augusta Victoria.

Although the Hollanders may claim to be the originators of the Peony-flowered Dahlias, I am positive it was such German growers as Pfitzer who brought this type forward and who catalogued it before the Holland growers ever thought of it. Among these German introductions of Peony-flowered Dahlias there are several which not only equal but far excel the Hollanders' introductions. A variety which should be grown by florists for a money maker is called Anna Sutter. This is of dwarf, sturdy growth, carries its flowers on erect stems and its flowers are of the most refined form that could possibly be desired. The color is a clear yellow. It flowers freely and is a good shipper. Another fine Peony-flowered Dahlia, of German origin, which in my estimation equals in form or color some of the prettiest Orchids, is called Philadelphia. The petals are more of the Cactus form, but very long, and there are but two or three rows of them. The color is a combination of deep pink and white, and the flowers are borne in great bunches and lend themselves excellently for table decorations or basket work.

All the varieties I have enumerated are selections of over a thousand sorts and introductions of Dahlias of ten years' duration; so one can readily see that the percentage of good things is exceedingly small.

Among last year's introductions, of which I had not less than seventy-five, I have not been able to select a single one that showed superior quality. New Dahlias as a rule are quite expensive, and it means a considerable expense to get this education; it is therefore wise for any florist to rely upon the American grower for his selections. For it is the American grower who has had the expense of obtaining this knowledge, and is willing to give the American florists the result of his experience.

Boston, Mass.

MAURICE FULD.

[As in America so in Europe there are novelties originating by scores every year. Of the foreigners we mention those only which are given the most prominence in European trade papers—we must not be understood as recommending them. As admitted by Mr. Fuld some of the foreign sorts have done well here.—Ed.]

Privet in Nebraska

Editor The Florists' Exchange:

Here, at the York experiment station, for years we have been testing the various kinds of ornamental shrubs

to find something suitable for hedges. We have tried the silver-edged Privet from France and it is beautiful as it first opens, but under the influence of our hot sun and dry air the silver will revert to the green and never appear again. The Ithya variety is regarded as the hardest of all. With us it is the tenderest and utterly worthless—just fit for the brush pile. Some, in a sheltered place, managed to grow 8 ft. tall, but were killed to the ground last Winter. Many things that can resist the cold cannot endure our dry Winters. Hanson's Sunbeam Raspberry, so popular all through the North and hardy without protection in Manitoba, kills to the ground every Winter in Nebraska. Regelianum is fairly hardy. It is not suitable for hedges, but is fine as an individual specimen, very attractive with its sweet white bloom and rich clusters of purple berries. The vulgaris is tender. The California Privet—from Japan—is in great demand. One of its attractions is that it keeps green a long time in the Fall, but it kills down badly.

As tested year by year, the Golden Privet is by far the hardest of all. I suppose this is a sport of the California variety. It is beautiful for hedges or as an individual. On a cloudy day it looks as if a streak of sunshine lay along the hedge. This is rare, you find it in only a few price lists, but it is easily propagated, both by divisions and cuttings. This variety has a future, and must be in great demand.

Next hardest is the Swedish Privet, which for 20 years has been so popular in Colorado, especially at Boulder, where you will find it in beautiful hedges. Sometimes it is trimmed to resemble posts and gateways.

York, Neb.

C. S. HARRISON.

Help Wanted—As One Man Sees It

Editor The Florists' Exchange:

Your editorial, "Help Wanted," is very good as far as it goes. Suppose that the employers were willing to train help. Could they get it? I think not! What father will let his son go to a trade that works 58 to 60 hours a week (saying nothing of overtime and Sundays) and after ten years' experience, he can get from \$12 to \$15 a week, when there are lots of other trades (where good men are just as scarce) that only have a 48-hour week, pay from \$20 to \$25 a week. Raise the wages to the level of other trades and they'll get the men.

ONE OF THE HELP.

The Commercial Definition of a Seedling

Editor The Florists' Exchange:

As it appears to the trade here the definition of a seedling, as rated commercially, is and will be just what the U. S. Customs authorities choose to make it. The broad question of when a plant passes from its infancy into a higher stage cannot be defined, except by years, for convenience sake for, as a matter of fact, a plant raised from seed and not perpetuated by artificial means, can never be anything but a seedling.

No rule can be made which would cover all plants. Take a Dahlia, for instance; it could not be considered a seedling after its first year, while an orchid unfloored would still be considered a seedling after many years.

Newport, R. I.

ALEX. MACLELLAN.

William E. Hall

Wm. E. Hall, son of Ezra and Nancy Hall, was born May 18, 1857, and passed away at his home on Piety Hill, Clyde, Ohio, Tuesday, May 3, 1910, at 8.25 p.m. He was nearly fifty-three years of age. His severe illness of four weeks' duration was due to a relapse after having a siege of the grip. Mr. Hall was born and raised in Clyde where he had spent all of his life. He was married to Eva Stark, June 17, 1885. To this union were born six children: four sons, Eugene, Breese, Lloyd and Frank, and two daughters, Amy and Lulu, who, with the sorrowing wife and mother are left to mourn the loss of a loving husband and father. He also leaves an aged father, Ezra Hall who, thirty years ago, started in the florist and gardening business here. Ezra Hall retired in 1898 and the business had since been carried on by his son, William, in a most proper manner; in latter years he has been assisted by his sons, Eugene and Breese. Mr. Hall had gained a wide reputation and was well known and highly respected by the community at large. Funeral services were held on May 6. Interment was in McPherson Cemetery. Among the florists in attendance from out of town were Messrs. Geo. Bayer and Krueger of Toledo and Isaac Hushards of Bellevue, O.

Mr. Hall was a member of the S. A. F. and O. H., the American Carnation Society, the Toledo Florists' Club and the Independent Order of Florists.

Henry C. Eickhoff

Henry C. Eickhoff, a well-known nurseryman of Indiana died at his home on the Michigan road, near Indianapolis, on April 29. The deceased was born June 9, 1853, on the farm where since his twentieth year he carried on the nursery business, originally in partnership with his brother Edward A., but later in his own name. He leaves a widow and eight children, five girls and three boys.

The Club Outing

H. A. Banyard, chairman of the outing committee, reported that his committee had arranged that the annual outing of the Club should take place on Tuesday, June 28. The committee had had a meeting that day and arranged some of the details. The price of tickets would be the same as last year: \$5 for tickets admitting a lady and gentleman; \$3.50 for gentlemen's single tickets, ladies' tickets \$2, and tickets for children \$1. A souvenir program would be issued similar to the one of last year and members whose portraits did not appear in last year's issue should send their photographs to the secretary at once. The steamer Isabel has been chartered for the occasion, Witzel's Point View Grove being the objective point of the excursion.

The Hitchings Cup of Merit

W. E. Marshall of the exhibition committee made the following report:

The exhibition committee recommends that the Club offer the cup presented by Hitchings & Co. for competition at the Club's monthly meetings, commencing with the June meeting and ending with the December meeting of this year, said cup to be known as the "Hitchings Cup of Merit" and to be awarded to the exhibitor scoring the greatest number of points during the next five meetings, and to be presented to the winner at the first meeting of next year. The terms of the competition should be as follows:

1. Competition open for plants and cut flowers only.
2. One hundred points to be the maximum number allowed for any one exhibit; quality alone to count.
3. The same variety cannot score more than once in any competitive season.
4. The number of cut flowers required should be as follows: Carnations, not less than 25 blooms; Roses, not less than 25 blooms; Gladioli, not less than 25 blooms; Chrysanthemums, not less than 10 blooms; Chrysanthemums, Pompon, not less than 12 sprays; Stocks, not less than 12 sprays; Snapdragons, not less than 12 sprays; Dahlias, not less than 12 sprays; Sweet Peas, 5 bunches of 12 in bunch or more; Peonies, not less than 10 blooms, and Violets, not less than 100 blooms. Other blooms not specified to be in like proportion.
5. Novelties entered for certificate not entitled to competition.

The committee further recommends that the cup, if offered by Hitchings & Co. annually, should be competed for in the same way as before, but competition should commence with the January meetings and continue each month until the end of each year, the cup to be presented to the respective winners at the first meeting of each year.

Judge Vesey. Professor John Craig of Cornell University, Ithaca, N. Y., then made an address on "Some Phases of Experimental Work in Relation to Floriculture."

Some Phases of Experimental Work in Relation to Floriculture

The address was, in part, as follows: "On the occasion of your annual dinner, I made some small attempt to bring to your notice some of the work which we are doing at Ithaca along floricultural lines. It was not my intention to present, at that time, a serious address, and not being blessed with the versatile ability of the gentleman who presided so ably that evening, I deemed discretion wiser than valor and faded away. Tonight you are at my mercy because if you escape from this hall, you will be detained in the ante-room. Unfortunately, I did not have time—because we think ourselves rather busy at the college just now—to prepare a set address and there is a good deal of danger from the garrulity of unpreparedness, one is not always able to recognize the proper stopping place; but I will call the attention of those of you who are interested in floriculture as a life work to some of the lines we are trying to throw more light upon.

"Floriculture in this country, as one sees it, differs in a marked degree from floriculture in the older countries of Europe, particularly in the fact that here it is a distinctly commercial industry and in the old countries an amateur feature clings around it. Our amateurs will increase in number, of course. As countries grow old, cultural ideas develop, and floriculture is a fine art and appeals to cultured people, so that larger interests will center upon it and we may expect the amateurs will increase in number.

New York State Leads All in Floriculture

In this State, floriculture occupies a very proud position. The Empire State leads in a number of agricultural industries. It is rather surprising, as compared with the great agricultural States, how New York stands forth. When we hear of the corn, the wheat, the hog and beef States, we are apt to think of them as leading. In the finer products New York stands first, and in floriculture she leads; in her nursery interests, also in the vegetable industry she leads, and she would lead in the fruit industry were we to eliminate the California interests. We, as horticulturists, should realize the position we occupy. The State has done a good deal to foster our interests. In 1905, she established a college of agriculture at Cornell. Previous to this, the Federal government established a Federal station. Now, Federal experimental establishments are to be found in every State in the Union. The Federal government provides only for the carrying on of experiments, providing no building equipment. If any line of work requires building equipment, such building must be taken care of by the State. That is where floriculture has lost out.

The agriculturists of the country said their industry demanded certain care and attention, and got money from the State. The florists have been rather modest. They have not, thus far, said to the State that their industry has many problems which should be solved, and, therefore, there has been no call upon the State in the direction of solving them. I do not mean to say that no experiments have been carried on for the floricultural interests. Our work has been divided into two parts. With a very small and meagre equipment of glass we attempt to carry on some work, but our main experiments have been directed in the field type, the one in which we could use Federal money. In this field work the great floricultural products, such as Carnations and Chrysanthemums, have to be left out, but Asters, Peonies and Sweet Peas have been prominent.

Cornell Station and the Peony

The efforts we have been making in the direction of Peonies have been most noted. The American Peony Society was organized sometime ago for the promotion of the Peony, and its directorate met with the directors of Cornell University and asked if we could co-operate. The Society, on its part, furnished plants; we, on our part, provided ground and labor. So we came together. We now have 1600 varieties, so-called, of Peonies. The first step in our work was to find out all the varieties of Peonies which were listed, here, there and everywhere, and one man worked on that side of the question continuously, delving through every scrap of literature, and wherever he found a name he put it down, with reference, and subsequent reference was given to these names. That work resulted in a check list of Peonies containing the correct names, as far as spelling was concerned, as applied to Peonies. The next step was the study of the varieties on the grounds of Cornell, and the best collections available in the country elsewhere. The list resulted in the publication of a second report, which took up the classification and added over 75 varieties which were thought authentic. This work stands at the present time in the process of a third report which will include about 200 additional varieties, all of which we have, to the best of our knowledge, put in shape with complete descriptions. We publish two lists, one which grades the varieties, and the other which furnishes technical description and which goes into detail. Our new publication will be out within about

The Late Baron Schroder, C.V.O., V.M.H.

From The Gardeners' Chronicle, Eng.

Baron Sir Henry Schröder, C.V.O., V.M.H.

Baron Schröder, C.V.O., V.M.H., head of the banking firm of J. H. Schröder & Co., London, England, and in private life a well-known orchidist, died, April 21, at the age of 85. His ancestors were among the leading merchants of Hamburg, and the family had been naturalized in England since 1864. At his country seat at Egham, Surrey, he devoted much time and attention to his Orchids. His collection was the oldest in England and rich both in species and hybrids, many plants in it being original and historical.

A large number of Orchids have been named after Baron Schröder, these, with the rarities in his collection making too long a list to mention here. He was for many years an active member of the council of the Royal Horticultural Society, and largely through his generosity and efforts the Royal Horticultural Hall was built; in fact, he was known as the "Father of the Hall." All Orchid lovers will regret his death.

Brilliant Red Dahlia Giant of Stuttgart

Riese von Stuttgart (Giant of Stuttgart) is a novelty by Wilhelm Pfitzer of Stuttgart, Germany, which is considered the largest-flowered among the brilliant red Dahlias. The flowers measure nearly eight inches across, and rise well above the fine foliage. This novelty has created a sensation in Germany.—*Bindekunst*.

New York Florists' Club

The regular monthly meeting of the New York Florists' Club was held in the Club's rooms, Grand Opera House Building, 23d st. and 8th ave., on Monday evening, May 9, with a fair attendance of members. President Miller occupied the chair.

The New Plant and Flower Market

W. H. Siebrecht, Jr., secretary of the joint committees having in charge the project for a plant and flower market under the Queensboro Bridge, reported that the matter was now in the hands of the comptroller and would be shortly brought before the board of aldermen, thence going before the board of estimate for an appropriation. The comptroller had reported favorably upon it and the bridge commissioner was in accord with the project.

On motion of Patrick O'Mara the report of the committee was adopted.

Walter F. Sheridan, for the essay committee, announced that George V. Nash, of the New York Botanical Garden, would, at the next meeting, give an illustrated lecture entitled "On Horseback Through Hayti."

The following were elected to membership: J. W. Merritt, 384 Jay st.; J. Ebb Weir, Fifth ave. and 25th st., and E. W. Wiles, 812 Ocean Parkway, all of Brooklyn, N. Y.; and T. Mellstrom, 235 Broadway, New York.

J. H. Pepper, for the committee having in charge the preparation of a memorial on the death of Mrs. W. J. Vesey, Fort Wayne, Ind., read resolutions which were, on motion, accepted and a copy ordered to be sent to

Article III—Continued

Distance Between the Houses

In planning for the erection of separate houses, the question of how far one house should be built away from the other so as to avoid the shadow of the ridge of one house falling on the side glass of the next house naturally arises. This, of course, very largely depends upon the height of the ridge, which is governed by the width of the house and pitch of the roof, in addition to the height of the eaves.

In planning for the future, with a piece of land of a given size the distance the houses should be apart is a matter which should be decided at the outset, and to enable a prospective builder to decide this question intelligently the diagram shown in Fig. 19 is constructed. This diagram shows the shadow line that many greenhouse builders have used in the construction and erection of greenhouses between Philadelphia and Boston, and other places to the west in the same latitude, and, while it is not correct for all uses, it has been found sufficiently close for practical purposes, and it is given at this time so that intending builders within these latitudes may have it for quick reference. For other places, outside of these latitudes, and where other shadow lines are desired, a supplemental diagram is furnished, Fig. 22.

The diagram, Fig. 19, is used as follows. First, determine the height of the ridge of the proposed house. Assuming that it is the intention to build a house 30 ft. wide, with the eaves 6 ft. high, the roof being constructed on a pitch of 7 in. to the foot, to find the distance of the ridge above the eaves take one-half of the width of the house, which is 15 ft., and multiply this by 7 in., which equals 105 in. or 8 ft. 9 in., the vertical distance from the line of the eave plates to the ridge. To this should be added the height of the eaves above grade, which is 6 ft., thus making a total of 14 ft. 9 in., which is the height of the ridge above line. The figures to the left of the diagram (Fig. 19) indicate the various heights of the ridge above grade up to 30 ft. high, each of the squares being equal to one square foot. Thus, for a ridge 14 ft. 9 in. high, go up the column on the left hand side of diagram to figure 10 and then count four squares farther up, and three-quarters of the next square, the whole equalling 14 ft. 9 in., the height of

the ridge above grade. Draw a line from this 14 ft. 9 in. point over to the right, until it strikes the diagonal line of the sun's rays AB, and from this point trace a line downward to the line at the bottom of the diagram, and it will be found that it comes to a point about 31 ft. 6 in. from the point B at the toe of diagram, or where the line of the sun's rays, AB, strikes the bottom or grade line. Each of the squares along this line are also equal to one square foot. If the height of the sill of the future house will be 2 ft. 6 in. above grade, which is the usual height, it would be the same height as the dotted line C which crosses the shadow line, AB, just 5 ft. from the point B along the bottom or grade line. Therefore, subtracting 5 ft. from 31 ft. 6 in. gives us 26 ft. 6 in., the distance required between the center of the ridge of the contemplated house and the side of the future house, and assuming that this ridge is placed in the center of the 30 ft. house it would mean there would have to be a space of 11 ft. 6 in. between the two houses, so that the shadow from the ridge would strike the future house at the sill line when the sun was at an altitude of 25°.

If the house was made 40 ft. wide, with the ridge in the center and 8 ft. high eaves, the roof of the house being constructed on a pitch of 7 in. to the foot, it would make the height of the ridge 19 ft. 8 in., and by tracing up the column at the left side of the diagram to one-third of a square below 20 ft. it would be just 19 ft. 8 in.; tracing this line over the right until it strikes the diagonal line of the sun's rays, AB, we find that the

This Diagram Shows How Far Houses Should be Set Apart to Avoid Shadow, the Pitch of House Having Already Been Determined

downward line from this point strikes the bottom line of the diagram at a point 42 ft. 6 in. from the point B; and assuming the same height of sill, 2 ft. 6 in., in the future house, it would mean that the side of such house would have to be set 37 ft. 6 in. away from the center of the ridge, which in the case of a 40 ft. even span house would mean that there would have to be a space of 17 ft. 6 in. between the sides of the two houses to avoid the shadow of the ridge falling on the side glass of the future house. To further explain and illustrate the use of this diagram see Figs. 20 and 21.

Fig. 20 shows two even span 20 ft. wide houses with eaves 5 ft. above grade. The roof being built on a pitch of 7 in. to the foot would make the height of the ridge 10 ft. 10 in., which, according to the diagram, shows that the center of the ridge of one house should be 18 ft. away from the side of the next house, or 8 ft. between the houses.

Fig. 21 shows two three-quarter span houses 20 ft. wide, the eaves on the south side 5 ft. from the grade line. The center of the ridge is placed 13 ft. 3 in. from the south wall and the pitch of the south side of the house is 7 in. to the foot, making the ridge 12 ft. 9 in. high.

According to Fig. 19 the center of the ridge of the south house should be about 22 ft. away from the side of the north house, which would make the distance between the two houses 15 ft. 3 in.

As before stated, the diagram Fig. 19 shows the

shadow line which has been used in connection with the erection of greenhouse work in places between the latitudes of Philadelphia and Boston, but it is very apparent that it cannot be correct for all the area included within these lines, although for the purpose intended it is close enough. However, for the benefit of growers purposing building outside of these latitudes, and also for those who desire a more correct shadow line, we present diagram Fig. 22. This shows the shadows caused by the sun's rays at an altitude from 10° to 80°. In this diagram the columns A, B, C give the degrees of the sun's altitude. Column DE gives the height of the greenhouse or other object casting shadow. Column EF gives the required distance away to avoid shadow.

This diagram may be used in the same way as described for Fig. 19, each of the horizontal and vertical squares being made to represent one square foot; or, if necessary, they can be considered as representing two feet or five feet, but as shown in the diagram they are figured on the basis of being equal to one foot. This diagram will be found useful, not alone in deciding the shadow line on various days during the year for the dif-

ferent heights and widths of greenhouses, but also because in case there should be on a certain piece of property a building or clump of trees, and it is desired to know at what distance to place a greenhouse so as to avoid the shadow from such obstruction, all that will be necessary will be to find the height of the building or tree and decide at what altitude of the sun it is desired to avoid the shadow, then proceed in accordance with the directions given for diagram Fig. 19. Presuming there is a clump of trees 35 ft. high and it is desired to place a greenhouse so as to clear the shadow of these trees when the sun's altitude is 25°, go up column DE, to the left of diagram, to the point marked 35 ft., follow this line over to the right until it crosses the shadow line of 25°, as seen in column AB, and from this point trace down to the bottom of the diagram to line EF, at which point we find that the termination of the shadow of the tree or building, with the sun at the altitude mentioned, is just 75 ft. away from such object. In other words, the end of the shadow falling upon the ground from this object will be just 75 ft. distant. If it is desired to find out the length of the shadow with the sun at an altitude of 40°, follow out the same line of 35 ft. high until it crosses the 40° shadow line, and tracing down to the bottom of diagram to column EF, we find that the length of the shadow with the sun at this altitude would be 42 ft. Diagram 22 may also be used to find the height of an object, if the altitude of the sun is known. This is done by measuring out the distance from the building or tree to the end of the shadow, and finding this distance along the line EF tracing upwards until the line indicating the altitude of the sun is reached, then tracing out to the left to column DE where the height of the obstruction will be found. For instance, assuming that a building or other obstruction casts a shadow 30 ft. long when the sun is at an altitude of 40°, finding in the bottom column, EF, the figures 30 ft., and tracing up this line until it crosses the 40° altitude line, then tracing to the left to column DE, we find that the height of the obstruction is about 25 ft.

If it is desired to know the length of the shadow from this obstruction when the sun is at an altitude of 25°, note where this 25 ft. high line crosses the 25° shadow line, and tracing down from that point we find that the

shadow would be just about 53 ft. 6 in. long with the sun at this altitude. As before stated, this diagram can be made to find any altitude or distance by changing the values of the squares to any figure desired.

We will next take up the consideration of the desirability of large or small houses.

GREENHOUSE CONSTRUCTION and HEATING
INQUIRY DEPARTMENT

In Mr. Payne's article No. 3 in the EXCHANGE of April 23, regarding shadeless ridge houses, I would like to see a section of such a greenhouse showing how far the ridge would have to be carried beyond the center of the house so that the shade line from the ridge strikes the inside of the north wall at the floor line on February 21, for a house having the ridge due east or west; also the method of finding such shade line for each month, or any time of the year in the latitude of Chicago, Ill.—G. F. C., Oak Park, Ill.

The altitude of the sun in the latitude of Chicago on Feb. 21 would be about 41° or 42°, and at this altitude it would not be necessary to construct anything but an even span house to avoid the shadow of the ridge. This is shown by the section of a 30 ft. house here illustrated, having 5 ft. 9 in. eaves and the roof constructed on a pitch of 7 in. to the foot. The ridge would be 14 ft. 6 in. high, and, as will be seen by the dotted shadow line, the shadow of the ridge would come at a point slightly below the sill line, placed at 2 ft. 6 in. high. If the eaves of the house were made about 4 ft. high the shadow of the ridge would fall just at a point inside of the north wall at the floor line, but as this would be an impracticable height with a walk along the side it need not be considered.

Regarding the last part of your question, as to the shade line for any time during the year, this is too large a question to be answered within the space for the purpose, but if you will write to the U. S. Naval Observatory, Washington, D. C., that institution will furnish you with an American Nautical Almanac for each year, from which you can get the declination of the sun whereby you can figure the various altitudes.

In this issue we show a diagram that will give you the necessary information as to the length of the shadow when you know the sun's altitude.

BY EBER HOLMES

Selecting Stock for Planting

To the new beginner the question of what to plant is an important one, but one easily answered. Plant only approved and standard varieties at first, which you know will do well. You cannot afford at this time to take any chances, but later on you may branch out and try any of the novelties you may take a fancy to. Pick out a few kinds and invest in five or six of each variety, these will not take up much of your space and will be enough to show how they will act with you. It is likely that you may find some very good novelty in this way which will be of value to you, but until you get established confine yourself to the kinds you know that you can do well.

Raised Bench and Solid Bed Comparisons

This is the best time of the year for replanting and, although planting will not be finished for three months yet, the earlier it is done the better will be the result. When the general results for the year are summed up I fail to see much difference between plants grown on benches and those grown in solid beds. In the early part of the Winter I think that raised benches are preferable, but for late Spring and Summer flowers the beds

give us the best results. I rather think that the variety Richmond gives flowers with more substance when grown on the solid beds.

Care of the Young Plants

The young stock, previous to planting, will need the best of care. This is the time of the year when everything grows and multiplies more rapidly than at any other. The plants themselves will make a rapid growth if they get the proper care, and will need care in watering, tying, weeding, and should be kept clean and free from mildew, red spider and other pests. The weeds will grow fast now if they get a chance, and as this is such a very busy time it pays to put on extra help and get everything done right at the proper time rather than neglect these important things. Weeds should never be allowed to grow in the pots with the young plants; not alone is the plant damaged, but two hours' work at the proper time is worth a day after things gets in bad shape. Cut the flowers off the young plants as they open, leaving as much good foliage as possible on the plant. Sometimes the bud alone may be cut off, but, generally speaking, the first small leaf may be cut off with the flower, which leaves a good eye from which the next break will be made. It is wise to let the buds show color before taking them off, for then any mixing of the stock may be avoided. This applies to such kinds as pink and white Killarneys, and others where the foliage is identical.

Care of the Loam Pile

If the loam intended for use in planting is in a pile, it would be well to make the same as long and narrow as possible, to give every chance for the sun and air to get at it; and also to turn it over several times on dry sunny days, spreading it out if wet; but if it is about the right condition as to moisture, a pile ridged up to the center will keep off a good deal of the rain and prevent it getting too wet. The weeds should never be allowed to grow on the loam pile.

Early Planting in Benches Desirable

It is not likely that much planting will be attempted by the general run of growers until after the rush of Memorial Day is over, but the first two weeks in June are often even busier, as far as the rush of work is concerned, than are the ones just preceding the holiday, if such a thing as this is possible.

Therefore, if room is available, planting before June 1 is a decided gain in every way. Not only will the plants be better able to take care of themselves in the benches than in the small pots, but they will have the advantage of getting well established in the best time of the year.

Planting

If the soil is light and gravelly, and not wet when put in the houses, it may be trodden down with advan-

tage, and then leveled off with the rake before the plants are put in. If the opposite is the case I would not tread it. Ordinary helpers may be set to carry the plants around, and to dig out the holes, leaving the more experienced men to do the planting. A round stick should be used to tamp down the soil and firm it carefully around each plant. These sticks may be easily obtained from old broom and shovel handles. Leave a small hole around each plant for the greater ease of watering.

Whenever the planting is done it is best to get all the help possible and push it through as quickly as possible, a few days' difference in finishing the job will pay for a few extra men during the operation.

Treatment of Young Stock After Planting

Give a good soaking to each plant to settle the dirt thoroughly around it, but do not wet the whole bench for several weeks, excepting to damp down the top soil. Syringe the young stock, after planting, every fine day, and damp down several times daily in very hot weather. Scratch over the top of the beds once a week to keep down the weeds and to sweeten the soil.

A Use for the Old Plants

The man with a retail place who is replanting would do well to plant outside some of his old plants of such varieties as Killarney and other Hybrid Teas. These make a splendid show outdoors in the late Summer if given good ground and kept free from weeds.

Helping the Memorial Day Crop

As the greatest holiday of the year, from the point of quantity of flowers used, is approaching, the flowering plants must not on any account be neglected. Feed liberally and water freely. Dishudding will have to be done every other day. Syringe freely on fine days and damp down every day. Keep the plants tied up, out of the walks. Air will be left on the houses every night now, but fire heat is also needed and a little sulphur should be kept painted on the pipes to keep out mildew, as long as the fire heat is available. There is no excuse for mildew as long as the firing lasts.

Mulching Old Plants for Summer Run

Start in with clean houses whenever you drop firing, whether this happens in May or July. Plants which you expect to run through the Summer, or even for the next two months only, may need another mulching of cow manure at this time, if the first was applied about March 1. Two cords of good cow manure for 5000 sq. ft. of bench surface will not be too much. Common wooden or zinc pails make the best things to carry this in; five or six men will cover the ground very quickly. Level down the manure, give a good watering and then cover over with a sprinkling of loam. Leave as much air as possible on the house the first few nights, to prevent burning the foliage, if the manure is fresh.

Diagram showing shadow line with the sun's altitude at from 10° to 80°. Column D—E shows height of object casting shadow. Column E—F shows required distance away to avoid shadow.

three weeks and will be valuable to all persons in New York State and all members of the American Peony Society. This is a type of field work in which all florists are interested.

Cornell's Work for the Sweet Pea
